West Leads Way With Increases In Graduations

Copyright, 1935, by The Canadian Press

The trend in higher education in Canada is upward and westward, judging by the number of graduates from Canadian universities expected this spring. The lure of college education, dimmed for a time by economic conditions, is brighter for the year 1935.

There is an actual increase over last year in the number graduating from western universities. More degrees will be handed out in Manitoba, Saskatchewan, Alberta, and British Columbia than in 1934. No slackening is reported in Ontario and Quebec. The slackening in the high tempo reached in recent years in the Maritime provinces is slight.

Approximately 5850 hoods will be distributed at graduation ceremonies about 15 more than in 1934, returns from 20 colleges indicate. This number will be slightly increased by graduates at theological and other institutions.

The University of Toronto will turn out some 1600 graduates, there being little change from last year. McGill expects about 500, an increase of 60. In the Maritime provinces all degree-granting colleges report decreases.

Development of the west's mineral and power resources and other fields of endeavor continue to be reflected in the optimism of students and faculties at the four universities. All the institutions report an increase in graduates and unlike their fellows in the east the future in most cases is painted for them in rosy colors.

University heads and students east of the Great Lakes while not minimizing conditions in the world of commerce feel an all-around improvement has set in and problems awaiting the job-seeking graduate will gradually be solved.

In the aggregate, graduates in the arts course show a slight decrease from last year. Some 2500 will receive parchments, a difference of about 100. Science and engineering will account for approximately 850 or about 50 more than last year.

Among the co-eds, household

Confidence that Prospects are Improving for Graduates Leave College

Copyright, 1935, by The Canadian Press

Confidence that prospects are improving for graduates of Canadian universities is expressed by heads of scholastic institutions as nearly 6,000 young men and women bid farewell to lecture rooms and studies to take up the search for positions in the professional, scientific and business life of the country.

Greatest optimism is noted in the western provinces where an increased number of graduates leave college halls. There, new avenues of employment are being opened up with development of the West's natural resources, particularly in the mining field. Throughout the east the opinion is general that business is on the upgrade and the outlook for graduates, in mining, geology, chemical engineering and other specialized courses. For arts graduates, with no vocational training, the future is regarded as somewhat obscure.

Presidents and heads of faculties say the graduate of 1935 is made of sterner stuff than the collection of a few years ago who stepped out into a world at the flood-tide of prosperity, teeming with opportunities for the university-trained man. In many cases he will be in competition with his predecessors.

A warning against discouragement on finding that knowledge acquired at a university does not earn instant recognition was given to McGill students recently by Chancellor E. W. Beatty. "An enduring foundation has been laid and your ultimate advantages cannot be questioned," he said. "But in the beginning I would suggest that you reconcile yourself to a measured and unburied progress."

Discussing prospects for Dalhousie University, graduates President Dr. Carleton Stanley said while it was difficult to make any forecast he was amazed to find that last year all medical school graduates found berths and the class was a large one.

"In casual conversations recently, I was surprised to find how many undergraduate students have work for the vacation," he continued. "There would seem to be considerable improvement in this respect. As against this, no one need be told, I think, that times are pretty hard."

President R. C. Wallace of the University of Alberta was of the opinion that on the whole prospects are better for those graduating. "In electrical engineering for example, men are being placed this year in a field where conditions have been difficult for three years," he said. "It is noteworthy applications in applied sciences are greater than facilities we can provide."

Dr. Wallace continued, "The quality in applying knowledge to practical use is higher in the student body than that of the pre-war student. The student of today has a more direct approach to things of life and is determined to face a future that will give a better opportunity to young men and women who are trained, and will see to it that this is somehow achieved."

TO HOG PRODUCERS OF PRINCE EDWARD ISLAND

The Federal Department of Agriculture is suggesting that Rail Grading of Hogs be adopted here.

This means the Hogs will be graded, after killing, by Government Graders and paid for accordingly on dressed weight at Plant, with a bonus on Selects and a reduction on under grades.

