**Artificial Teeth on Metal Plate**

A dentist who knows his business, and one that has any regard  
 for his patients will always advise them to have a metal plate  
**PROF. MELVILLE B. BUCKLEY,**  
 Instructor Boston Dental College, Boston Mass.  
 In view of the vast amount of injury done to the mouths of wear-  
 ers of rubber or vulcanite plates, by the retention of undue heat  
 owing to the non conductivity of rubber, and as aluminum is now  
 so cheaply produced and making as it does a rigid, light, clean,  
 unobjectional plate there seems no reason why any person should  
 wear a rubber or vulcanite plate. Not only this, but better results  
 in fit and adhesion are obtained in difficult cases, than in the use  
 of rubber.  
**L. P. HASKELL, D. D. S.**  
 Chicago Ill. Dental School

The above quotations are from hundreds by eminent dentists  
 whose close observation in many years experience in plate work has  
 learned them the many advantages of metal over rubber.  
 Many persons who are compelled to wear artificial teeth on a  
 plate find that the ordinary plate causes heating of the mouth, bad  
 taste, shrinkage of the gums, etc., finally causing the plate to get  
 loose, sometimes sore lips, sore mouths and sore throats, and caused  
 directly from the wearing of an ordinary plate.

**We recommend a Metal Plate either of Gold, Platinum, Aluminum.**  
 It is a conductor of heat and cold, it is non-irritating, and is thin-  
 ner, lighter, and stronger than any other plate.  
 We have testimonials from persons for whom we have made  
 metal plates—not one would wear an ordinary plate again. You  
 can have your impression taken, and a metal plate made same day  
 fully guaranteed because we make them ourselves, and know all  
 about the material used. Call and see specimens of our work.  
 Every piece of work done by us must give entire satisfaction to  
 the patient, else we will not allow it to leave our office.
