

HOW TO JOIN

You can join up by getting in touch with any officer or member of the RESERVE ARMY or by visiting the Armouries or uptown headquarters, Kent Street. You will be given a hearty welcome, and will soon make many friends. The units that are recruiting are as follows:

- 17th (R) ARMoured REGIMENT
- 204th BATTERY FIELD ARTILLERY
- 6TH DISTRICT SIGNALS
- 17th (R) ARMY SERVICE CORPS

W. C. T. U. NOTES

TRUE PATRIOTISM

It's your Flag and my Flag. It proudly floats today. Over your land, and my land. And half the world away. All hail, proud Flag, our own Flag. Flag of the brave and free. There's no Flag like our Flag. Aloft o'er land and sea. —Flora Yorke Millar.

We believe it to be a patriotic duty to uphold the ideals of the founders of our Country — to honour our King, respect the Flag, revere the Sabbath, maintain British Justice; love our country and obey her laws.

We believe the call of the hour is the call to you to enter the lists against that great enemy of the race — Alcohol. I therefore affirm my intention to abstain from personally, and to refuse to purchase for others all alcoholic liquors as a beverage; and what as a Patriot I will enroll for service under the banner of the New Crusade.

The above is a copy of our Patriotic Roll to pledge allegiance to the Flag, my Country, and my God. (Introduced by Mrs. Millar when she was the leader of our work for young people).

The time seems ripe to again bring it to notice.

A GREAT BRITISH GENERAL

Among the names of great Generals of the British Army, that of Field Marshal Lord Roberts, or "Bobs," as he was affectionately called, will hold a high place. Although well advanced in years, he was in service in France in the earlier years of the Great War, when he died.

As Kipling put it: "He died in the very battle front. Three hundred miles of cannon roared, when the master gunner died."

He did great work for the Empire against external enemies, and also against that internal menace, the liquor evil. As founder of the Army Temperance Association, and in his book "Forty-one years in India," he tells that when he left India one-third of the 70,000 men in the army there were members.

Practically his last public utterance was his letter to the "London Times," not long before he died, which might be quoted to show what the greatest military authority in the Empire at that time thought of drink.

"Will you kindly allow me through the medium of your paper, to make an appeal to my countrymen, and women; upon a most vital subject which is causing me very great uneasiness. All classes in the United Kingdom are showing a keen interest in our forces engaged in the struggle now going on for our country's existence as a nation, and they are munificent in their efforts to supply the wants of our gallant soldiers and sailors fighting abroad. But I feel it my duty to point out to the civil population that putting temptation in the way of our soldiers by treating them to drink is injurious to them and prejudicial to victory.

Thousands of young recruits are now collected together in various places, and are having their work interfered with, and their confidence undermined by being

tempted to drink by a friendly but thoughtless public, and also by the fact that public houses are being kept open to a late hour of the night.

"I beg most earnestly that publicans and the public generally will do their best to prevent our young soldiers being tempted to drink."

"My appeal applies equally for the members of the Overseas Contingents, who have so generously and unselfishly come over to help us in our hour of need." During the South African war, Lord Roberts presided at a temperance meeting at Bloemfontein, during which he stated that discipline in the army showed a remarkable contrast between abstainers and non-abstainers. Among abstainers the convictions were 4.12 in the 1,000, while among non-abstainers there were 36.38 in the thousand, or about nine times as many. Lord Roberts added: "IT IS NOT A FRIENDLY THING TO GIVE A DRINK TO SOLDIERS. — Everybody's Monthly."

UNDERMINING NATIONS:

The part alcohol played in the defeat of France was indicated by the fact that for every three and one-half litres consumed, in all forms, in Germany, before the war, there were four and one-half in Great Britain and 21 in France. And from no temperance or religious organization but from the American Business Men's Research Foundation comes this:

The Prime Minister, the speaker Mr. Chalmers said, emphasized the great need of efficiency now and its impairment through industrial accidents due to alcohol. The same Business Men's Foundation quoted above said that insurance companies in the United States had paid out \$15,000,000 in 1941 for automobile accidents due to alcohol.

The statement that the materials used in the production of liquor are those of which Canada has an abundance the speaker pointed out by the information that ten million pounds of sugar are used each year in the manufacture of wine alone, and the speaker questioned: "Have we an abundance of sugar in Canada?"

A FRENCHMAN'S WARNING

Messieur E. Doumergue, in an article appearing in Le Christianisme in 1930, said:

"The greatest enemy of France is not Hitler; it is not the German race; it is not even Odin, the great German god. The greatest enemy of France is France. She commits suicide by blows of little glasses and bottles."

