BLIND—CURED BY HYPNOTISM.

A remarkable instance of a blind child gaining its sight within the space of a few seconds while under the treatment of a hypnotic specialist at Dulwich, Eng., is arousing considerable interest.

The child is Gertrude Yates, nine years old. She was born blind, and has been educated at one of the London County Council schools for the blind.

A few days ago one of the London County Council woman inspectors took the little girl to Professor Alexander Erskine, who is a professor of psycho-suggestion. He effected so complete a cure that the child was able minutely to describe every object shown to her.

How this strange cure was affected was described by Professor Alexander Erskine.

"I induced a hypnotic sleep in her as a last hope, and as soon as she was properly asleep I told her she could see.

"'Yes,' she replied, and added that she could see me, but said that I was black when I asked her what color I was.

"I told her that she was wrong, and then she said that only my moustache was black.

"Then I made her describe various objects, and the gardener, who could be seen working in my garden from the window.

"I was very much surprised, as I had not hoped for such good results, but when she collected fragments of paper I threw about the floor I realized that the child could really see.

"One of the most extraordinary features of the case was the child's description of colors. She correctly named vivid blues and yellows, although she cannot have known much of colors before, except as mere names."

THE WANING OF A RACE.

We might expect the fiery individualism of the Southern mountain people to cool gradually as population grew denser; but, curiously enough, crowding only intensifies it in the shy backwoodsman. Neighborliness has not grown in the mountains—it is on the wane. There are today fewer long-rollings and house-raisings, fewer husking bees and quilting parties that in former times; and no new social gatherings have taken their place. Our mountain farmer, seeing all arable land taken up, and the free range ever narrowing, has grown jealous and distrustful, resenting the encroachment of too many sharers in what once he felt was his own unfenced domain. And so it has come about that the very quality that is his strength and charm as a man—his staunch individualism—is proving his weakness and reproach as a neighbor and citizen. The virtue of a time outworn has become the vice of an age new-born. —Horace Kephart in the May Outing.

I bought a horse with a supposedly incurable ringbone for $30, Cured him with $1.00 worth of MINARD'S LINIMENT and sold him for $85.00. Profit on Liniment, $54.00.

MOISE DEROSCE.

Hotel Keeper, St. Phillippe, Que.

The Human Eye

The Eye is one of the most delicate and complicated of the human organs, and yet, probably through ignorance of this fact, it is being constantly ill-used and overworked.

Eye-Strain

Be wise and do not ignore any of the symptoms of Eye-Strain: headaches or pains in the region of the eyes, inability to read or sew for any length of time, blurred vision.

Allow us to Examine your Eyes. We will give you expert reliable advice.

This is our business.

HOUSEHOLD HINTS....

Vinegar or yeast should never be kept in stone crocks or jugs. The acid eats off the glazing, which is poisonous.

When your furniture becomes dull rub it with a flannel dipped in equal parts of turpentine and kersoene.

A very good way to reheat up a joint is to wrap it in thickly greased paper and keep it covered while in the oven.

Grease in the sink is a very prolific cause of disease. Washing soda is the best and simplest cleaning agent.

Parsley can be kept fresh by putting it into a glass jar and screwing the lid on tight, then placing it in a cool place.

FASHIONS.

A few Greek effects in gowns are used as an intense contrast to the present waye of orientalism.

Dancing frocks escape the ground by two inches. Other evening gowns are made with slight trains.

Brown with rose which has the faintest hint in it of the same color is one of the new combinations.

LARGEST SHIPMENT OF CATTLE.

NEW ORLEANS, La., Aug. 8.—Arrangements are being made to handle the largest shipment of cattle ever ever brought to this, and probably to any American port. The first ship load of a movement of 93,000 head will dock here tomorrow from Tampico, Mexico,

Forced by continuance of the insurrections in the southern republic, the owners are going to this vast expense as the only means of saving any portion of their property. While the shipment is being made in the name of the Corraiitos Ranch Company, an English concern, it is understood that Gen. Luis Terrazas, Enrique C. Creel and other Mexican cattle owners are sending out some of their cattle with this movement. Thirty-two hundred stock cars will be required to carry the cattle from New Orleans to the various ranches to which they have been assigned.

::Dandruff is natural in small amounts but when it becomes excessive, the dry scales may kill the roots of the hair and cause baldness. Rexall "93" Shampoo Paste to promote the health of the scalp by vigorous and systematic shampooing. Large jar 25c. The MacKinnon Drug Co., Corner Great George and Kent Sts. MEtf.

Monday, August 11th is the last day for receiving discounts on electric light bills for July lighting. Pay today and save money.
