Honor LaSalle As Pioneer For Great Traverse

(By The Canadian Press) TORONTO, Dec. 10.—Discovery and exploration of primeval Canada and the navigable inland waterways, now the Great Lakes, the Ohio and Mississippi Rivers, are recalled by the plans at Rouen, France, for celebrating the 250th anniversary of Robert Cavellier de La Salle's achievement in North America.

La Salle, a member of a rich family of Rouen, crossed to Canada in 1668, when he was 23 years of age. He was drawn to the New France by the fact his older brother was a Sulpician monk at Montreal. George M. Wrong's history relates the younger La Salle talked so much about reaching the Far East by going up the St. Lawrence that the signatory granted him was called in derision China-Lachine—a name still retained.

Restless and ambitious spirit, La Salle would have none of the settled life. He was eager for the conquest of discovery. He sold his Canadian signatory and in 1680 was at the Lake Ontario mouth of the Niagara River. Proceeding southwest he eventually came to the head waters of the Ohio River and explored many miles down that stream. He was still searching for a route to the Far East.

Returning to France he was honored by the King and given another grant of land in the neighborhood of Fort Frontenac on the West. His new idea being to discover and name a great Empire for France. His ship was wrecked in the Niagara River below the cataract. Undaunted he built another vessel, the Griffin, above the falls and navigated her through the then unknown channels of Lake Erie, Lake Huron and Lake Michigan. The craft was loaded with furs and started back to Montreal while La Salle went on through the territory now on the map as Illinois. The Griffin was lost with all her cargo. Of recent years there have been stories of locating her hulk and searching it further for historical purposes.

La Salle returned to the East but in 1680 he was off again, this time on the overland trail by a route leading from what is now Toronto to Lake Simcoe and Lake Huron. Late that year he reached the head of the Mississippi. In 1682 he had paddled to its mouth on the Gulf of Mexico. It was then he took possession of Louisiana in the name of his King, Louis XIV.

Commemoration of La Salle's exploits will take place in 1937, in connection with the international exposition of arts and crafts to be held in Paris that year. In addition, the France-American Society (French section) plans to send a large delegation to Canada and the United States to visit the territory explored or discovered by the French pioneer during the latter part of the 17th century.

Rouen possesses a view of New Orleans, dated 1726, and the stream which traverses the city is marked "The River of St. Louis or Mississippi." In addition, a dusty volume dated 1737, tells the story how a group of Ursuline nuns from Rouen had visited New Orleans the preceding year.

This historic book describes the new-found lands as follows: "The inhabitants of Louisiana—the Indians—are without law, without religion, without arts and their only property is liberty. For occupation they hunt wild beasts and fight their neighbors. They take one or two wives, whom they can repudiate without notice as their caprice may desire."

CONFEDERATION LIFE INSURANCE L-6798-7-12-312.

MRS. J. GORDON MacDONALD will be at Home Friday afternoon from 4 to 6 P. M. at 175 Pittsroy St. L-3732-12-12-11.

FELTS WILL BE received at the office of J. A. Webster, 156 Richmond St., Charlottetown, throughout the season for shipment to the Prince Edward Island Fur Pool Limited, Summerside. L-3464

NOT OPEN EVENINGS.—An error announced yesterday that Moore & McLeod Limited were open evenings this week. Moore & McLeod Limited will be as usual, open Saturday evening only, this week. L-3740-12-12-11.

COMMUNITY CONCERT ASSOCIATION presents Kniesel-Alden-Turner, violin, cello, piano, trio Friday, December 13th, 8.15 P. M. Prince of Wales College Hall. L-3738-12-12-11.

POLICE COURT.—At the Police Court yesterday a man appeared charged with common assault. The case was adjourned until Saturday.

Gaelic Meeting.—A delightful social was held Monday night at the home of Mr. and Mrs. S. Hume, Ulg. The chair was occupied by the president Mr. R. C. MacLeod, and after the reading of the minutes of the previous meeting by the Secretary, Mr. Walter Ross, a most interesting and instructive Gaelic lesson was given by Rev. D. M. Sinclair. This was followed by the reading of a chapter of St. John's Gospel in Gaelic by the many members present, each member reading in turn. Hearty Gaelic songs were then sung, among them being such favorites as "Fear a' Bhaile," "Ho-ro, Mo Nighean Donn Bhoideach" and "Thainig ah Gille Dugh an roir do'n Bhaile So". A delightful supper was then served by the hostess Mrs. Hume, after which the meeting adjourned following the singing of "Auld Lang Syne" in the ancient tongue. Susie Lels a' Ghaidhlig!

