HESTIA WRECK BREAKING UP

Wreckers Risk Lives to Recover Scotch Whiskey From Her Floating Cargo.

Special to The Guardian.
YARMOUTH, October 28—Another body from the wrecked Hestia came ashore at Port Maitland this morning.
Two bodies at Cranberry Head have been identified as Chief Engineer Munn and Sidney McDonald, the third is unidentified.
The body at Salmon River has been identified as Theodore Reid of Glasgow.
FLAGGS COVE, October 28—There is no news from the wreck.
She is in bad condition and will probably break up in the first storm.
A great deal of the cargo washed out of the hatches and drifted away.
The upper deck is nearly all washed away. Between 30 and 40 small boats are around the wreck picking up the floating wreckage, chiefly Scotch Whiskey.
In their eagerness to secure this much desired freight the occupants of four boats were thrown into the water by the smashing of their little craft, but no lives were lost, as they were quickly fished out by their companions.
It is definitely known now that the death list numbers thirty-five.

SUCCESSOR TO GENERAL BUCHAN

Special to The Guardian.
MONTREAL, October 28—The vacancy in the Quebec command caused by the death of Gen Buchan has been filled by the appointment of Col Gordon, who was in command of Eastern Ontario and was recently transferred to the staff at Ottawa.
Col Gordon went to Africa second in command to Col Jarvis of Halifax in the sixth contingent.

ITO'S POLICY TO BE CONTINUED

TOKIO, Oct. 27—Japan's policy toward Korea will remain unchanged by the assassination of Prince Ito, who, as Resident General of Korea, worked out the plan for that kingdom's reformation. This much was made known in a statement issued by the Foreign Office today. The statement was called out by the appearance in some of the sensational newspapers of editorials demanding the immediate annexation of Korea to Japan.
The Foreign Office silences this clamor by formally declaring that, though the death of Prince Ito through the dastardly act of a Korean, was the greatest loss which the Empire could sustain, the attitude of Japan toward Korea remains the same as that inaugurated and desired by the dead statesman.
There is no reason to believe that the death of Prince Ito will have the slightest effect upon Japan's policies at home or abroad. On the contrary his known wishes will be followed probably more closely now that he is dead than when he was alive.
The death of the Prince was officially announced by the Government, today, and it is also stated that the warship bearing the body would arrive at Yokosuka, November 4th, when the body will be removed immediately to the Prince's late residence, in Tokio.

BRITISH TRADE STILL RETAINED WITH CANADA.

LONDON, Oct 27—In referring at Queen'sbury to his recent visit to Canada, Lord Milner said that he had met a man whose business it was to study the question of the importation of British goods to Canada. He belonged to no party and he had no political bias, but he had immense information. Lord Milner said he asked him to tell him honestly what had been the effect of the Canadian preference as regards the importation of British goods, and his reply was that it had saved for Great Britain whatever trade she still has with Canada.

INCENDIARY SUFFRAGETTES

Throw Acid to Destroy Ballots in English By-Elections. Arrests Followed.

Special to The Guardian.
LONDON, October 28—Mrs Chaplin, Suffragette, furnished a thrill at the Bournemouth election when she smashed upon the ballot box.
Her intention was to destroy the ballots as a protest against the exclusion of women from the right to the franchise.
What she accomplished was the painful burning of some election officers and the assurance of her own arrest.
About the same time a similar outrage was attempted at another booth by a young girl who wore the Suffragette colors.
In the latter instance little damage was done beyond burning the finger tips of the election officials who removed the broken glass.
No acid reached the ballots in either case.

A COMMANDMENT FOR DRINK EVIL

CAMBRIDGE, Mass., October 27—Some changes in the Ten Commandments to make them apply to modern conditions are advocated by Thomas N. Carver, professor of economics at Harvard University.
Prof Carver in particular wants an entirely new commandment dealing with the liquor habit. He would have it take the place of the commandment which reads: "Thou shalt not take the name of the Lord thy God in vain."
"The employment of the word God and the blasphemous as they are uttered today have lost their old-time significance," said Prof Carver today. "They are employed many times from pure force of habit, or an unthinking utterance of the first sentence that comes to one's lips, and are demonstrative of one who possesses a breeding and good taste."
"We see on the other side the intense craving for stimulants holding many people who have our lives in their keeping, and once in the possession of their desires, danger hangs over our being like the sword of Damocles. Drinking is a hindrance to any man who is placed in a position of trust in these times of highly specialized life."
His substitute commandment would read: "Thou shalt not drink to drunkenness nor bewilder thyself with strong drink."

