GIDEON GAY.

The many friends of Mr. and Mrs. Lemuel E. Jay of Fanning Brook deeply regret the death of their darling baby Gideon, at the early age of ten months although so very young he was a bright and promising child. HE IS IN PEACE.

Tender Shepherd, thou hast stilled Now thy little lamb's brief weeping; Oh, how peaceful pale and mild In its narrow bed 'tis sleeping, And no sigh of anguish sore Heaves that little bosom more.

In a world of pain and care, Lord, Thou wouldst no longer leave it. To thy meadows bright and fair Lovingly Thou dost receive it. Clothed in robes of spotless white, Now its dwells with Thee in light.

HAVE PURE BLOOD

Hood's Sarsaparilla Makes Pure, Rich Red Blood.

Your heart works night and day without a pause. It is the principal organ of the circulation of your blood. It is of the utmost importance that it should do its work well. The quality and quantity of your blood have much to do with its action. If this fluid is pure and abundant, your heart and other vital organs act with more energy than when it is defective in quality or deficient in quantity.

Hood's Sarsaparilla makes the blood pure and abundant. It is the one old reliable medicine that has been sold for forty years, for purifying the blood. There is no better blood remedy, appetizer, stomach tonic. It embodies the careful training, experience, and skill of Mr. Hood, a pharmacist for fifty years, in its quality and power to cure.

Our Unmixed Fertilizers Show the Way to Bigger Crops and Better Profits

All the successful Island farmers use some kind of fertilizer on their fields, and practically every one who has a bigger year's yield, each year, than his neighbor, uses our UNMIXED FERTILIZERS.

For with these fertilizers the land can be treated scientifically to produce a maximum crop. One field may be run out more than another, or even a section of one field may be less fertile than the remainder, but—

With these fertilizers you can build up the land a lot over the entire farm to its natural state of productiveness. You can prepare the exactly right fertilizer for any crop and give any plot, or any field, the right heart for that particular crop.

You mix these fertilizers yourself, saving all expenses, and preparing the Superphosphate, Basic Slag or Nitrate of Soda, in just the right quantity or proportion to suit the individual needs of the different fields.

You save money, save work, save work by using UNMIXED Fertilizers. You get a bigger crop, you get better produce, you get more profit for your work, when you use UNMIXED Fertilizers.

But don't take our word for it—write for testimonial from successful Island farmers and get some of the free books on farming we are sending out now. WRITE TODAY, for the supply will not last long.
