

How a spoonful of LUX improves the Appearance of "Fine" Hair

THE luxurious Lux lather cleanses each individual hair right down to the scalp and separates the strands when they are inclined to mat.

The Lux shampoo gives hair of goddess-like fineness a silky fluffiness that makes it seem to have almost doubled in volume.

Regular LUX Shampoos will keep the hair Beautiful-Safely

Lever Brothers Limited Toronto

After Every Meal

Take Wrigley's Spearmint, Juicy Fruit or the delicious peppermint Nips or Doublemint.

Take them after meals and profit greatly thereby.

You need just the aid to digestion that Wrigley's gives. Spearmint has the flavor of fresh mint leaves - Juicy Fruit has the flavor of fresh ripe fruits - And your favorite Peppermint flavor is double strength in the others:

Crepe de chine is the ever-faithful, ever-smart material amongst a checked skirt and sports clothes.

GUARDIANS ON SALE at the Guardian's Western Office in the McNeill Building, Summerside every day.

JUST ARRIVED one carload of Portland Cement now unloading also one car of cedar posts and stakes.—A. H. Affleck, Albany. 9161-8-31

GUARDIAN OFFICE.—The Guardian's Western Office is now located in the McNeill Building, Water St., Summerside, where subscriptions, news or advertising will be received. The phone number is 233.

Hon. H. Frank McPhee, Minister of Public Works, came to Summerside Thursday night and returned to Charlottetown yesterday.

Find X-Ray Interaction on Energy And Matter

ITHACA, N. Y., May 8.—Research in the field of X-rays, now under way at Cornell University, has led to the discovery of certain laws governing the action and effect of the rays which shed considerable light on a present problem of great scientific importance—the interaction between radiant energy and matter.

Dr. F. K. Richtmyer, professor of physics at Cornell, has established that the absorption of X-rays is proportional to the cube of their wave length. His graduate students have demonstrated to one part in ten thousand, that no change in absorption of the rays is produced when iron is magnetized; that there is a slight change as the temperature of the absorber is raised, and that chemical combination seems to change the absorption.

The students also are working on the problem of scattering X-rays, which are spread in much the same manner as dust in sun beam scattering light; the effect of various factors, such as temperature, magnetic condition and chemical combination on absorption, and the polarization of X-rays.

Professor Richtmyer asserts that the experiments thus far have led to no practical results, and that they were undertaken with no thought of their application in industry or elsewhere, except as they have a direct bearing on scientific theories.

"The problems we are studying however, may have a practical effect upon the lives of the future generations," he said. "For instance, if we knew absolutely what the effect of X-rays upon matter is, we might have somewhat more of a clue as to whether X-rays could cure cancer. We cannot anticipate the commercial or other applications of the future, but we can determine and formulate the laws of nature with the confident expectation that future generations will make use of these laws in solving their problems."

Roentgen quite accidentally discovered X-rays in 1895 when he was working on the discharge of electricity through evacuated tubes. Professor Richtmyer pointed out, "It is absolutely certain that if Roentgen had been interested in finding some way to assist surgeons in setting bones, he would never have been studying vacuum tubes and electricity. Yet out of his accidental discovery came this new tool of X-rays which has revolutionized certain phases of medical practice."

"Thus the scientist never knows how close he may be to some mighty discovery. The laboratory experiments of today may suddenly divulge one of the great laws of Nature which heretofore had been hidden."

Cities In Russia Renamed After Soviet Celebrities

MOSCOW, May 8.—More than sixty cities and towns in Russia have been renamed by the Bolshevik authorities because the former names were identified in some way with the Czar, the Nobility or the Church.

The commonest change is that of Petrograd (City of Peter the Great), which is now known as Leningrad (City of Lenin). Then there is Tsaritsyn, the famous city on the Volga, which has been rechristened "Stalingrad" in honor of Joseph Stalin, General Secretary of the Communist Party.