AMHERST WILL HAVE BIG RACE

AMHERST, October 27—Arrangements are being made here to have the first five runners of The Herald and The Mail's ten mile race to run here next week. Rodgers, the fast Crescent man, who unfortunately met with an accident and was unable to finish will also be asked to run. Amherst is very enthusiastic over the possible chance of seeing these men and elaborate preparations are being made for the big event. The arrangements now being made include the collection of valuable prizes for the race. The entire town is looking towards the arrival of the fast team which would have represented the Maritime provinces in Montreal had the race been run this year. As soon as plans are completed the date of the big race will be announced. Many people from outside places are expected on the day of the race.

HOT-HEADED GIRLS PROVOKE LABOR WAR

MARLBORO, Mass., Oct 27—A war between the United Shoe Workers of America and the Boot and Shoe Workers Union such as crippled for so long the shoe industry of Lynn, is feared in the city as the result of the action of a few young girls employed in the Maple Street factory of the W. L. Douglas Shoe Company, in leaving their work this afternoon because they refused to accede to the company's request to join the Boot and Shoe Workers' Union unless they received the scale of wages called for by the union of the majority of its members. The girls were addressed by John Flynn, secretary of the Independent Lasters' Union, a local body affiliated with the United Shoe Workers of America. At the counting of Mr Flynn's address and the girls reaffirmed their position and they should cast their lot with the United Shoe Workers it is thought that a local war may break out between the two rival shoe unions.
The company points to the fact that there are only a few girls out, not more than fifteen, and those the youngest in the factory.
The temperature at three o'clock this morning was forty-four degrees.

Minard's Liniment for sale everywhere

SURVEY PARTY'S PAPERS STOLEN

Caused Great Concern Until They Were Mysteriously Returned Again.

Special to The Guardian.
OTTAWA, October 28—A couple of weeks ago a portfolio of papers was stolen in Vancouver from the Canadian surveyors working on the Alaska boundary all summer.
The loss was a matter of great concern to the surveyors as they included all the accounts and might make necessary the surveying of the work all over again.
However, the papers have been mysteriously returned.

LIVINGSTON TO FILL VACANCY

AMHERST, N. S., Oct. 27—A convention representative of the Liberal party of the county, met recently to nominate a candidate for the House of Assembly in place of the late Attorney General Pipes. Hon A. B. Etter, president of the Cumberland Liberal Association, presided, and A. D. Ross was secretary. Resolutions deploring the death of Mr Pipes were moved by H. J. Logan in an address which admirably represented the feelings of the convention, seconded by E. B. Paul, M. L. A., in appropriate remarks and passed by a rising vote.
The nominating committee submitted to the convention a number of names. All of the persons designated declined except Charles A. Lusby, Amherst, and Joshua H. Livingston, Wentworth. Each of these stated his wish to retire in favor of the other, and the choice having been left to the convention, Mr Livingston received a majority of three votes, whereupon Mr Lusby moved that the vote be made unanimous for his competitor. It was so declared by a rising vote. The candidate accepted the nomination in neat speech.

FARMAN MAKES FLIGHT AT BLACKPOOL, ENG.

BLACKPOOL, England, October 27.—Henry Farman, the French-Scotch aviator, today accomplished at the aviation meet by far the finest flight that has been witnessed in this country. The Frenchman covered forty-seven miles and one thousand, one hundred and eighty-four yards in one hour thirty two minutes sixteen and four-fifths seconds.
In the first hour he made thirty miles and one thousand, five hundred and seventy-seven yards, and the spectators cried out in their enthusiasm that he had established a world's record. This is not true, however, as Paulhan flew 30 7/10 miles in sixty minutes at Rheims.

DEATH LIST IS OVER A HUNDRED

CALCUTTA, Oct 27—The recent earthquake in Beluchistan was the worst that has occurred over such a wide area in many years. It is reported that the fatalities were one hundred and twenty six and that one hundred and fifty were injured.
Complete details have not yet been received from the interior but the best information is to the effect that the total deaths during the recent cyclone in Eastern Bengal did not exceed one hundred and that the fatalities included no Europeans.

PLEADING TO SAVE LIFE OF WOMAN

OTTAWA, Oct 27—Letters, post cards and petitions calling upon the Executive Council to exercise clemency in the case of Mrs Robinson, the Sudbury woman, sentenced to be hanged for the killing of her daughter's children, continue to pour into the Department of Justice. An accurate count of the letters, etc., has not been kept, but it is estimated that the number of individual signatures is approaching the one hundred thousand mark, and they are still continuing to come in. It is not likely that action will be taken by the Government until after the trial of Mrs Robinson's husband.

