## Says Church Is Weakest In Cities

Great Centres Becoming Paganized, Declares United Church Minister in Referring to Religious Conditions in Large Cities.

WINNIPEG, Sept. 13.—The report of the Home Missions Committee of the United Church of Canada containing information on the general work of the church in Canadian provinces was adopted at the general council sessions here today.

In connection with this report A. W. Mayberry, of Moose Jaw, Sask., secretary of the settlement committee of Saskatchewan, remarked upon the dearth of ministers and laymen to man the churches of that province. His suggestion that the home mission committee be permitted to increase the grant to laymen so that full salary would be \$1,500 instead of \$1,200, was adopted.

Rev. Robert Hicks, of Wallaceburg, Ont., referred to religious conditions in large cities. While many young men and women of the church were being sent in considerable numbers to various parts of the world, he stated, the great cities of the continent were in danger of being slowly paganized. The general council concurred in his plea that very large grants be made for work in the cities and that the matter be referred to the committee of the council.

Rev. E. J. Millyard of London, Ont., submitted the final report on the new proposed pension scheme and Rev. Dr. D. McConnell, of Amherst, Ont., suggested special cases which did not appear to be covered by the new plan. It was thereupon suggested by Rev. S. W. Dean, Secretary of the Pension Board, to the favorable consideration of the committee.

The committee on education and colleges reported many problems in connection with various institutions of the church. The United Theological College of Montreal wished permission to appeal for money, as the former buildings and a large percentage of the endowment was rendered to the non-concurring congregations, and the committee recommended compliance with this request.

Several Presbyteries sent memorials to this committee regarding a list of colleges, the degrees of which were to be recognized by the church. It was agreed to refer the matter to a list, and that in the proceedings of the church the degrees of no other colleges would be recognized.

In the matter of peace, dealt with in a motion last night, commissioners today declared a further statement on the question was necessary, and the business committee was asked to set aside further time for consideration of the question.

## Porto Rico Hit By Hurricane

(Special to the Guardian) NEW YORK, N. Y., Sept. 13.—A severe hurricane struck Porto Rico early today and was expected to reach the island of Haiti by tonight. All business has been suspended in Porto Rico. All land wires were down and no reports were received as to loss of life or property damage. One message from San Juan said an east-northeast wind of 90 miles velocity was blowing, with the barometer at 29.50.

## Labor Minister and British Harvest Labor

HON. PETER HEENAN DEFENDS MOVEMENT OF BRITISH MINERS TO CANADA FOR HARVEST LABOR.

(Canadian Press) TORONTO, Sept. 13.—Addressing the Dominion Trades and Labor Congress today Hon. Peter Heenan, Minister of Labor in the Dominion government, declared that a persistent campaign is being carried on in Great Britain to stampede the Dominion government to bring over British unemployed by the shipload.

"This is being carried on for two purposes," the minister said. "One is to meet a political need on the other side and the other is to provide men for every job that is available in this country."

As an instance Mr. Heenan stated that advertisements were being published in England to the effect that coal miners were wanted in Nova Scotia at higher rates of wages, when as a matter of fact, there were many miners already out of work in that province.

"It's a damnable lie," declared Mr. Heenan "to say that the British unemployed don't want to work and that they are content to subsist on the doles. They want to work and so far the reports of the Dominion government are eagerly received."

"Canada ought to have something to say to this," he continued. "Canada ought to be past the stage where we can't take up a paper and read calmly that the British magistracy has allowed a man convicted of crime to go on suspended sentence if he migrates to Canada."

The Labor minister defended the movement of British miners to Canada for harvest labor, and pointed out that it was separate from the immigration policy generally. The government was informed, he said, that 75,000 harvesters would be required to take off the crop and on making enquiries from the provincial governments as to the number of men likely to be found in Canada was told that owing to the increase in employment the number who would take the excursions would be much smaller than usual.

