In Just Three Minutes

Madam, you can make better, cleaner and wholesomely bread in three minutes with the UNIVERSAL bread maker and raiser than is possible in half an hour in the old-fashioned, by hand way.

With the UNIVERSAL bread maker your hands do not touch the dough, it does away with all hand kneading simple and light to operate that even a mere tot could work it. It's easy to clean, always ready for instant use.

If you wish to save time and lighten your labor on baking day, you should get a UNIVERSAL bread maker. Small in price big in satisfaction.

See our window display—step inside and let us show you this unique bread maker.

**GERMANS CHEERED BRITISH SEAMEN**

(Special to the Guardian.)  
COPENHAGEN, Aug. 19.—Via London 12.15 p. m.—German cheers for men in the British navy is an unusual war time incident reported from the North Sea by the captain and crew of the German trawler, Gudrun, belonging in Altoona, which has just arrived at Esbjerg.  
The captain, relating the experiences of the trawler, said that the Gudrun was stopped in the North Sea by a British squadron. He promptly got his boats ready and distributed life belts, believing his ship was certain to be sunk.  
"When the British seamen reached the trawler the captain begged for time to take to the boats, and admits that he was staggered at the short and pointed reply: 'You take the whole ship, we shall not harm you.'"  
The captain adds that the British left amid the hearty cheers of the greatly relieved Germans.

**C. P. R. TRAIN HIT ROCK SLIDE IN B. C.**

CALGARY, Aug. 19.—Canadian Pacific Transcontinental No. 3, from Toronto to Vancouver, crashed into a rock slide near Golden, B. C., early Wednesday morning. The engine turned turtle and Fireman John McLennan was killed. All the coaches kept the track and the passengers escaped with a severe shaking up. Wrecking gangs were dispatched to the scene and trains are again running.

**SIR ROBERT BORDEN'S TRIBUTE TO THE CANADIAN TROOPS**

OTTAWA, August 17.—The text of Sir Robert Borden's message of appreciation of the work of the Canadian troops at the front, addressed to General Alderson after the Premier's recent visit to the firing line, has been received here.  
"The fine spirit of the Canadian division and their officers for the great test in which they are engaged," said Sir Robert, "very deeply impressed me. It was a great privilege to have the opportunity of seeing them and conveying to them from the people of Canada a message of pride and appreciation. As I speak on more than one occasion in addressing the officers and men, they can hardly realize how intensely all Canada has been thrilled by the tidings of their achievements. The President of the French Republic, as well as General Joffre and Sir John French, spoke of the troops under your command in terms of the highest praise. I bid you Godspeed in the great task in which you are engaged."

**FRENCH "PAINT THEIR WAR HORSES 'HORIZON BLUE' TO DECEIVE THE ENEMY.**

The problem of rendering horses as nearly invisible as possible on the field of battle has been turned over for solution by the French War Department to the Society of Comparative Pathology. Sessions of this learned medical body already have been held to discuss the matter.  
Permanganate of potash has been used to tint horses which were of a conspicuous color. Experience now shows that it is not satisfactory. First of all, it is of little use unless applied to the horse before he has shed his hair. It further seems to be irritating to the animal and probably is slightly toxic.

Veterinarians have found that the application of any coloring matter to horses should be made only after the oil has been washed out of the hair with a weak ammoniated solution. This will insure a lengthy duration of the artificial coat.

Dr. Roeland, a recognized authority, devised the use of picric acid for giving horses a khaki color. The acid, an excellent antiseptic, especially serviceable for burns, has proved to be without irritating effect on the horse. It does not give to its body the yellow tinge which it imparts to the human skin, but a special sorrel hue that is very close to khaki.  
It has been suggested, however, that the aim should be to approximate the horse's color as closely as possible to that of the soldier's uniform. It is admitted that the French now have adopted an admirable color tone for their troops.

All unprepared for the war, they had been obliged to send their men into the field in highly conspicuous colors—dark blue tunics and red caps and trousers. When they set themselves to make the change they did it with thoroughness.  
The garb of the French troops is now of a "horizon blue," an attractive shade at close view and as nearly as possible invisible at a distance. The question then was how to give this "horizon blue" tint to the horses.  
Dr. Lepinay at one of the sessions of the Society of Comparative Pathology announced he had made the discovery. He gets the color by mixing methylene blue in a special way with tannin.

Experiments show that it neither is toxic nor irritating to the horse. Care must be taken in applying it to cause the hair and work it into the grain of the horse's hide. The horse then has a durable "horizon blue" color practically identical to that of the soldiers' uniforms.

**BRITAIN TO TAKE OUR GRAIN CROPS**

(Special to the Guardian.)  
OTTAWA, Aug. 18.—The British Government is evidently planning to take all the surplus of the Canadian grain crop.

The Government has received a request from the Imperial authorities as to the amount of grain which will be available for export and what tonnage will be required to move it, outside of that which Canadian shippers can supply.

