Mrs. M. A. Beaton who has been the guest of relatives on an extended visit to the U. S. has returned home.

Miscellaneous Shower

The spacious home of Mr. and Mrs. George Leard, Lorne Valley, was the scene of much gaiety on the evening of May 26th.

Miscellaneous Shower

The spacious home of Mr. and Mrs. George Leard, Lorne Valley, was the scene of much gaiety on the evening of May 26th.

a pleasant but brief trip has returned home.

Mrs. Isabel Johnston, Toronto, has arrived at her home where she will be with her mother, Mrs. W. A. Johnston, Peters Road, who is seriously indisposed.

The schools at Alliston, teacher Mr. Beck, Peters Road, Miss McSwain, of Alma and Mr. Mellichamp are being well attended and let us hope appreciated by the pupils interested, as this is the time and place for mind development—the spring time of life.

With the ground well saturated by the recent copious rains and the sun shining its magic in flowers, wood land, meadows and cultivated fields present a lovely appearance in their new robe of green.—P.

Rev. R.R. St. John to Receive Litt. D. From De Paul

(The New World, Chicago.) The Rev. Richard R. St. John, associate editor of Extension magazine, will receive the honorary degree of Litt.D. at the thirty-ninth annual commencement exercise of DePaul University, to be held in the university auditorium, Wednesday afternoon, June 9, at 2:30 o'clock.

Father St. John, a native of Souris, Prince Edward Island, took his theological studies at the Grand Seminary, Quebec, Canada. Following his ordination, he was secretary to the Most Rev. Francis C. Kelley, Bishop of Oklahoma-Texas. In 1928 Father St. John came to Extension society as director of the Order of Martha (Ladies Auxiliary to Extension Society). At the present time he holds the position as director of the Order of Martha, associate editor of the Extension magazine and Book Reviewer.

Graduation week will open Sunday, June 6, with the Baccalaureate Services at 11:30 A.M. in St. Vincent's Church, with the Rev. Walter E. Case, C.M., head of the English department at DePaul, delivering the Baccalaureate sermon.

The pontifical High Mass will be celebrated by a former graduate of the university, the Most Rev. Paul B. Misner, C.M., bishop of Kansas, China. The Rev. Martin V. Moore, C.M., will be the deacon; the Rev. Daniel J. McHugh, C.M., subdeacon; the Very Rev. Michael J. O'Connell, C.M., assistant priest.

A machine that smokes four cigarettes at a time to test them chemically to determine their effect on smokers has been invented by three Virginians.

Both Buses leave Charlottetown at 7.30 a.m. to connect with early boat train at Borden. Commencing Saturday, June 5th, Bus leaving Charlottetown at 10.20 a.m. connects with mainland S.M.T. Bus Service at Tormentine via 1.00 p.m. boat.

Elmira-Charlottetown Service: Leave Elmira at 7.15 a.m. Leave Souris 8.00 a.m. Arrive Ch'town. 10.15 a.m. Leave Charlottetown 4.30 p.m. Arrive Souris 6.43 p.m. Arrive Elmira 7.20 p.m.

If Business Is To Lead

Men of wealth and industry must heed well the lesson of the lean years: Profit is real only when it secures the happiness of all.

(By Sir Edward Beatty, Chairman and President, Canadian Pacific Railway)

What sort of business leadership was it that led the world economy to a bright peak, then dropped it into a dismal slough, all within this decade? Or was the lack of business leadership to blame? And what of business leadership today—and tomorrow?

Before the depression, from which most of the world is now happily emerging, many nations experienced a period of wild enthusiasm and eager enterprise such as had seldom been seen before.

Did it then occur to the businessmen of those nations that it was not enough to say to a worker, "Here is work and here are good wages? Did we stop to think when we had made the son of a farmer to a mechanic's bench in the city or a youth from a fishing village to a big city office that we had undertaken the inescapable obligation of seeing that he could still live?

Did we, in these great days, attempt to stop to think when we offered wages? Did we attempt to give unskilled men and women against the dangers of speculation? Had we not every reason to know that, should speculation end in disaster, business would be blamed?

And in the years of readjustment, were businessmen leaders? We turned, I think, from a period of optimism and individualistic enterprise to one of deep pessimism and rash attempts at external interference with the ordinary course of business.

Did we, in these great days, attempt to stop to think when we offered wages? Did we attempt to give unskilled men and women against the dangers of speculation? Had we not every reason to know that, should speculation end in disaster, business would be blamed?

Yet, business must provide leadership. Now, I do not believe for one moment that we shall ever find any successful system of conducting society except to leave men free to seek the form of profit which attracts them. But, in that pursuit men must use wisdom.

Rotary articulates a very lofty ideal in its terms: that the truest form of profit is service. There can be no simpler truth. He who thinks today of his own profit as though he lived alone is pursuing the will-o'-the-wisp. Money obtained by transactions which impoverish great numbers of people, industrial profit won by oppressing the workers of a nation as a mere reservoir of labor to be tapped when times are good and left unused when times are bad, safety sought in investments which bear no risk—none of these forms of profit can ever be real.

