Imam Of Yemen Reported Dead

(C. P. Havas)
(By Guardian's Special Wire)
PORT SAID, May 3.—The Imam of Yemen was reported dead today as troubles flared anew in the desert war between the Yemenites and King Ibn Saud of the Hedjaz. H. M. S. Penzance was reported to be standing by at Hodeida to protect British subjects and other Europeans.

Vague reports from the interior said that the Imam was dead, and that his eldest son, Emir El Hadi Mohamed Seif Al Islam, commander of the Yemenite forces, had fled from Sana.

(A Havas despatch from Bombay, quoting private advices received there from Djeddah in the Hedjaz, confirmed reports that the Imam of Yemen had been killed).

The Imam had 12 sons. His territories covered 75,000 square miles inhabited by a population of from 2,000,000 to 3,000,000 Bedouins.

King Ibn Saud rejected the Imam's peace offer, following which the flight of the Yemenite forces began. The Yemenite arsenal and customs house at Hodeida was said to have been looted while the commander fled with 200 refugees to Kamaran Island.

Reports received in Cairo stated that hostilities were resumed on the whole front. The Yemen territory in which the fight is being waged is essentially desert, oases and mountains inhabited by Nomadic Bedouin tribes, leading a pastoral life.

Sana from which the Imam's son was said to have fled is a walled city with eight gates, and a population of from 20,000 to 25,000.

King Ibn Saud has placed his kingdom in a dominant position among the Arabian States. On Jan. 8, 1926, he was proclaimed king in Mecca, as king of the Hedjaz, and in Owu changed his title of sultan of Nejd and its dependencies, to that of king. The kingdom was renamed Sept. 22, 1932 to "the kingdom of Saudi Arabia."

To Serve Well Is Their Motto

(By The Canadian Press)
TORONTO, May 2.—With efficiency in the volunteer services of its army of young women members as the prime objective, the Association of Junior Leagues of America will hold a conference here May 28 to June 1. This is the 14th annual meeting of the organization and the first to be held in Canada.

Representative of the Dominion from coast to coast, the Junior Leagues of several Canadian cities will send their delegates. There are six full fledged Junior Leagues in Canada with others in the embryonic stage. Membership in the local organizations is progressive. Young women must serve a probationary year before being admitted to full membership. Candidates must first show appreciation of the ideals of the League to foster and maintain interest in the social, economic, educational, cultural and civic conditions of the communities in which they live and seek to improve these conditions.

Discussions and exhibitions at the convention will include a wide variety of women interest along the lines of the League's general objects.

Hon. David C. Adie, commissioner of Social Welfare, State of New York, will be the principal speaker at the social welfare conference. Mrs. Chas. A. Lindley of New York, will conduct an open forum on the Junior League magazine. Children's theatre, business enterprise arts and cultural projects are also on the agenda.

Mrs. John G. Pratt of New Orleans, is the retiring President of the Association. Nominees for the office of President and Treasurer are respectively Mrs. Elizabeth Taylor of Little Rock, Ark., and Miss Helen W. Leovy of Pittsburgh. Miss Taylor is a former Regional Director of the southern states.

Mrs. F. Grenville Rolph is chairman of the Toronto committee in charge of the convention arrangements. Other members include Mrs. Brommer Green and Mrs. W. Gilmour, vice-chairman; Mrs. Douglas Higgins secretary; Mrs. C. A. Massey, Miss Elsie Johnston, Mrs. Stephen Greer, Mrs. Hugh Allward, Mrs. W. Lovring, Mrs. Arthur Miller, Mrs. Strachan Bonner, Mrs. Lawrence Grouse, Mrs. G. P. Scott and Mrs. Halden Meek.

DR. M. WEST SUGGESTS LIMITED VOCABULARIES

Chicago, May 3.—Dr. Michael West of the Ontario College of Education believes that 1,300 words are enough in any language.

Speaking before the annual convention of the Association of Modern Language teachers, whose members returned home to-day, West said that in almost any language a vocabulary of 1,300 words is sufficient to express any ordinary thought.

His idea is that high school, college and university professors try to teach their students too many words in teaching them a foreign language. Under this method he said, students frequently "obtain neither reading nor speaking ability."

Under the method he proposed only the 1,300 most common words of a language would be taught during the first three years' study of it. At the end of that time, he believes, the student could both read and write enough to get along in the country to which the language he studied is native.

THE AMOUNT OF CANADIAN HONEY EXPORTS HAS BEEN INCREASING STEADILY FROM 1,744,871 POUNDS IN 1929 TO 2,806,770 POUNDS IN 1933.

Of the total exported in 1929, 1,213,229 pounds went to the United Kingdom, while in 1933, 2,213,899 pounds were sent to that market, indicating a growing market for Canadian honey in Great Britain. The Agricultural Situation bulletin.

GREAT WALKER LEAVES TRAIL

LONDON, Eng., May 3.—Tommy Green, the greatest competitive distance walker of his day and the athletic idol of his home town, Selgrave, has said farewell to the road.

