THURSDAY, JANUARY 8, 1920.

SACKVILLE-TORMENTINE LINK.

Conditions on the N. B. and P. E. Island railway, between Sackville and Tormentine, are steadily going from bad to worse. At present, with exceptionally heavy ice between the Capes the situation is becoming intolerable.

Were these delays caused by unavoidable natural causes, heavy ice or snowed up railways, no fault would be found but when caused, as has been the case all the fall and winter, by crippled engines unable to haul the trains, it is inexcusable.

THE FORWARD MOVEMENT

For the first time in its history the pulpit of St. Paul's Anglican Church, this city, was occupied last evening by a non-Anglican clergyman, the occasion being one of the inter-church week of prayer services.

The war has broken down many denominational barriers; men of all denominations and all creeds faced death together in the cause of human liberty and national and international righteousness; creeds and distinctions were forgotten in the face of the eternal realities, when only one creed mattered, namely duty to God and humanity.

This constitutes today the basic creed of all Christian denominations and many denominational differences in forms and ceremonies are disappearing.

The Inter-Church Forward Movement has adopted the slogan "The World for Christ" and these churches are uniting in spirit, if not wholly in form, for its consummation.

In this connection the following from the Halifax Chronicle of January 6 is apropos: "The first annual meeting of the Halifax Ministerial Association was held Monday morning in the Y. M. C. A."

The President, (His Grace Archbishop Worrell), in his address, outlined a very attractive programme for the coming year, which included a proposal to conduct a series of discussions on "Faith and Order," having in view a frank and friendly consideration of points of agreement, as well as differences between the bodies represented, and all with the thought and purpose of working out a platform for closer co-operation in a common cause.

EDITORIAL NOTE.

In opposition, that is, the Patriot maintained without waiting for the Arsenal government to disclose its plans, that the federal road grant would mean \$42 additional taxation on farms valued at \$6000.

(taxing the farmers \$42 additional for the purpose. But, says the Patriot, we intend taking \$20,000 out of revenue and applying this with the object of defraying the cost, and therefore it will not cost what we said before the election it would cost. If the Patriot will demonstrate how it can take \$20,000 out of general revenue and apply it to a purpose without leaving a hole in the revenue to be filled, farmers might be prepared to swallow its "dope." So far it has not done so and seeks to escape the consequences of its folly by pretending that the exchange in application of \$20,000 from one purpose to another means a gain of \$20,000 to the revenue. As a slight of hand artist the Patriot requires some further practice in the profession before it can possibly delude the farmers in this connection.

The evils of the concentration of great wealth in the hands of a few are vastly reduced by such employment of it as Mr. Rockefeller's donation of \$100,000,000 for assisting education, remarks the Ottawa Journal. There may be something seriously wrong with a social system under which one man is able to amass such a large share of the world's wealth, but perhaps in Mr. Rockefeller's hands it is accomplishing more for humanity than if it were scattered among many.

A man's pride in his work is not connected with a hope of being some time more than he is. It is, or should be, pride in work done well for its own sake. An engineer or conductor forty-five or fifty years old knows that he has small chance of being advanced into any more lucrative or responsible position. And, even with the younger men, hope of promotion beyond a certain point is highly illusory, though it may buoy up the spirits of many.

Prohibition Queries

Sir—We thank you for what information you have given us, in reply to my previous letter. You say, "The Dominion laws permit the importation of liquors, but the Provincial law prevents anyone from selling them."

Daily Selections For Guardian Readers

Furnished by W. S. Louison BIBLE IN 517 TONGUES

"We have been inundated with applications for Bibles from all parts of the world," says the superintendent of the British and Foreign Bible Society headquarters in London. "It is one of the signs of the day of peace. We have received so many orders that it is only with the greatest difficulty that we shall be able to execute all demands. One large collection has gone to Iceland. We are sending others to parts where there has been a Bible famine for a long period—certain portions of the late German Colonies in East Africa and other places that were closed by the war, are at last going to be supplied this year. From 1914-1918 we added thirty-five new languages to our printed publications, making altogether 547 different languages in which the Bible is printed by us. This includes our printing works in Japan and China, and also the presses in Germany, which were kept going throughout the war. Last year we despatched 8,746,000 Bibles to all parts of the world accessible. Some of them were taken in collier ships, some on camel transport, and others by head carriers to transport them to regions inaccessible by other means."

Others View Point

A WORLD VIEW OF THE FARMER

(Wall Street Journal)

Could the American farmer be voluntarily mobilized to furnish the credit to Europe to buy his products? The Canadian farmer has been. The Grain Growers' Export Company, with liberal banking encouragement, has done the thing. Nor have that company's operations been confined only to Canadian Grain. It has dealt also in American wheat, both hard and soft. In a broad way it may be said our own farmers, both cash depositors and the debtor class, have been indirectly advancing substantial credits to "export" their surplus. Why shouldn't they, and know they are doing so?

This is not the winter of the farmer's discontent. He is rich beyond his father's dreams of avarice. The latter was an agrarian because he was poor. He believed if he could control Congress and currency issues he might some day be able to pay off the mortgage with dollar wheat. The son is almost tired of making money to buy more land to make more money. He has a mind to play politics, and live in an hotel flat.