STUDY CLASS MEETS.—The C. W. L. Study Club had its opening meeting at the home of Mrs. A. Howatt on Dec. 10th, with a group of eleven interested members present. As previously announced the subject under discussion was the "Sacred Vestments used at Mass and what they symbolize". The vestments were taken in the order of vesting and explicitly described as to material, origin and what particular part of the Passion of Christ they symbolize. Mrs. Howatt, the leader, aptly led the questioning so that every member joined in the discussion. Explanations by the aid of accurate reference books were very ably presented by Miss King the secretary, Mrs. Frank Murray and Mrs. R. J. MacDonald. When a comprehensive knowledge of the subject had been arrived at there followed an hour of reading by Mrs. F. Murray who in her pleasing style presented the opening chapters of H. V. Morton's latest book "In the Footsteps of the Master". This was a treat indeed as the listeners were carried to the very scene of the story by the author's vivid description. At a late hour the meeting closed to meet again soon after Christmas. The subject at the next meeting will be "The Altar Linens and Sacred Vessels."

Australian Axes 10,000 Years Old

Fourteen hundred carefully chipped axes of flint and many knives, all of the paleolithic age, have just been discovered between Portland (Victoria) and Kingston (South Australia). They are declared by Professor Wood Jones of Melbourne University to be 10,000 years old, and to have been used by some of the earliest inhabitants of Australia. Many old kitchen middens, two gasin-shaped stones, and a considerable number of skeletons of very primitive black were also found.—Australian Press Bureau.

NINE YEAR OLD TRAVELS ALONE FROM ROUMANIA

MONTREAL, Que., Dec. 11.—Travel has no terrors for little Margaret Novak, 9 years of age, or if it has she simulated a total indifference to such unusual surroundings. Margaret left her native Rumania to embark on the S. S. "Alania" for Halifax and arrived on the Ocean Limited train at Bonaventure station recently. After spending a glorious day seeing the sights of the Metropolis, she left the city from Bonaventure station to join her parents in Port Colborne, Ont., who are anxiously awaiting her arrival.

SATIN TRIMMING Lucile Paray shows many trimmed tailored effects with stitched satin trimming. For example, a navy gupure lace afternoon dress made in suit effect had vest, wing-collar and bow tie all made of white satin.

The Excruciating Pains of Rheumatism We recognize in rheumatic disorders a diseased condition of the blood containing uric acid which is the cause of this irritating and painful trouble.

Rheumatism leaves in its train, distorted joints, crooked limbs, crippled hands, and the intense pain and agony is almost unbearable. Burdock Blood Bitters purifies the blood by driving out the uric acid. Get rid of your rheumatic pains by using B.B.B.

GLASGOW—A new industry, the manufacture of safety-razor blades, is to be started shortly on Clyde-side, plans including production of a new type of blade.

SERVICES in York Pastoral Charge on Sunday, December 15th will be: Central Church 11 A. M. Brackley 3 P. M. York 7 P. M. L-3737-12-12-11.

The many friends of Dr. Zella M. Clark will regret to learn that she fell on a stairway yesterday morning breaking both bones of her right wrist. She is a patient in the Prince Edward Island Hospital at present where she is resting as well as can be expected under the circumstances.

Honor roll for November: Grade VIII—1, Wendell Birt, Grade VII—1, Althea Dockendorff; 2, Freeland Dockendorff; 3, Edith MacMillan. Grade VI—1, Margaret Woolbridge; 2, Janet Swart; 3, Garth Birt. Grade V (Sr.)—1, Helen MacMillan; 2, Clarence Woodbridge. Grade V (Jr.)—1, Allan Reardon; 2, Lorne Kieley; 3, Reta Doyle. Grade IV—1, Eddy Doyle. Grade III—1, Marjorie MacDonald; 2, Erma Birt; and Veda MacDonald; 3, Harold Sempel. Grade II (Sr.)—1, Mary Webster; 2, Alden Dockendorff. Grade II (Jr.)—1, Patricia McGrath; 2, Tom Power; 3, Muriel MacDonald. Grade I—1, Leroy MacDonald; 2, Ellen Woodbridge and Lewis MacMillan; 3, Marion Woodbridge.

