MARKET REVIEW FOR APRIL 9, 1931

CONSOLIDATED SMELTERS:

While the report of Consolidated Mining Company will not be issued for some time yet a reference of the directors(when the last dividend was declared) gives some idea of the actual condition of earnings in relation to dividends.

It was stated that the dividend and bonus payments of 1930 would be almost covered if regular ... preciation and depletion allowances were not made. In 1929 the total for the two was $2,675,417, and for 1928, $2,396,748. The average for the past five years has been $2,139,311. Taking an amount of say $2,500,000, this would represent about $5 a share on 510,048 shares outstanding, according to the latest report. The official statement declared that estimated net profits for 1930, together with $750,000 for West Kootenay Power and Light Co., which would be available for dividend distributions for the parent company, "did not fall far short of the amount required for the usual years dividends, bonus and taxes, but they did not provide anything towards depletion and depreciation." It may be assumed, therefore, that on the same basis of figuring ea... that is, after depreciation and depletion, as in previous years, the net available for 1930 would be about $7.00 a share against regular dividends of $2.50, and business of $10 a share.

The decision of the directors "to charge depletion and depreciation allowance to the contingent reserve," on the ground that it had been set up "to meet just such a condition as the present," will be generally accepted, however, so that the reference made in these Reviews a few days ago to the forthcoming statement as likely to just about show the dividends and bonus as earned, may be accepted as the probable result. It may be added, also, that the company is generally considered to have been very liberal for years past in its appropriations.

H. SIMON AND SONS:

During the month of March sales of H. Simon and Sons, Limited, whose shares are listed on the Montreal Stock Exchange, showed a very generous increase over the same month of last year, and that for the first quarter of 1931 the turnover has been nearly as good as in the corresponding period of 1930.

Results for January resulted in a good increase, but the February total was down due large... to the fact that in that month of last year the company undertook an important change in its preparation of goods for the trade through the adoption of a new type cellophane wrapper. As a result sales in that month expanded very rapidly through stocking up by dealers of goods presented on the new basis. Thus the comparison of February of this year with last year was naturally affected, but the showing can be regarded as purely temporary. The position of the company is now being helped substantially by the c... ...tising practice adopted over a year ago, and its products are proving popular in the retail markets.

The preferred stock is being steadily reduced and retirem... ...ow ahead of normal sinking fund redemption requirements. The company expects to have a progressive year during 1931.

MURRAY HARBOR NORTH

Our roads are now opened up for traffic in wheeled vehicles and we will all lay aside our sleighs for another summer.

The snow has disappeared from the fields, although some is evident along the centre of the road, where the water has cut serious holes and ruts in many places. These will receive the attention of roadmasters later on in the season.

Mr. William Irving, of Murray Harbor South was a visitor last Sabbath in our locality, as the open water permitted the voyage to be made in safety. He expects to secure some help for his farm and marine operators this summer.

Messrs. Jack and Stanley Clow returned to their home here last Saturday evening, after having spent the winter at the harbor of St. John, N. B. Both of them look exceedingly well, but report that a rather dull winter season was a result of so many vessels being directed to Halifax, N. S. The work of fishing will be next on their programme for the summer.

Mr. R. D. Millar, of Murray Harbor South visited his relatives in this district the early part of this week, coming over by boat as the ferry has not yet begun its trips, owing to the prevailing depth of ice in the neighborhood of the wharf at Clows and little business.

Mrs. W. W. McClure and Mrs. William Irving were visitors on Monday last at the home of Mr. and Mrs. D. Sencabaugh.

We regret to report the continued very serious illness of Mr. H. Sencabaugh, who expects he will yet have to submit to an operation later on.

CULTURED WOMEN OUTNUMBER MEN

NEW YORK, April 7—Dr. Charles Gray Shaw, author of a best seller on culture and for thirty years a professor at New York University, warns men that their women folk have outdistanced them culturally, Men have gone in for physical culture and business, he says, while what used to be the weaker sex has developed artistically and mentally as well as physically.

"If this goes on in another generation women will supplant men in creative culture. Today our men of culture are all women."

Dr. Shaw means women will soon be writing the best books and painting superior pictures while the man play squash and tend to business.