The 32-year-old Olympic champion is taking up a business appointment which will leave him no time for training.

Smiling Tommy never competed in a road race until he was 33 and then he proceeded to win more races and break more records than any other athlete in the world. He culminated his career by winning the 50,000 metres walk at the Los Angeles Olympic Games in 1932. In that race, over nearly 30 miles, most of the international field did not finish because of the intense heat.

Green won the famous 33-mile London-to-Brighton race four times and scored five successive successes in the Manchester Blackpool event. He never quite managed to win the Royal Walking Association's national 20-mile race, but he triumphed all its winners over other routes.

Green was the Belgrave Harrier in competition, but Green worked out in Toronto on his way to the Los Angeles Olympics. His chief rival at that time was thought to be Hank Cleman, Toronto star, but the heat forced Cleman to withdraw during the Olympic race.

COLLEGE REQUESTED TO POSTPONE ACTION IN KING GORDON ISSUE

TORONTO, May 3.—The executive of the General Council of the United Church of Canada last night decided to ask the board of governors of the Montreal Theological College to postpone until the autumn its recent decision to discontinue the chair of Christian ethics now occupied by Professor King Gordon.

Meanwhile it was learned from Winnipeg that Professor Connor, of the Canadian novelist, Ralph Connor, is planning to lead a tour of Canadian clergymen through the Soviet Union during the summer.

COLONY FOR JEWS PLANNED IN ANGOLA

LONDON, May 3.—The Herald says it has learned that the Portuguese Government has approved in principle a long-discussed plan for a large-scale Jewish settlement in Angola, Portuguese Possession on the Congo in West Africa.

The paper said an American Jewish relief organization was prepared to contribute about \$10,000,000 toward the scheme.

Sponsors of the plan aim ultimately to establish an autonomous Jewish colony in Angola under the protection of the League of Nations. In Portugal, however, objects to the overlordship of the League, and negotiations are afoot to remove the objection.

SYSTEM OF POLYGAMY URGED TO BOOST BIRTH RATE

DUNDEE, Scotland, May 3.—The Scot of the future may have a harem in the view of one expert on the country's vital statistics.

Speaking Saturday before the Association of Registrars of Scotland, retiring-president W. H. Phillips declared the 1933 birthrate in Scotland was the lowest on record.

Mr. Phillips said that if in the future the population should by any chance be reduced by one-half, then, regrettable though it might appear to some, he believed "public opinion would countenance, and perhaps insist on some form of polygamy until the balance of population had been restored."

ONCE WAS BLIND SIGHT NOW KEEN

MENAFORD, ONT., MAY, 3.—Menaford's oldest man, now 91, thinks he has lived long because he worked hard. It was work he believes, that made him tough to survive a sun-stroke that blinded him for a year.

James Milligan, the town's patriarch who used to be a fisherman, is strong and lively. He reads without glasses and is a noted checker player in this section of the country. He was born in County Fermanagh, Ireland, a land almost as famous as Turkey for the longevity of its emigrants.

The sailing vessel that brought Milligan and his parents to Canada took 42 days to make the crossing. The old man has been interested in ships since his boyhood. He came here when he was 25 and can tell tales of the sinking of the "Jane Miller" and the "Asia" when many lives were lost and the founder

DUKE OF GLOUCESTER TO VISIT ANTIPODES

LONDON, May 3.—The Government today announced King George's decision that the Duke of Gloucester, His Majesty's third son will visit New Zealand and Australia next autumn instead of Prince George who has just returned from a tour of South Africa.

The King, it was said, reached his decision in view of the heavy strain under which Prince George had been placed during his whirlwind African tour, and considered it would be unwise for him to undertake a second important tour calling for a six months' absence from England.

His Majesty's announcement came after he had consulted the Governors-General of New Zealand and Australia. The Duke of Gloucester, who previously has had no opportunity of visiting the Dominion will represent the King at the centenary celebration of the State of Victoria, Australia. He will carry out the programme which was arranged for Prince George.

TURK WHO CLAIMS TO BE 157 YEARS OF AGE

ISTANBUL, Turkey, May 3.—Zaro Agha slipped home quietly tonight from the German hospital here, shrinking from publicity and efforts to get him to undergo a special test to see how old he is.

The Turk, who claims to be 157 years old or more, was in good health again after a week in the hospital where the doctors said his remarkably pure Aryan stock threw off a pneumonia threat easily, with a minimum of arteriosclerosis.

His blood pressure was normal, they said. He spent most of the time at the hospital, but hoped soon to return to his job as doorman at a government building.

Dr. Serge Voronoff, world famous for his gland operations, has been seeking Zaro Agha in an effort to let him conduct an experiment on him which the surgeon declares will set the Turk's age accurately to the year.

"What do I need with doctors?" Zaro grinned. "I'm all right now. I don't need any tests."