Would you give us your opinion on this policy by writing us at once. At the same time would you suggest any changes either in type of Hog or method of feeding that in your opinion would be in the interest of the industry.

We may say that too many Hogs at present, while having type and weight for Selects are not properly finished and are too thin, bacon being very irregular in thickness, and Hogs appearing to have too much growth in proportion to flesh.

Is this the fault of type of Hog or of feeding? What is the remedy?

We would appreciate your writing us at once.

Charlottetown, P. E. I.

Consisted of a Reading

"The Easter Egg" by Mrs. Peter Gallant and a "candle contest" prizes being won by Miss Emily Gallant. It was moved and seconded that \$3 would be given to the Cancer Fund.

Next meeting is to take place at the home of Mrs. Nelson Gallant, roll call to be answered by "what I think is the Greatest Discovery" crease. The western universities reflect this interest in particular. At the University of Alberta 22 graduates specializing in mining engineering will graduate compared with 10 in 1934.

Western graduates in mining during the past two years are reported to have experienced little difficulty in obtaining employment and their prospects are good this year.

Universite de Montreal and Laval University, Quebec, largest scholastic institutions in French Canada, both will have more graduates than last year. The Montreal graduating class is expected to number well over 600 including 34 in agriculture, while Laval will probably graduate nearly 190.

North River Institute

The regular monthly meeting of the North River Women's Institute was held at the home of Mrs. Jack Moreside on the evening of May 1st, the President presiding.

Meeting opened in the usual manner, sixteen members responded to roll call by naming a native tree. There were five visitors present. Some correspondence was read and discussed. It was moved and seconded that \$2.00 be sent to the Cancer Fund, also decided to have the school signs re-painted.

The feature of the evening was a most pleasing and instructive talk on "Flower Gardening" by Mrs. Gordon McMillan. Mrs. McMillan having had a wide experience in this work, gave many practical hints. At the conclusion of her address Mrs. McMillan agreeably surprised each member with a generous gift of gladioli bulbs.

A hearty vote of thanks was extended to Mrs. McMillan for her interesting and helpful talk. A date for lunch was served and a pleasant social hour enjoyed. Mrs. Glen Owen kindly invited the members for next meeting, on June 5th when roll call will be answered by "What women dislike most in men."

Lunch committee: Mrs. Roy McKinnon, Mrs. Parker Home, Miss Leah MacKinlay, Miss Mary Doyle.

Fairview W.I.

The May meeting of the Fairview Women's Institute was held at the home of the president, Mrs. Annie Currie. There was an attendance of 16 members and 3 visitors. With the President in the chair, the meeting opened by singing the hymn "A Minute of Last Meeting" was read and approved. Roll call was answered by a riddle. The members returned lottery tickets which were sold on a hooked rug. The same was drawn for, the holder of the lucky ticket being Mrs. Stanley Taylor. Some correspondence was read by the secretary. It was decided to put the large rug which was hooked by the Institute on display in Charlottetown.

New window locks were reported as having been bought for the school. The members decided to go to the school some day to prepare the ground for flowers. Mrs. Al. McIsaac reported for the sick committee. Next meeting to be held at the home of Miss Selma Currie. Meeting closed by singing, "God Save the King."

Queen Mab Comes High

LONDON, May 15—(C.P.)—A first edition of Shelley's "Queen Mab" a small booklet issued in 1813, was sold at Sotheby's for \$2,500.

Future Better As Graduates Leave College

Copyright, 1935, by The Canadian Press

Confidence that prospects are improving for graduates of Canadian universities is expressed by heads of scholastic institutions as nearly 6,000 young men and women bid farewell to lecture rooms and studies to take up the search for positions in the professional, scientific and business life of the country.

Greatest optimism is noted in the western provinces where an increased number of graduates leave college halls. There, new avenues of employment are being opened up with development of the West's natural resources, particularly in the mining field. Throughout the east the opinion is general that business is on the upgrade and the outlook for graduates, in mining, geology, chemical engineering and other specialized courses. For arts graduates, with no vocational training, the future is regarded as somewhat obscure.

