

### The End of Your Cough

is near when you begin to take Jamieson's White Pine and Tar. One bottle is usually sufficient to completely cure any ordinary cough. The starting cough is often overcome with a few doses.

**Jamieson's White Pine and Tar** acts directly upon the inflamed respiratory tract, soothing and healing the affected membrane promptly. It does not dope the taker and temporarily stop the desire to cough while the cause of the cough remains. Its a real cure; Large bottles 25 and 50c.

#### TO-DAY'S ELECTION

The Civic Elections today are attracting more than ordinary attention notwithstanding they are void of politics. For each and every office, including those of Mayor, City Councillors and Water Commissioners there are contests, and all the Candidates have publicly advertised their eagerness to devote their time, service and ability to the public weal. This is a healthy sign, the more so as there is no "platform" each of the Candidates appealing for support on his individual merits. The free and enlightened electors are thus at liberty to back their own selection without let or hindrance, and without any qualms about party allegiance.

There being no party nominees, it is left to the electors' discretion whom they will return, and they will no doubt vote for the Candidates best answering their individual conception of an ideal civic head, Councillors and Water Commissioners. By their privilege and secrecy of the ballot they can record their votes without fear or favor.

It is nobody's business except the voter's, for whom he votes, and nobody can ever know how he exercises his franchise unless he chooses to tell. herein lies the inestimable value of the ballot, for it forms the safeguard of the freedom of our civic, as well as our national life. It is the alienable right of British subjects to make their choice of rulers without interference, retaliation or fear of ill-consequences from independence of judgment. This right has its corresponding duty, and the duty is no less than that every qualified voter who is physically able should do to the poll.

As at present we are on the threshold of great developments and expansion, it is incumbent on all the citizens of the capital to show their intelligent appreciation of the great possibilities by at least taking the trouble to record their votes for our future civic rulers.

He is a very poor, selfish and self-pionated individual who considers himself too important to exercise the franchise. And he is a useless incubus in any community who is too indolent to do so. Everyone who has the interests of the city and province at heart will not fail to mark his ballot papers today. There have been many prophecies as to the result of the election, but if every elector do his duty, the greatest surprise of all will be to find the successful Candidates retained as the result of the most. Total poll of the electorate, that would be something to boast about in this jubilee year in Charlottetown.

For curing colds and coughs and warding against all future attacks here is nothing better than Rexall's preparation is made of purest Norwegian cod liver oil combined with "Diphosphites" and is a really splendid article for building up the general condition of the body. Price 75c. and 35c. a bottle. The MacKinnon Drug Co., Corner Great George and Kent Sts.

#### 12 YEARS STIKE

We are in receipt of a special report by the Department of Labour concerning strikes and lockouts which have occurred in Canada during the period 1901-12. The report shows that strikes taking place during these twelve years have numbered 1,319, an average of 110 annually. There were 319,880 employees concerned in these strikes. The time losses in strikes during the twelve years reach nearly 9,000,000 working-days and would represent, at \$2.50 per day an annual loss to the workers of about \$1,900,000 or a total estimated loss for the twelve years of over \$22,000,000. The burden of these strikes fell most heavily on the coal mining and building trades. It is pointed out that it is a connection with organized labour, rather than unorganized, that strikes chiefly occur. The reason for this is obvious. A strike means, as pointed out and by the Deputy Minister of Labour, unity of action, which is impossible without organization. Wage earners are seldom inclined to enter on a struggle with their employers until a degree of organization is found in their ranks. The situation is fairly reflected in the very large proportion of strikes concerning union recognition.

It will, it is true, frequently happen that union and non-union employees are both concerned in a particular strike. The unionists may even be sometimes in a minority but, being organized and including inevitably the more aggressive spirits they will often largely control the action of the employees as a whole.

Of the 1306 strikes recorded in Canada during the twelve years, it is a remarkable fact that only one is charged against railroad employees of the higher grades, namely engineers, firemen, conductors, trainmen or telegraphers. It is pointed out that the reason for this is that these men "stand at the apex of organized labour, having achieved that most desirable of industrial systems, that of working under agreement, and having learned the further valuable art of renewing these agreements, modified or otherwise, without cessation of work. The facilities for arranging working agreements in the case of these great railroad brotherhoods are superior in a measure to those open to many other classes of workmen."

The year 1911 was exceptionally high in time losses, showing 2,021,440 wasted days, twice the volume of time losses recorded for any other year. The wage earners for that year are estimated at slightly under 2,300,000 and the possible working days for 1911 may be therefore placed at 299,000,000. This estimate allows an average of 300 working days a year to each worker. Analysis shows that these time losses of 2,000,000 days, if spread evenly over the whole wage earning population of Canada, the losses by strike for 1911 would represent a loss per worker of a fraction under two days. For 1912 the figure representing time losses as against days worked dwindles to less than one day per worker; the time losses were only 50 per cent of those of 1911 and the industrial population had grown.

