THIS MOTHER AND DAUGHTER

Both Made Well by Lydia E. Pinkham's Vegetable Compound.

Steele, Ala.—'During the Change of Life I had hot flashes, was nervous, run down, and had sick headaches for two or three days at a time. I took Lydia E. Pinkham's Vegetable Compound and I feel much stronger and better in every way than I was. My daughter's health broke down last June from teaching school without rest, and she has taken Lydia E. Pinkham's Vegetable Compound and the Blood Medicine with good results. She is much better and teaching now and I give your medicine the praise. You are welcome to use this letter for the benefit of other suffering women.'—Mrs. F. A. GAINES, R. E. No. 1, Steele, Ala.

Women who suffer as Mrs. Gaines did should not hesitate to give this famous root and herb remedy, Lydia E. Pinkham's Vegetable Compound, a trial, as the evidence that is constantly being published proves beyond question that this grand old remedy has relieved many suffering among women.

For confidential advice write Lydia E. Pinkham Medicine Co., Lynn, Mass. The result of their forty years' experience is at your service.

ATTEND the big clearance auction sale at Benson Weatherbie's, Vernon River, on Wednesday, November 19th. 2334-11-12MWedThrusat51.

RUBBER GOODS. Our big shipment of rubber goods is going fast. Leave your order for one of our high grade hot water bottles today. Johnson and Johnson's. 2358-11-15M21

RABBIT PELTS IN DEMAND.—Since all the regular furs are bringing such high figures, it becomes more and more apparent that substitutes must to a great extent be used, and in this the manufacturers are certainly making good. Large quantities of rabbit skins are now being used, and from them imitations of almost every kind of fur is made. Of course, rabbit will not wear so well, but it does not look bad when made up, and as it can be sold at a comparatively low figure, it fills the bill. House-cats is another fur which has had a great demand and you see it everywhere made up to imitate skunk, mink, marten and many other furs. Well, so long as the people are satisfied and do not know the difference, the dealers do not worry much.—Black Fox Magazine.

'WELCOMING A THOUSAND BRIDES.—Mrs. Ensign Condie has consented to give a talk about the work of welcoming at St. John the returned soldiers, their brides and their little ones in the Salvation Army Hall, tonight at 8 o'clock. Ensign and Mrs. Condie were appointed to take charge of the Salvation Army Hospital at St. John over a year ago and in that capacity have waited upon every troopship that has arrived at St. John since the signing of the armistice. Hundreds of brides arrived with each vessel, many of them totally ignorant of Canada or how they were to get to their destinations. In one vessel, through the mistake of the authorities, four brides arrived without husbands and four bridegrooms without wives, the authorities having notified the wrong wives and the wrong husbands to take the vessel in question. How the Army straightens matters out makes an interesting story in itself, but in addition there were hundreds of cases where couples would have been stranded but for the timely aid accorded by the Salvation Army and kindred organizations at St. John. Mrs. Condie should have a large audience to hear her story tonight.

PERSONALS Mr. H. B. Stewart, City, left Saturday for Boston. Miss Ada Wadman, city, has gone to Boston on a visit. Mr. J. Jarvis, city, left Saturday for Providence, R. I. Mrs. Murphy, Weymouth Street, left Saturday for Boston. Her son Fred, left for Halifax.

The many friends of Mr. Henry Woodridge, City, will be glad to see him out again after his serious illness.

The many friends of Mr. Edmund Handran, Southshore, will regret to learn that he has entered the Charlottetown Hospital, where he underwent an operation for appendicitis. At latest reports he was progressing favorably.

TO FORTIFY AGAINST GRIP Take LAXATIVE BROMO QUININE Tablets which destroy germs, act as a Tonic and Laxative and thus prevent Colds, Grip and Influenza. There is only one "BROMO QUININE." E. W. GROVE'S signature on the box. 20c.

AMBER MONOPOLY CONE. Amber is Lithuanian. The Lithuanian shore of the Baltic Sea is the only district in the world where the collecting and digging of amber is a practical industry. Practically all the products of amber—the necklaces, cigarette and cigar holders, buckles, buttons, pipe stems and hat pins, which are seen every day in the shops of the world—are really Lithuanian in that they come from Lithuanian soil.

During modern years this industry has been closely guarded as a Prussian government monopoly. In the future, with Lithuania a republic, this industry can be greatly expanded with considerable profit despite the fact that amber is one of the few things in the world which has diminished in value during recent years.

Baltic amber is not only collected along the shore but it is mined from the so-called "blue earth" layers of the tertiary period well into the interior of Lithuania.

