Pen-Angle Sweater Coats. The proof of a sweater coat is in the wearing! To the most critical eye, a Pen-Angle Sweater Coat excels any other kind in the evident care with which it was so beautifully knit and finished. The trying-on test shows it has the stylish look and snug, smooth fit you demand of your outdoor apparel. Examination of the material reveals the superfine quality of the wool yarn that makes it so fleecy, light and warm. But neither of these three superficial tests can prove how worthy these knit garments are of your preference and the famous trade-mark they bear. That proof is in the wearing of them under every outdoor condition—for hunting, boating, golfing, skating, sleighing, driving, walking. Since the Pen-Angle process knits them perfectly into lasting shape, they remain smart looking and neat-fitting; and the wear is there. PENMANS LIMITED - PARIS, CANADA UNDERWEAR HOSIERY AND SWEATERS

Range Talks by the Housekeeper No. 2 Subject "The Oven" "Once convinced that the appearance of a range appeals to our sense of good taste, we want to know all there is to know about the Oven—because the Oven is the important range essential. If it is not a perfect cooker and baker, outward beauty counts for very little. "The more you look into the 'Kootenay' Oven the more anxious will you be to own a 'Kootenay.' The oven of this beautiful range is made of nickelled sheet steel—one-eighth of an inch thick. I don't know how to explain this nickelled steel but the main thing to remember is that a 'Kootenay' Oven cannot rust—more than that you can wash it out just like an ordinary kitchen dish, and always have a fresh, clean Oven. "The reasons for the 'Kootenay's' splendid cooking and baking reputation are very plain—The heat flues are broad and deep—surround the entire Oven so that it bakes and cooks evenly. The ventilation is thorough—a roast retains all its rare and generous juices when cooked in it. "The construction of the Oven of my range was carefully explained to me—shown me—before I bought it. The inner body of the 'Kootenay' is protected with asbestos—the Oven walls cannot burn through—over the Oven-top a cast iron frame or guard holds a sheet of asbestos in place, while the bottom is braced with iron bars. "The thermometer is a great convenience. Plain figures show the exact degree of heat necessary for baking pies, cakes, bread, etc., or roasting meat. No need to open the door—that only cools off the Oven. The thermometer costs a little more, but I wouldn't be without it. Of course there are other splendid features about the 'Kootenay.' All in all, it's the best range I've ever seen." LONDON TORONTO MONTREAL WINNIPEG McClary's VANCOUVER ST. JOHN N.B. HAMILTON CALGARY Sold by the Rogers Hardware Co, Ltd
