Great interest is being evinced in the Boy Scouts these days, leading citizens of all denominations offering assistance in furthering the movement in the Province. The Secretary has received many complimentary letters on the value of Scouting and expressing every good wish for its further development in our midst.

Scouts be prepared! Now is the time to make arrangements for your annual troop exhibitions and concert, the best items of which should be utilized later in the program for the annual Provincial concerts and display to be held in Charlottetown and Summerside.

Hockey is a thing of the past winter—among the has-beens—now Scouts and Cubs should be alert to complete their training for badges and in the development of stunts and surprises for "the other fellows."

THAT THE PEOPLE MAY KNOW

WHO PAYS THE BILL?

Canada's Liquor bill is a big one, nearly \$200,000,000, roughly a \$20.00 Bank-Note from every man, woman and child in the land. King Alcohol is a costly monarch.

But it is said that the governments, federal and provincial, get revenue from the traffic. So they do to the amount of some 80 to 90 million dollars annually. In 1930 the federal government received in revenue the sum of 55 millions and the provincial governments, about 34 millions. The expense of administration runs into 15 millions. Nearly \$100,000,000 flows into the big pockets of the privately owned Liquor Traffic. The Brewers and Distillers get the biggest slice of it. The enormous sum of \$45,000,000 actually went out of Canada to pay for imported liquor. These are big sums of money.

It is an expensive business but who pays the bill?

It all comes out of the pockets of the Canadian people, an average of twenty dollars a piece. It all comes out of the pockets of the drinking people of Canada. It is paid in hard cash by the drinkers and harder suffering by their wives and children. What pays for beer will not buy bread or butter. The larger portion of it comes out of the pockets of the wage earners, for there are so many more of them. Thus the common folk, the people with the smaller incomes, pay the biggest share of the drink bill.

The government revenue from the drink traffic is a tax, an indirect tax on the people. Indirect taxes are always the heaviest kind, cost the citizen most, pay the government least. Taxes are supposed to be levied in proportion to ability to pay. But in the case of the liquor revenue it is the poor man who pays most. A U. S. Senate investigation brought to light the fact that the Association against the Prohibition Amendment was organized by 230 millionaires who hoped to save their own big income taxes by repealing prohibition and getting the revenue out of the common working folk through a tax on beer. Isn't it time the working classes got their eyes opened to the oppressive working of the Drink Traffic, and not less of the System of Government Control?

The drinking fool must pay a heavy tax; He gets it "where the chicken got the axe."