Excavations in Greece, Italy and Egypt have shown that Baltic amber was famous hundreds of years before the Christian era. Herodotus wrote of it and beads, which the ancient Lithuanians must have bartered, were discovered in the Grecian ruins of Mikens, dating back to 1500 B. C.

VIOLET RAY INSTITUTE COMING.—A branch of the Violet Ray Institute of electrical treatment will be opened in Charlottetown at an early date under the direction of Mrs. Geo. Walsh, the present representative at New Glasgow, N. S. 2334-11-15-m31

FOX RANCHING IN NEVADA.—The Black Fox Magazine, New York says:—'Advice at hand show that Nevada is becoming interested in fur farming, as in a late issue of a Reno, Nevada paper that was sent here, a long account appeared regarding silver fox ranching and states that a number of prominent people of that state are about to start a large ranch. They intend to bring the animals from the east, and are quite enthusiastic over their belief that Nevada has the greatest climate on earth for fox ranching. Some of our Island friends, however, are apt to take exception to this, especially when they say that Nevada has it over P. E. Island in not having any damp, rainy, wet weather or floods in the spring to kill off the young.'

Some Perform the Most Astonishing Acrobatic Feats. (New York Herald.) Mere man, under the spell of love, is commonly supposed to be not quite true of birds, for at the time of courtship they not only assume quite unwonted attitudes, but in not a few species perform the most astonishing acrobatic feats.

One of the most remarkable illustrations of this fact is furnished by that most interesting bird, the great bustard, which a generation or so ago was more common than now. Even in its sedate moments it is a handsome bird, the back being of a lively ochre, lined with black, while the neck and under parts are of a delicate rose color. The only ornament of the male is formed by a tuft of long feathers extending backwards on each side of the head. When in amorous mood these have a role of their own, and a by no means inconspicuous one. But the "display" as it is called, of the great Bustard is a very ceremonious affair.

The first stage in the proceedings is to inflate a most wonderful windbag, which runs down the front of his neck just under the skin. How this is done no man can say, but the necessary air is somehow drawn through a slit-like aperture opening just under the tongue. As the process of inflation proceeds the head is drawn down until it rests between the shoulders, the beak cushioned against the feather tufts are raised upward and thrown forward to stand like a pallisade at each side of the head.

While this is going on the tail is raised and drawn forward until it lies upon the back, where it is held down by the tips of the wing feathers. This brings into view a billowy mass of white feathers formed by the under tail coverts. As the gull feathers are brought into play to hold down the tail, the long barred "scapulars" and the pure white secondaries are in some mysterious way spread out into a sort of shield, covering each side of the body.

By the time these complex movements are completed a transformation has been effected which is almost indescribable. All likeness to the bird of a few minutes ago has vanished. What remains is a bewildering shimmer of feathers from which proceed a series of low guttural sounds like "oak-oak-oak" slowly uttered. As these sounds are uttered this feather-contortionist stands directly in front of his mate, evidently endeavoring to excite her admiration and her consent to his suit.

No other member of the bustard tribe has quite so remarkable a display. But the "Australian" bustard makes a good second. With this species the tail is also drawn over the back and the neck is inflated, but by a very different means, for it is the gullet and "crop" which are filled with air. At such times the "crop" forms a great pendulous bag, hanging down far below the line of the breast and swaying with the bird's every movement.

The head, however, instead of being drawn down to the back, is thrust high up into the air, the neck forming a sort of post to which, as it were, it is affixed. In this strange posture the bird struts about with a mincing gait before his commonly passive and apparently indifferent mate. At last, however, his pertinacity is rewarded.

Among birds windbags are by no means rare devices for captivating coy mates. In some species these aids to courtship are bare of feathers and brilliantly colored, as in the case of the strange frigate bird of the tropics. Herein the air vessel forms a great crimson pouch which, when fully inflated, rivals the rest of the body in size.

PRINCE EDWARD MATIGER 3.15. NIGHT 7 AND 8.45.

JESSE L. LASKEY Presents

BRYANT WASHBURN A VERY GOOD YOUNG MAN

He was too good to be true, she could't believe that any young man could have habits so saintly. Result: she would'nt take the solitaire so what do you think he did? went right to work like a regular fellow to make the family reputation a fit subject for the Laundry.

A Bright, Breezy Snappy Comedy.