ITO'S ASSASSIN WAS AN EDITOR

Twenty Reasons Sworn to Kill the Illustrious Japanese Prince.

Special to The Guardian.
HARBIN, October 28—The assassin of Prince Ito was identified today as Inchan Antsen, former editor of a newspaper at Seoul.
He said he was one of an organized gang of twenty Koreans who had taken an oath that they would kill the Japanese statesman.
The assassin used dum dum bullets, poisoned with cyanide.

ANOTHER PAINFUL SHOOTING OCCURS

Yesterday morning while a young lad named Edward Tyke, of Milburn, Lot 40, was putting a charge of powder and shot into a gun, he met with an unfortunate accident. He was in the act of putting in the shot, and holding his hand over the muzzle he jarred the weapon on the floor so that the shot, this action resulting in the discharge of the load, all of which went through the boy's hand, making a very painful and ugly wound. The lad is only about fourteen years of age.
After the accident Dr R. D. McLaughlin, St Peter's, was immediately summoned, and attended to the lad's injuries, dressing the wound and relieving his suffering to a considerable extent. It was decided to have him removed to the P. E. Island Hospital, as it was not certain as to whether amputation of the hand would be necessary or not, and he was brought in yesterday evening in the eastern train and placed in the P. E. Island Hospital for treatment.

EMPEROR'S ACT REINSTATES FAMILY

VIENNA, Oct. 27.—Emperor Francis Joseph's act in conferring the title of Count on Baron d'Aerenthal, the Austrian Foreign Minister, marks the final transformation of an old bourgeois family into a noble one, and the recognition by the most exclusive aristocracy in Europe of the dignity of commerce. Count d'Aerenthal's ancestors were merchants of Prague.

FERRER WANTS HIS WORK TO CONTINUE

PARIS, Oct 27—The will of Francisco Ferrer, who was executed at Barcelona for conspiracy against the government of Spain, as published here today, charges the executor to conduct the publishing of the works on the Modern Schools and Education.
The testator stated that history would vindicate his innocence, but he adjured his friends not to bother about his memory, as "in this regard only acts count," he added the regret that his body could not be cremated.

A FOOL AND HIS MONEY ARE SOON PARTED

OTTAWA, Oct. 27—The desire to have what is known technically as a "little time," was responsible for a generous collection of misfortunes, which overtook a young man from the golden west, who came to Montreal to sail on the Allan Liner "Corsican." George Hilly arrived in town on Wednesday night, in the company of a hanker for a bit of life on Montreal's great white way. He got it.
A companion whom he found invited him into a Leguaniere street resort, where his drinks were doped, with the result that he did not awaken until Friday afternoon, and consequently lost his boat. He found his way to his hotel, a sadder, poorer, but much wiser young man, and from there he proceeded to the steamship offices where he booked passage on the "Ionian."
THE HESTIA'S CARGO FOR CHARLOTTETOWN.
ST. JOHN, October 27—The wrecked Steamer Hestia carried the following cargo for Charlottetown:—ten cases Whiskey, order; twenty-five Tons Pig Iron, N. Stairs and Morrison; fifty cases Whiskey, M. & D. Co.; six cases Merchandise, B. C. & Co.

Minard's Liniment Cures Dandruff.
COLDER.
Special to The Guardian.
TORONTO, October 29—Northwesterly gales, clearing and colder.
The length of today will be ten hours and forty-four minutes.

MINISTERS ARE NOW CONSULTING

About Plans for Canadian Navy. English Firm May Locate at Halifax.

Special to The Guardian.
MONTREAL, October 28—A conference took place today between Laurier, Fielding, and Broadout on behalf of the Canadian Government with the local representative of Swan Hunter & Wigham Richardson, of Newcastle on Tyne, Clarence Sola, who set forth the company's plans with reference to building the proposed Canadian Navy.
The matter will be studied by the Ministers and later will come up for the consideration of the Cabinet. This firm will locate at Halifax.

SCHOONER LOST AT SAINT PAUL'S

Special to The Guardian.
NORTH SYDNEY, October 28—The schooner Canadienne, Capt Theriault, which left here Monday with coal for the lighthouse of St Paul's Island, has been wrecked at that place. The vessel was caught in a heavy gale on Monday night.
The crew of four men are reported safe.
The Canadienne was built at Magdalen Islands in 1883 and owned by Arsenault of that place.

