AUTO THIEVES ON TRIAL IN NEW BRUNSWICK

MONCTON, Feb. 27.—When the Westernland Circuit Court resumed at Dorchester this morning the case of Karl Tower, of Sackville, charged with assault with intent to do grievously bodily harm, was taken up. The Crown reduced the charge to common assault and the accused pleaded guilty being sentenced by Judge Crockett to one month in the county jail. The case of William VanBaskirk Alonzo Peirler, and Byward Wilson, charged with stealing an automobile in November last from Albert Arsenault, of Sunny Brae, was next proceeded with. At the conclusion of the evidence for the prosecution the accused took the stand in their own behalf. They admitted taking the auto, but alleged that they took it for fun but when they heard the police were after them they kept on going, making for the United States. The car, it will be remembered, was in a damaged condition and the accused some time after were arrested in New Hampshire. The case will likely be concluded tomorrow.

Aviator Drops Five Miles After Reaching 36,000 Feet

DAYTON, Ohio, Feb. 27.—An airplane carrying Major R. W. Schroeder, chief test pilot at McColl Field, fell over five miles to day after reaching an altitude of 36,000 feet, said to be 5,020 higher than world's record.

Tonight the officer is in hospital suffering from the shock and a high temperature. Instruments on the machine indicate that it fell more than five miles in two minutes. While still 2,000 feet above the earth the plane righted itself and glided to a graceful landing. The pilot was discovered sitting erect and apparently lifeless.

The plunge was witnessed by thousands of people and for a brief time spectators thought a comet had appeared in the sky. The trail of vapor in the wake of the plane giving rise to the belief. Instruments on his machine told the story of the aviator's flight. The thermometer registered a temperature of 55 degrees below zero, centigrade or 67 degrees below zero Fahrenheit.

Leaving the field at 10.45 this morning Major Schroeder battled for two hours and five minutes against changing air currents and bitter cold atmosphere. The sudden change in air pressure from less than three pounds at 36,000 feet to 17.6 at sea level, crusted the tanks on the plane and caused them to collapse.

Labor Men Give Idea for Solving Irish Problems

LONDON, Feb. 28.—The report of the commission of labor men which recently investigated conditions in Ireland is a strong denunciation of what is characterized as the British misrule of Ireland. This report declares, "would drive any spirited nation into deep seated and dangerous discontent," adding that "where the administration is not merely unintelligent it appears to be deliberately provocative."

The report sets forth that Ireland has become utterly estranged and the Irish problem, as the labor delegation sees it, is "a problem of political pathology." Abundant evidence exists, the report finds, of the need of action with regard to social matters and education but the political issue, it holds, obscures these questions. "The economic regeneration of Ireland, which would help materially to destroy existing animosities and speedily efface the memory of historic wrongs," the report adds, "cannot be successfully achieved unless and until the political problem is solved. The fundamental necessity, therefore, is a change in the political system."
