

**Always use Old Dutch for Healthful Cleanliness**

CONTAINS NO HARD GRIT, LYE OR ACIDS  
WON'T SCRATCH  
MADE IN CANADA

The soft, flaky particles not only remove visible dirt but also the impurities you cannot see. When you have used Old Dutch all through the Bath-room, you can rest assured everything is hygienically clean. Goes further and costs less.

Scientific Facts

NEWEST NOTES OF SCIENCE.

Hull expects to gather a cotton crop of 65,000,000 pounds this year. Compressed air machinery has been developed for steering ocean going vessels.

Italy is using about twice as much electric power in industry as it was six years ago.

The annual per capita consumption of lumber in the United States is now about 350 feet.

Electric motors will be used to toll the famous bells of the Notre Dame Cathedral in Paris.

An inventor has mounted a clothes wringer on clamps that permit it to be used over a bath tub.

A large proportion of Brazil's extensive production of alcohol is a by-product of the sugar industry.

A fountain pen for draftsmen has been invented that can be adjusted to draw lines of various widths.

Ceylon's first electric vehicle is a motor propelled street sprinkler purchased by the city of Colombo.

There now are 148 national forests covering 181,799 acres, controlled by the United States government.

A Swedish sawmill obtains power from gas generated from wood waste, which also yields by-products of value.

A roller mounted on a spring has been invented to hold window shades in any position without the use of weights.

American automobiles with their tires replaced by flangers are being used on some of the smaller Danish roads.

A number of sharpened gear shaped wheels that intermesh do the work of a new lawn mower that is almost noiseless.

The British government has rescinded its regulation forbidding the use of foreign made radio receiving apparatus.

An airplane has been adopted by a Nevada silver mine to carry heavy loads to and from a railroad 60 miles distant.

With cheap electricity available a Swedish iron works is planning to make malleable iron and steel direct from ore.

Racks in which weights hold newspapers in a vertical position against walls have been invented to save news stand space.

Germany has about 100 electric steel furnaces in operation as compared with 360 in the United States and 40 in Canada.

Economy of material and labor are claimed by its inventor for a base ball cover made in one piece and requiring only 14 stitches.

The government will build two oil refineries of sufficient capacity to more than meet Argentina's present production of petroleum.

A small wheel and supporting arm have been invented to be attached to golf bags to save players the necessity of employing caddies.

Night telephone service by way of Hamburg and Berlin will be established between Amsterdam, Rotterdam and The Hague and Copenhagen.

On the bucket conveyor principle is a portable machine that has been invented for unloading bulk materials shipped in open railroad cars.

Persia's annual production of tobacco is estimated in excess of 22,800,000 pounds and the government is endeavoring to increase this amount.

For attachment to motion picture projectors there has been invented a motor operated device to automatically feed the light carbons to the arc.

Statistics compiled recently by the British post office showed that Liverpool's telephones are used more frequently than those of any other city.

Under perfect light conditions a camera has been invented in Germany to time horse races has a speed of one thousandth of a second.

Mountable on an automobile dash board, a new warning device flashes a lamp when the oil in the crank case becomes low or the lubrication fails.

For driving livestock an electric motor that imparts mild shocks has been invented in Europe with the idea of being more humane than whips or clubs.

A ventilator adjustable to a window of any size has been invented that is made of thin sheet metal and that will admit air to a room but keep out rain.

In clear weather the light from an 874,000,000 candlepower beam erected to guide aviators at night between Paris and Algiers is visible 300 miles.

Two laundry tubs and a wringer have been combined so compactly by an inventor that they can be used over a sink in kitchen where there is little space.

A Swedish lumber company will be 700 years old this year and its forests, due to scientific forestry, are in better condition than at any previous time.

A novel pushmobile for children folds compactly for carrying and is equipped with a seat upon which a child can ride or transport a package or hand baggage.

Japanese scientists are conducting series of experiments to determine the minimum amount of food needed to enable an average man to carry on his usual work.

Government statistics show that the average amount of coal used in the United States to produce a kilowatt-hour of electricity has decreased one pound since 1919.

To prevent employees stealing small metal articles from a factory a German has invented a magnetic device that, when passed over a man's clothing, detects hidden loot.