France has a gross annual mortality rate of 11.8 per 1000. She also has the highest per capita consumption of alcohol of any country: 20 litres in Spain, the rate is 14 litres in Italy, 13.5. — The Clarion Call

BROKEN FRIENDSHIP

Broken friendship, like china, may be repaired, but the break will always show. Friendship is a precious thing — too precious a treasure to be carelessly broken or thrown away. The world handles the word "friend" lightly; its real, true, deeper meaning is forgotten, and the acquaintance of an hour or the chance comer is designated by the term, which in itself bears a wealth of meaning. Your friends is the one who appreciates you — your faults as well as your virtues — who understands and sympathizes with your defeats and victories, your aims and ideals, your joys and temptations, your hopes and disappointments as no one else does or can. It is your friend to whom you turn for counsel, for comfort, for praise, he may not be as learned, for some or as wise as others, but it suffices that he understands you,

Join Up Today or Tonight

Let Us Make Saturday, June 5th
A Notable Day and Evening
In Recruiting Annals

The campaign to fill the ranks of the RESERVE ARMY has focused the attention of our people on the necessity of all supporting it. We have no fault to find with the way it has gone. Almost two hundred have either joined or will join within the next few days, but to be really efficient the RESERVE ARMY and all its branches requires another two thousand. It will then have a strength of over twenty hundred officers non-commissioned officers, and men, and will be as fine a body of men as can be found in the RESERVE ARMY in any part of Canada. Training for the new recruits will commence at once, and the instruction which they will receive will be imparted in an interesting manner that will give them a keen interest and hold it. The old days of the tough Drill Master are passed, and the training in all branches of military service throughout Canada is fascinating, and interesting. Once again let us run over the units that require your services.

THE 17th (R) ARMoured REGIMENT

The units of this powerful striking force are equipped with the latest in Bren guns, carriers, mortars, rifles, and auxiliary arms for offensive or defensive purposes. Their trucks and carriers are fast, so mobile in fact that they can arrive in any part of the province from about nine minutes in from a fifteen minutes to one hour. All types of training are given the recruit with emphasis on the protection from all kinds of chemicals and gas.

THE 204th BATTERY FIELD ARTILLERY

This is the fastest form of artillery, equipped with eighteen pounder guns that can travel from Charlottetown to Souris in one hour and a half. Their range is over nine thousand yards, and they have a muzzle velocity of sixteen hundred feet per second. Their shells will penetrate the skin of a submarine, and they can also be used to send bullets from shrapnel shells on the enemy. Young men who have a flair for mathematics will find the Field Artillery a most fascinating study. It gives plenty of action, takes plenty of hard knocks, and the young men and middle-aged men of Charlottetown should grasp the opportunity to fill the vacancies in this unit.

6TH DISTRICT SIGNALS

This is another very technical branch of the Army, and considered

GRAHAM'S ROAD SCHOOL

- Honor Roll for May:
- Grade X — Sr. — 1. Elaine Campbell.
 - Grade IX (Sr.) — David MacGregor; 2. Darrach Murray; 3. Louis MacLeod.
 - Grade IX — Jr. — 1. Marie MacKinnon; 2. Eric Wigmore; 3. Ralph Wigmore.
 - Grade VII — 1. Malcolm Campbell.
 - Grade VI — 1. John Ward.
 - Grade V — 1. Jennie Green; 2. Fredrick Campbell.
 - Grade I — 1. Margaret Williams.
- Perfect Attendance: Freddy Campbell, John Campbell, David MacGregor, Darrach Murray, Malcolm Campbell.
- M. Emily MacLeod, Teacher.

TRINIDAD CATTLE

To increase the breeding stock of cattle in Trinidad 300 heifers and heifer calves were recently imported from Cuba.

GUNS OF THE 1200'S

The first recorded use of cannons on ships dates back to the 13th century.

and even his quiet listening gives strength and renewed courage. Blessed the man or woman into whose life has come the beauty and power of such friendship. Prize it well. Do all in your power to keep such a friendship unbroken. Avoid the break, for when it comes it cannot be mended, and the lasting note mars the harmony. It is not alone a question of forgiveness; that may be full and complete. It is the hurt in the heart that will not readily heal and the confidence that will not fully come back!

ably more so today than in former wars. Means of communication used are up to date, and conversation can be kept up by the Tank Commander with his tank force, or by the Battery Commander with his guns as easily almost as if he were right with them. Bright young intelligent boys of seventeen to twenty-one are wanted for the signals.

17th (R) ARMY SERVICE CORPS

This is newly formed unit which will be responsible for bringing the supplies to the other units of the RESERVE ARMY. It has made rapid progress. It will be composed largely of trucks, and Acting-Captain J. Foke Clarke has already lined up a large number of qualified truck drivers. Since the campaign started, between fifty and sixty have signed up and a few days or at least in a week's time, it should be full strength.

THIS IS THE LAST CALL

With this announcement, the Recruiting Committee that was set up to help along the campaign to fill the ranks of the RESERVE ARMY will cease to exist, but the work of recruiting will go on until all units are brought to full strength. The publicity so splendidly accorded us by the newspapers and the radio, has we feel confident shown our citizens the why and wherefore of the RESERVE ARMY. They will do the rest and Prince Edward Island will have a defensive force that will be equal to any in Canada in quality and personnel.

