RRITTAING PIMPLES AND DISFIGURING BLOTCHES.

They place many young girls at a great disadvantage in life. The only cure is a blood purifier like Ferrozone. It cleanses the crimson flood of poisons and impurities, renews and strengthens it, and makes lots of red corpuscles that manifest their prescence by a ruddy, healthy glow in the cheeks and lips. Ferrozone quickly masters all skin eruptions, builds up broken down constitutions, and gives to weak, sickly women an abundance of spirits, vitality, energy and beauty. Try Ferrozone, it's all right. Price 50c per box, or six boxes for $2.50, at druggists, or N. C. Polson & Co., Kingston, Ont.

At the home of her daughter Mrs. A. J. Pybus, Winnipeg, Mrs. John Carr in the 84th year of her age leaving to mourn a family of eight viz. Mrs. John McCallum, Mrs. John Pybus, Mrs. John Hoggins, Nelson Carr, Andrew Carr of Winnipeg, Mrs. Norman Campbell, Mrs. Henry J. Casley of P. E. I. and Miss Maggie Carr of Boston.

A CONVERSATION WITH A CLIMAX.

When a Professional Man Talks, It's to the Point.

Several famous American physicians and surgeons were recently dining together after a session of a national meeting held in New York.

'I had a remarkable case this winter,' remarked a surgeon present, whose name as a specialist in rectal diseases is world wide. 'My patient was a woman, a delicate, nerve racked creature, who had suffered so fearfully from the ravages of hemorrhoids, that the knife seemed the only solution of the trouble, and yet her heart was weak and her strength so wasted by this fearful disease, that we dared not operate.

'I had ceased my visits to her for a time and had given up all hope, when one morning she entered my office looking like a new woman; the pallor had disappeared and the lines of suffering were nearly eradicated from her face. She told me that she had purchased a proprietory medicine, namely Pyramid Pile Cure, and that from the first insertion of the suppositories she had obtained instant relief. I made an examination and found the rectum in excellent condition, the inflammation entirely disappeared and the swollen veins in normal condition.

I was so interested in the case that I had the remedy analyzed carefully and was so pleased with the result of the analysis, finding a combination of the most healing and scientific remedies present in the Pyramid Pile Cure and in more convenient form than I could secure them otherwise, that I wrote to the Pyramid Pile Company at Marshall, Mich asking for their booklet on Piles, their Nature, Cause and Cure, (which by the way is sent free,) and have since used their Pile Cure extensively and with best results in my practice. I do not hesitate to recommend it to you all. It will often save your patience from a painful surgical operation which in many cases results fatally.'

A BIG STRIKE IN CAPE BRETON

View of Copper Gold Ore 100 Feet Wide and Over a Mile Long. Found in Cheticamp.

A body of copper-gold ore 100 feet wide and traced for a mile has been found in Cape Breton on the property of the Eastern National Copper Company, Limited, at Cheticamp. This is a very important find as it is the first instance in this Province, and probably in Eastern Canada, where metaliferous ore has been found in similar great magnitude to that which in the western country has made the metal mining industry such a great producer. It looks as though that wonderful little Island of Cape Breton would become almost as well known for its metals as for its coal, and the above discovery at Cheticamp is especially important because the copper ore being in a country of coal, iron and lime and further favored with excellent shipping facilities makes it an especially attractive proposition. Several prominent mining engineers who have visited Cheticamp district think that it will eventually rank among the most important mining sections of Canada on account of the great extent of the mineralized country there, and the undoubted great size of the metal deposits. The Eastern National Copper Company, Limited, which is developing the district, is a corporation of prominent Halifax business men. Active development was commenced last fall to prove the deposit in a pay streak of ten feet wide on the outer which gave an average value of $10. a ton in gold, silver and copper. In the sinking of the main slope during the winter the seam was found to graddally widen and this led the engineer in charge to make further investigations by cross-cutting and the result is the announcement that the mineralized zone is actually over 100 feet wide, and it is hoped, with adequate machinery, the entire mass from wall to wall may be treated at a profit. The developement has proceeded far enough to prove the existence of a tremendous body of ore, and thousands of tons have already been blocked out and are in sight. The sinking and drifting is now going on night and day. Large smelter works are projected and we may expect to see Cheticamp the centre of extensive industrial operations in the next few years. Expert mining men will probably have to be brought into the country at the inception, because no metal mining of any extent, except perhaps in iron, has been done in this part of Canada up to the present time. Free milling gold quartz has been a much simpler proposition and has naturally attracted the first consideration of mining men, but it is the complex ores which in the Western States and Mexico and in British Columbia have really furnished the material for the great mining works of those countries. Copper-gold ores are perhaps the most attractive form of mining, because they are usually found in large deposits and carry regular and uniform values and have permanency to warrant the investment of large capital in extensive works. Many of the large private fortunes in the United States have had their origin in the copper-gold ores of the West, and just at the present time it is noticeable that copper shares in that country have tremendously appreciated and that the price of the metal has risen from 11c. to 15c. per lb. We are glad that this rich section in Cape Breton is in the hands of home company, because it has been a matter of regret for years that so much money has been going abroad for the exploitation of foreign countries. The Eastern National Copper Company's advertisement on another page announce that a small block of development stock is being offered for public subscription at $3.00 per share, par value $10. The fiscal agents are Alfred Bennett & Co., 16 Prince St., Halifax, Canada. The price is expected to advance to $5,00 per share (50 cents on the dollar) in a short time based on and justified by ore actually blocked out. The stock started at $1.00 and shrewd speculators look forward to it being quoted at par in the course of a few months further development. Mr. Hugh McInnis is representative for P. E. Island and may be addressed care of A. Bennett & Co., Halifax com.

IMPERIAL ARMY RESERVISTS FOR

Canada Cause Official Correspondence With Ottawa

The Two Governments Fail to Agree—Changes at Militia Camps Proposed by Lord Dundonald's Report.

ABOUT ARMY RESERVISTS.

OTTAWA, March 23—(Special)—The arrangement for bringing army reservists from Britain to Canada may be declared off.

The imperial authorities wanted special legislation passed by Canada so these reservists might be called upon to serve with the British army abroad, whenever they got notice.

THE CANADIAN REPLY.

The Canadian Government said if the reservists come to Canada they must be allowed to remain on the same conditions as other citizens.

The matter is still in the hands of the Deputy Minister.

ANNUAL MILITIA REPORT.

The annual report of the Minister of Militia is issued.

Lord Dundonald in his report says he proposes to leave out marches-past and the ceremonial at the camps and substitute practical soldiers fit to take the field.

DON'T WAIT

Come in and order that Suit or Overcoat today. We have a very attractive stock to select from and will make you a Suit that will fit well, look well, wear well.