ONCE DEAD DOG HAS FEEBLE MIND

BERKELEY, Cal., May 3.—Still physically alive thirteen days after being asphyxiated in a laboratory at the University of California here a dog continued to gain strength today, and Dr. Robert E. Cornish, who is conducting the experiment in an effort to restore the dead to life, spoke encouragingly of the results so far.

The animal eats almost like a normal dog, growing and snapping at bits of liver, but Dr. Cornish said it had not regained complete consciousness.

The most important thing, Dr. Cornish said, was whether the animal's brain cells, damaged by death would be restored completely. He believes part of the cells have recovered their functions, but the higher part of the brain apparently has not healed.

"Of course, it is difficult to say whether his brain will function normally again," Dr. Cornish stated. "He might recover and have the brain of a puppy. The dog's right leg, which at first seemed to be paralyzed from the injury to the animal's brain at death, has limbered up. He is able to raise himself on his forelegs, but hasn't been able to get his hind legs erect."

MOUNT STEWART SCHOOL HONOR ROLL FOR APRIL

Senior:
Grade X—1, Ida Clark; 2, Eleanor Douglas; 3, Helen MacDonald.
Grade IX—1, Gilbert Timmins; 2, Elsie Kneebone; 3, Florence Martin.
Grade VIII—1, Cecil MacLeod; 2, Stella Affleck; 3, Lona Jay.
Grade VII—1, Lois Bryenton; 2, Roy Clark; 3, Edna Glover.
Highest average—Lois Bryenton, 85.4.

Intermediate:
Grade VI—1, Freddie Coffin; 2, Franklin Jay; 3, Harry Timmins and Sheldon Coffin (equal).
Grade V—1, Victor MacDonald; 2, Gerald MacLeod; 3, Oswald MacLeod.
Grade IV—1, Brighton MacDougall; 2, Ora Rose; 3, Cyrene MacIntyre.

Primary:
Grade III—1, Phyllis Affleck; 2, June Jay; 3, Ruby Martin.
Grade II—1, Jean Affleck; 2, Lona Jay; 3, Ruth Pigott.
Grade I (Sr.)—1, Everett Mitchell;

DOG TROTS BACK TO OWNER EXHAUSTED BUT HAPPY

WYE, ONT., May 3.—Percy Ross, a trapper here, has a three-year-old husky dog named Beaver to look after despite his efforts to get rid of the animal. Ross shipped the dog by rail to the Naughton Indian Reserve, but the animal returned within 24 hours, making a 50-mile trip through swamps and creeks, many of which he had to swim. He trotted up to Ross, dripping wet, but intensely happy.

TUNE IN FRED WARING and HIS PENNSYLVANIANS. Glorious music. Famous guest stars. Every Sunday and Thursday night at 9:30 (E.D.S.T.). Columbia Broadcasting System.

Simple Rules Prevent HEADACHES

The best way—in fact the only safe, suitable way—to avoid headaches is to live a normal life. Live a moderate life. Eat moderately. Sleep sufficiently. Get lots of fresh air, exercise and recreation. Avoid worry. And, once or twice each week, enjoy a refreshing, pleasant-tasting glass of Andrew's Green Salt.

This last rule is extremely important: Even with the most careful living and the most regular physical habits you may still suffer from the effects of incomplete elimination of body wastes. Thousands of people suffer from this cause without suspecting it. Andrew's Green Salt completely helps your eliminative system to new energy—helps you fit—and corrects the conditions which cause headaches, indigestion, neuralgia, body weakness, and the "blue" tinge.

Begin following these simple rules for health: Take Andrew's once or twice each week. Then you will enjoy a new and better life. The pleasure of vigorous good health.

All drug stores and Andrew's Green Salt, 100 St. John St., New York, N.Y. Sole Agents: John A. Hanson Co., Toronto.

GERMANY REFUSES TO LET JEWISH LAD MARRY CHRISTIAN

FRANKFORT, Germany, May 2. Court permission to marry today was denied a 19 year old Jewish youth, though his intended bride awaits the arrival of a child.

The Frankfurt Court held the rule against marriage of minors ought not to be violated in favor of the marriage of a non-Aryan with an Aryan.

No doubt remarked the Court, the law ought to facilitate the legitimizing of children, and certainly the mother would normally excite sympathy, but "she has forgotten her duty to her race and must be punished for lack of responsibility."

Cornish, who is conducting the experiment in an effort to restore the dead to life, spoke encouragingly of the results so far.

The animal eats almost like a normal dog, growing and snapping at bits of liver, but Dr. Cornish said it had not regained complete consciousness.

The most important thing, Dr. Cornish said, was whether the animal's brain cells, damaged by death would be restored completely. He believes part of the cells have recovered their functions, but the higher part of the brain apparently has not healed.

ONCE DEAD DOG HAS FEEBLE MIND

BERKELEY, Cal., May 3.—Still physically alive thirteen days after being asphyxiated in a laboratory at the University of California here a dog continued to gain strength today, and Dr. Robert E. Cornish, who is conducting the experiment in an effort to restore the dead to life, spoke encouragingly of the results so far.
