New Edison Records for JANUARY

On Sale December 24th

REMEMBER that's the day before Christmas. Hear these forty new records, both Edison Standard and Amberol—select the ones you want and assure full enjoyment for your family on Christmas Day—and all the days that come after.

The new Amberols include a Victor Herbert record, "Mlle. Modiste," a Sousa number and Godard's famous "Berceuse de Jocelyn."

The Standard Records also include a Herbert number, a comic song sung by Bessie Wynn and Sousa's "Summer Girl."

Forty Records, including ballads, comic songs, monologues, dances, band and orchestra numbers. Not one you can afford to miss.

If you haven't an Edison Phonograph, get one and be ready to enjoy these new records on Christmas. Your dealer will demonstrate them.

Edison Phonographs	$16.50 to $162.50
Standard Records	.40
Amberol Records (twice as long)	.65
Grand Opera Records	.85 and $1.25

We desire good live dealers to sell Edison Phonographs in every town where we are not now well represented. Dealers having established stores should write us at once.

National Phonograph Company, 100 Lakeside Ave., Orange, N.J., U.S.A.

A large assortment of Edison Phonographs and records always on hand at the New Music Store, 177 Queen St.

A. E. Toombs

"IMPERIAL" Gasoline Motors.

21-2, — 4, — 8, -- 12, -- 16, H. P.

---in two cycle, three port design.---

These Motors are better designed, built and equipped than any other two cycle Motor offered for sale in Canada.

Fishermen and pleasure boat owners are requested to send for Catalogue and full particulars before placing orders elsewhers. All we ask is a fair comparison with other Motors, and we are satisfied we can make good our statements.

We are always ready and willing to assist and give and information in regard to the running of the Motors. And then again, the advantage there is in being able to secure any parts that may be required from time to time, right at home, instead of having to send abroad for them---which you would have to do, if you purchase a foreign make.

FERTILIZING OF CORN LAND.

Difference in Soils Makes It Impossible to Lay Down Fixed Rule.

No fixed rule can be laid down for fertilizing corn land because of the difference in the quality of the soils. I. S. Long, a Pennsylvania farmer, who has raised 193 bushels per acre, says he uses no commercial fertilizer, but a large amount of plant food is provided through other crops previously grown. Soil in his section requires lime in large quantities and corn is grown in rotation with clover every third year to supply nitrogen. Mr. Long turns under all vegetable matter possible in the fall, which is worked up into the soil the next spring.

On some Indiana lands phosphorus and tankage are used to good advantage, the mixture consisting of one part of phosphorus to two of tankage.

In the south fertilizer is applied through an attachment to the planter or with a wheat drill.

On heavy muck soils muriatic potash and phosphorus are used often at a cost of from $5 to $8 per acre.

In the corn-belt states, however, the principal fertilizer is stable manure, and on the corn soils of these states perhaps no better fertilizer could be applied.

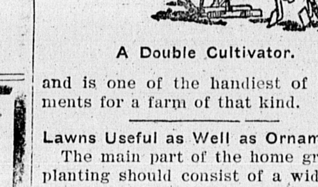
Of course the elements necessary to grow corn are nitrogen, potash and phosphorus, and some soils are often short in one of these elements, which must be supplied in some form or other. There are thousands of acres of swamp land in the corn-belt states which contain all the elements for plant growth except potash, and when this is applied good crops are obtained.

One of the cheapest and best ways of enriching the soil is to plow under leguminous plants, and many thousand acres of land in the older corn states that have been cropped to corn for 30 to 40 years in succession and whose vitality has been exhausted is now being restored and made to produce good crops by a simple method of rotation and plowing under leguminous crops.

A USEFUL TOOL IN FARMING.

An Almost Indispensable Implement That Is Used in Dry Farming.

The following cut shows a cultivator, commonly used in dry farming,



A Double Cultivator.

and is one of the handiest of implements for a farm of that kind.

Lawns Useful as Well as Ornamental.

The main part of the home grounds planting should consist of a wide and long grassy lawn, stretching out from the base of the dwelling in all directions and terminating at the extreme outer boundaries near the fence, if there be any fence. The less obstructed the lawn is the more expansive and refreshing it will appear. A single shrub or a group of shrubs or a flower bed in the middle of the lawn defeats the very idea for which the plants are intended. Cutting up the unity of the lawn with other planting destroys its integral beauty and apparently expansive extent and makes it inconvenient as a pleasure ground for games and similar amusements.

The grassy lawn in summer and at other seasons should be pleasing not only to look at, but to walk over and run over by both children and grown-up people.