"We knew we could get men in other parts of the world," he said, "but the British government offered us 25,000 men, accustomed to hard manual labor, and why should we turn down our own flesh and blood?"

"We placed the responsibility on the British government and limited the number we could accept to 10,000. We are prepared to stand by these men and see that they are looked after."

## Plot to Wreck Spanish Govt. Is Thwarted

OPPOSITION TO RULE OF PRIMO DE RIVERA AT BOTTOM OF TROUBLE. 2,000 ARRESTS MADE THROUGHOUT SPAIN.

BORDEAUX, France, Sept. 13.—Overthrow of the Spanish Government and the arrest of all its high officials for immediate trial and prompt deportation, were the avowed aims of the plot against the rule of Primo de Rivera, according to news trickling across the Spanish frontier.

The plot, says La Petite Gironde, one of the leading newspapers of this border city, was thwarted by the dictator's police. The police appear proud of the success of their coup, and have given out considerable information respecting it.

The newspaper states that the frontier towns of Hendaye and Bayonne have heard that nearly 2,000 arrests have been made in different parts of Spain. The prisoners are said to include all the leading plotters and it is added that the Archbishop of Saragosa, the Rev. Vidal Y. Veraguer, has been invited to retire to a convent in order to save himself from going to prison.

Taking advantage of the absence in Sweden of King Alfonso, the police says that the Spanish Liberal and Republican elements, together with Communists, decided to strike a blow which had been scheduled for later in the autumn.

Martinez Andio, Minister of the Interior, got wind of the plot early Tuesday and immediately conferred with police officials.

They drew up a list of persons to be arrested.

Taxis scoured Madrid throughout the early hours of Tuesday and more than a score of arrests were made in the capital, including Alexander Lerroux, leader of the Liberal Republican Party.

In Barcelona, Barrio Verro, a former deputy, headed the lists of prisoners. Several newspaper men, officials of some lodges of Free Masonry and the president of the local branch of the League of the Rights of Men were also taken into custody there.

## Tragic Accident Near Sackville

Three Prince Edward Island People Instantly Killed In Motor Accident Yesterday - Shocking Event Has Created Great Excitement in City.

The shocking news was received available, with the result that the accident near Sackville in which three Prince Edward Island people were instantly killed.

The unfortunate victims were: Mrs. Benjamin Binns, Charlottetown; Mr. James Dougherty, Charlottetown; and Mr. Clement Drake, Sackville.

The late Mrs. Binns was the wife of Mr. Benjamin Binns of this city. She leaves to mourn besides a sorrowing husband, one son Carl, a sister, Mrs. Thomas Dillon of Lynn, Mass., and a brother, John in Boston.

Mr. Dougherty was about 58 years of age and was an example of all that is best in a man. He was widely known throughout the city and province in general and was a great lover of all that is good and noble. He was an old and faithful employee of the Island Crossing, Westmoreland County, New Brunswick at 11:45 yesterday morning when the West-Boston Acadian Express struck the car which Mr. Drake was driving, instantly killing him and the other two occupants.

The driver was found in the car while Mrs. Binns and Mr. Dougherty were picked up a little distance from the scene of the accident. All three were dead when picked up.

Mr. Drake was returning to Boston where he had resided for the past fifteen years, but during that time he had always spent his vacation at his home in Cornwall, P. E. I.

Mr. Dougherty and Mrs. Binns were accompanying Mr. Drake, the former on a visit to his daughter, Mrs. Parker of Dorchester, Mass., and the latter on a visit to friends in Boston.

The party had left the city early yesterday morning.

The delay in getting the news was due to the difficulty in identifying the bodies. The car bore a Massachusetts number plate, and was registered in the name of Francis Drake, Boston. In Mrs. Binns's pocket book was found a letter from Lieutenant Governor Hertz, identifying a Miss Binns, and it was at first believed that Miss Binns of Prince Edward Island was the woman killed. This was the first clue to the fact that the occupants of the car were from this Province. The Chief of Police here was notified by wire and the car got in touch with every source of information.

