A large and appreciative audience attended the variety concert in St. George's Hall, Kensington on Tuesday evening. The program, which was under the capable direction of Mrs. Roy Silliphant, was excellent and each number received a well-merited encore.

Mr. H. T. Holman, president of the Hospital acted as chairman and gave a short address on the work undertaken by the doctors and nursing staff of the Institution.

He proposed that a Ladies Aid be organized in Kensington to assist the present Ladies Aid of the Hospital, which has always done such splendid work.

During the sale of candy Mrs. Roy Silliphant and Mr. J. Callaghan played piano selections.

Worthy of special mention was the violin solo by little June Church which was charmingly rendered. A duet "Where Were We" by Miss Mary Silliphant and Master Everett McLellan was also very charmingly performed. Mrs. R. Morrison gave an excellent exhibition of tap dancing. FOREWORD

I HAVE been asked to write a foreword to this booklet — this I willingly do because I have been instrumental in having this shoe manufactured.

Many years ago I learned from my practice that certain details in footwear were essential to the good health of the feet—particularly those that required treatment—and I have always believed that many ailments of the body arise from unhealthy feet, poor circulation and weak arches, and that many of these ailments would not have occurred if feet were correctly shod and shoes properly fitted.

At one time, to obtain the desired results, I prescribed certain changes to be made by shoe-repair shops in the shoes worn by my patients, always believing that in some way a shoe could be completely manufactured embodying features that would obtain better results. Eventually I met a shoe manufacturer willing to undertake the task and assume the necessary expense. The first shoes indicated that many changes and improvements were necessary. I know that time, work and intensive study were spent on many pairs of shoes, but eventually the present Lockwedge shoe was developed; some details, I believe, being patented by the manufacturer.

I was asked to give my endorsement to these shoes, but withheld this until at least ten thousand pairs were fitted or sold to my patients.

While I cannot expect that every pair of Lockwedge shoes will be successful in their purpose, I know that they have been helpful to many thousands of my patients and to many who have not attended my clinic. It is with the thought and hope that the Lockwedge shoe will be a benefit to many that I now give my endorsement, not only to the shoe, but to its wider distribution. I am, of course, not a shoe manufacturer, nor have I any stock or shares of any kind in any Company manufacturing this special shoe.

Williamsburg, Ontario,
September, 1932.
M. W. Locke.