Perfect attendance—Althea Dockendorff, Janet Swart, Clarence Woodbridge, Veda MacDonald, Marjorie MacDonald, Mary Webster, Alden and Carman Dockendorff, Edith F. MacLaughlin—Teacher.

YORK WOMEN'S INSTITUTE The annual meeting of the Alpha York Women's Institute met at the home of Mrs. Elmer Brown on Wednesday evening, November 27th, the President in the chair. The meeting opened with singing Institute Carol. The Secretary read a report on "Gems of Thought." There were eight members and four visitors present. Minutes of last regular meeting and last annual meeting read and on motion adopted. Reports from different committees were then given. The Secretary Treasurer's report was also given and a motion adopted. The election of officers then took place. Mrs. Will Cook and Mrs. Peter Proude were appointed scrutineers, voting being done by ballot. The officers for 1935-36 follow:

President—Mrs. B. A. Mallett. Vice President—Mrs. Heath Vessey. Secretary Treasurer—Mrs. Frank Wats. Directors—Mrs. Herb Vessey, Mrs. E. J. Vessey, Mrs. Peter Brodie. Auditors—Mrs. G. A. Christie, Mrs. Lela Vessey. School Committee for 3 months—Mrs. Elmer Brown, Mrs. Gordon Crockett. Sick Committee for 3 months—Mrs. G. A. Christie and Mrs. Horace Vessey.

A hearty vote of thanks was extended to the retiring officers. The retiring president was a few remarks. Mrs. Heath Vessey reported that the annual collection was due for the Protestant Orphanage. One new member was welcomed and one member paid her fee. The following program was then given: Reading, Mrs. R. J. Vessey; Poem, Mrs. Peter Brodie; Contest, Miss Irene Vessey. A dainty lunch was served by the hostess and the meeting closed with singing of Island Hymn. Next meeting will be held at the home of Mrs. Gordon Crockett. (Patriot please copy)

Fibre Used By Natives Becomes Kapok of Today

The first Europeans who visited the islands of the Dutch East Indies found the natives making use of a whitish silky vegetable fibre which they called "tandoe alias." Half a century later a few small parcels were sent from Java to Europe, which brought the attention of the world and to which has been given the name of kapok. Its tendency to resist matting and moisture makes it an ideal substance for stuffing furniture, mattresses, etc. Kapok is greatly superior to cork in life-saving appliances and due to its insulation qualities is used in aviators' clothing and winter garments; also as an insulator for ice chests. The kapok is derived from a tree grown on estates in conjunction with coffee and cocoa, the fibres occurring in large pods, and the tree is found wherever tropical and semi-tropical conditions exist. It is only in the Dutch East Indies, however, where the tree is cultivated on a large scale. The chief world market for kapok used to be Amsterdam, Holland, but with the advent of the World War it changed to the United States which has been the principal buyer ever since. Holland is the next largest buyer, followed by Australia, and in much smaller quantities, Singapore, New Zealand, Spain, Great Britain. Canada gets the bulk of her requirements through the United States, according to the Industrial Department of the Canadian National Railways.

"BULL PENS" COVER MIAMI BEACH ROOFS

MIAMI BEACH, Fla., Dec. 11.—The "n in craze continues at Miami Beach and solariums were not neglected in the nine million dollar building program this year. Sun parlors for both men and women dot the roofs of all of larger hotels and apartments and many public solariums are available. They are called "bull-pens" and by the most fastidious "cow-pens"

THURSDAY, DECEMBER 12 3.30 P. M.—Explorers—Social Hall. 7.00 P. M.—Chamaine Ladies Chorus—Social Hall.

IN MEMORIAM

MR. WALLACE FERGUSON

The many friends on P. E. Island will learn with regret of the sudden passing of Mr. Wallace Ferguson of Malden, Mass. The late Mr. Ferguson was born at Mt. Herbert, P. E. I. in 1870 and was a son of the late William and Ann Ferguson. Stricken with pneumonia he was taken to the Malden hospital on Dec. 5, where all that medical skill could do was done to counteract the disease, but God willed otherwise, and in the early hours of Dec. 6th his spirit winged its flight homeward to God who gave it.