## Accidents Cause 4,638 Deaths

(Special to the Guardian) NEW YORK, Sept. 13.—Accidents caused the death of 4,638 persons in New York last year, the New York safety congress announced. Of this number 942 were children between the ages of 5 and 14 years. Automobiles caused 1,135 deaths.

## No Potato Warehouse for Shippers this Fall

Negligence and Delay on the Part of the Federal Government in Speeding Up Construction of New Warehouse at Charlottetown May Cost Shippers Many Thousands of Dollars.

The matter of building the new potato warehouse at Charlottetown in time for the fall shipping it is now conceded, has been hopelessly bungled. The blame for this is placed upon the Federal Government, the storage of excess produce is due directly to the action of the Government in failing to order these piles by wire and demanding prompt delivery immediately after the fire. Had they left this matter to the contractors' hands, and had they taken pains to insure that the warehouse be completed on time, irrespective of some additional expense incurred upon the speeding up of the work, the building would be well under way and would be finished well within the desired period.

Plans for the construction of a warehouse similar to those of the Georgetown warehouse, were ready within three days after the fire, on time. As the matter now stands there is no prospect of the period for the construction of the warehouse being completed in time to insure that no reasonable expense would be spared to finish the work on time. As the matter now stands there is no prospect of the period for the construction of the warehouse being completed in time to insure that no reasonable expense would be spared to finish the work on time.

The contract specifies that "the let the contract at once, left the work to be commenced immediately after the person or persons contractors' hands, and insisted upon the work be speeded up so as shall have received due notification of acceptance of tender and the award to them of the contract. These tenders were in Ottawa on the 7th. In such a manner as will fully August and the contract was not awarded for some ten days after the tenders were in. There were delays all along the line.

The Government undertook to order the piles for the warehouse, and a leisurely correspondence on this matter seems to have been entered into. It took six weeks to complete the purchase. The piles were eventually shipped, but they have not yet arrived in Charlottetown. The contractors have had to borrow a few piles from the local Government and some from the Stand-Construction Company which are to our local shippers.

## Cabinet Changes Forecast

Home Secretary, Sir William Joynson-Hicks to Leave Politics Viscount Peel for Indian Post.

LONDON, Sept. 13.—Reconstruction of the British Cabinet is now understood to involve the removal of the Home Secretary Sir William Joynson-Hicks, at his own request, and also the retirement of Earl Balfour from office and probably from politics.

Mr. Balfour, who is 80 years old, holds a sinecure as Lord President of the Council, but it is understood that he feels that young men ought to be given a place in the cabinet; he therefore intends to retire to make room for them.

Viscount Peel is expected to succeed the Earl of Birkenhead as Secretary of State for India.

Sir William Joynson-Hicks it is believed will be given a post entailing less onerous responsibilities.

In connection with these rumored cabinet changes, it is not thought that Hon. Winston Churchill, the Rt. Hon. of the Exchequer, will be effected.

Meanwhile difficulties continue to accumulate within the Conservative party. Demands for an extension of the safe-guarding of industries are continually being presented, and the agenda of the party meeting to be held at the end of the month already comprises four pages of resolutions on the subject.

Another main issue is likely to be the proposed reform of the House of Lords—during the lifetime of the present parliament, but which clearly cannot be touched before the general election next year.

There are wide divergencies within the Conservative ranks on this issue. While some agree that there ought to be a reform, all disagree on what reforms are necessary.

Indeed, Premier Baldwin, on his return from his holiday in France will find enough party problems to occupy him for many weeks.

## Big Reception for Bennett Planned

(Special to the Guardian) TORONTO, Sept. 13.—Toronto is to tender to Hon. R. B. Bennett, K. C., leader of the Conservative opposition in the House of Commons, the biggest and the warmest welcome ever extended to a political chieftain, some time this fall. A fire which early this morning destroyed the Bennett home, at Mill street, has been called for Tuesday evening to make plans for the demonstration. The suggestions at present are a dinner in the coliseum at a banquet at the King Edward Hotel, followed by a bumper meeting in Massey Hall, at which he will be the speaker of the evening.

