tion is an amazing spectacle," said Dr. Baird. "It is not a vicious-looking insect but in attacking a hopper it assumes a deadly role. It flies in at lightning speed, selects a spot to land and there lays an egg."

"In a fraction of a second the egg is a maggot. If the sarcophaga lands on a soft part of the hopper, the maggot has vanished in the twinkling of an eye, burrowing like mud."

"The shelly part of the hopper is no protection. If the egg is laid when a distal insected with hopper, a second or so, but no longer, it drills its way through, gathers strength by sucking the body fluids at first and then eating into the hopper's vitals."

"It means the hopper is dead in about 15 days."

Dr. Baird agreed the time came when a distal insected with hopper might send a hurry call for armies of sarcophaga, "but that is not the way we want to work. We want to locate the breeding grounds and place the hopper, first there. There would have to be co-operation with the United States and we know we will have it because we constantly exchange information."

"Grasshoppers on the plains are migrants and action on both sides of the border is as essential in a campaign of using parasites as in the employment of poison. The Argentine has worked with us and we hope to extend our anti-grasshopper alliance to Australia, South Africa and other Empire countries with similar problems."

"Our studies are not confined to parasites which may be imported and found effective, such as those from the west and vice versa. British Columbia and Ontario grasshopper control presents some problems different from those on the prairies."

"Such experiments, take time. We have reached the point where some grasshopper parasites have been released in Ontario and the results have been encouraging. But we cannot say anything definite yet because we have to be sure."

"We believe we are on the right track and with the support of other countries and continued research at home we feel that in the future we will cope with the grasshopper and control him, though though he is."

C. N. R. ADD NEW FREIGHT LOCOMOTIVES
MONTREAL, Que. Feb. 27.—Canadian National Railways has ordered 25 freight locomotives for service on the United States lines of the National System, according to an announcement made today by R. C. Vaughan, vice-president in charge of purchases, stores and steamships. The new engines, which are required to handle the increasing traffic on the Grand Trunk Western lines of the System will be built by the American Locomotive Works at Schenectady, N. Y. They will be of the Northern type, designed for hauling heavy freight trains at high speeds.

Currencies

NEW YORK, Feb. 27.—(CP)—The Hong Kong dollar swung upward to a new peak for 1941 today with a gain of 1/4 of a cent to 21 1/4 cents in terms of the United States dollar.

Foreign exchange dealers attributed the rise mainly to repatriation of funds held in the United States by Far Easterners. Brokers also noted a downturn in the pound sterling in relation to the Hong Kong dollar because the Hong Kong unit is usually quoted in terms of sterling.

The Shanghai dollar rose 1-20 cent to 5 7/2 cents. The free Argentine peso lost 1-10 cent and the Canadian dollar 1-8 cent to 85 1/2-1-2 but sterling gained 1-4 cent to \$4.03 3-4.

(Ottawa Foreign Exchange Control Board rate 9.00-9.91 per cent discount.)

Lowly Carrot Is Called Up For Sandwich

By D. E. BURRITT
Canadian Press Staff Writer

(CP)—The common potato and carrot have been elevated to a distinguished position in the changing diet of Britain. Previously accepted as commonplace as water and fresh air the potato and carrot are being distinguished in fancy dress so they may appear different for every meal.

The Ministry of Food is reminding Britons about the nourishment to be obtained from these vegetables and suggests various ways in which they may be served for breakfast, lunch and dinner.

Take the case of "Miss Lightfoot," a character given birth by the Ministry which tells how she works in a factory all day and "Makes no sense or dances about it but she is doing her bit." And the thing you can't help notice about Miss Lightfoot is that "she is seldom tired, never ill, never nervous." That's because she eats her potatoes and carrots every day. But how about you?

NOW TRY THESE
If you would like to follow the example of Miss Lightfoot how would you like to try "carrot sandwiches for a change," or a "carrot cake salad," or "Fudge for Breakfast," or perhaps Potato Floedies.

For the sandwich you simply grate carrot and cabbage and mix with chutney or sweet pickle. That will help replace rationed ham. If you prefer the salad, instructions are much the same except that you boil the carrots instead of serving them raw.

"Fudge," which the Ministry says is both nourishing and filling, is approximately smashed potatoes mixed with enough flour to a pliable dough and then cooked on a griddle.

"With 'potato floedies' the potatoes are grated raw, mixed with flour and water to form a batter and then fried much the same as 'potato chips' or French fried."

FOOD AS MUNITION
Coupled with these instructions is the advice to grow potatoes, carrots and onions, vegetables that will store for winter.

"Food is a munition of war," the Ministry declares on a flowing banner.

New Canada Speaks

(Translated extracts from foreign language publications in Canada.)

BRITAIN'S FORESIGHT
"Der Courier," German language weekly Regina Saskatchewan.

By her far-sightedness, Britain knew how to create goodwill in the Colonies and Dominions, in that she allowed as much freedom as possible to each country, and interfered hardly at all in domestic matters. This clever policy is now bearing fruit. The different dominions stand united behind the Mother Country and to participate in the war with all her natural resources in materials and men.

PAYING FOR OLD MISTAKES
"Gazeta Polska" (Polish Gazette), Winnipeg, Manitoba.

It is not excluded that Germany which today is tolerating her Bolshevik ally will tomorrow attack Russia, applying the principle of preventive war. At any rate very grave developments may be expected in Eastern Europe, if not in the near future, then certainly in the Spring of 1941. According to "Main Kampf," Russia has been doomed by Hitler and sooner or later his Russian plan will be carried out. Russian political leaders made a mistake in August 1939, when they gave Germany an ideal opportunity to start war. This mistake will have frightful consequences for Russia and the assistance lent by Molotov to Hitler in the liquidation of free Central European nations, will not save Russia from her fate. . . . Stalin must

now speedily revise his political calculations. The old Polish proverb comes true in his case, which says "that nobody can get fat on stolen goods."

A NET OF PAN-SLAVISM
"Novy Shlakh" (New Pathway), Ukrainian-language semi-weekly Saskatoon, Sask.: As the Russian Tsar once did, Stalin now wants to play the all-Slavic fiddle: he wants to appear in the role of a "gatherer of all Slavic lands". Stalin's pan-slavistic propaganda is already being spread in all Slavic countries, like Bulgaria, Jugoslavia, Bohemia, Slovakia and in the German-occupied part of Poland. The Comintern is whetting its appetite for these countries, in order to extend the Soviet possessions in Europe.

Deputy Provincial Secretary

Fighting for Mother Britain

CANADIANS manning the defenses of the British Isles... Australians chasing Italians in North Africa... Indians and South Africans chasing Italians in East Africa... New Zealanders manning the big guns in Singapore and British Malaya... Egyptians guarding the western approaches to Suez... a mighty empire is just beginning to fight. While Hitler holds away over 160 millions, Britain's war effort is backed by 500 millions. These fighting men from the dominions and territories have scored great victories in this war, as they did in the World War. That they will score still more is a virtual certainty. These pictures show some of the men. (Egypt is not part of the empire, but she is closely allied and her men are British-trained.)

... draws bead on Japs ... aids the empire. ... bars roads to Suez. ... prays in Libya.
