Security Prices Drift Lower On Mt'l. Market

(C.P. By Guardian's Special Wire) (A. P. By Guardian's Special Wire) Montreal, Sept. 10.—Security prices drifted lower on the Montreal Stock Exchange in today's trading. Losses ranged from a fraction to nine points and reflected the softer Wall Street tone as well as the uninspired attitude of traders here.

Some of the leading issues opened steady and declined only in the late trading. Thirty-four stocks were traded in board lots, of which 18 declined, five gained and 11 remained unchanged.

Consolidated Smelting was a soft spot, dipping nine points to 130, a price which is more in keeping with the recent decline in sales and which reflects weaker metal prices in New York. International Nickel was off 3-8 at 23 3/8 after holding steady through most of the morning session.

MINING

(Canadian Press) TORONTO, Sept. 10.—Weakness on the Toronto stock market today was reflected in the mining list of the Toronto exchange today which grew to considerable proportions in the secondary market. Moderate recessions were general. Noranda retreated with gold and silver shares were only mildly disturbed by the selling of a group of heavy stocks.