Of security as offensive to German pride and prestige. The Germans are ready to discuss the fixing of final total reparations payments and also to negotiate for commercialization of the Dawes plan bonds.

## Six Children Dead as Result of A Fire

(Canadian Press) SAULT STE. MARIE, Ont., Sept. 13.—Six children of Mr. and Mrs. T. Peyer, are dead and a hired girl, whose name is at present unknown, may die as the result of a fire which early this morning destroyed the Peyer home, at Mill street, page 279, on the Algoma Central Railway, about twenty miles south of Sault Ste. Marie. The parents together with a baby in arms, and a girl 13 years of age, escaped from the flames. Bodies of two children apparently smothered by smoke have been recovered but the remains of the other four are still in the ruins. Destruction of the house followed the use of coal oil in the kitchen stove by the hired girl to revive a smouldering fire. The girl was terribly burned.

## Commissioner Here Sept. 22

(Special to the Guardian) OTTAWA, Sept. 13.—Sir William Clarke, British Trade Commissioner, to Canada, is due here September 22. His offices will be opened in the new Victoria building on Wellington street, facing the parliament buildings. Mrs. Frankford Rodger's residence has been leased for a year at \$1,000 a month as a residence for Sir William.

## Succeeds Plumer in Palestine

(Special to the Guardian) LONDON, Sept. 13.—The appointment of Sir John Robert Chancellor, governor of Southern Rhodesia since 1923, as high commissioner for Palestine and Transjordan, was officially announced yesterday.

## Hearty Welcome for Prince and His Brother

(Special to the Guardian) CAIRO, Egypt, Sept. 13.—The Prince of Wales' desire that informally prevail throughout his African tour caused the elimination of the formal ceremony today from the welcome prepared for him and his younger brother, the Duke of Gloucester. Cairo was restless with excitement, however, when the royal tourists arrived from Alexandria. They travelled in a special train provided by the Egyptian government. Good-natured crowds filled the streets and cheered, the Prince of Wales and his brother acknowledging the spontaneous welcome with smiles. The visitors motored to King Fuad's yacht, Kasas Kheib on which they will make their headquarters while in Cairo.

King will visit Paris to meet members of the French cabinet and to officially open the new Canadian legation offices, a ceremony for which Hon. Phillippe Roy, Canada's representative in Paris, is returning from Geneva shortly in order to complete arrangements. Forty prominent Canadians now on the continent or in Britain have been especially invited to attend the opening ceremony, after which Mr. Roy will present his credentials as Canadian Minister in France to President Doumergue.

The legation building is now complete with the exception of rooms of commercial attaché, Colonel C. W. Barr. The Canadian Premier is expected to visit Premier Doumergue while in Paris. Great interest is being shown in London regarding the affair, as the Canadian legation will be the first of its kind to be opened by any dominion in Europe.

It is likewise anticipated that important members of the British government will be in attendance at the function.

## OYSTER PRODUCTION

Mr. W. A. Found, Deputy Minister of Fisheries, Ottawa, is expected shortly to visit this province. While here, he will make an inspection of the oyster areas, with a view to ascertaining what steps are advisable to bring those which, due to the ravages of disease have become depleted, back into bearing again.

At the present time, the principal oyster beds are located at North River, East River and West River in Charlottetown Harbour, and Orwell, Vernon River and Seal River, open on Hillsborough Bay. A few oysters are found at Enmore River in East Prince, and on the Richmond Bay area, once so productive about ten or twelve barrels were shipped last fall from the beds and the Bladdford and Grand Rivers.

The oysters in the Richmond Bay area are slowly coming back, especially near the heads of the tributary rivers. The beds, however, have been silted over and much work is necessary before they can be brought into full bearing again. They must be dragged over or "dredged" as it is termed, and mussels and other such shell life removed, as mussels and silt are fatal to oysters.