Presidents and heads of faculties say the graduate of 1935 is made of sterner stuff than the collection of a few years ago who stepped out into a world at the flood-tide of prosperity, teeming with opportunities for the university-trained man. In many cases he will be in competition with his predecessors.

A warning against discouragement on finding that knowledge acquired at a university does not earn instant recognition was given to McGill students recently by Chancellor E. W. Beatty. "An enduring foundation has been laid and your ultimate advantages cannot be questioned," he said. "But in the beginning I would suggest that you reconcile yourself to a measured and unburied progress."

Discussing prospects for Dalhousie University, graduates President Dr. Carleton Stanley said while it was difficult to make any forecast he was amazed to find that last year all medical school graduates found berths and the class was a large one.

"In casual conversations recently, I was surprised to find how many undergraduate students have work for the vacation," he continued. "There would seem to be considerable improvement in this respect. As against this, no one need be told, I think, that times are pretty hard."

President R. C. Wallace of the University of Alberta was of the opinion that on the whole prospects are better for those graduating. "In electrical engineering for example, men are being placed this year in a field where conditions have been difficult for three years," he said. "It is noteworthy applications in applied sciences are greater than facilities we can provide."

Dr. Wallace continued, "The quality in applying knowledge to practical use is higher in the student body than that of the pre-war student. The student of today has a more direct approach to things of life and is determined to face a future that will give a better opportunity to young men and women who are trained, and will see to it that this is somehow achieved."

Students Better Prepared

Comparing modern students with those of 25 years ago, Prof. H. E. Bland of the Department of Chemistry at Mount Allison University, Sackville, N.B. declared that in his opinion students today are better prepared for college.

"A larger number are majoring in some specific field of study and a much larger number are going to obtain degrees," he said. "Probably quite as large a number of graduates, proportionate to numbers, are obtaining lucrative employment as in previous periods of depression, particularly in the field of science."

Comments by graduating students varies according to their prospects of obtaining positions. Those graduating in science courses are encouraged by recent developments but arts graduates, except those preparing for law, medicine, theology and other professions, feel their prospects are not particularly bright.

The following statement by an agriculture student in the University of British Columbia who has a flair for poultry farming is interesting.

"This year, I believe, is one that graduating students will welcome. While the Faculty of Agriculture is very small compared with the remainder, I think our point of view is shared by the majority. I intend applying my university teaching practically along the lines of chicken fancier and I have already made a number of contacts which would not have been possible several years ago."

W.M.S. MEETING

On Wednesday evening the 8th inst. the Eldon section of the W.M.S. of the Presbyterian Church was entertained at the Manse as guests of Rev. and Mrs. Griffiths. Much useful work was carried out during the meeting with Mrs. J. R. McWilliams as President and Mrs. Ella McDonald as Secretary. Mr. Griffiths gave the society a brief and much appreciated address, and all were delighted to see him so well and fit again after his recent indisposition. A tasty lunch was enjoyed by all at the close. On Tuesday of this week Mr. Tomlinson and Hugh Brockman also were held. Lindsey is pictured, left, with an attorney in court in Columbus.

REICHSTAG TO CONVENE TUESDAY

Hitler To Announce Foreign Policy Eagerly Awaited By European Powers.

(A. P. By Guardian's Special Wire) BERLIN, May 14.—Adolf Hitler today convened the Reichstag—divested of legislative powers under the Nazi regime—for Tuesday, May 21, to hear him deliver his eagerly awaited address on foreign policy.

"Friends of the realm leader tonight said he would again express his willingness to scrap every gun, every ship of war, every fighting plane the Reich has if the rest of Europe does likewise."

An earlier announcement said the Reichstag session would be held Friday evening at 7:30 o'clock and telegraphic invitations citing them for that day and hour actually went out to the legislators. The propaganda ministry was quick to recall them, however, after Hitler, deciding with characteristic suddenness to wait until after the funeral Saturday of Germany's late Polish friend, Marshal Joseph Pilsudski, settled upon the new date.