Fourth Thrilling Chapter OF 'THE TERROR OF THE RANGE'

MUTT & JEFF Cartoon Comedy. Coming-Coming MARY PICKFORD In 'The Hoodlum'

Others View Point (Continued from page Four)

entered the partnership of nations, and has affixed her signature to the peace treaties. This means that the old idea of an Empire consisting of a Mother Country surrounded by daughter states, is entirely obsolete, and has long been left behind by the British Empire. Our Empire has taken a new and far grander form. It is now a single state composed of sister nations of different origins and different languages. The British nation is the largest of these nations, but the younger nations have grown up to be its equals, and Great Britain, like the Dominions, is only one part of the whole. Consequently I regard myself as belonging to Canada and the other British Dominions in exactly the same way as to Great Britain, and when I go to the United States on Monday I shall go there not only as an Englishman and a Britisher, but as a Canadian and a representative of the whole Empire.

PUNISHING A BABY ELEPHANT. In a recent exchange it is stated that elephants are amazingly like human beings in the way they discipline their young. The following amusing incident was seen by a traveller in an extensive lumber yard in Burma.

While the adult elephants were faithfully at work the youngsters played about the yard. The elephant that attracted the traveller's attention was hauling in her chain harness, a huge tree trunk from the bank of the river. She had a heavy load, a fact that her offspring did not realize. Bent on playing a prank, he wound his little trunk about one of the chain traces and pulled back with all his strength.

Conscious of the suddenly increased weight, the mother stopped and looked around. She saw the youngster and shook her head so sadly, but, paying no further heed to his teasing bent again to her work. Meanwhile the little rascal with his mischievous trunk had loosened the ring that fastened the traces to the load.

While the mother was straining to set her burden in motion again, her rascally son pulled with all his might against her, and pulled so steadily that she was quite unaware that she had been disconnected from her load. Then, suddenly, the youngster let go. Naturally enough, the mother was thrown to her knees and her driver hurled in a wide circle from her back. The culprit sought a huge woodpile that seemed to offer him at least a temporary protection. His mother, however, was soon in pursuit, and he had to flee. Round and round the woodpile he dodged, but his mother with her iron harness clanking noisily behind her, kept close at his heels.

Although the little one's greater agility gained some space for him at the corners, his mother eventually overtook him. The first blow of her trunk drew from him a bawl of pain. At the second he sank, quite humbled to his knees; and then he endured with out a murmur, although with many tears a sound thrashing. Finally the mother let him up. With tears still streaming and with drooping trunk he took his disconsolate way out of the yard.

The little fellow had won the complete sympathy of the observer. Consequently he was overjoyed to witness

during the moon hour a touching reconciliation. The mother did all she could to comfort the penitent, little sinner; she caressed him with her trunk, cuddled him up against her and looked at him as if to say "You still have a mother who loves you."

MIGHT BE IF SHE DID. A woman and her daughter were at sea during a terrific storm. After a silence of some time the mother asked, "Are you seasick, dear?" "No, I think not, mother," replied the girl, "but I'd hate to yawn."

CURIOS WAGERS. Curious wagers are less common today than they were in earlier days when men would undergo personal humiliations and discomforts to win a purse.

One of the strangest is that regarding Lord Digby, in 1870, when he walked five miles around Newmarket Heath in a certain time, barefooted and naked, while the King and his court watched him. Lord Digby lost the wager by a margin of half a minute.

In the eighteenth Century a Liverpool scientist bet a brother scientist that he could read a newspaper by the light of a farthing dip at a distance of 30 feet. The scientist performed the feat by creating the inside of a shallow wooden box with slitting pieces of looking glass. The idea led to the modern reflected light system.

Another example of a curious wager was that of a Liverpool cotton broker who, on a bet, wore a pair of wooden shoes to the Cotton Exchange.

The limit in feature wages was possibly reached by a man in a small town who propelled a green pea with a toothpick for about 80 yards along the pavement within half an hour, the stipulated time, and won his wager.

Who Won the War Two colored men met at a peace celebration on the day following the signing of the armistice. It was in a Colorado town, and the state had gone Republican a few days before. "Well, what you all think of it now?" enquired one. "Sure to look good," the other replied. "President Wilson sure did stop them Hunns." "President Wilson nuthin'" retorted the first speaker. "Listen heah, you Democrat nigger! Didn't I tell you something swine happen if we Republicans got elected? We've only been in a few days, and look what we done."

Do not suffer another day with PILES, Bleeding, or Protruding. No surgical operation required. Dr. Chase's Ointment will relieve you at once and as certainly cure you. One box all dealers, or Edmondson, Bates & Co., Limited, Toronto. Sample size free if you mention this paper and enclose 25c stamp to pay postage.
