First Symptoms of Paralysis.

Should warn you to revitalize the wasted nerve cells by the use of

Dr. Chase's Nerve Food.

Though paralysis is dreaded by everybody, some do not recognize in nervous headache, sleeplessness, irritability and low spirits the indications of nervous exhaustion which point to paralysis as the final outcome.

Dr. Chase's Nerve Food is the most potent nerve revitalizer known to science to-day. You can use it with positive assurance that each dose is bound to be of some benefit to you in building up the system and preventing nervous prostration and paralysis.

Mrs. S. J. Schooley, 12 Arthur ave., St. Thomas, Ont., states:—“I was troubled a great deal with nervousness, severe headache and sleeplessness and at times a sort of numb feeling would come over me. I was in constant fear of paralysis as the doctors told me my trouble was exhaustion of the nervous system. I began using Dr. Chase's Nerve Food and soon noticed a great improvement. Now I can say that my nerves are completely restored. I sleep very much better and the distressing feeling of numbness has disappeared.”

Dr. Chase's Nerve Food, 50 cents a box, at all dealers, or Edmanson, Bates & Company, Toronto. To protect you against imitations, the portrait and signature of Dr. A. W. Chase, the famous receipt book author, are on every box.

The “Boston Tourist” King of Soft Hats.

Reaver Tea. Has the right flavor, strength and color. Just THE TEA for an evening party. Jas. Kelly & Co.

ISLAND MEMBERS DISCUSS THE G. T. P.

A Conservative Estimate of Their Speeches

J. J. Hughes and A. A. Lefurgey Join Issue on Many of the Points in Connection With the Scheme.

The St. John Sun O.tawa correspondent has the following:

The Prince Edward Island members took a hand in the debate on the Grand Trunk Pacific gold brick scheme yesterday. Mr. Hughes, of Kings, supported the deal from the government standpoint and was responded to by Mr. Lefurgey of East Prince, in a two hours' speech. Mr. Lefurgey is not only a good talker but he is a student of matters political and consequently has his facts well in hand whenever he takes the floor. In opening he congratulated the preceding speaker on having whittled down the cost of the line to only \$13,000,000, and expressed surprise that the government had not last session selected the member for Kings, P. E. I., instead of John Charlton as its railway expert. Mr. Hughes had talked about the knowledge the house had of the country from Winnipeg to Quebec and Moncton, but said Mr Lefurgey, he should have given the data on which he based his talk about valuable timber limits and mineral lands, and the millions of acres of fertile land through which the projected line is to run. He (Hughes) should have produced the reports showing that the route had been surveyed and that the cost would be less than \$30,000 a mile. As a matter of fact, the history of railway building through a rugged country had shown that in many cases it cost some \$150,000 per mile. The Pennsylvania railway, one of the greatest systems in the United States is at the present time spending \$100,000,000 for the purpose of improving its grades. The Pennsylvania road runs through a rugged mountain district like that which the Grand Trunk Pacific will have to traverse between Winnipeg and Quebec and from Quebec down to Moncton.

Mr. Lefurgey said he had it from competent engineers who had been over the New Brunswick section of this line, that the point where the Grand Trunk Pacific will have to pass from Quebec into New Brunswick is twice as high as the point where the Canadian Pacific railway passes into the latter province, and that cuttings will have to be made there to get anywhere near the grades propounded by Mr. Charlton last year. These cuttings will probably put up the cost to \$150,000 a mile. From the character of the country we already know, said Mr. Lefurgey, it is reasonable to suppose that like conditions will have to be faced in the more northern region. It is also reasonable to suppose, in the absence of authentic data by the government, that no person knows what this railway will cost between Winnipeg and Quebec.

Against Mr. Hughes' assertion that the people of Canada were assuming little or no responsibility for this giant railway, Mr. Lefurgey put the statement of Sir Rivers-Wilson that the Grand Trunk Co. were assuming no obligation, that they had received a contract the like of which would never be offered to a railway corporation again. He left the house and the country to weigh these two statements and to draw their own conclusions. The Canadian Pacific railway bill was not rushed through the house without the fullest information having been first given to the members of parliament. A million dollars was spent in surveys, the people of Canada pronounced on the undertaking and when the Conservative party came back to power in 1878 they were pledged to carry it to completion.

Mr. Lefurgey made a strong argument in favor of government ownership of railways, as the only remedy against monopoly, combines and excessive freight and passenger tolls. By acquiring the Canadian Atlantic and adding it to the Intercolonial and then extending the Intercolonial from the great lakes to the Pacific ocean, the people would have in their hands an effective weapon to use against other railway companies. He read copious extracts from Blair's speeches and documents on the railway situation, in which he advocated a policy of Canada for the Canadians—a policy, said Mr. Lefurgey, which I heartily endorse. In stirring tones he protested as a maritime member against the action of the administration in using the money and credit of Canada to build up American ports at the expense of Halifax and St. John, and in this connection

He quoted the speech of the minister of justice (Mr. Fitzpatrick) last session, in which he said Canada could not shut its eyes to geography and that invariably the food products of the country, destined for the old land, had gone via Portland, Boston or New York, and not by St. John or Halifax. And yet Mr. Hughes now contends that the trade of the G. T. P. will pass to our own ports.

Best Way to Rear Healthy Children

Develop Their Strength With Ferrozone Which Makes Rich Blood, Hardy Muscle, Steady Nerves.

Children brought up on Ferrozone are known by their strong, rugged frames, their chubby cheeks and healthy appearance. Mothers find it an indispensable tonic and blood builder, and in thousands of homes no other remedy is used.

Mrs. E. Montgomery, of Pittsburg, writes: “A little niece came to visit me, and noticing her pale looks and haggard looks, I started her on a course of Ferrozone. The change that girl underwent in a few weeks was marvellous. Her appetite chirped up, she had more spirit and strength. Every Child and a rosy color came into her cheeks that I never saw there before. I weighed more. Ferrozone fore I weighed more. I noticed about the time and in seven weeks she gained almost eight pounds, and just looked the picture of health. I think this should be an example to many mothers, and I hope that others will try Ferrozone for their little boys and girls. I am thoroughly convinced that it's the most strengthening tonic. It has my strongest endorsement.”

The reason Ferrozone works so beneficially with children is that it acts directly on their blood, freeing it of all unhealthy matter, at the same time giving it an additional supply of iron. This at once results in more strength, new spirit and renewed vitality. Just one tablet at meal time works wonders.

You must be sure to get Ferrozone. Refuse to accept any article the druggist may say is just as good. Get what you ask for Ferrozone, and the result we guarantee will be satisfactory. Price 50c per box or six boxes for \$2.50. By mail from N. C. Polson & Co., Kingston, Ont. and Hartford, Conn., U. S. A.
