that the rates will remain as they are at the present time. The company to create a Group 6 was refused.

The Board decided that any extension of the limit would advance to a higher group when its phone use exceeded its limit by 10 per cent and so remained for six months. It also decided that such an extension should be refused. The Board also decided that the original group when the number of phones had decreased by 5 per cent. The Board refused the Company's request to place this latter figure at 15 per cent.

With regard to long distance tolls, the Board allowed the request of the Company to increase its person-to-person and station-to-station service. This is a system which is universal elsewhere but is only now being adopted in this province. In this connection the Telephone Company made a request for a report charge in person-to-person calls. This the Board has refused. The Company also requested a higher over-time charge on long distance calls in the person-to-person classification. This the Board also refused. The Board made the same as station to station.

In distance telephoning which is based on mileage, it has been settled that direct mileage rates shall be the same as station to station.
