Discuss Improvements To Summerside Wharf

Reporting for the Marine Committee of the Summerside Board of Trade, Mr. John E. Campbell brought to the attention of the Board last night the fact that during the past season the shipment of potatoes from Summerside has been very heavy, heavier than was ever dreamed of in the past. Mr. Campbell pointed out that during the war years no ships were available and this economic means of transporting Island potatoes was out of the question entirely. Now, however, ships are available and in view of the fact that the quota of potatoes permitted to be imported to the United States had been doubled it promises to provide a great market for Prince Edward Island potatoes. Mr. Campbell reminded the Board that the Marine Wharf had not been constructed to accommodate this enormous volume of shipping and was not adequate to accommodate the heavy truckloads now transported by the farmers for shipment. These conditions being recognized by the prominent shippers of the locality, a convention of these shippers was held on Wednesday, Dec. 3rd, and the following report of this conference was made by Mr. Campbell at last night's meeting:

"Report of a conference of shippers and others held at Summerside Railway Wharf on Wednesday, December 3rd, 1947. Present were Mr. Silas MacFarlane of Simmons and MacFarlane, Lorne Driscoll, Lorne MacFarlane of MacFarlane Produce Company, Senator B. W. Robinson, J. Watson MacNaught, M.P., and J. E. Campbell, wharfinger.

"Considering the fact that upwards of 800,000 bushels of potatoes were assembled and shipped over this pier during the past season and accommodation is far from adequate or satisfactory it was deemed advisable that a survey be made by those directly interested. After looking the situation over it was decided to recommend the following improvements: First, that the west wall of east shed be extended west about twenty (20) feet, full length of shed, and that this shed be made frost proof and an improved heating system be installed; secondly, that the west shed be jacked up on east side and new crib work placed all along this side; thirdly, that the joist in the deck of wharf be renewed at south end of sheds and south end of west shed, also in east and west driveways above light house and that improvements be performed during the coming summer in time to accommodate fall shipping.

"In arriving at the foregoing recommendations the fact of removing the switch along the east shed was considered as it was no longer of use and therefore could be removed to accommodate extension of shed.

"I wish to present these recommendations to this meeting as a resolution and would therefore move their adoption and that copies be forwarded to the Minister of Public Works, Ottawa, J. Watson MacNaught, M.P., Ottawa, and H. E. Miller, district engineer, Department of Public Works, Charlottetown."

It was moved and seconded that the report be adopted as a resolution and that copies of same be prepared and forwarded to those mentioned. The president, Mr. W. M. Mellish, who presided at last night's meeting, advised that the Boards of Trade and Chamber of Commerce over Canada had been asked to make a survey as to whether oleomargarine should be sold in Canada. He stated that at a special meeting of the Council of this Board it had been decided that the report from Summerside Board regarding this question should be in the negative and a reply to this effect had been forwarded.

The president also advised that he had received a report from Mr. T.E. Hickey to the effect that the Band instruments had now been collected up and were stored in the upstairs of the civic building.

Elmsdale Man Seriously Injured In Highway Accident

The condition of Mr. Fred Johnston of Elmsdale, who is a patient in the Prince County Hospital as the result of a motor accident, was reported yesterday as good.

The accident occurred about five o'clock Tuesday evening as he was proceeding eastward from Kane's Hill in his Ford roadster, accompanied by his brother, Wesley, and another man, Roy Arsenault of St. Louis. A truck owned by Curran and Briggs Ltd. entered the highway from a lane and Mr. Johnson's car crashed into the wooden rails of a bridge. A flying sliver of wood from a rail crashed through the windshield striking Mr. Johnson directly on the mouth and buried itself in the back of his throat.

He was rushed to the Western Hospital at Alberton by the R. C. M.P. where he received first aid treatment, but it was not considered advisable there to withdraw the piece of wood for fear that he might bleed to death. He was then conveyed to the Prince County Hospital at Summerside. Here Dr A.R. Grant and Dr. J.C. Simpson attended the patient and extracted the object, which had penetrated the man's head to within a very short distance of his brain.

The roadster was only slightly damaged. S