Operated by a small gasoline pump, apparatus that can be transported in a small boat has been designed for purifying the water in swimming pools with chemical solutions.

Experiments by French scientists have indicated that certain antiseptic solutions emanate rays that kill disease germs without the solutions coming in contact with them.

Building Reports

AUGUST RECAPITULATION OF YEAR AGO

Largest August Total since 1921. Contracts Awarded thirty-one Millions. Construction For Year to Date Equal to Last Year.

Construction figures for August are particularly interesting because in 1924 a better-than-usual Autumn Season is indicated. The total totals that for the corresponding month of last year by over 18%.

Recently one of the correspondents in New Brunswick of Business Statistics Organization, Inc. said: "The most encouraging feature of the situation here is the new feeling that has recently awakened. People are beginning to think seriously toward a solution of their problems. Apparently they realize that mere grumbling gets nowhere and that construction action is all that counts. They go on to say in part—'Business is now where things should be. The new era of prosperity leading toward a new era of prosperity. The change, however, will not come about until the new feeling, that our correspondent speaks of, is apparent in most lines of business. New building continues in satisfactory volume, Canadian exchange is as high as that of any country bank amalgamations have strengthened banking facilities with a reduced rate of interest. The volume of new incorporations show that men in all parts of the Dominion are realizing opportunities and preparing to take advantage of them. Employment in Canada is higher than in any other country during the present re-adjustment period with the exception of 1923. Number of employees in almost all lines registers a distinct improvement over a year ago. While some industries in the Prairie Provinces are less active, other sections of the Dominion more than make up for this temporary local condition.

Canada's foreign trade continues to grow. While the balance of trade with other parts of the Empire offer opportunities which should and will be developed. Bank deposits show an increase over a similar period of a year ago. The statistical position of Canada is such that the foundation is completed on which a new era may be built.

Canada's problems are many and of a complex nature. The growing pains are acute and are sometimes mistaken for something more serious. Men, who are leaders in their locality can easily get the habit of complaining. The usual foreign competition, taxation and every other possible thing. The idea never occurs to them that they, themselves, might possibly be partly to blame. Constructive action is what is needed. The new feeling is what is needed. The new feeling is what is needed. The new feeling is what is needed.

Report Of Women's Institutes Of Prince Edward Island

WOMEN'S INSTITUTE East Sideford. The regular meeting of the Institute was held on August 12, at the home of Mrs. John MacEachern, when nine members and seven visitors were present. After the usual opening, reports of the Annual Convention were given. A member was appointed to procure large gate-posts for the school fence and another to buy seed for the school grounds. Plans were completed for work on the school grounds. The next meeting will be held at the home of Mrs. Leslie Morrison.

Avonlea Institute met at the home of Mrs. R. Fleming on August 19th, when eighteen members and ten visitors were present. Roll call was answered with reports of the Annual Convention and other matters. A paper entitled "Men and Women of the Future" was read by the members. Next month roll call will be answered with the favorite name for a boy or girl.

Conway. Eight members and three visitors met at the home of Mrs. Asif Wallfield on August 11. The meeting opened with the minutes, followed by the reading of the minutes. Plans were made for holding an Ice Cream Social and the Secretary was authorized to buy sugar and ice cream. Two new members were welcomed at this meeting. The next meeting will be held at the home of Mrs. Oatway.

Eglinton and Howe Bay. Fourteen members and six visitors met at the home of Miss Alice Morrow on August 5th, when Miss Mathieson was present and gave a talk on the Federated Institute Convention in Victoria, B. C. and the value of such an organization to the Provincial Institutes. Reports of the recent picnic were given, and a vote of thanks was tendered to Mr. and Mrs. Clapp for their kindness in allowing the picnic to be held on their grounds. Roll call will be answered with the minutes, followed by a piece of poetry, and the meeting will be held at Mrs. Wm. Fisher's, Eglinton. New school committees were appointed for both schools.

Gowan Brae. On August 5th, eighteen members and three visitors met for the regular meeting at the home of Miss Agnes Mallard. After the usual opening report of the social held in July was read, the proceeds of which amounted to \$70.45. It was decided that each household should donate a pound of wool, have it spun and knit, and the stockings and mittens donated equally to the Orphan Asylum. A new map of Canada, with locks and lamps are to be bought.