So harassed was the propaganda ministry at the confusion created by the Führer's unexpected change of mind that officials for some time refused flatly to give out any information as to the reason for the change or the date finally chosen for the session.

Particularly dear to Hitler's heart, and his loyal followers, is May 17, for that is the second anniversary of his first major foreign-political address to the assembled legislators.

MOUNT TRYON

The school is progressing favorably under the skillful management of the teacher, Miss Amelia MacDonald.

His friends are glad to see Mr. William Quigley out again after being confined to his home with the flu.

The people of Mount Tryon had a busy day when their school caught fire but some of the handy neighbourhood boys gathered and after a couple of strenuous hours saved the buildings with only the roof to shingle. They later all turned in and soon had it completed.

Mr. Wilbur Wadell made a business trip to Summerside the other day.

What might have been a serious accident happened when Jimmy Quigley was bitten by Mr. MacDonald's dog. While passing the road the dog caught him and tore his hand badly. The dog was soon caught and done away with, the owner greatly regretting the incident.

Mr. and Mrs. Joseph Francis have taken up their new home in Mount Tryon. (Patriot please copy)

Professor Found Dead At Desk

(C. P. By Guardian's Special Wire) SASKATOON, May 14—His head resting in his hand as if he had fallen asleep at his work, Dr. J. T. McGibbon, 37, professor of anatomy in the College of Medicine was found dead before his desk at the University of Saskatchewan today.

The body was discovered by Mrs. McGibbon who came to seek her husband after a night of anxiety. Doctor McGibbon, who had been working late hours, recently, had failed to return home from his office Monday night.

WATERFRONT ACTIVE—No less than four schooners from Prince Edward Island are now moored at the Town Wharf with cargoes of agricultural produce for sale. All in all, it looks as if the East River will be busier this year than the past two, when the M. S. "Gaspe County" made several trips from Montreal. It is said that goods of various types will be brought here this year by water from the Upper Provinces.—New Glasgow News.

W.M.S. MEETING

On Wednesday evening the 8th inst. the Eldon section of the W.M.S. of the Presbyterian Church was entertained at the Manse as guests of Rev. and Mrs. Griffiths. Much useful work was carried out during the meeting with Mrs. J. R. McWilliams as President and Mrs. Ella McDonald as Secretary. Mr. Griffiths gave the society a brief and much appreciated address, and all were delighted to see him so well and fit again after his recent indisposition. A tasty lunch was enjoyed by all at the close. On Tuesday of this week Mr. Tomlinson and Hugh Brockman also were held. Lindsey is pictured, left, with an attorney in court in Columbus.

BUSINESS GIRLS MEET

The business girls unit of the C.W.I. held their annual membership tea in their hall on Monday evening the 13th inst. The hall presented a very clean and inviting appearance. A very pleasant evening was spent in social chat and bridge playing. A delightful luncheon was served by the members. Mrs. Frank Murray, president, presided. Miss Hilda Doucette, vice-president, presided. Special prize for nearest to half highest score. Miss P. Gaudet. Door prize Miss Ruth Walsh. A special membership cake was lotteried and the lucky ticket holder was Mrs. Murray. A sing song and God save the King closed a most delightful evening.

JUNIOR RED CROSS MEETING

The "Fairview Helpers" held their first meeting in the school room on Friday afternoon, May 10th. The vice-president, Mae Cavanagh presided. Meeting opened by singing "O Canada." Minutes of last meeting were read and approved. Roll call was answered by jokes. The Service Librarian, Mrs. Margaret McDougall was appointed on the library committee for the next two weeks. Alton Burdett, Keith Taylor were appointed to see that fresh water is brought every day. The teacher showed the members a pretty Easter card received from Miss Milla Creek J.R.C. A note of thanks to the committee of solos by Reta Cavanagh and Adele Currie; recitations by Adele Currie, Stella Cavanagh, Mary Cavanagh and Alfred Currie. Roll call at next meeting to be answered by a famous man and why he is famous. Meeting closed by singing "God Save the King."