FOR SALE AT SOURIS

The dwelling house, barns, and other outbuildings with one acre land, situated on Upper Main St., formerly owned by the late Wm. Kearney. The entire premises are in splendid condition, the dwelling being heated with hot water, and electrically lighted throughout. The situation is magnificent and commands a splendid view of the surrounding country and Gulf of St. Lawrence.

Also two plots land about nine (9) acres almost adjoining, will be sold with above premises, or separately, very suitable for market gardening or strawberry culture. For terms and other information apply to

Circus And Carnival Draw Dakota Indians From Home

PINE RIDGE AGENCY, S. D., May 8.—The circus and the carnival are on the road again, and officials of South Dakota Indian reservations are making their annual effort to keep their wards from flocking to join the performers under the big tent.

Every spring circuses and carnivals send scouts out here in quest of Indians for pageants and wild west shows, and for every man they seek, a dozen braves respond.

Federal and state officials frown on the recruiting of Indians for traveling shows, but often their pleas are ineffective. The Indian, migratory by nature, is easily beckoned from his little farm. His guardians have no objection to his departure to permanent employment elsewhere, but they have found that when he leaves in the spring to join a carnival, he comes home penniless and throws himself again on the beneficence of the reservations, seeking to reclaim his land.

Indian Chieftain Teaches Sioux Legend Of Creation

RAPID CITY, S. D., May 8.—An ancient Sioux legend of the creation is the most popular story in the repertoire of Chaumey Yellowrobe, son of a Rosebud Sioux chief, and a teacher in the federal Indian school here.

"When the Great Spirit had created his world here on mountains and prairies and streams and trees," Yellowrobe tells his students, "he sought to fashion a human being worthy to enjoy its grandeur. He shaped the clay in his hands, and baked it in his campfire, but when he drew it forth it was pale and had not baked rapidly enough, and he threw it behind him.

"He moulded another form, and laid it in the hot ashes, but when he drew it out it was blackened and crisp. So he tossed it to one side. Then he modelled a new figure, over more carefully than before, packed the red coals around it, and when he lifted it from the fire it was red and sound and perfect.

"And he put it into the great wilderness of the west and it multiplied in kind and was the tenant of the Great Spirit's own garden."

Serpent As Fascinating As Primeval Times Keeper Says

PHILADELPHIA, May 8.—That the serpent has lost nothing of its primeval fascination, is the conviction of Robert Hess, for twenty-seven years keeper of the reptile house of the Fairmount Park Zoological Gardens.

Mr. Hess believes that the lure which snakes appear to exercise over women is something deep-rooted and long in-bred.

"Women are fascinated by our snakes," Mr. Hess said. "They come again and again and stay for hours; some of them standing perfectly absorbed without moving, just watching the movements of the big reptiles."

The huge boa constrictors and anacondas seem especially attractive to the women visitors to the zoo, the keeper said. He attributes the strange lure of reptiles for women partly to the slight element of danger and to the stealthiness of their movements.

Snakes have his endorsement as household pets, but he stipulates that the owner must banish all fear or hatred for them before attempting to keep one.

GRAHAM'S ROAD SCHOOL

The following is the standing of the pupils for the month of April. Principal's Dept. Grade X—1, Sterling Williams; 2, Wilfred Whitehead.

Grade VIII.—1, Robina Whitehead; 2, James Williams.

Grade VII.—1, Olive Campbell; 2, Ada MacKinnon; 3, Hilda Murray.

Grade V.—1, Clara MacLeod; 2, Jennie MacKinnon; 3, Christine Wigmore.

Assistant's Department: Grade V.—1, Elmer MacLeod; 2, Clarence Folland; 3, Earle Murray.

Grade IV.—1, Margaret MacLeod; 2, Elmer Wigmore; 3, George Wigmore.

Grade III.—1, Edna Wigmore; 2, George Whitehead; 3, George MacKinnon.

Grade II.—1, Leigh Campbell; 2, Hugh MacKinnon.