Birch Hill. Ten members and three visitors met at the home of Mrs. J. C. Martin on August 20th. The meeting opened with the singing of the Ode, and repeating of the Creed, after which minutes were read and reports of the different committees were received. A new school and a new committee were appointed. Miss Mathieson was present and gave a talk on the Federated Institute Convention. Next meeting will be held at the home of Mrs. Ernest Newcombe.

Sea View. Twenty-three members met in the school room on August 12th for the regular meeting of the Women's Institute. When the meeting had been opened in the usual manner, the secretary submitted bills, and reported that \$52.50 had been realized at the recent Ice Cream Social. This money will be used for painting the interior of the Hall. A new school and a new committee were appointed. Miss Mathieson was present and gave a talk on the Federated Institute Convention. Next meeting will be held at the home of Mrs. William Adams.

Central Bedouque. About thirty members met at the home of Mrs. Ronaghan, Fernwood Light-house, on August 10th. The meeting opened with a picnic. After lunch was served, sports, which included races and tug-of-war, were carried on by the members of the different Institutes, the honors being equally divided. No business was taken. Next meeting will be held at the home of Mrs. Robert Waugh, Lower Bedouque.

Emmont Bay. On August 18, eight members and one visitor met at the home of Miss Beatrice Arsenault. After the usual opening new committees were appointed for the school in each district. The members are going to clean the schools. Four new members were added to the role at this meeting.

Brudenell Institute met at the home of Mrs. Simon Nicholson on July 7, and at the home of Mrs. Sidney McLaren on August 4. Plans were made for an Institute picnic to be held at Brudenell Point Friday, August 21.

St. Columba Institute met on July 17 at the home of Mrs. Jennie Campbell, when nine members and two visitors were present. The members decided to have a new hardwood floor placed in the school room. The program of the evening consisted of recitations by Miss Deagle and Miss Donovan. August meeting of this Institute was held on Wednesday, 19th, in conjunction with Priest Pond and East Battle Institutes, when Miss Mathieson was present to give a talk on Federated Institute Convention.

Harrington. On July 27 seven members met at the home of Miss Doris Roid. Report was given by the school committee to say that the hardware floor in the school had been completed. A recent picnic was reported. Roll call was answered with suggestions for removing stains.

Red Point. Seven members and two visitors met at the home of Mrs. Roy Bruce, on August 3rd, when Mrs. J. C. Campbell gave a report of the Provincial Institute Convention. The members of this club met again on August 18, in Red Point school house in conjunction with members from Little Harbor and Kingsboro Institutes to hear the report of the Federated Institute Convention.

Lake View. The members of this Institute met on August 3rd at the home of Mrs. J. E. Dingwell, with an attendance of ten members. Roll call was answered by a member telling a funny story. A splendid program was carried out consisting of a reading by Mrs. J. E. Dingwell, a reading by Mrs. D. Rose, and music by Mrs. Morrow and Miss Olga Morrow. The members met again on August 20 in conjunction with East Point, Elmira and South Lake Institutes to hear the report of the Federated Institute Convention.

Grand River. Sixteen members and five visitors met at the home of Mrs. Patrick McMillan on August 4th. A report of the Ice Cream Social showed proceeds of \$40.50, of which \$25 was given towards varnishing the Hall. A paper on "The Ideal Home" was read by Mrs. Joseph McMillan. The members decided to hire a man to make improvements to the cemetery. The next meeting will be held at the home of Miss Stella McNeil.

Freeland Institute held its August meeting at Hardy's Harbor, when eight members and twenty-eight visitors were present. It was decided to have Mr. E. A. Hardy make a flagpole for the school. This meeting was the Women's Institute annual picnic on the Beach. Ladies and children were conveyed by motor boat. The business of the meeting was attended to, followed by the annual weighing contest.

Poplar Grove. On August 5, nine members and thirty-five visitors met at the home of Mrs. Thomas Grigg. Further plans were made for paying off the debt on the flooring for the school. The next meeting will be held at the home of Mrs. Leslie Smith.

