Boys Blue Serge Sailor Suits, good heavy weight for fall. Sizes for boys from 3 to 10 years. \$10.00

SUMMERSIDE and WESTERN GUARDIAN

CORN, CORN, CORN. At Auction. Expected in a few days, by auction at Centreville Bedque, on Thursday, Sept. 8th, beginning at one o'clock, household furniture, including livingroom, kitchen and bedroom furniture, stoves, carpets, pictures, dishes, etc. Also sewing machine, Mason and Hamlin organ, and driving carriage.

SPLENDID PLAY—The Frank Urban Company, one of the most popular theatrical stock companies that visits the Maritime Provinces, arrived in Summerside on Thursday and played a packed house at Happyland on Thursday night. Their opening bill was "Five O'Clock," a bright breezy comedy with enough plot and sensational situations to please the most fastidious. Besides the sterling worth of the production and the excellent ability displayed by each member of the cast, the performance was made even more entertaining by the many vaudeville specialties which were introduced between the acts and which were heartily applauded and enjoyed by the delighted audience.

RETURN HOME—Mr. John H. Cunningham, one of the most prominent druggists of Cambridge, Mass., who has been spending the last two months visiting friends and relatives in the west, returned by motor to his home on Monday last, accompanied by his brother, Dr. Joseph Cunningham and Mrs. Cunningham, also of Cambridge. Mr. Cunningham, who is a native of Miscouche, and his brother, are both excellent examples of the progressive and professional men and have certainly made their mark in their chosen professions in the college city. The trip homeward was made by way of Halifax, Annapolis Valley and other interesting sections and the two months stay on the Island was spent principally with Mr. Thomas McLaughlin, of Sherbrooke, brother-in-law of Mr. Cunningham, and of Mrs. Percy Weeks, Pope Road.

THE MARKETS

MONTREAL, Aug. 31.—A firm feeling prevailed in the local market for eggs yesterday, and prices for all grades were unchanged. There was a good steady demand for supplies and a fairly active trade was done with sales of strictly new laid stock at 50c per dozen in a wholesale jobbing way. The receipts were 2,355 cases, as compared with 2,280 for the same day last week last year, while the total shipments for the season to date are 32,169 cases smaller than the same period in 1920. Wholesale jobbing prices were quoted as follows:

Selected stock 45c to 46c No. 1 stock 40c to 41c No. 2 stock 35c to 36c

The market for maple product was without any new feature to note. The demand continues to be very limited for supplies and business in consequence was slow with prices unchanged. Maple syrup being quoted at \$1.45 to \$1.50 per gallon and maple sugar at 15c to 17c per lb. as to quality. The trade in car lots of potatoes continues quiet owing to the fact that the quality of the stock coming forward is not altogether satisfactory and in addition to this, the receipts owing to the warm weather prevailing. At the city markets the receipts continue ample to meet all immediate wants and sales of wagon loads were made at \$1.75 to \$2 per bag of 90 lbs.

New York, August 31.—Eggs gathered, receipts 10,202 cases. Fresh gathered, extra firsts, 37c to 40c; fresh gathered, firsts, 35c to 36c; State, Pennsylvania and nearby western hennery, whites, firsts to extras, 47c to 50c; do, browns, extras, 46c to 48c; do, gathered browns and mixed colors, firsts to extras, 35c to 45c; refrigerator special marks, 35c to 37c; do, firsts, 34c to 35c. New York, August 29.—Hope steady; State, 1920, 25c to 31c; 1919, 20c to 25c.

The receipts of butter yesterday were 76 packages, as compared with 2,539 for the same day last week, and 2,631, for the corresponding day a year ago. The export of butter from here last week sight; and the books that have shown a decrease of 10,468 pack weight; but the total shipments, the readers who are waiting somewhere to receive and cherish them. —Henry Van Dyke.

