

It is the Little Things That Count

In the selection of the simpler remedies for the most common ills and ailments, a drugstore has perhaps its best opportunity to prove its policy and method of serving the public. It is the little things that count.

Because preparations for certain purposes are in common and constant demand, it is all the more reason why they should be carefully selected, even if the ailments they are to treat are considered lightly.

We have a preparation that we recommend to those who ask for a good physic. It is our LAXAT-VE FIG SYRUP; a pleasant and agreeable fruit laxative that induces prompt and painless action of the bowels and cures constipation, 25c bottle.

Chest Colds Wheezing Cured Over Night

You Can Break Up Cold, Feel Fine Next Morning, by Following the "Nerviline" Method.

Experience of a Trained Nurse

Every mother knows how difficult it is to get a young child to take a cough mixture. Seldom will one help unless given in large doses, and the result is to completely upset the stomach and make the child sick.

Speaking of the promptest cure for chest troubles and children's colds, Nurse Carrington says: "In all my experience in nursing I haven't met any preparation so dependable as Nerviline. It is the ideal liniment. Every drop you rub on is absorbed quickly, sinu through the pores to the congested muscles, eases, relieves, and cures quickly. Especially for chest colds, pain in the side, stiff neck, earache, toothache, I have found Nerviline invaluable. In treating the minor ills of children Nerviline should be in every home."

Hundreds of thousands of bottles of Nerviline used every year—prove that it is the ideal liniment for the home. Refuse anything your dealer may offer instead of Nerviline. Large family size bottles, 50c, trial size, 25c. All dealers, or the Catarhozone Co., Buffalo, N.Y., and Kingston, Ont.

INVENTS PRACTICE TARGET

LONDON, Dec. 6—A lieutenant in the 19th Hussars has invented a new form of target as the Butt practice target, which it is said, will make the shooting of the British soldier more efficient in a much shorter time than is now taken, and will also effect a great saving in ammunition. The apparatus, which is designed for use in drill-hall or barrack-room, is a life-like representation of a rifle range, the targets being changeable and drawn to scale, so that by the use of dummy cartridges men can be practised in firing at exactly the same targets as on the actual range.

ADDRESS AND PRESENTATION

On Saturday evening, Nov. 30th, a large number of friends gathered at the home of Maurice Rose, St. Peter's Bay, on the eve of his departure and presented him with the following address and purse. Mr. Rose made a very feeling reply also taken completely by surprise.

We, your friends and neighbors, have learned with deep regret that you are about to leave us and take up your abode in a distant Province of this great Dominion.

We cannot allow you to depart from our midst without giving expression, however feeble, to the regret we feel at the severing of the bonds of friendship and neighborliness that have knit us together all the years of our association.

While we feel the keenest regret at losing you from our community we wish to place on record our desire for your future welfare. It is in the hope we have assembled here this evening and all the advantage of this oppor-