Farm rentals in Iowa are 100 per cent higher than they were; keeping abreast of the rise in value of the land itself. This is not confined to Iowa. It is officially estimated that the whole cultivated area of the country has within the past two years enhanced from 15 per cent to 20 per cent in value. September 30, 1919 over 100,000 farmers were borrowers from the Federal Farm Loan Banks to an aggregate of \$282,175,346. This institution may have "stimulated" production. Certainly, it has quickened speculation in farm lands. With rising prices speculation has been profitable.

THE PEOPLE. (The Attorney General's explanation in yesterday's issue is applicable to this.)

THE REASON WHY

IS THERE A MAN IN THE MOON? The markings which we see on the face of the moon when it is full can be a stretch of the imagination said to form the face of a man. On some nights this face appears to be quite distinct. If, however, we look at the moon through a telescope, we see distinctly that it is not the face of a man. Through a very large telescope we can see very plainly that the markings are mountains and craters of extinct volcanoes. It just happens that these markings on the moon, aided by the reflections of the light from the sun, which gives the moon all its light, it has, makes a combination that looks like a face.

DIAMONDS FROM LUSITANIA FOUND FLOATING ON THE WATER

LONDON, January 7.—Jeremiah MacVean, M. P., is the authority for a story of the romantic recovery of \$150,000 worth of diamonds from the Lusitania after the vessel was sunk by a U-boat off the South of Ireland.

On May 11, 1915, four days after the Lusitania was torpedoed, John Hayes, the captain of a fisher boat named the "Pet," found a postal packet with vouchers and a packet of gloves floating on the open sea, about ten miles to the south of High Island, near Glandore, Co. Cork.

In the postal packet were three registered parcels which, it is said, contained the diamonds. These diamonds had been sent on the Lusitania by a firm in New York, but it has not been found possible for the salvagers to discover the consignees, and some dispute has taken place as the consignors in New York, to whom the diamonds were returned, refused to accept delivery.

(Special to The Guardian.) OTTAWA, Jan. 7.—The engagement is announced of Captain Harold MacMillan, Grenadier Guards, A. D. C., Youngest son of Mr. and Mrs. Maurice MacMillan, and the Lady Dorothy Cavendish, third daughter of their Excellencies the Governor General and the Duchess of Devonshire. Captain MacMillan is on the Ridgeau Hall staff. His father is one of the heads of the British publishing house by that name.

Prince Edward Island Hospital Annual Collections

In October last the Trustees of every school district in Queen's and King's Counties were asked to kindly interest themselves in the affairs of the Hospital and to appoint collectors who were to start making collections on November 1st. The majority of the districts have already made a splendid response to the appeal but unfortunately there are too many not yet heard from.

HAS THE COLLECTION BEEN MADE IN YOUR DISTRICT?

If not we want you to find out why. This is very much your business. Just as much yours as it is ours. The Hospital is an absolute necessity for the safety of our people. It is important that it be kept right up to date, and furnished with the most modern appliances for relieving suffering and saving life. It is also important to our people that the charges be kept as low as possible. These things can only be accomplished by each person in the two counties served by the Hospital, contributing their share. It is not just or fair that one district contribute and another not do so.

I would therefore ask anyone who reads this to find out if the 1919 collections have been made in their district and if not take steps to see that it is made at once. The Hospital needs the money now.

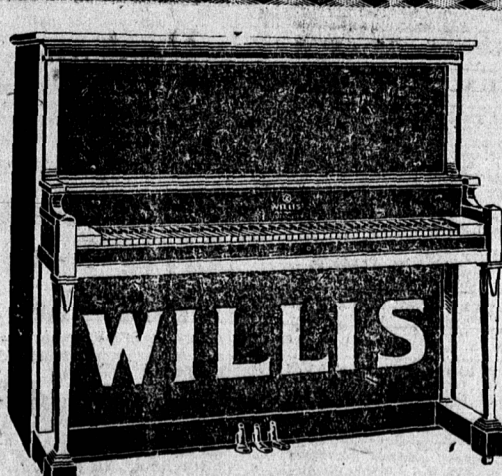

W. K. ROGERS, Chairman Board of Trustees.

Fur Date Sale Has Been Changed

(Special to The Guardian.) NEW YORK, Jan. 7.—The opening date of the annual midwinter sale of the New York fur auction sales corporation in the Masonic Temple here has been changed from February 9th to February 16th in a statement issued tonight. The corporation attributed the change to the short catches of the leading fur bearing animals throughout the United States and Canada and the consequent slow arrival of the pelts in this market. The last date for receiving shipments has been changed from January 17th to January 24th.

NORMAN ROSS WINS 220 YARDS SWIM

MELBOURNE, Jan. 6.—Norman Ross the American swimmer won 220 yard championship sprint in an athletic meet held here today. Spencer and Oster Cler, Americans, were winners of the six-days bicycle race carrying off the prize of £300. Fourteen teams completed.

THE WILLIS PIANO

The superiority of Willis instruments has won recognition from hundreds of the world's greatest musical artists. They are also used in the leading colleges and conservatories of the Dominion. It is the sentiment of the musical profession itself that no piano more nearly equals the human voice in its sweetness—clearness—purity and power of tone. Do not fail to visit our store and see the beautiful models that have just arrived.