Urges Women

To New Zeal
In Knitting

HEMINGTON, June 4.—(OP)—In the reconstruction period following the war an organization such as the Imperial Order of the Daughters of the Empire could help materially in bringing about a better world, and the I. O. D. E. Empire Study Committees exist for this very purpose. Mrs. B. Horkins, National President of the I. O. D. E. declared last night in an address at the 43rd Annual Meeting of that organization.

"The pre-war world is gone forever. We propose still to enjoy freedom of speech, freedom of religion, to try to bring about freedom from fear and want but it is not to be expected that we can produce a new paradise. It may be very difficult not to feel bitter but our energies should be directed to a better purpose and every member of the I. O. D. E. should work toward the building of a better and permanently progressive world," Mrs. Horkins said.

The I. O. D. E. was designed to function both through peace and war, said the National President, paying tribute to the "magnificent manner" in which members had carried out the dual function. It was impossible to disassociate the war work and the peacetime activities, she pointed out.

Show me too, neighbor

The Reserve Army is the people's army; an army of neighbors who are unable to enlist in the Active Army but are willing to take military training a few evenings a week. . . just in case.

If you are under 51 years old, either married or single, and of a medical category not lower than C1, you can — and should — volunteer with the Reserves.

Units throughout New Brunswick are in urgent need of recruits immediately. Get in touch with officers or members of any unit you would like to join.

Serve with the RESERVE ARMY

Mrs. Horkins urged all I.O.D.E. members to become a potent factor in controlling rumor and avoiding loose talk. She stressed the need for women to "go back to their knitting needles with increased zeal" as comforts for fighting forces would be needed in ever increasing quantities in the immediate future.

Members were also asked to make sacrifices in order to purchase increased numbers of war savings stamps and certificates. The President said the I.O.D.E. had a real and definite task in helping to maintain a link with the Empire. "If we are true daughters of the Empire we must work un-

ceasingly to strengthen the ties between Canada and the Motherland and to cement the bonds of Empire. No matter how prosaic our occupation, it is an integral part of a great scheme of Empire building," she said.

Minards Kills Pain

**THE ENGINEERS
FORD A RIVER!**

ONE OF A SERIES OF ACTION PICTURES WITH CANADA'S MECHANIZED ARMY

PAVING THE WAY for any offensive action, the Engineers are foremost in the field. While enemy planes strafe and dive bomb advanced positions, these skillful beavers in battle dress launch a floating bridge to carry the light advance forces and secure the bridge head. This is quickly followed up by a husker bridge that will stand up under the rumble of heavy tanks, trucks, artillery tractors and other vehicles of war (see sketch above).

First in, last out in military operations, the Sappers hack roads through thick jungle, locate and dig up hidden mines, make unexploded bombs safe. They dismantle booby traps, erect suspension bridges and provide water supplies to all formations in the field. Most United Nations victories have been made possible

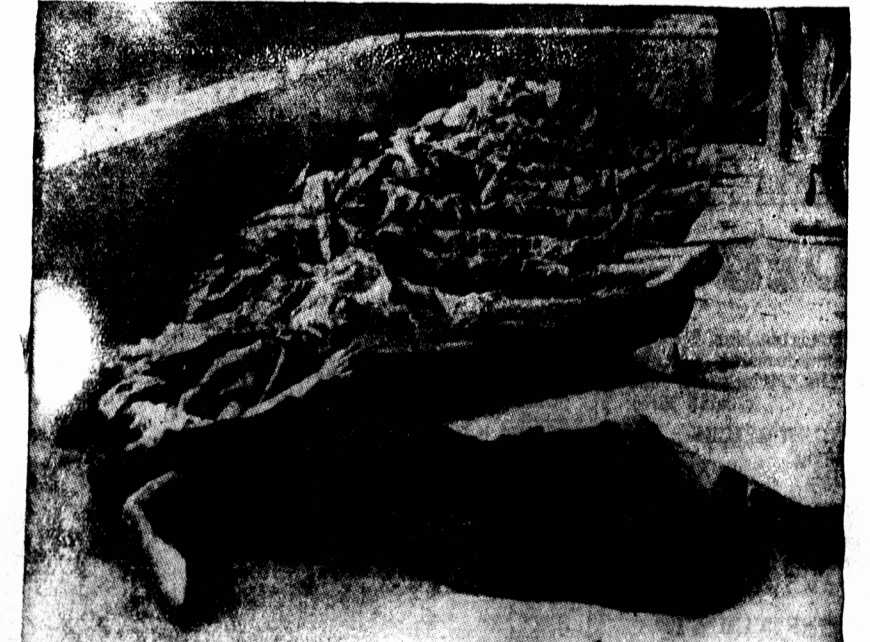

because our Engineers have overcome all enemy obstacles—taking hours instead of days to peg out safety lanes through mine fields and make way for the attack.

With modern mobile equipment, the Engineers today take the "impossible" in their stride! When the history of this war is finally recorded, many of the highlights will be provided by the courage and achievements of our gallant Sappers.

More than 40 types of modern military vehicles made by Ford-of-Canada craftsmen include several special units used by Engineers of the United Nations. Illustrated above is the "Derrick"—a powerful, useful vehicle which helps these scientific warriors make miracles look like routine work.
