SUMMER SCHOOL.—The School's hosts on Saturday, the 26th inst., were Lieut. Governor and Mrs. McGregor. Right royally they entertained. The members of the School had the freedom of Government House and the spacious grounds attached thereto. An orchestra and a Victrola furnished music for the occasion. In response to the invitation of President McKenzie and the Faculty of Dalhousie College, the members of the School found their way to the classic halls of old Dalhousie on Monday afternoon the 28th inst. The Faculty and their wives proved to be charming hosts and hostesses. Many of the members were ex-students of the College, and renewed their acquaintance with the building and staff. The majority however were there for the first time and appreciated the opportunity to examine the building. Dainty refreshments were daintily served. The officers of the School for the ensuing year are: President, S.A. Starnitt, B.Sc., Boston, Mass.; Vice-President, B. McKittrick, A.B., Lunenburg, N.S.; W. R. Biggar, Sussex, N.B.; Inspector Crockett, York, P.E.I.; Secretary-Treasurer, J. D. Seaman, Charlottetown, P.E.I. MR. WEBBER.—Mr. H. Price Webber and his popular company, who are general favorites in this Province, are playing to full houses throughout Nova Scotia. Mr. Webber on writing a friend says he tried to get Exhibition week in Charlottetown but couldn't get the dates being already filled. No doubt Mr. Webber will come here later as he is always assured a full house.

APPRECIATION.—A correspondent at Hartsville writes: Being one of the many who pass through the Dock Road, Hartsville, I cannot refrain from giving a word of commendation to the present government for the much needed work along the steep embankment known as the McLenan Hill, in making it safe with cedar posts and rails, which goes to show that the officials of the present government are desirous of doing everything in their power for the safety of the public. Needless to say the work has been carried on under the supervision of the efficient Road Master Mr. A. B. McLeod.

TAKEN PRISONER.—Some clever detective work on the part of Policeman McNamee Tuesday night says St. John's Telegraph, landed Paul Wedge in jail on suspicion of stealing about \$30 from the house of Henry Anthony at Red Head. A telephone message at central station saying that Wedge, who has been working on the Anthony farm, had left and somewhere in the vicinity of \$30 was missing. Policeman McNamee was put on the case, and first turned his attention to the railway depot. He had a description of the man, and was in the station when the Boston train arrived, when he saw a man who answered the description apparently coming off the Boston train and making his way towards the Halifax train which was to leave in a few minutes. He followed the suspect and when he saw that his boots were covered with dust, he thought that he was not very far astray in suspicion and placed the man under arrest. The prisoner at first stoutly denied that his name was Wedge, but said it was Scott, and claimed that he had come here from Halifax two days ago. On the way to the station however, the policeman says he admitted his guilt. The prisoner gives his age as twenty-three, and says that he is native of Prince Edward Island, and that he has been employed with Mr. Anthony for the last years. The police found \$29.15 on the man's person, besides a ticket to Moncton.

HORSE SHOW AT LONG BRANCH. LONG BRANCH, N. J., July 30.—The annual horse show of the Monmouth County Horse Show association opened at Hollywood Park today and will continue until the end of the week. The event is one of the social attractions of the summer season, and has attracted a large number of well known people. The saddle, harness, hunter and jumper and other classes are well filled, and in addition to the regular show there will be a series of running races, which have attracted an unusual amount of attention.

LAMMAS DAY. One of the quaintest and most interesting of old English festivals is Lammas Day, the festival of the wheat harvest, which will be observed today in the remote rural sections of England and Scotland. In the church, it is the festival of St. Peter's miraculous deliverance from prison. In England it is a half-quarter day, and in Scotland a quarter day, when rents are paid and other interests affecting property are attended to. This triple observance has somewhat obscured the origin and meaning of the festival. Some hold that the name of Lammas Day was derived from the old ceremony which marked the delivery of live lambs to the landlords by their tenants on that day. Another custom, still observed in a few places, was the lamb chase by the maidens of the community. With their hands tied behind their backs, the girls pursued a lamb, and the one to first seize and hold the animal with her teeth was declared the "lady of the lamb." This chase always afforded great amusement to the spectators. When the lamb was caught it was killed and

carried on a pole at the head of a procession of the villagers, after which the animal became the piece de resistance of a banquet. At Eton the students celebrated the day by chasing a ram, which, when captured, was killed and eaten. The college butcher had to provide the animal, and he always searched the country to find one that was vicious and able to put up a good fight. The real origin of the word Lammas, however, was the Saxon blammesse, or loaf mass, because formerly on that day bread made of the new crop of wheat was offered. It was, and still is in some sections, the custom to give thanks for the harvest on this day.

Ruberoid Roofing

Stands Extremes of Heat and Cold RUBEROID is used on houses and barns at points 1,000 miles north of Edmonton, Alberta—and the extreme cold has no effect on it. RUBEROID is used on buildings in the West Indies, South America and the Orient,—where the thermometer registers from 90 to 100 degrees for months—and the extreme heat has no effect on it. Could you ask for a more satisfactory roofing for your house and barn?

Ruberoid Contains No Rubber, Tar, Nor Asbestos

It is not an Asphalt Roofing. Ruberoid is fire resisting. Hot coals thrown on a Ruberoid roof will not set fire to the roofing or the sheathing underneath. Ruberoid is a non-conductor of heat. In winter it keeps the heat in, and in summer it keeps the heat out. It is false economy to put your money into a cheap roofing that has to be done over with coating, etc., every other year. This means extra expense. Ruberoid roofing never requires a single cent's worth of Coating, graveling, or other protection; therefore, it costs less per year of service than any other roofing made. Each Roll contains 108 sq. feet and is supplied with tins and cutting. Price per sq. 1 ply \$2.50, 2 ply \$3.25, 3 ply \$4.00. Dominion 2 Ply roofing, the next best on the market to Ruberoid, and is a splendid imitation. Price per square, complete \$2.00. We would be pleased to send you samples and circulars. Call, write or phone us.
