

National Cash Registers Complete with ALL Improvements

During the last eighteen months, we sold over 170,000 National Cash Registers, which is 35,500, or 35% more than had been sold in any similar period of time in our history.

This enormous output was handled without increase in operating expenses. There has always been a demand for a low-priced cash register. Heretofore this demand has been filled with registers lacking certain desirable improvements. We will no longer manufacture registers without improvements. This simplifies our line and enables us to manufacture in greater quantities.

This all means a big saving in cost of manufacture. We are going to give you the benefit of these savings.

Therefore we have reduced our prices from \$10 to \$150 each.

Further, owing to our Canadian Plant, we save you 30% duty. This is a big saving to you.

All cash registers made by us will now be equipped with every known improvement, at prices lower than those formerly charged for registers lacking certain features of protection.

Our present line of registers meets every requirement for all classes of stores, large or small, at prices as low as \$20.00.

When you buy a National Cash Register you are guaranteed a first-class mechanical principle, first-class material and first-class workmanship. This insures accuracy and durability.

Our Guarantee: "We guarantee to furnish a better Cash Register for less money than any other house in the world," has never been equalled. If you are interested in knowing more about this "Guarantee," or any register we make, sign and send in the coupon. It will place you under no obligation to buy.

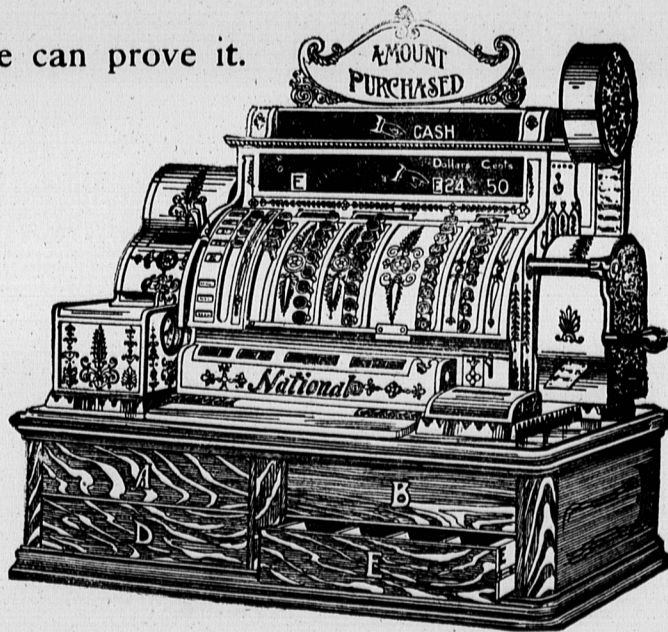

Terms Cash, with a liberal discount; or easy monthly payments without interest. All sales F.O.B. Toronto.

Have you to ask questions like these? You can cut them out, and all uncertainty with them, if you use the

NATIONAL CASH REGISTER SYSTEM

We can prove it.

This National is the Monarch of all Cash Registers. A bookkeeping staff in itself! Gives superb protection—the kind you need! Ensures exactness in all your cash dealings. Separate total and separate cash drawer for each clerk.

Gold Coins.
Gold pieces are the only coins of the United States which are worth their face value intrinsically. A double eagle contains \$20 worth of gold without counting the one-tenth part of copper.

Children in China.
In China children are brought up almost as if they were deaf and dumb. A Chinese boy or girl will sit in the presence of father or mother for hours and never say a word unless spoken to. The Chinese boy who would speak to a caller at the house unless he had permission would be considered a most impudent rascal.

Tea Smoking.
Tea smoking is extremely poisonous and unpleasant in its effects. In a very short time it produces nausea, palpitation of the heart and acute trembling in the limbs.

Stone Garments.
The Russians manufacture a fabric from the fiber of a filamentous stone from the Siberian mines which is said to be of so durable a nature that it is practically indestructible. The material is soft to the touch and pliable in the extreme and when soiled has only to be placed in a fire to be made absolutely clean.

Dragon's Blood.
The sap of the dragon tree of Tenerife, a resinous substance like dark treacle, is called dragon's blood. It becomes brittle and crumbling when dry and is an article of commerce used in medicine.

The Carolinas.
The Carolinas were not named after Queen Caroline, but after Charles II, the Latin of Charles being Carolus, hence Carolina.

The Water Pump.
The most ancient description we have of a water pump is by Hero of Alexandria. There is no authentic account of the general use of the pump in Germany previous to the beginning of the sixteenth century. At about that time the endless chain and bucket works for raising water from mines began to be replaced by pumps.

Needle's Journey.
A needle which entered the left knee of a dressmaker at Schroda, Posen, emerged some days later from the sole of her right foot.

Volcano Cooking.
The Maoris of New Zealand cook their potatoes and other vegetables in volcanic heat. There are a few volcanoes in New Zealand, and some of the Maoris live up in the mountains near them. They make the volcanoes do several useful things for them, but the queerest is the cooking.

Caste in India.
The barbers of India rank with the washerwomen. The son of a barber must be a barber all his life, and his wife must be a barber's daughter.

The St. Lawrence.
Vessels of 4,000 tons can ascend the St. Lawrence river to Montreal, a distance of 1,000 miles from the sea. Only one other river in the world, the Amazon, is navigable to such a distance for craft as large.

Jewels on an Idol.
The jewels of an Indian idol must be worth stealing if many of those remarkably hideous images possess such valuable head ornaments as one made for the idol Parthasathy, in the Triplicane temple at Madras. The ornament is worth some 50,000 rupees and is made of gold, studded with diamonds, emeralds and rubies, the largest emerald being valued at 1,000 rupees and the biggest ruby and diamond at 300 rupees apiece.

Macedonia.
Macedonia has a population of about 4,000,000. Three-fourths are Christians and one-fourth Turks. Nearly half are of Bulgarian ancestry.

Orchards.
Orchards generally produce full crops only every other year. This is because the full crop of one year so exhausts the fruit producing qualities of the soil that it is not able to make a full crop the next year.

Presbyopia.
Old sight (presbyopia) begins at about the age of forty. It is first noticed by the tendency to hold the paper farther off. The glasses should not enlarge the letters, but simply render them clear and natural at the ordinary reading distance. Whatever the ocular defect, the proper glasses should be obtained as soon as it is discovered.

Perfumes.
There are scores of references in the Bible to the use of perfumes by the Hebrews both in their religious services and in private life.

NATIONAL CASH REGISTER CO.

BRANCH FACTORY: TORONTO, ONTARIO
MAIN FACTORY AT DAYTON, OHIO

F. E. MUTTON, Canadian Manager.
Head Offices for Canada: 285 Yonge Street, Toronto

The man who neglects to put a National Cash Register at work in his business is expecting flesh and blood to do what a machine can do better: a principle that went out of date over one hundred years ago.
