The Clyde River Farmers' Institute held its regular monthly meeting in the Kingston Hall on Saturday evening, March 30th. After considerable routine business was gone through, the dog tax question was brought before the meeting and was fully discussed pro and con. One of the largest sheep raisers present said if farmers would only use precaution and attach a small bell to their sheep, as he has been doing for the last twenty years, they need not fear dogs, as he never had his sheep worried or killed, while his neighbors, with only the line fence between, had been both worried and killed. On motion to put a tax of one dollar on male dogs and three dollars on females, the motion was lost by 15 to 10, some refusing to vote. Nicholas Dolwill, John Stewart and Wm. Holmes then addressed the meeting on procuring good seeds, emphasizing the best that can be got as none too good. Daniel T. Fraser gave an instructive talk on lessons learned at the Seed Fair which was listened to attentively. The meeting then closed to meet again the last Saturday in April.

It is hard to believe that coffee will put a person in such a condition as it did a woman of Apple Creek, O. (Tea is just as harmful as coffee because it contains caffeine, the same drug found in coffee.) She tells her own story:

"I did not believe coffee caused any trouble, and frequently said I liked it so well I would not quit drinking it, even if it took my life, but I was a miserable sufferer from heart trouble and nervous prostration for four years.

"I was scarcely able to be around at all. Had no energy and did not care for anything. Was emaciated and had a constant pain around my heart until I thought I could not endure it. I felt as though I was liable to die any time.