The state of affairs if a distinctly United States phenomenon, he believes, an outgrowth of women's freedom from household drudgery, large families and economic responsibilities —plus an aptitude for appreciation. The Professor observes that in United States colleges women take cultural courses and men elect vocational subjects, Men began turning away from cultural education a generation ago. Dr. Shaw says.

"Our one-time poets and sculptors are now designing skyscrapers and building bridges,' he laments.

Male students, he avers, are more starved for culture than their sisters on the campus, and many of them have to "bootleg"—the word is his—culture or bring it in from outside in the shape of books, pictures music with which they do not come in contact in their ordinary couse of their college life.

Acreage devoted to wheat in France is greater than last year.

Americans are the only foreigners who can drive an automobile in France without a French license.

Easter services, morning and evening in the Presbyterian Church here were fairly well attended, considering the present condition of health, weather and roads prevailing at present. A number of the Sabbath School pupils have qualified for certificates for learning Primary Catechism and Memory Passages of Scripture as prescribed by the General Assembly's Committee on Sabbath Schools.—C.

SWEET PEAS

Are among our most beautiful Flowers. Easy to grow and will bloom until late in the fall.

Carter's Seed Catalogue

Pages 32 and 33 will tell you what to plant.

CARTER'S "NEW SPECIAL" improved Mixed Sweet Peas a good mixture.

English Spencers

A choice brand of English re-selected Spencers of recent introduction. Extra large bloom.

American Spencers

Choice large blooms containing "Eckford" Novelties of 1930.

SPRUCE AND BALSAM CONES

The cones of the spruce hang down from the branches; those of the balsam fir (or "balsam') stand upright. The species are thus easily distinguished when the trees are bearing cones states the Dominion Forest Service of the Department of the Interior. The two species mentioned are the ones chiefly used in the manufacture of wood-pulp.

Minard's Liniment for burns.

Morning Stock Letter

Wall Street Mirror Says:-

Special to Johnston & Ward

BY THEIR OWN PRIVATE WIRE

NEW YORK, April 9—Weakness in the rails and certain industrials unsettled the general list at times but support was encountered and prices generally were inclined to move upward.

Including yesterday, there have been three days of recovery out of the last 15 when the general trend has been downward. These minor rallies have prevented the market from becoming definitely oversold with the resulting sharp automatical rally. The market seems to be less susceptible to bad news at this level which is just about the resistance point established in early and late January in the Dow Jones industrials averages. No more than a brief rally probably should be expected until the first quarter reports are out but it is still a possibility worth watching for.

Looking further ahead, steel operations cannot recede much from the seasonal peak in March or second quarter earnings for the steel companies at least also will be disappointing. There is still the possibility, however, that the seasonal peak in steel operations will occur later this year than usual as it did in 1922 when the peak occurred in May.

WALL STREET MIRROR SAYS

The technical rally which made its appearance in the Wednesday session should become more pronounced today with higher prices all around. There can be no doubt of the fact that the market has run into a period where it is oversold. Many issues which are usually freely loaned now command a premium. Furthermore, the length of the decline without any rally of more than a few hours duration certainly calls for a sharp rebound. ... how far this technical rally can proceed is anybody's guess but we would suggest that those who are taking a long pull position on the idea that a sharp rebound is overdue should be content with small profits.

HALL OF FAME FOR WOMEN IS NAMED BY JURY

NEW YORK, April 9—A mythical hall of fame—for the female sex only—was created recently when a jury of five men selected "America's twelve greatest living women." They were chosen from among 2,786 women nominated by readers of a women's magazine in a survey lasting 4 months.

The final selections included Grace Coolidge, chosen because she "shares with Dolly Madison a reputation for exceptional graciousness amiability and distinction as hostess of the white house." The judges also pointed out that she writes poetry and was responsible for a million-dollar endowment for a school for deaf mute children.

Others honored were Grace Abbott, chief of the Federal Children's Bureau; Jane Addams, pioneer in social welfare work; Cecilia Beaux, artist; Martha Berry, one of the first to provide education for southern mountain children; Willa Cather, novelist; Carrie Chapman Catt, women's suffrage leader and anti-war worker; Minnie Maddern Fiske, actress, Helen Keller, Blind and deaf woman who furthered education for the blind, Florence Rena Sabin, scientist, Ernestine Schumann-Heink, singer, and Mary E. Woolley, president of Mount Holyoke College for 30 years.