BELEFAST

The largest Mother's Day congregation of the last few years gathered at the Presbyterian Church, Belfast, on Sunday evening, when the Y. P. S. C. E. and Sunday School scholars, carried out the denominational Mother's Day programme, copies of which were distributed among the hundreds present. In the printed programme were embodied hymns, responsive readings of scripture and responsive prayers, these parts being led by the pastor, Rev. D. L. Griffiths who presided, and who during the proceedings delivered a brief and lucid address on "Mother's Day as an Institution." The stated address "Mother's Faith" was very creditably taken care off by Miss Katie MacEachern. The program, however, was supplemented by appropriate recitations by Mrs. Lena MacEachern and Miss Flora Gillis, their

PATRIOTIC ADDRESS AT MONTAGUE

Address delivered by Mr. J. A. Dewar of New Perth at Montague, at the celebration of the King's Jubilee on May 6th.

Mr. Mayor, Ladies and Gentlemen:—I wish to thank the committee of Management for the kind invitation to deliver a short ten minute address on this auspicious occasion, the celebrations of the Silver Jubilee of His Majesty King George and his consort, Queen Mary.

Though there have been many brilliant stars in the gallery of English Kings and Queens, it is universally conceded that our present Monarch is one of the ablest and most dearly loved since good King Alfred's time.

Not excepting his father Edward the Peace-maker, statesman and diplomat, or his illustrious grandmother, Queen Victoria "whose price was far above rubies," as an example to her family and to her subjects. When after one of the longest and most glorious reigns in the British history she threw down the sceptre—the command of the King of Kings—I think it is Bobby Burns who has used the expression "The heart benevolent and kind, the most resembles God" and the King and Queen have entered into the joys and sorrows of all classes of their subjects by their deeds of benevolence and kindness, as well as by their virtuous example, and in turn have earned the people's respect and gratitude.

His Majesty came to the throne at a difficult time and he has been called on to fill an important role in one of the most exciting and terrible periods in the world's history. He has been crowned with the great achievements of science, the conquest of the air by radio and the aeroplane, and darkened by the sombre hues of tragedy.

The King had been trained to the life of a sailor and many of the wise ones thought he would be unequal to the task of grappling with the grave problems of state, but they had yet to learn of his deep insight into the Constitution of Government.

The rejection of the budget by the House of Lords in 1910 created a problem and it was the King's diplomacy that solved the difficulty.

Four years later he was called on to enter the "Valley of the Shadow" in that carnival of madness known as the "World War" where the flower of mankind was slain and a yoke of debt placed on those who remained caused conditions which resulted in the present World depression, he used keen judgment.

It is well known that the King and Queen have participated in the various relief activities incident to those trying times in a manner that has never been exceeded, by those holding such an exalted position.

There are some people who think that a more democratic form of Government would be more suitable and yet democracy has attained a greater degree of perfection under our British Constitutional system than in any other country in the world, not even excepting the United States and it has been a grand experiment there.

The British people believe that the stabilizing influence of a system that places the monarch above

WARM WATER AIDS GROWTH OF FISH

MAGOG, Que., May 15—(C.P.)—Experiments conducted at the Dominion Government fish hatchery here have increased by 45 times the growth of fish in the time they hatch to the fingerling stage.

Last October some 100,000 eggs were obtained from speckled trout and placed in the hatchery here. June 1 next 50,000 fingerlings, 25 times the weight they would ordinarily have attained, will be distributed in waters of Quebec province. The weight increase was obtained by keeping the spawn in a constantly flowing stream of water, maintained at a temperature of 50 degrees. Authorities discovered fish grow more quickly in water warmer than it would normally be during winter months. Usually the young trout start to feed towards the end of May and distribution takes place in October. Under the new method feeding starts around the first of January, thus allowing over four months of additional growth.