A supplementary statement gives the report for 1913.

The number of industrial disputes occurring in 1913 was 113, considerably fewer than the number recorded for the preceding year. The number of employees involved was 29,426, a fraction under the figures for 1912. The approximate time losses for 1913 are placed at 1,237,678, being somewhat higher than those recorded for 1912, when the number of days lost was placed at 1,059,208. These last named years fall as to time losses very much below the figures for 1911, for which year the number of days lost by strikes was placed at 2,046,650. A glance over the record of earlier years will show that the time losses for 1913 were curiously close to those recorded for 1903, ten years earlier, those of the earlier years being 1,275,500. The outstanding strike of the year 1913 was that of coal miners on Vancouver Island, which of course largely swells the time losses.

#### LOSS IN GALT FIRE \$250,000

**GALT, Ont., Feb. 9.**—In an interview with J. C. Dietrich, who holds the controlling stock in the Shurly-Dietrich Company, he stated that his loss would be \$250,000, with an insurance of only \$85,000. He would not give out the names of the companies in which the insurance was secured but said it was divided among several companies. The large number of orders on hand are to be filled from the plant of the R. H. Smith Company, St. Catharines, in which Mr. Dietrich has also a controlling interest.

#### BRITISH SHIPS LACK FREIGHT

**LONDON, February 9.**—The extent of the steamship freight depression in the north of England is evident from the fact that the vessels now laid up in the Tyne number sixteen, representing fifty thousand tons carrying capacity, while others have been ordered to lay up upon their arrival.

#### PARLIAMENT OPENS

(Canadian Press.)  
**LONDON, Feb. 10.** The opening of Parliament found an unusually large number of members present. Irish Nationalists and Ulster were on hand for the prominent seats for the Home Rule Debate. The place was thoroughly searched for Suffragettes.

(Canadian Press.)  
**LONDON, Feb. 10.**—King George opened the session accompanied by the Queen.

Great crowds watched the procession from Buckingham Palace to the Parliament Building. In House of Lords. The King read the speech from the Throne.

(Canadian Press.)  
**LONDON, Feb. 10.**—In reading the speech from the throne the King, by emphasis of words and by his manner, indicated his realization of the gravity of the situation. He said, "I regret that the efforts made to arrive at a solution by agreement on problems connected with the government have so far not succeeded. In the matter in which the hopes and fears of so many of my subjects are keenly concerned and which, unless handled with foresight and judgment and in the spirit of mutual concession, will prove a grave and serious difficulty, it is my most earnest wish that the good will and co-operation of the men of all parties and creeds who have assembled in this House should be directed to the settlement of the Welsh Disestablishment Bill, the continuation of the House of Lords and the dealing with housing, poor and education."

#### ZANZIBAR IN LONDON

**LONDON, February 9.**—The Bishop of Zanzibar did not make any statement on his arrival at Charing Cross station yesterday. The bishop of St. Albans, who started the Kikuyu controversy, is a middle-aged and energetic man with fine record as a clergyman of High Church sympathies, a strenuous worker and a deep thinker.

Dr. Campbell, of the City Temple, makes the suggestion that an annual national church congress should be held which would include Anglicans and Free Churchmen.

#### COULDN'T DROP THE PILOT

**NEW YORK, February 9.**—The Cunarder Lusitania arrived on the 6th, from Liverpool, fourteen hours late after a voyage, according to Captain Daniel Dow, which was a succession of westerly gales and high seas. There was very heavy weather at Queens-town last Sunday and the Lusitania was unable to enter the harbor until late in the evening. Richard J. Gore, the Cunarder company's senior pilot, was unable to leave the ship, Mr. Gore said last night that he has been pilot for the company for twenty-five years, but never before had been carried to New York.

#### PORTUGAL UNDER FIRE

**LONDON, February 9.**—The condition of affairs existing in Portugal respecting the treatment of political prisoners was the subject of a public meeting on protest, held yesterday at the Westminster Palace Hotel.

Mr. Philip Morley, M. P., the chairman, said that the republic had now existed for three years, yet was still under a reign of terror, men being persecuted not for their deeds, but for their opinions.

Mr. G. W. G. special correspondent of the Daily Chronicle, told of having seen priests, doctors and nobles thrown into prison without even a pretence of trial.

