

**PEOPLE RECOVERING**

From Pneumonia, Typhoid or Scarlet Fever, Diphtheria, La Grippe or any Serious Sickness

Require the Nerve Toning, Blood Enriching, Heart Sustaining Action of Milburn's Heart and Nerve Pills.

It is well known that after any serious illness the heart and nerves are extremely weak and the blood greatly impoverished. For these conditions there is no remedy equals Milburn's Heart and Nerve Pills. It restores all the vital forces of the body which disease has impaired and weakened. Mr. T. Barnicott, Aymer, Ont., says: "About a year ago I had a severe attack of La Grippe which left my system in an exhausted condition. I could not regain strength and was very nervous and sleepless at night, and got up in the morning as tired as when I went to bed. "I had no energy and was in a miserable state of health. "Milburn's Heart and Nerve Pills, which I got at Richard's Drug Store here, changed me from a condition of misery to good health. They built up my system, strengthened my nerves, restored brisk circulation of my blood, and made a new man of me. "I heartily recommend them to any one suffering from the after effects of Grippe, or any other severe illness."

**TEACHERS' CONVENTION. PLEASE READ CAREFULLY.**

**Important Resolution Passed—Mr. Collier Reads Important Paper Upon Manual Training Which was Ordered to be Published. Officers Elected.**

FRIDAY MORNING.

THIRD SESSION: Convention was called to order at 9.15. Mr. Ewen Stewart gave his talk on Arithmetic. Mr. Stewart claims that only practical and useful Arithmetic be taught even in the Primary Grades. This can be done by the use of objects, for example fractions can be taught by an apple cut into half, quarter, eighth, sixteenth etc. or a paper yard cut into half yard, quarter lengths or even into inches.

The vote of thanks to Mr. Stewart was moved by Mr. Bradley, supported by Messrs Seaman, McSwain, Dunan, T. C. James and presented.

Mr. Collier next read his paper on Manual Training in the schools. This paper will be published in full.

The vote of thanks to Mr. Collier was moved by Mr. Bradley seconded by Inspector McCormack and Dr. Taylor and presented.

Mr. Seaman moved the thanks of the Convention to Sir William McDonald, and Prof. Robertson, the former for kindly donating the means for starting this excellent and useful department of school work, the latter for the very great interest he has taken in getting it started. Also that Mr. Collier convey to these gentlemen the notice of this resolution. Miss Gillis of Murray Harbor South read a very thoughtful and practical paper on "Music in the public schools." Miss Gillis showed clearly that the study of music is not only practical but necessary to the development of lung power and therefore conducive to health and enjoyment. Owing to lack of time and he over crowded state of the school curriculum too little attention is given to this important subject, but teachers lose much in neglecting it. Children work better, march better, do all their work when keeping time to some simple, familiar tune. A vote of thanks, moved by Mr. Ewen Stewart and supported by Miss Annie Moore was presented. Miss Gillis. Mr. McSwain came next with an interesting talk on nature studies. This address was illustrated with specimens of fungi which were passed round and examined by the members, showing what interest can be taken in apparently very uninteresting things such as we daily pass by without noticing. Mr. McSwain is well up on the subject and well able to direct the attention of others to this most interesting subject. A vote of thanks was moved by Mr. Landrigan and seconded by Mr. W. C. West.

The Credential Committee reported 232 teachers enrolled, the largest number present at any session for a long time. Adjourned till 1.30 p. m.

Mr. Collier's Paper

MR. CHAIRMAN AND TEACHERS,

You have done me the honor of asking me to read you a paper, on Manual Training, during your Convention, and indeed no better time could have been chosen, for such a paper than this which marks the introduction of Manual Training, into the schools of Prince Edward Island. It is therefore with more than ordinary interest, the opportunity is gladly taken, of giving a general outline of this work.

In idea it is not new. There has ever been a leaning towards a means of development, other than that to be derived, from mental exercise alone. We see it in the Greeks of old time, who sought in and obtained from the pursuit of manly competitive skill in game and contest, that harmony of mind and body, of mental, moral, physical excellence, which distinguishes theirs from succeeding ages.

The Romans too, gave much time and thought to the same end, though with preference for such physical training, as would serve them best in their progress as conquerors.

In later times scholastic attainments came to be regarded as the almost exclusive necessity. Then learning was the rule, and training, the exception. Next came a time of reaction, when it became

necessary from an economical point of view, to supplement the ordinary school knowledge, with that of a practical kind, in order to enable scholars not only to acquire some handicraft or other to follow in after life, but as a present means of occupying any leisure in a profitable way.

While many practised such work in the schools for its mere utility, there were others who saw in it, a most valuable aid to education itself, and where no necessity exists to hinder such an application employed it educationally only, or as a means of training in general.

The country holding the proud distinction of being the first to introduce a system of educational handwork into its schools is Finland. This system was called Educational Sloyd. This is the English form of a word denoting handiness or skill. We also have the same meaning in such a phrase as "sleight of hand" implying dexterity. Now that there are other systems of educational handwork, the name Sloyd is given to the system of woodwork practised in Sweden. In Finland, then, under the able directorship of the great teacher Cygnens, in 1862 was begun a new era in school life; a movement which rapidly flourished and attracted the attention of other countries. Foremost of these was Sweden. Here for some time, the work was adopted chiefly for acquiring dexterity in the use of tools; but not proving altogether satisfactory or sustaining the interest first awakened, even amongst the country people whom it was supposed to benefit most, changes were found necessary. In 1872 a new school was started at Naas on the estate of Herr Abrahamson, who equipped, it with every requisite and placed over it his nephew, Otto Salomon as director. Here the estate children, both boys and girls, who had left the

(Continued on Third page.)

**WARNING AGAINST WORK.**

BELLEVILLE, Sept. 26.—Professor William Seymour, formerly of Toronto, and a well-known educationalist, committed suicide to-day at the home of his sister, Mrs. Fred Collins, in Madoc, by shooting himself in the head with a revolver. It is supposed nervous depression, caused by overwork during the summer caused the rash act. Seymour had gone, to his sister's home for a few days rest.

**She Was Pale and Languid**

Too Nervous to Sleep, and Daily Grew Weaker and Weaker—Dr. Chase's Nerve Food Restored Health and Vigour.

Mrs. E. McLaughlin, 95 Parliament street, Toronto, states:—"My daughter was pale, weak, languid, and very nervous. Her appetite was poor and changeable. She could scarcely drag herself about the house, and her nerves were completely unstrung. She could not sleep for more than half an hour at a time without starting up and crying out in excitement.

"As she was growing weaker and weaker I became alarmed, and obtained a box of Dr. Chase's Nerve Food. She used this treatment for several weeks, and from the first we noticed a decided improvement. Her appetite became better, she gained in weight, the colour returned to her face, and she gradually became strong and well. I cannot say too much in favour of this wonderful treatment, since it has proved to be a blessing to my daughter."

Dr. Chase's Nerve Food is a blood-builder and nerve vitalizer of most unusual merit. In pill form, 50c. a box, at all dealers; or Edmanson, Bates and Co., Toronto.