The grain commission, grain exporters and shippers, have been asked to supply estimates at once, according to the present figures available, as to the likely western crop. It is expected there will be nearly 175,000,000 bushels for export. The British Government is evidently preparing to provide the tonnage needed to move the crop.

Sir Robert Borden has been taking up the matter with the same authorities, and it is presumed the action of the British Government is due to the representations of the Canadian Premier.

Crop reports from the West all show that the weather is magnificent throughout the prairie provinces. The weather is very warm and the grain is cutting. It is in full swing and the total crop promises to be the largest on record. Another week, or week and half, of warm weather is all the West now asks.

**WAR ORDERS FOR CANADA 230,000,000**

OTTAWA, Aug. 17.—Orders placed in Canada by the British Government in reference to war supplies, and now executed or under execution, total the vast sum of \$230,000,000, according to an official statement issued today in which details are given of the different articles purchased, and their amounts. The Trade and Commerce Department is also collecting information as to orders placed in the Dominion by the other Allies. While it is possible to obtain statistics as to supplies directly purchased, there is much difficulty in coming at even approximate values in connection with the large amount of indirect buying done here, but the data will be collected as possible.

Orders for munitions of war placed in this country by Britain according to the statement total \$183,183,180.  
Orders for leather goods, timber and miscellaneous stores amount to \$2,142,000. Some \$10,655,490 of clothing and textiles has been ordered here. As regards food and forage, the total is \$23,397,385, and wagons, etc., to the amount of \$925,595 have been purchased in the Dominion. A great part of these orders have already been shipped and paid for, while a larger part is still under contract for delivery.

**REICHSTAG TO FACE FINANCE TEST**

According to a New York despatch the assembling of the German Reichstag today is watched with interest by the entire world of finance. Another huge war loan is asked by the Imperial government, and on the success of this loan depends the country's credit and its ability to continue the war. Whether there will be a breakdown in German finance is just now interesting not only the European capitals but the friends and foes of the Teutons in this country.

From information gleaned by New York financial agents, it is shown that the last German loan was successful only because the government mobilized savings banks, mortgage banks and insurance companies. From Switzerland comes the information that these sources of revenue are already exhausted. There is plenty of wealth in Germany, but it is felt by financiers in America that the Kaiser's hope must now lie in the bigger financial interests of Germany. To be sure, they have been patriotic with their aid; but it is known that many of the conservative, far-seeing German financiers must see victor ahead and a sure return before they give their more than their share. In fact, it is believed here that only decisive military victories and the signal defeat of the enemies of Germany can bring forth the full power of the financial interests of that country.

When the Reichstag assembles today, it will be asked to give its consideration to a new loan bill prepared by the Minister of Finance. It is reported that the conditions of the loan will be the same as those of former war loans, with the price of the issue at 99.

A second important consideration will be the conferring a new and separate government on Poland. The Kaiser and his advisers have worked out the details of this movement, and it is said to have proceeded so far as the suggestion of one of the German princes as ruler of the new German state. Galicia would be joined with that section of Poland captured from Russia, and the Poles would be given a more or less important part in the government of the region. Thus would be formed a buffer state, a protecting life-belt for the Austrians and Germans against the tides of the hated Slavs.

Among diplomats and military strategists, it is not believed that the mere taking of Warsaw will be hailed with any great acclaim by the Reichstag. It is assumed that the Minister of War will make the most of the victory and the big drive through Poland; in fact, it will be taken as a big military feat. But there is no reason to believe that the Reichstag will consider that a crowning victory. The failure to trap the Czar's legions is a disappointment—he has suffered in the campaign against Russia. Although handicapped for ammunition and big guns, the Russians made some serious rents in the German advance. The price the German leaders paid for their drive to Warsaw is said to be staggering. With perhaps equal losses, the Grand Duke Nicholas has made a masterly retreat and has brought his entire army practically intact from the vise of three of Germany's great commanders, and this has not been achieved.

**SUMMER HEAT HARD ON BABY**

No season of the year is so dangerous to the life of little ones as is the summer. The excessive heat throws the little stomach out of order so quickly that unless prompt aid is at hand the baby may be beyond all human help before the mother realizes the danger. Summer, the season when diarrhoea, cholera, infantum, dysentery and colic are most prevalent. Any one of these troubles may prove deadly if not promptly treated. During the summer the mothers best friend is Baby's Own Tablets. They regulate the bowels, sweeten the stomach and keep baby healthy. The Tablets are sold by medicine dealers or by mail at 25 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

**PREFERRED DEATH TO IMPRISONMENT.**

LONDON, Aug. 19.—The morning Post's Copenhagen special cable says:  
A vessel arriving last night at the Danish Island of Funden with Russian soldiers who had fled from the prisoners' camp in Schleswig.  
The fugitives declared they preferred to expose themselves to the risks of death rather than continue to live in a German prison camp. Their appearance bore testimony to the fact that they had been starved for a long period.