Grade I.—1, Waldon Ferguson; 2, Margaret MacLean; 3, Helen Wigmore.

FRENCH GOVERNMENT 6% BOND Shrewd Investors Perceive in the Temporary Low Value of French Money and Income on an Investment in "France's Premier Rente"

Tax-Exempt Interest Income

After having exhaustively studied the financial and economic condition of France, one must inevitably come to the conclusion that the purchase of her high-grade Government Bonds is an opportunity which one cannot afford to ignore. The investor in French Government Bonds today buys at such an advantageous time that early profits are within his grasp.

Not only does the principal increase in value as the franc rises but the interest-income automatically augments. For example, each Bond of 10,000 Francs yields an income of 600 Francs per annum. At the present rate of the franc, holders of French Government 6% Bonds, if coupons are converted, will receive a yield or interest at the rate of nearly 7%, which is in itself attractive enough.

With the franc worth only 80 cents, however, the holder of 10,000 Francs in French Government 6% Bonds will receive \$800 in Canadian money for each 10,000 francs yearly interest-income. This amount represents a yield of over 16% on the original outlay of \$300.00.

With the franc worth 15 cents, every 600 Francs interest-income will be worth \$90.00 in Canadian money. This latter amount represents an interest rate or yield of over 31% on an investment of \$300.00. With French exchange at parity, the annual interest-income in Canadian currency will amount to \$180.00 for every Bond of 10,000 Francs denomination at a yield of nearly 40% on every \$300.00 invested today.

As the security is unequalled, and the investment thoroughly safe, we advise investors to buy as many French Government 6% Bonds as they can conveniently afford. Immediate action must be taken if early profits are to be made.

Our past record stands out as testimony to our ability to make money for all who deal with us.

In November, 1925, we strongly advised investors to make substantial investments in German Government 6% Bonds, when they could be bought from us at \$39.00 per million marks. Nine months later German Government 6% Bonds had risen to \$2,800.00 per million marks, and those who had taken our advice were able to sell out at a profit of more than 6,000% for every \$39.00 invested. The same is true to an even greater extent of City of Berlin Bonds (1914-15 issues) which we sold as low as \$10.00 per million marks; subsequently they rose to \$12,000.00.

And not only in German Government and Municipal Bonds were handsome profits made by our clients. Polish Government 6% Bonds which we sold for \$50.00 per one million Polish marks rose as high as \$800.00 within a comparatively short time.

Government and Municipal Bonds in sympathy with the rise in Danish money, are selling today at prices that return to those astute investors who bought them on our advice a year or so ago, profits of more than 100% on their principal alone. The same is true of the Norwegian Government Bonds, which we sold at \$100.00 per one million Norwegian kroner, and those far-sighted investors have been cashing their interest coupons at steadily mounting rates.

Another issue which we recommended and sold to investors was the Australian Government Guaranteed 7% Gold Bonds of 1925. We offered these Bonds at \$25.00 per \$100.00 Bond, less than a year ago; today they are selling above par.

Substantial profits—indeed, fortunes—are being earned by far-sighted investors through the medium of French Government and Municipal Bonds recommended by this House.

KENSINGTON HIGH SCHOOL

Honor Roll for April. Principal's Department: Grade X—1, Gwen Spriggs; 2, Ruby Rogers; 3, Fred Jardine; 4, James Millman.

Grade IX. Sr.—1, Keir Duggan; 2, Ruby Bernard; 3, Jean Sharp; 4, Mary Murphy.

Grade IV. Sr.—1, Margaret Stewart; 2, Lester Champion; 3, Urban Hicke; 4, Lorne McRay.

Grade IV. Jr.—1, Gertrude Gillis; 2, Irene Caeley; 3, Eddie MacDon-

WE BELIEVE that an investment made today in French Government 6% Bonds (Loan authorized Dec. 16th, 1920; redeemable at par at the option of the Government on or after Jan. 1st, 1931), presents an exceptional opportunity for profit on any material advance in the value of French money (Francs).