FURNITURE SALE—Miss Maud Wright will sell, by auction at Centreville Bedque, on Thursday, Sept. 8th, beginning at one o'clock, household furniture, including livingroom, kitchen and bedroom furniture, stoves, carpets, pictures, dishes, etc. Also sewing machine, Mason and Hamlin organ, and driving carriage.

INCREASE IN PRICE OF MILK—Effective September 1, Thursday, all the milk vendors supplying Summerside with the lactated fluid advanced their prices from 12c a quart to 14c 1/2 a quart. It is believed that this is the first time in the Maritime Provinces to increase the price of milk, when the other communities are on the downward trend and if any town could afford to sell milk for less money than another community, Summerside should be that place.

WESTERN PERSONALS

Arthur McKay, of Darnley, was brought to the Prince County hospital, Summerside, on Wednesday morning for an emergency operation, suffering from appendicitis.

Mr. and Mrs. Joseph Donette, of Rumford, Maine, who have been visiting friends and relatives in Summerside during the last month, left on return to their home Thursday morning.

Some coal stored in the western end of the town by a Summerside citizen took fire on Thursday morning but was noticed in time by a passer-by so that it was necessary to call the fire department.

MESSAGES IN BOTTLES

Every summer brings one or two sealed-bottle messages boxes around our coasts, and this year has been no exception. The perpetrators of these mild jests probably have no notion what a bottle can really do as a message-carrier when it is bent on business. One which was thrown into the sea at Studland Bay, Dorset, on August 18, 1913, is said to have been discovered near Christchurch, N. Z., 11 months later, after establishing, so far as one knows, a record in long-distance drifting. Its average rate of travelling was a mile and a half an hour. This pace, however, was beaten by a bottle in the previous year, which made 7,250 miles in five months. A marked bottle once took one and a half years to voyage from Cape Town to the Shetland Islands. Mystery surrounds the adventures of a bottle which was committed to the sea off Mozambique and 37 months later was picked up at Gwarran, some 50 miles from Gwarran, in Dutch waters. The Gwarran is 27 miles above the Maredos falls, which are nowhere less than 50 feet in height and are quite impassable. Round the seals on the bottle were distinct traces of the green clay peculiar to the old diamond district 55 miles above Gwarran.

If a man succeeds the world envies him; if he fails it sympathizes with him—and secretly rejoices. Vices are among the oldest things on record, and yet historians chronicle the loss of not a single one.

How Thin, Nervous People Can Increase Weight and Strength at Small Cost With Bitro-Phosphate.

It's worth your while to read what a New York specialist has to say about the nerve and brain cell builder that Hughes Drug Co. Ltd. and other leading druggists sell so much of these days. He writes: "Let those who are weak, thin, nervous, anemic or run-down, take natural unadulterated substances such as Bitro-Phosphate. It has been shown to increase nerve energy and strength of body and mind. Bitro-Phosphate is a pure organic phosphate such as good physicians prescribe to increase weight and strength. It is an excellent aid in relieving weak nervous conditions. Its use is not advised unless increased weight is desired."

CHAMPIONSHIP IN DOUBT

PRESQUE ISLE, Me., Aug. 31.—Fully 4,000 wild fans, the largest crowd that ever turned out to a baseball game in Northern Maine or New Brunswick left the field today still in doubt as to which team, Perth or Limestone, the title of champion belonged, when the third and deciding game between them, after having been interrupted twice on account of rain, finally had to be called because of darkness. In all three and one-half innings were played. Perth led at the first intermission 3 to 0 and when the game was called Limestone was ahead 4 to 3.

Perth won the first game of the series at Perth, 7 to 0; Limestone won the second game at Caribou, 4 to 2; then the teams were brought together for this, the deciding game, and a side wager of \$2,000 by their supporters, Perth led 3 to 0 when play was stopped by a heavy downpour of rain after an hour's delay play was resumed only to be stopped again by rain.

