At the City Police Court Saturday morning the case of Mary Jane McMillan was heard. Sergt. Bradley was the only witness examined. He testified that on searching the premises of Mrs. McMillan he found a regular constituted bar with counter and a full supply of liquor and beer on hand, up stairs in a concealed cupboard, or fixture under the window. There were bottles of whiskey and 39 of brandy and one bottle of gin. The Inspector said he considered enough evidence was offered to establish a prima facie case. As no defence was offered the Magistrate imposed the penalty of third offence, a six months imprisonment in Queen's County Jail.

A serious case of alcoholic poisoning occurred in the city yesterday afternoon. Leo Chipman, age 23, a resident of the lower end of Dorchester street being the victim. He is now in hospital. He was found lying on the sidewalk about 3.30 o'clock in the afternoon. Officers Carter and Hooper on passing the rooms of the Labor Union, corner of Water and Queen streets, saw a man stagger in the door and fall to the sidewalk, where he remained for a few seconds, when several men came out and carried him into the quarters. Dr. Ledwell was summoned about twenty minutes to seven o'clock. On going to the union quarters he found Chipman in a comatose condition, and it was difficult to determine whether he was suffering from alcohol or from a case of cholera. The incident is due to the fall on the sidewalk.

The unfortunate man was removed to the Charlottetown Hospital, where Dr. Kelly was in consultation with Dr. Ledwell, and every restorative measure available was administered. After washing out the stomach it was discovered by the doctors at the Hospital that the stomach contents contained a very large percentage of alcohol. At the hour of going to press the patient was still unconscious, and Doctors Ledwell and Kelly entertain serious doubts of his recovery.

As to the Experimental Farm an arrangement is entered into by which the purchase of the property by the Government is deferred until before despatch on Mount Edward Road will be completed. The land will be conveyed to the Provincial Government, but the Federal Government is to pay at the rate of \$50 per acre toward the purchase price and take a lease for 999 years from the Province, conditions upon the land being continuously utilized for the experimental farm. Failing that the property will revert to the Province. The Dominion will erect the necessary buildings, place a superintendent in charge and carry on the operations of the Farm.

The Maritime Merchant Halifax, in referring to fresh fruits and vegetables says: The principal feature of this department today is the dulness of the potato market, under which there has been a slight decline in price. The Upper Canadian markets are also dull. This, however, is in contrast to conditions further west, where a Prince Edward Island shipper recently sold 10 carloads at a price higher than that prevailing locally. Lemons are arriving in large quantities and jobbers have to repack them. Consequently, the price is quite firm. Strawberries are getting lower in price, supplies still coming from the States in fair quantities.

The esteemed Patriot rises frequently to ask questions. Will it please to inform its readers why under full Liberal Government control of the freight rates it costs as much to transport a ton of produce from Toronto to Sydney? The Patriot has itself condemned this injustice. The Liberal Government could remedy this in an hour but will not do so. Why is it not done? There is a notable change of attitude on the part of Liberal leaders and the Patriot with regard to the Tunnel and our winter transportation generally, since before the election. Why is this?