TERRIFYING EXHIBITION OF LATHAM'S MONOPLANE

BLACKPOOL, England, Oct 27—The capabilities of the aeroplane in the hands of a daring pilot were exemplified here, when Hubert Latham, the French aviator, gave an exhibition that first entertained and then terrified the spectators. In a monoplane Latham battled against a gale that was blowing thirty miles an hour, twice circling the course. As the machine struggled in the teeth of the gale it appeared at times to stand still in the air. When, however, Latham came about in the wind, the monoplane was driven at a rate estimated to be between eighty and a hundred miles an hour. At one time he barely escaped being carried out to sea, and the crowd, which had been worked up to a high pitch of excitement, ceased to cheer and besough the aviator to come down.
When Latham did alight he was not permitted to attempt a further flight while the wind continued high.

ARE ALL CONFIDENT OF MAYORALTY

NEW YORK, Oct. 27—Although the managers of all the mayoralty candidates claim success as assured, the municipal campaign enters its final stage indicating one of the closest contests ever decided on election day. Although the claims advanced in behalf of Mr Hearst and Otto T. Barnard are less sanguine than those of Tammany Hall, both their camps have concentrated fire on the Tammany candidate, Judge Gaylor. The former Brooklyn jurist, in addition to being attacked last night by William M. Ivis, representing the Civic Alliance and by Job E. Hedges speaking for the Republicans, had his judicial career bitterly assailed by Hector M. Hitchens, a well known lawyer, who gained prominence at the time of the overthrow of John Y. McKane, as political boss of what was then the town of Gravesend.

C. N. R. STEAMERS ON BOTH SEAS.

WINNIPEG, Man., Oct. 27—D. D. Mann, First Vice-President of the Canadian Northern Railway, arrived Monday and made a statement that directly C.N.R. steel reaches the Pacific coast, first class liners equal to any afloat, would be launched on both oceans, this being one result of the far-reaching arrangement between Mr Mann and the B. C. Executive.
Mr Mann prophesied that the effect of Canadian Northern trans-continental competition would be a great stimulus as the original coming of the C. P. R. He explained that the retentions of Hon Messrs Fulton and Tatlow was a surprise to him, happened after he left. He had no comment to make, but he regarded the deal as reasonable and safe. Negotiations began a year ago and had been conducted with the Premier through Attorney-General Bowser, in fact the Cabinet had been seen. Mr Mann declared that while Government assistance was necessary for trans-continental lines, private capital could not be depended upon for the construction of the prairies. He said that five hundred miles of C. N. R. track had been graded this summer, and two hundred and fifty miles of steel laid. Another hundred would be completed this year.

A LOVE AFFAIR AND SUICIDE

Rash Act of St. John Girl in Boston. Unknown Body Identified.

Special to The Guardian.
BOSTON, October 18—The young woman who committed suicide Tuesday evening in a room on Dwight St. by taking corrosive sublimate tablets has been identified as Miss Bertha Keely of St John and according to her friends a love affair which was not turning out to her satisfaction was the cause of the rash action.

MURDER TRIAL AT SYDNEY SUPREME COURT

SYDNEY, October 27—At the opening of the supreme court this morning, Joseph Nash was placed in the dock to answer an indictment for the murder of Max Passerino. The court house was packed to its utmost capacity, all eager to absorb the sensations of a murder trial.
Before answering the indictment Mr Maddin moved to quash the same on the grounds that the grand jury lists were not legal, not having been prepared according to the provisions of the statutes.
Judge Russel ruled that all the defects had been cured by the act following the lists. Nash then answered "not guilty." The prisoner is a bright and rather prepossessing young man. To look at him in the dock no person would think he was a native of Southern Europe, and he does not, in appearance at least, fill the bill for a typical murderer.
Some time was consumed in ampanelling the jury. Three challenges on the part of the crown and fourteen on the part of the defense exhausted the pannel and then the sheriff started putting in talesmen. After a while enough were sitted out of the crowd to complete the jury.
Mr Cameron and Mr Carroll appeared for the crown and Mr Maddin and Mr Harrington for the defense. Mr Carroll opened with a short resume of the facts relied upon by the crown to sustain the indictment. He stated the facts, as already given in the press, and in addition intimated that the crown should attempt to prove a conspiracy to murder Passerino, on account of him having been active in securing Italian labor for the Coal company against the wishes and interests of the strikers. Nash is said to be one.
Dr J. D. McKeen was the first witness for the crown and stated the cause of death was a deep wound on the upper part of the thigh, which severed an artery and some minor blood vessels. The internal wound was about three inches in length but the external wound was quite small.