Due to the depreciation of French Francs a French Government 6% Bond (of 1000 Francs denomination) can now be bought for \$30.00; with French exchange at normal (193c per Franc) these same Bonds would have a value of \$193.00 each.

International bankers believe French Francs will sell at 10 cents per Franc before very long. Just think what this means to French Government Bonds; with the Franc worth 10 cents, each Bond of 1,000 Francs will have a value of \$100.00—a rise of over 240%, or a profit of \$70.00 for every \$30.00 invested today.

With the Franc selling at 15 cents, each Bond of 1,000 Francs will have a value of \$150.00, a rise of more than 400%, or a net profit of \$120.00 for each Bond of 1,000 Francs, or for every \$30.00 invested today.

We made a lengthy and thorough investigation to determine the best way to buy French Francs for maximum profits. We are of the opinion that these French Government 6% Bonds afford the best medium, for they represent to French investors precisely what British Government and our Canadian Government Victory Bonds represent to us, being legal investments for every Institution, Trust Fund and Savings Bank in France, and constituting a strictly high-grade Government investment. They may be sold again instantly for spot cash, as they are listed on the Paris Stock Exchange and traded in throughout the financial centres of the world. The interest coupons (payable June and December 16th) have always been paid promptly on the spot, and can be cashed in Montreal, New York, London and other financial centres through our Home, bank or other institutions.

French Government Bonds will, we believe, unquestionably come back to normal (\$193.00 per 1,000 Francs Bond). The United States were financially bankrupt after the Civil War.

Their securities could be bought for a few years the Americans were on the financial feet again, and today are considered the richest nation in the world. Even England was once faced with a similar disaster. Her Bonds sold down to 10 cents, but she eventually recovered 95%, making fortunes for far-sighted investors who had the courage to invest in them. When millions of men and nations lead their collective efforts to the task—nothing is impossible. The French franc will undoubtedly come back to normal.

A study of history convinces one that the most difficult thing in the world to do is national existence. History is repeated. The opportunity of a life time, remarkable profits, exists today for investors through the purchase of these high-grade French Government Bonds. They rank as the eminent class of French Government securities and are virtually a first mortgage on the assets and resources of the vast and powerful Republic of France. The Bonds are valid for 5 years after their respective maturity dates thus enabling the investor to cash them at a time the exchange rates are favorable.

France is a first-class commercial and military power of the world. French industries are thriving and working overtime. France is exporting goods to every country on the globe; her shipping is crowding the world's ports, and the nation shows every evidence of industrial and economic progress. Repayment from Germany are further enriching the French treasury. These conditions will quickly reflected in a rapid rise in the French franc, which in turn increases the value of French Government Bonds. That is why we urge you to buy French Government Bonds NOW, while they are on the bargain counter.

Table Showing Present Price and Profit Possibilities. Densinations: 1,000 Francs, French Government 6% Bonds; 5,000 Francs, French Government 6% Bonds; 10,000 Francs, French Government 6% Bonds; 25,000 Francs, French Government 6% Bonds; 50,000 Francs, French Government 6% Bonds; 100,000 Francs, French Government 6% Bonds.

WE ARE selling a good many of these bonds at the above price, which covers every expense, receipt of accepted cheque or money-order we will at once confirm sale. Bonds are forwarded insured these prices as quotations are changing daily.

For many years this Investment House has been Canada's foremost exclusive foreign bond house, and makes it most quickly. Our interest does not cease after a sale for it is our constant aim to keep our clients advised of the market value of their investments, to render it greatest service, informing clients when Bonds rise in market value, and when our clients is infeasible.

THE INVESTMENT HOUSE OF C. M. CORDASCO & COMPANY FOREIGN EXCHANGE FOREIGN BONDS MONTREAL, CANADA

I enclose herewith { cash / accepted cheque / money order } for \$..... in full payment for the purchase from you of francs in French Government 6% Bonds (Loan of 1920), which you are to forward me by registered and insured mail.