Long Creek. Twelve members and five visitors met at the home of Miss Rose McEachern on August 5th. The meeting opened with a song entitled "It's a Good Thing to Get Acquainted." Arrangements were made for painting the interior of the school. A vote of thanks was extended by the meeting to Mr. Walter Shaw for his assistance with the recent entertainment. The meeting closed with the National Anthem and the repeating of the Creed. Next meeting will be held at the home of Miss Annie McPhee.

Alma, Lot 3. On August 5th, eleven members and four visitors met at the home of Mrs. Joseph Dunbar for the first meeting of the Institute. The members practiced the Ode and read over the Creed. Two auditors, Miss Rae Barber and Mrs. Allan Clark were appointed. The next meeting will be at the home of Mrs. John T. Wallace.

Searletown. On August 6th there were twelve members present at the home of Mrs. James McQuarrie. The members voted \$40.00 towards repairs on the Hall. A sign-board has been placed on the Searletown school. Four new members were added to the roll at this meeting.

Stanchel Institute met on August 6th at the home of Mrs. Wesley McNeil with an attendance of eight members. A musical program was enjoyed, and a pleasant evening spent. The next meeting will be held at the home of Miss Sadie Buchanan.

Pleasant Valley. Fifteen members met at the home of Mrs. John H. Weeks for the August meeting. The meeting opened with the re-

**Saves so much Suffering**

when you have ABSORBINE JR. handy in the medicine cabinet.

If the younger Children develop Toothache, Ear-ache or Sore Throat in the night, a little ABSORBINE JR. will soothe and relieve and send the sufferer off to sleep.

If accidents happen—a cut finger, burnt hand, sprained ankle, bruised arm, wrenched shoulder or bleeding cut—apply at once

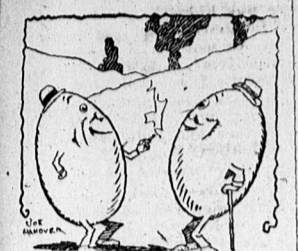

**Absorbine Jr.**  
THE ANTISEPTIC LINIMENT

It prevents infection, soothes the pain, starts healthy healing, and is a dependable "first aid" for any injury. It does not grease or stain bandages—has a clean, aromatic odor that freshens up a sick room.

PICNIC AND SPORTS

The regular yearly picnic of Cornwall United Sunday School was held on the evening of August 19th in Mr. Hood's field at the edge of the village. The weather was ideal and a large number gathered making the event a complete success in every way. The younger ones particularly had an evening of unusual sport. After being well fed by the women of the congregation they played games and ran several well contested races. The following were the winners in the several events:

Boys 7 and Under—1, Victor Inman; 2, Jack MacMillan.

Boys 8 to 11—1, Lorne Scott; 2, Wilfred Inman.

Boys 12 to 15—1, Elmer Frizzle; 2, Robert Inman.

Girls 9 and under—1, Anitha Pettick; 2, Doris Crosby.

Girls 10 to 13—1, Mary Scott; 2, Thankful Bain.

Potato Race 12 and under—1, Elmer Frizzle; 2, Lorne Scott.

Potato Race 13 and over—1, Robert Inman; 2, Gordon Frizzle.

Thread the Needle Race—1, Thankful Bain and Allison McKinnon; 2, Mary MacMillan and John Scott.

Three Legged Race 12 and under—1, Lorne Scott and Elmer Frizzle; 2, Herbert Scott and D. MacDonald.

Three Legged Race 13 and over—1, E. Lowther and G. Boyle; 2, John Scott and A. Horne.

Sack Race 12 and under—1, Herbert Scott; 2, Elmer Frizzle.

Sack Race 13 and over—1, Gordon Frizzle; 2, John Scott.

Relay Race between boys and girls—won by girls.

This circuit, comprising four churches in all in conjunction with the old congregation of West and Clyde River, has recently been arranged to be worked for a year by Rev. Mr. Pierce and Rev. Mr. MacNeil as joint pastors. This is a venture along new lines. But the spirit of unity and good fellowship shown not only at the picnic but throughout the field since the plan has begun operation, gives every assurance for a happy year in Christian work.

Nearing A Breakdown

A Condition That Calls for a Reliable Tonic.

Many women give so much of their time to the cares of their household that they neglect their own health and sometimes reach the verge of a breakdown before they realize that their health is shattered. Often the heart palpitates violently at slight exertion, the stomach fails to digest food and discomfort follows. The nerves become weak and headaches grow more frequent.

