A Heavy Coat

TO CHANGE OFF WITH YOUR TOP COAT

Winter doesn't come all at once—there's a period of vacillating weather for a month or two.

Even if you won't need a big overcoat all the time now days will come when you will.

And it's pleasanter to make a selection while stocks are new, and be among the first out.

You won't want to "get by" with a last year's either. The difference in the style is too noticeable.

New Method of Reducing Fat

A new item from abroad informs us that the American method of producing a slim, trim figure is meeting with astonishing success. This system, which has made a wonderful impression over there, must be the Marmola Prescription. Tablet method of reducing fat. It is safe to say that we have nothing better for this purpose in this country. Anything that reduces the excess flesh steadily and easily without injury to the stomach, the causing of wrinkles, the help of exercising or dieting, or interference with one's meals is a mighty important and useful addition to civilization's necessities. Just such a catalogue of good results follow the use of these pleasant, harmless and economical little fat reducers. We say economical because Marmola Prescription Tablets (made in accordance with the famous Marmola Prescription) can be obtained of any druggist the world over or from the Marmola Company, 412 Woodward Ave., Detroit, Mich., for one dollar a case, which is a decidedly economical price, considering the number of tablets each case contains. They are harmless.

Two-Thirds Are Married

Notwithstanding the H. C. of L. nearly two-thirds of the population of the United States, from fifteen years up, is married. But notwithstanding all you read about the prevalence of the divorce evil, the census bureau says there are only about one-half million divorced per-

sons in the country. Capper's Week-ly says. Maybe they don't stay that long. Mississippi and Arkansas are the largest proportion of mar-ried men, 62.3, and Nevada the smallest, 45.9. It seems strange that

in the western states the propor-tion of married men is small and of married women is large. The ex-planation is the high ratio of men to women. Eastern girls should take Horace Greeley's advice,

Laying the Foundation

The large majority of business successes have had their inception in a savings account. Not only does a savings account aid in accumulating capital for a start, but it gives a young man confidence in himself because he knows that no matter what may happen, he has something in reserve. The Bank of Nova Scotia, one of the oldest institutions in Canada, invites you to open your savings account at any of its branches.