In all three and one-half innings were played when the game had to be called owing to darkness with the score at that time 4 to 3 in favor of Limestone. Paynter was in the box for Perth and Theriault for Limestone, each in fine form. The game will be played off in the near future in a place as yet not known.

ANGLICAN RECTOR KILLS SELF IN NORTHERN WILDS

COCHANE, Ont., Sept. 1.—The Anglican rector at Moose Factory, on James Bay, Rev. W. Haythorne Waite, who was injured recently, ended his suffering with a bullet, according to word just received here from Rt. Rev. J. G. Anderson, bishop of the Anglican diocese of Moosemeec, who is on a trip to Port Albany, writing to his wife, Miss Anderson, that the late rector suffered a compound fracture of his shoulder while helping to move a piano and lay for weeks without medical attendance, the nearest doctor being at Cochrane, 130 miles distant. While crazed with pain, in his short and delirious days, the rector twice escaped from his Indian attendants and shot himself. Rev. Mr. Haythorne-Waite was principal of the Indian school at Moose Factory. He was well known here where he ministered for ten years ago. He took active part in helping the lost American ballists when they descended in the vicinity of Moose Factory last winter.

DETECTIVES IN DISGRACE

They Were Betrayed by Criminals Whom They Assisted. In 1877 three chief inspectors of Scotland Yard were informed suddenly that they were under arrest. The charge against them was that they had accepted money from the notorious Benson gang to aid them to defeat the ends of justice. The three detectives—John Melkiohn, William Palmer, and Nathaniel Druscovich—were induced by bribes of money to give Benson and his confederates warning when Scotland Yard were on their track. For a time they managed to evade the police by this means, but finally they were arrested and sent to prison. Benson and his fellow-swindlers had no intention of allowing their official confederates to escape, and they "gave the show away" within a few weeks. The three detectives were arrested, and after a prolonged trial each was sentenced to two years' hard labor.

CRIMINAL FLOWERS

Like human beings, flowers have their likes and dislikes, and vent their displeasure in no uncertain manner upon their unfortunate victims. Popples, for instance, have a very injurious effect upon other flowers placed in the same vase, which seems to react upon themselves, as they soon fade and die under such conditions. The same remark applies to sweet peas, which should always be placed by themselves. If other blooms are mixed with mignonette, there are few which will survive such intimate contact. A yellow tea-rose faded away in two hours when placed next a pink one, yet in the ordinary way it

"Auto-Shoes" Mean Mileage

The mileage given by the best tire you ever used would just about approximate the average given by Ames Holden "Auto-Shoes" year after year.

Ames Holden "Auto-Shoes" are miles better than ordinary tires. The name "Auto-Shoes" is to help you to remember that—to make it easy for you to get the cheapest mileage you can buy.

quire any great skill to bring his suit home to him. He was arrested and sent to penal servitude.

INDIAN PAINT.

Quick silver, or mercury, is derived from an ore that is a mixture of sulphur and mercury, called "cinabar," and when very pure is of a color a brilliant vermilion. It is from this source, indeed that vermilion used to be obtained. Nowadays, however, it is usually made by heating mercury together with sulphur, potash and water.

To get the quick silver from the ore it is necessary merely to separate it from the sulphur with which it is chemically combined, and this is accomplished by roasting. The ore goes from the crusher into a furnace, where high heat volatilizes the quick silver, the latter being thereupon precipitated pure in a water-jacketed condenser. Out of the condenser it runs in a silvery stream and is put up in wrought iron flasks for market.

Some tribes of Indians have used cinabar for red paint since prehistoric times, frescoing their faces and bodies with it and it was observation of this circumstance that led to the discovery of the famous quick silver mines. Occasionally a miner's pick penetrates a pocket that contains a cupful or so of pure quick silver.

When reduced by low temperature to a solid quick silver becomes very malleable, and can be beaten into sheets as thin as tissue paper. The metal has a strong affinity for gold, and is much used in connection with gold mining. During the war its price multiplied tenfold owing to the need of fulminate of mercury for cartridge caps, shell fuses, and detonators for all sorts of projectiles.