There is a converse of this principle, however, and it is just as true. The truest form of service is profit. The one function which any man can perform for society is to add to its wealth. No man can do that except by seeking profit at all times. He may find his profit in the pleasures of creative effort, in producing a picture or a book, in service for the relief of suffering, or in contributing to the good government of his city or nation.

The first leadership which a nation needs from its businessmen,

HEALTH

A HEALTH SERVICE OF THE CANADIAN MEDICAL ASSOCIATION AND LIFE INSURANCE COMPANIES IN CANADA

UNDULANT FEVER, A MILK-BORNE DISEASE

Undulant fever in human beings is caused by the same germ that causes contagious abortion in cattle. Man contracts the disease with infected animals, or by handling infected milk.

The symptoms of this fever include recurrent rises of temperature with drenching sweats, headache, general pains, lassitude, lack of appetite and complete disability for months. It is altogether likely that many cases of neurasthenia among country people is due to undulant fever.

It was only in 1924 that the relationship between undulant fever and contagious abortion was established. This knowledge has intensified the interest in a subject affecting so wide a range of the population.

The affection is closely akin to Malta fever, a Mediterranean disease contracted from the use of the raw milk of goats.

Undulant fever is on the increase on the continent of America. It is very general in the United States. At least one case has occurred in every county in Southern Ontario. Since 1929, 480 cases have been found in Ontario alone, the greater number of cases occurring in adults.

The diagnosis is readily made by laboratory tests. If we leave out of consideration the cases derived from close contact with affected animals and the handling of the meat of such animals, the one certain preventive is to abstain from the use of raw milk. Pasteurization or boiling of milk destroys the germ causing the infection. Among dairymen it is impossible to avoid close contact with animals, a considerable proportion of which are liable to be affected with the organisms causing undulant fever. There exists no ready protection for the butcher or other handler

VELVET MITTENS

Gloves mostly of the short gauntlet, or short-to-wrist type, match the fabric of the coat or frock they accompany. Often the flower pattern of a frock is embroidered on the back of gloves.

Gold and silver gilt gloves match bells and buttonholes, while for summer wear, pique, organdie, tulle and lace gloves will be worn. Coloured velvet mittens are an innovation for evening wear.

The Irish Free State has required that not less than one sixth by weight of home grown cereals must be used in the manufacture of maize meal mixture.

Ford President Starts Newest Turbo-Generator

Wallace R. Campbell, president, is shown above throwing the valve which started in service the first of two new British-built turbo-generators installed at the Ford power house at Windsor, Ont.

The new generator develops 5,000 kilowatts. A second generator, developing 20,000 kilowatts, is being completed by British manufacturers and will be shipped overseas shortly for installation in the power house. The two new generators and two new boilers of an advanced type new to Canada, generating steam at 800 pounds pressure, 800 degrees Fahrenheit, are

major units in a power plant expansion and modernization program now in progress which will cost \$1,700,000 when completed. The two new generators, together with a 10,000 kilowatt generator now in service, will give the plant a rated capacity of 35,000 kilowatts, as compared with the present capacity of 15,000 kilowatts. The additional electric power capacity is required for increased volume of manufacturing operations, and to meet the growing demands of electric furnaces and electric welding operations.

In Memoriam

NORMAN MACSWAIN

One of the outstanding members of Dundas Congregation passed away after a illness of some months, at his home in Mt. Hope on April 26th in the person of Norman MacSwain, aged 79 years.

Mr. MacSwain was an esteemed Elder of Dundas Congregation for about forty years, a Sunday School teacher for several years, and a faithful visitor and helper of the sick and needy. He will be gratefully remembered in many homes for his acts of kindness and helpfulness. He gave heed to the Savior's words of commendation: "I was sick and ye visited me."

Mr. MacSwain was twice married. His first wife was Isabel Nicholson. The surviving members of the first family are: Mrs. Russell Hunter, Strathcona and J. D. in Alberta. Three of the first family predeceased the father. He is survived also by his second wife, Margaret Macdonald and a family of two sons and four daughters. The sons are Sterling and Sheldon on the old home in Mt. Hope. The daughters are: Mrs. George Perry, Alberta, Mrs. W. W. Anderson, St. Peter's Bay, Mrs. Lloyd S. Cox, Morell, Mrs. E. H. Anderson, Charlottetown. The family bear the marks of good home training, so essential to Christian citizenship. The funeral services were conducted by the pastor Rev. Alexander Pirih, assisted by Rev. W. E. Aitken, St. Peter's, and were very impressive and largely attended.

The "Dundas quartette" gave a fine rendition of the "Unclouded Day," reminding sympathetic hearers of the heaven y home which will have "no need of lamp light or sunlight, for the Lord giveth them light."

Interment was in the cemetery adjoining the church, which he loved and served during his life time. Of him, it could be said: "He was a faithful man, and feared God above many."