The body grows weak and they are always depressed. This condition requires immediate treatment with such a reliable tonic as Dr. Williams' Pink Pills for Pale People, which enrich and build up the blood, carrying renewed energy to every part of the body. The value of Dr. Williams' Pink Pills in a case like this is proved by the following statement from Mrs. Alex. Melness, Bowsman River, Man., who says: "About a year ago I had a serious illness which left me very anemic. I was not able to get around to do my work; in fact I could scarcely walk. I was troubled with palpitation of the heart with the least exertion. One day a friend advised me to try Dr. Williams' Pink Pills for Pale People. I followed this advice and took the pills for some weeks when I felt as well as ever. I have since been able to attend to all my household duties. The dizziness and palpitation have left me. I bless the day I tried Dr. Williams' Pink Pills. They are just the medicine for those who are weak and run down."

You can get these pills from any dealer or by mail at 50c a box from The Dr. Williams' Medicine Co., Brockville, Ont.

WATER WHEEL THAT FLOATS

A water wheel has been invented which is designed to adjust itself automatically to the varying height of the propelling stream. As first constructed the wheel has eight V-shaped paddles about 13 feet long and 14 inches wide and it is so mounted on an air-tight tank that it rises and falls with the river's changes through any height up to 36 feet. It is used for pumping water from a depth of 70 feet above to a height of 70 feet above the source. Pumps and gearing are placed on the river bank and the wheel and tank are connected by a shaft having universal couplings at each end.

DEBTOR MUST CARRY LANTERN.

One of the many quaint customs common among the Chinese is explained by Nora Wain in a recent magazine article.

It was in the village of The Workers in the Noonday Sun, where I spent two months in the household of the Wong family, that I first saw a man go about in broad daylight with a lighted lantern.

"Is Sing, the fish dealer, crazy?" I asked a friend.

"Oh, that is only the custom," the Chinese reply. "It means that he has not been able to pay his debts, and must carry a lighted lantern everywhere until he as done so."

Chinese New Year began yesterday, but for him the new year has now dawned—it is still midnight of the old year. He may exchange of New Year greetings until he has settled up his old accounts, and his friends cannot greet him."

Adding plit prunes to ginger bread improves the gingerbread. Plit prunes cut in small pieces and added to the last kneading of bread instead of raisins make a very delicious bread.

Summer Complaints Kill Little Ones

At the first sign of illness during the hot weather give the little ones Baby's Own Tablets. In a few hours he may be beyond aid. These Tablets will prevent summer complaints if given occasionally to the well child, and will promptly relieve these troubles if they come on suddenly. Baby's Own Tablets should always be kept in every home where there are young children. There is no other medicine so good and so motherly as the guarantee of a government analyst that they are absolutely safe. They are sold by all druggists or will be mailed on receipt of price, 25 cents per box, by the Dr. Williams' Medicine Co., Brockville, Ont. A little booklet, "Care of the Baby in Health and Sickness," will be sent free to any mother on request.

**The Charlottetown Fox Breeders Protective Association**

Organized by a group of Fox Ranchers in the vicinity of Charlottetown for the purpose of giving financial support to each other for the prosecution of parties who molest or steal from the members' ranches.

Protective Measures Include:

MAN-TRACKING BLOODHOUNDS  
BEST DETECTIVE AGENCY IN CANADA  
BEST LEGAL TALENT

All ranches will bear the official placard. List of members is:

180 KENT STREET

**The Penalty of Leadership**

In 1914 Theodore F. MacManus wrote a Masterpiece, "THE PENALTY OF LEADERSHIP."

We quote some significant extracts from it.

"In every field of human endeavor, he that is first must perpetually live in the white light of publicity."

In art, in literature, in music, in industry, the reward and the punishment are always the same."

"THE LEADER IS ASSAILED BECAUSE HE IS A LEADER, AND THE EFFORT TO EQUAL HIM IS MERELY PROOF OF THAT LEADERSHIP."

"IF THE LEADER TRULY LEADS HE REMAINS THE LEADER."

"That which is good or great makes itself known, no matter how loud the clamor of denial."

WE ARE LEADERS IN OUR PROFESSION