Over one hundred acres have been cleaned this year by S. S. "Ostrea" by means of dredges. These dredges consist of a board about five feet long, provided with a bag to take up the oysters. This apparatus is dragged over the oyster beds. The "Ostrea" also landed about 1200 bushels of shells at Malpeque and Grand Ferry wharf to prepare the beds for next season.

The matter of the further development of the oyster areas in Richmond Bay, Mill River and Hill River will be fully considered when Mr. Found is here.

It is considered that the best oysters, both for size and flavour are those found in North River; but the

## London Ships Gold to Canada

(Special to the Guardian) NEW YORK, Sept. 13.—A shipment of \$500,000 of gold from London to Canada was announced today, the first transfer of its kind to be made as a result of exchange conditions in many years. In banking circles here the transaction was regarded as the fore-runner of gold shipments from London to New York, the general estimate being that \$25,000,000 of the metal would be received here. Sterling exchange has been quoted in Canada at \$4.84 3/4 for cable transfers, which is fractionally lower than the New York Exchange and makes profitable the shipment of gold from London to the Dominion on an exchange basis. A heavy Canadian export movement of commodities has tended to strengthen Canadian exchange in several world markets recently, but its effect has been partly offset in New York by the large volume of funds being sent here from Canada for loans and investments.

## Kipling at Balmoral Castle

(Special to the Guardian) LONDON, Sept. 13.—The announcement in a court circular that Rudyard Kipling had arrived at Balmoral Castle as a guest of the King and Queen excited great interest in London. It has always been understood that the poet's reference to Queen Victoria as "The Widow of Windsor" had not only earned the disapproval of the sovereign referred to, but resulted in a sort of court ban ever since. It has even been said it was the reason why Kipling was never appointed Poet Laureate.

To the family and relatives of the deceased the Guardian tenders sympathy in their sad bereavement.

## Briand Opposes German Demand for Evacuation

(Special to the Guardian) GENEVA, Switzerland, Sept. 13.—What one of the participants described as a "hopeful meeting" of the "big six" to discuss evacuation of the Rhineland was held today. It was brief but it adjourned with an agreement to sit again Sunday morning. It was stated officially that several points are which require further elucidation. It is believed these had to do with a French plan for new provisions for security in the Rhineland frontier zone in case troops are either reduced or withdrawn entirely in accordance with German demands.

Aristide Briand, French Foreign Minister, presented the ideas at today's conference. He arrived ready to counter the German demand for unconditional evacuation, and demanded an improved form of political security on the Franco-German frontier as essential to reduction or complete withdrawal of troops. France, in other words, wants the Rhineland frontier made stronger than is possible under existing treaties.

The Germans, on the other hand, say they would resent any new form

## King To Open New Canadian Legation

(Special to the Guardian) LONDON, Sept. 13.—Premier W. L. Mackenzie King, of Canada, is expected to reach London from Geneva about October 3 or 4 when he intends to consult Premier Baldwin regarding the reported emigration scheme, whereby Britain and Canada would co-operate in creating new governmental machinery for placing a thousand men from Britain on Canadian farms.

While Mr. King refuses to disclose the details of his plans in this respect until he has seen Mr. Baldwin, Conservative headquarters in London are busily engaged in collecting data, presumably with the object of furnishing the British Prime Minister with the necessary information.

Before embarking for London, Mr.

## PROHIBITIONISTS MEET

OTTAWA, Sept. 13.—Prohibitionists from all over the Dominion are to meet for a conference on Oct. 18 and 19 in Ottawa. The conference is being arranged by the Prohibition Federation of Canada, which has headquarters in Toronto.

fishermen in East River, especially those near Cranberry wharf, are taking more care in sorting their oysters, and consequently are producing the best pack. There has been a wonderful improvement in the selection of oysters for export from this area. This has also been noted in the case of consignments from Orwell, Vernon River and Seal River.