IN MY GARDEN

Tulips tall, and daffodils Up and down my little hills, Little paths of grey old stone, Little thoughts while all alone How God smiles on each new day, Teaching one the only way To be happy, is to know Smiling back will make one so. F. M. L.

SCENT IS DISTRIBUTED

It is true that we associate scent with the flowers, and occasionally, with the leaves of plants. But nature, so marvelously loving of diversity, scatters the sweetness, now here, now there, sometimes in the flower, sometimes in the wood and even in the roots. In the ginger and the iris, for instance, the perfumed oils are in the roots, in the sandal tree the fragrance is in the wood, in the cinnamon shrub it is the bark that scents this air.—Columbus Dispatch.

SELDOM SEE a big knee

like this, but your horse may have a bunch or brace on his ankle, hock, stifle, knee or thigh.

ABSORBINE

will clean it off without laying up the horse. No blister, no hair gone. Concentrated—only a few drops required at an application. \$2.50 per bottle delivered. Describe your case for special instructions. Book & R Free. W. F. Young, Inc. 141 Commercial Blvd. Montreal, Quebec, Canada. Absorbine and Absorbine Jr. are made in Canada.

would have lasted several days. This explains why, after arranging perfectly fresh flowers, one comes back in the course of an hour or two, to find that some of them have wilted badly. In nearly every case it is willful murder on the part of the other flowers which could not bear their company.

Not Obsolete

Admiral Sims said at a dinner party in New York: "Youth is always an extremist. Take, for instance, the battleship question. We middle-aged sailors are just now asking ourselves how much the submarine has impaired the value of the battleships, but youth has got the question settled for good and all. 'What is the value of the battleship today?' I said to a naval cadet at a luncheon. 'No damned value at all,' he answered. 'Then he thought a moment and added: 'Of course, she's got a very nice deck for dancing.'"

Smart

"That lawyer is making a fine speech to the ladies of the jury." "He's full of gulle, too." "In what respect?" "He carefully refrained from addressing them as the 'intelligent ladies of the jury,' and thus avoided the insinuation that they might not be good looking."—Birmingham Age-Herald.

Friendly Warning

Under the caption "A Friendly Hint," the following forcibly worded advertisement in Rivington's New York Gazette of January 18, 1915, was directed against a resident who had made a grievous financial error, very much to his own advantage: "If a merchant of this city who lives near the Exchange, does not return within 14 days from the above date return 10 pounds which, by mistake, he was overpaid in settling an account, a narrative of the whole transaction, with his name you at once and afford lasting benefit. See a box all dealers, or Edmondson, Bates & Co., Limited, Toronto. Sample box free if you mention this paper and enclose 2c stamp postage."

Odd Marriage Customs

In all Slav weddings the bride is fetched by the bridegroom, emblematic of the time, when his forefathers carried their mates away forcibly. At Albanian weddings it is correct for the bride to weep and show great reluctance to leaving home. The bridegroom must present the bride with a handsome dress for the marriage, no matter what the circumstances are, so that it is known by all the guests that the dress the bride is wearing shows the taste of the bridegroom.

PILES

Do not suffer another day with itching, bleeding or protruding Piles. No surgical operation required. Dr. Chase's Ointment will relieve you at once and afford lasting benefit. See a box all dealers, or Edmondson, Bates & Co., Limited, Toronto. Sample box free if you mention this paper and enclose 2c stamp postage.

Books that have Life

After all, is it not better that a hundred unnecessary books should be published than that one good and useful book should be lost? "Nature's law of parsimony is at work with 2,539 for the same day last week, and 2,631, for the corresponding day a year ago. The export of butter from here last week sight; and the books that have shown a decrease of 10,468 pack weight; but the total shipments, the readers who are waiting somewhere to receive and cherish them. —Henry Van Dyke.