M. D'S BREAK RECORD FOR VACCINATION

NEW YORK, Oct. 27—All known records for rapid vaccination are believed to have been broken at this port. The Greek steamer Themistocles was detained at quarantine from 7:20 a. m. until 3:50 p. m. until 1045 immigrants from Patras and other ports had been vaccinated. Dr Alvah H. Doty, federal health officer of the port and three assistants vaccinated the entire 1045. A computation showed that allowing no intervals for luncheon, the four doctors must each have vaccinated 261 patients at an average rate of one in every 1.9 minutes.
There was much chafing at the delay among the 93 cabin passengers, and the steamer was at first inclined to be mutinous. All had been vaccinated by the Greek immigration officials before being permitted to embark. Dr Doty, however, was unrelenting, for several cases of smallpox from Greek ports have recently developed here after landing.

VALUABLES THROWN FROM CAR WINDOW

SAN FRANCISCO, Oct. 27—J. E. Chibberg, president of the Alaska-Yukon exposition, is said to have accidentally thrown diamond rings worth several thousand dollars out of the car window while on his way from Seattle to Portola festival last week.
The diamonds belonged to Mrs Chibberg. She had placed them in a glass of water and set the glass on a window sill. Then she and her husband went to breakfast.
Mr Chibberg returned to the room first and before closing the window he picked up the glass and threw the water out. When Mrs Chibberg told him of the contents of the glass he chartered an engine and directed search along the roadway for the gems. They were not recovered.

VOLCANIC ISLAND SHOWS MUCH HEAT

SEATTLE, Oct 27—Remarkable reports of conditions in Bogotof Island which has been named Incandescent Island by sailors, were brought here yesterday by officers of the United States revenue cutter Perry.
With a new reef which stretches on one side of the island the water by test registered two hundred and ten degrees Fahrenheit. Clouds of smoke and steam arose from small fissures and within the latter small spot of land reflected a translucent glow of an active volcano extended a short distance beneath. At many points on the island the earth was so hot that the visitors were unable to stand upon it. In a pool, gulls eggs were boiled. The officers on the cutter also observed a disturbance of the earth on Pablove island that may indicate an early eruption of the volcano of Seablow. Smoke and steam were visible several miles at sea.

WHITNEY FACES FIRST DEFICIT

Caused by Change in End of Fiscal Year, the Treasurer Says.

Special to The Guardian.
TORONTO, October 28—Premier Whitney's Government faces a deficit.
On account of the change in the end of the fiscal year to Oct 31, the Treasurer claims the sheets will not balance.
Succession dues and railway earnings are good, but license fees and timber sales are not received till November.

DEADLOCK IN EASTERN LEAGUE POSSIBLE

NEW YORK, Oct 27—When the baseball magnates of the Eastern League began their second day's session at the Hotel Victoria, today, they faced the probability of a deadlock over the league presidency, for which two candidates, in opposition to Patrick T. Powers, now president of the organization, are aspirants.
The league presidency has been the foremost topic before the meeting since its convening yesterday, and the advocates of the election of James R. Price, sporting editor of a New York newspaper, and of Edward G. Barron, former manager of the Toronto team, and once president of the Atlantic League, were today pressing the claims for their candidates.
Debate preceding the election was expected to develop the charges that President Powers had too many other athletic interests and that Eastern League affairs were suffering in consequence.

EMPEROR AND KING COME TO AGREEMENT

PARIS, Oct 27—The precise results of the meeting of Emperor Nicholas and King Victor Emmanuel at Paeconig are revealed according to the Liberte, which from "unquestionable authority" announced that no written convention was signed, but two specific statements were made. The first was a mutual assurance of the independence and the eventual economic development of Montenegro. The second was support of the English-French policy regarding Crete; that is Crete for the Cretans, not for Greece. A further and more important general engagement, Italy is in the future to act with Russia, as did Austria prior to the Herzegovine-Bosnia affair. The Liberte insists that this latter agreement was made in full accord with Great Britain and France as proved by the active exchanges at London which preceded the invitation of Emperor Nicholas for M. Pinchoen to meet him at the frontier.

IDEA OF WAR DERIVED BY GERMANY AND BRITAIN

KANSAS CITY, Mo., Oct 17—Herr Bernard Dornburg, colonial secretary of the German Empire, last night derided the idea of war between Germany and England.
"Pouf," he said, when asked if the two countries would fight.
With him was Dr William Busse, Secretary of Agriculture for the Colonies. They have been in this country a month studying the culture of cotton. In their travels through the south they have visited Booker T. Washington's Tuskegee school. Telling of this during the Colial Secretary to mention the negro problem.
"The main problem with us in Africa," he said, "is to find something for the negroes to do that they will like to do, and will do. My government wishes to make its negroes in Africa work and pay taxes and save money."