The jury was composed of Newton D. Baker, Dr. Henry Van Dyke, Booth Tarkington, Otto Kahn and Bruce Barton.

RADIO CHAIR WARMERS IS CLUB OF INVALIDS

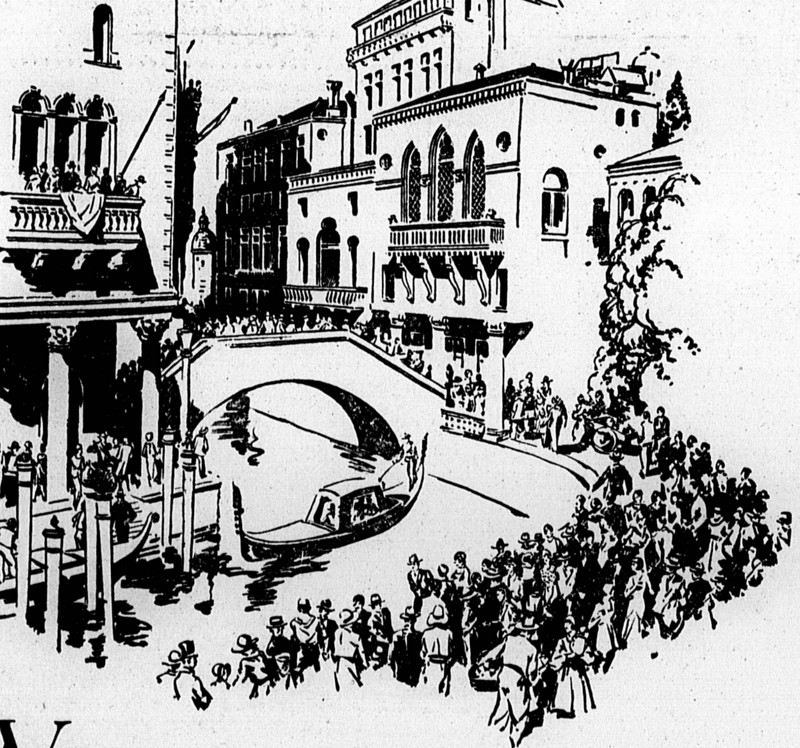
LIMA, O., April 9.—James Lisk, 35, an invalid and an amateur wireless operator, is president of a most unique organization. Its title is "The Chair Warmers' Club," a world-wide association of short-wave operators all of whom are invalids.

Every day the 50 or more members exchange greetings over the air. As president, Lisk is a claimant of the world's record for amateur long-distance wireless communication, he claims to have been in communication with every part of the world except Asia. He established connections with the Byrd Antarctic expedition several times.

BODY IS SENT TO P.E.I. FOR BURIAL

QUINCY, Mass., April 7—The body of Mrs Christine Ann McLeod was sent to her birthplace in Belfast, P. E. I., today, following funeral services in Hall Chapel on Cottage avenue conducted by Rev. William Nichol, of the United Presbytrean Church, of which she was a member. Mrs McLeod, wha lived at 201 Harrison Street, Quincy Point, died in the Reynolds Hospital.

THE VAST MAJORITY DEMANDS GILLETTE



WORLD POPULARITY

proves its quality

IN THE seasoned judgment of more than a hundred million men—from Vancouver to Venice—Gillette is the world's foremost razor blade. This one fact—dramatic and convincing—is conclusive proof of its uniform high quality and sensational value.

Never content in spite of overwhelming leadership—Gillette engineers devote every effort to constant improvement of production method and finished product. Throughout 29 years of arduous research and strict adherence to the highest manufacturing ideals—Gillette has won recognition as the standard of perfection in the razor-blade industry.

You have a right to expect far better shaving results from Gillette. Your experience proves that the Gillette double-edge blade—giving double service—is smoother and keener. When you use this blade you enjoy unsurpassed shaving comfort day after day. Every stroke is remarkable for its amazing ease and coolness.

Selected as the world's foremost blade by international referendum—Gillette is first choice of the vast majority. For this reason most men in every nation and every walk of life demand Gillette when they need razor blades.
