O. K. SPRAYERS

The O. K. Canadian Sprayer is constructed entirely of steel, iron and brass. The tank is made of heavy galvanized steel with reinforced heads; is well riveted and soldered so that it is perfectly water-tight.

All connections are securely reinforced and there is no danger of any leaks. It has a capacity of 54 gallons and is fitted with two screens to filter the liquid.

A vertical agitator is used for keeping the liquid thoroughly mixed and it is impossible for the ingredients to settle while the machine is in motion. The driving power is developed from both main wheels and everything is perfectly balanced, thereby allowing all working parts to start instantly upon the movement of the machine.
