. AGING EYES . NEED HELPING LENSES

Persons are unduly alarmed when they are unable to read as they once could. That is a handicap which can readily be overcome. Aging eyes need helping lenses. As this condition progresses stronger and stronger corrections are required.

Do not neglect the condition which makes reading difficult.

Fire Prevention Week

MONCTON N. B. Sept. 30—Fire Prevention week, proclaimed by the Dominion Government October 4th to 10th will be observed throughout The Canadian National railways system.

Instructions have been issued by W. U. Appleton, vice president and General manager Atlantic Region to district officers, for a check-up to be made of all railway property with a view of discovering any fire haszards that may exist and taking steps to eliminate these

In the larger field of fire prevention, the railways of Canada have rendered valuable assistance with the mobile fire fighting equipment which they maintain. This is particularly true in cases where forest fires may break out along the line of railway. Tanks cars are maintained with pumping equipment and these can be rushed to places where a fire may occur to assist in extinguishing it.

Rigid inspection is made at all times of fire preventive apparatus on locomotives to avoid fires being set by trains.