OF INTEREST TO TOWN AND COUNTRY.

Holly, mistletoe and Xmas decorations. Last season many were disappointed, they came at the eleventh hour, like onto the virgins of old, seeking oil for their lamps, and behold there was none for them.

We have the holly, we have the green vines, and other holiday decorations, why not secure some now.

Holly per lb 40c; for 5 lbs 35c per lb, for 10 lbs 30c per lb no reduction on those prices.

The holiday season most everyone wants some celery, (or should want it) in many places in the country and small towns, celery is not procurable, and for such we are packing up nice ($1.00) one dollar boxes of celery shipped to any address desirable—(send cash please with order.)

There are also hundreds of rich farmers that have not the time or inclination to grow vegetables, indeed it would not pay them to do so—more money in pork, milk, produce and stock &c for them. To such we would say, just call at our daily market and see what a dollar will buy in the vegetable line. The health of your family demand it.

We have still left from our immense importations of onions about 2½ tons of the choicest stock. For the balance of this month they go at 10 lbs for 30c. Choice hand picked beans are high but 10 lbs go for 45c.

Tea—we handle only the famous Haszard's Brahmin tea if you have not received the genuine Haszards, (we have been fooled ourselves) You are sure of it here. In the vegetable department we have many lines including celery, beets, carrots, parsnips, onions, squash, pumpkins sprouts, potatoes, turnips and many others not mentioned. Our canned goods include peas, corn, tomatoes, salmon, table syrup, green beans, etc. Some of our own growth and picking of ripe tomatoes left at 85c per doz cans.

LAKE OF THE WOODS MILLING COMPANY KEEWATIN TRADEMARK REGISTERED

Good Wheat Thoroughly Cleaned — The Vital Essential

NO DOUBT, when purchasing flour, you have often wondered at this legend flaunted by all cheap flours–

"*Made from Selected Wheat.*"

Certainly, the wheat was "*selected*" else there would be no flour at all. But what *sort* and *condition* of wheat it telleth not

Maybe it doth not wish to *carry tales out of school.*

Relying on the average housewife's *limited* milling knowledge, taking full advantage of *her* disadvantages.

We are proud to label FIVE ROSES so that all may see—"*Manitoba Hard Wheat.*"

We are jealous of its reputation. We are convinced there is no better grain grown under the sun, *none as good.*

* * * *

After culling the cream of the crop, *twenty-one years' practice* has taught us how to take care of the good stuff.

Coming direct from the farmers' wagons, even before it is admitted to the elevators, the grain is rid of its grosser impurities.

Cockle, for instance, round seeds, sand, mud and earth balls, pieces of string, nails, and goodness knows what.

If this ever got into the flour!

* * * *

We are proud of our *immense capital* and *superior organization,* and duly thankful.

Many good millers would produce *better* flour with such equipment than is now possible for them to hope for.

These impurities if stored with the wheat for even a short time will contaminate the grain, just as one bad boy can vitiate a schoolroom.

The cleaning and separation must be done at the elevators, Madam.

No amount of subsequent cleaning or "doctoring" will *entirely* eliminate the influence of its early associates. You understand *that,* of course.

* * * *

Thus is the childhood of FIVE ROSES immaculate and irreproachable.

The pure Manitoba berries are *clean at the outset and kept clean,* and when they reach the Keewatin mills a further process is relied on to polish off any possible bad manners which might smuggle in on the way home.

There is never a speck, nor stain, nor smell to vex the soul of the fastidious housewife.

* * * *

We will not believe, Madam, that you are wholly indifferent to the welfare of your family folks, *to fleckless purity in your baking.*

We know you will *always* use FIVE ROSES.

Veterinary Dentist
J. M. NICHOLSON D. V. D
Gradute of the Detroit Veterinary Dental College,
202 Kent Street,
Charlottetown

The cause of numerous diseases, and disagreeable habits, heretofore ascribed as constitutional, have been traced directly to the teeth. Blindness, drooling, frothing, loss of flesh, weak eyes, driving on one rein and pulling are very often due to diseased and irregular teeth. Rough edges and sharp corners of the teeth lacerate the mouth, and produce nervousness and irritability; uneven and elongated molars and incisors prevent the proper mastication of the food, producing indigestion and general debility. Decayed molars cause necrosis of the bone abscesses, nasal gleet, etc. These causes should be removed. Decayed teeth should be removed by extracting or trephining, sharp corners and edges should be smoothed down, and elongated and uneven molars and incisors cut of. The common float or file heretofore deemed sufficient to accomplish this, will not suffice but special instruments devised for the purchase are necessary.