Adeline Duchess of Bedford and Sir Conan Doyle also spoke. A resolution was passed calling upon the British Government to make representations to Portugal with a view to securing an amnesty.

#### Sciatica Vanishes Instantly

If Nerviline Is Used

CAN YOU BEAT THIS CASE?

No ordinary liniment will even relieve Sciatica. Nothing but the most powerful kind of a remedy can penetrate through the tissues and finally reach the Sciatic Nerve. You can always depend on the old-time "Nerviline." Nothing made today is as good for Sciatica as Nerviline was when first produced, about forty years ago. All this time the same old "Nerviline" has been curing Sciatica, Lumbago, Rheumatism, and is considered to be without an equal in relieving pain or soreness anywhere. "Nerviline" couldn't be made stronger or better," writes James E. Edwards. "The way it cures Sciatica is to me simply a miracle. For years I suffered frightfully. I ruined my stomach with internal dosing. I rubbed in gallons of oils and liniments—none were strong enough. One good rubbing with Nerviline relieved. I kept on rubbing and shortly was cured. My father cured rheumatism in his right arm and shoulder with Nerviline, and my mother cured herself of chronic lumbago with Nerviline. Our family simply swears by Nerviline and we are never without a 50c. family size bottle in our home. We find that for external pain, for coughs, colds, earache, such minor ills it is a veritable family physician."

### Silver Black Fox Farming Brings Riches

The new England and Prince Edward Island Silver Black Fox Co. Ltd. has the best proposition to offer to the investor. The Company has secured 14 pairs of the best grade of Prince Edward Island Pedigreed Silver Black Foxes selected from five of the best ranches and from the best strains of Foxes on the Island. The Company was also fortunate in purchasing a ranch containing 88 acres with up-to-date buildings for ranching. The capital stock is \$300,000 par value of shares \$10. Prospectus of the Company and full particulars will be forwarded to interested parties by addressing

R. W. McEwen, Merchant, St. Peter's  
Provisional Secretary—R. W. McEwen, Merchant, St. Peter's

#### Bankers

The Bank of Nova Scotia, Charlottetown

#### Object Of The Company

The Oriental Silver-Black and Patch Fox Company, Limited, has been formed for the purpose of purchasing, breeding, raising, and disposing of silver-black and patch foxes and all kinds of fur-bearing animals

Prospectus of The Oriental Silver Black and Patch Fox Company Limited

#### The Foxes

The Company have now three pair in their ranch. No. 1 is a pair of Island silver blacks. Nos. 2 and 3 are two pair of Newfoundland silver patches of the very best quality, raised in our ranch in Newfoundland last year.

It is a well-known fact that the Newfoundland fox is the very best fox obtainable. This fact can be readily proven, as the oldest and most successful of our Island fox ranchers have for years past, and do so yet, mate their Island best stock with the Newfoundland fox in order to get stronger, healthier and more vigorous stock in their ranches, and also better quality of fur.

#### Capitalization

The Company have these three pairs in their ranch, capitalized at \$24000.00 (twenty-four thousand dollars). Of the twenty-four thousand dollars, fourteen thousand is paid up, and the balance (ten thousand) is for sale in one thousand shares of ten dollars each.

#### Upkeep

Until September 20th, 1914, the ranch-owners will maintain the running of the entire ranch without any charge to the Company.

#### The Possibilities

It is a well-known fact that fortunes have been made in a short time in the Prince Edward Island fox business and this opportunity has been by no means exhausted. Fox-ranching is no longer an experiment but an accomplished science and one of the most profitable investment in the world today.

#### Estimated Results

If these three pairs produce, at the lowest estimate, three pups each on or about April 1st, 1914, and these sell at the low average of \$2500 (remember one pair is silver-black), this would net the Company \$22,500 or in other words would return a profit of almost 100 p. c. on the money invested in eight months. Consider this, almost as soon as your money is invested the pups will be born. Is this not far superior to investing in a pair of 1914 pups out of which you will get no returns until 1915? This fact is worth considering before investing. The Company guarantee 20 p. c. payable Oct. 1, 1914, which is equal to 40 p. c. a year.

#### Ranch Manager

Mr. G. H. Walker has had three year's experience in raising foxes, and is a most competent man in every respect. He also has an interest in the ranch.

#### The Ranch

The ranch is only a short distance from St. Peter's Station (about five minutes walk) and within fifty yards of the keeper's House, and is a most ideal place to raise foxes.

#### Applications For Stock

Applications for stock may be made to any of the Provisional Directors or the Provisional Secretary-Treasurer.

#### APPLICATION FOR STOCK

To The Oriental Silver Black and Patch Fox Co., Ltd.  
St. Peter's P. E. I.