He leaves to mourn two sorrowing daughters, Mrs. Lawrence Wilson of Malden, Mass. and Mrs. John A. MacDonald of Mt. Herbert, P. E. I., also the following sisters and brothers: Mrs. Wm. Goss of Malden, Mass.; Herbert of Medford, Mass.; George of Hingham, Mass.; Leigh on the old homestead at Mt. Herbert. He was predeceased by his wife Miss Marie Ralston some years ago, a'so by a brother Robert about five years ago. His body was tenderly laid to rest on Dec. 8th at Medford cemetery, there to await the glorious resurrection of the immortal.

Big Plant Makes Gasoline from Coal

LONDON, Dec. 11.—The Daily Express carries a special story today from Stockton-on-Tees describing how "Britain could make its own petrol." Its special correspondent writes: Today I saw a truck of coal tipping itself into a hole in the ground at the Imperial Chemicals hydrogenation plant at Billingham. An hour and a half later, having zigzagged for miles on foot and in motorcoach through forty acres of engineering plant, I saw petrol gushing past a peephole in a pipe at the rate of 120,000 gallons a day. Never in this long journey did I see more than twenty human beings. Of these only five were important, walking back and forward along hundred yards of pressure gauges in the control room. With a few turns of the wrist they could almost in stantly stop the hear-beats of this colossus. Every yard of the miles of pipe is painted yellow if it conveys oil green for hydrogen, blue for the faintest gas, and red for the coal slush on which the oil and hydrogen are put to work at immediate temperatures and bewildering pressures.

You see fifteen cigar-shaped tubes standing on end. These seventy-foot cigars weigh one hundred and sixty tons. Their ends are grappled to them with twenty bolts as thick as a man's thigh and held by twenty nuts the size of a man's head. For inside there are two hundred and fifty atmospheres struggling continually to equalize themselves with the one atmosphere outside. No one is allowed to stand near this heart. It is fenced in and floodlit by night.

Since February this plant has made thirty thousand tons, or nine million gallons of petrol—about 3 per cent of the nation's consumption. But if the world's supply of petrol were to diminish we in this country, it is claimed, could reach the point of exporting it.

ST. ANDREWS WOMEN'S INSTITUTE

The regular monthly meeting of the St. Andrews Women's Institute was held on Tuesday evening, Dec. 3rd at the home of Mrs. Nell Doucette with an attendance of nine members and two visitors.

The meeting opened in the usual manner. The roll call was responded to with a Christmas cake receipt. The minutes of the November meeting were read, approved and signed by the President. Reports of different committees were then given and new ones appointed as follows: School Committee, Miss Joanna and Winnie MacIntyre; Sick Committee, Mrs. Major Smallwood and Miss Frances MacIntyre; Entertainment Committee, Mrs. Nell Doucette and Mrs. Joanna MacIntyre. A letter from the City of St. Andrews regarding Christmas Seals was read by the Secretary and \$1.00 was voted for same.

The program for the evening consisted of a solo, "The Road to the Isle," accompanied on the guitar by Mr. C. L. Gallant; a contest was put on by Miss Frances MacIntyre won by Miss Amelia Egan, also a candy contest was put on by Miss Joanna MacIntyre. On motion to adjourn, the meeting closed by singing the National Anthem. Next meeting to be held at the home of Mrs. John MacIntyre, meeting to be opened with the Creed and singing "When I Grow Too Old to Dream." Roll call to be answered with a dime. A dainty lunch was served by the hostess, assisted by Misses Joanna and Winnie MacIntyre.

Also big supplies of Cigarettes and Tobacco in Christmas wrappers. Sugar only with orders. Don't forget to ask for our Calendar.

Wishing a Merry Christmas and Happy New Year to all.

NOTICE

All over due notes and accounts if not settled in 10 days will be handed over to our attorney.

Signed, WELLINGTON McNEILL and MABEL McNEILL

Looking Forward To U.S. Election

(C. P. By Guardian's Special Wire) NEW YORK, Dec. 11.—Alfred Moatsman Landon, who has been easy on Kansas taxpayers' dollars since he became governor of that middle western state, may be the "political Moses" Republicans seek for 1936.

The party chieftains of his state are hooting him. William Randolph Hearst has given indication that he would gladly throw the weight of his newspaper-chain behind the Kansanan.

Today, it seems safe to assume his name will be to the front when the National Republican Convention is called next June to name an opponent for President Franklin D. Roosevelt in the November elections.

"Alf" Landon has the unique distinction of having made the Kansas budget come out even. His budgetary credo is "don't spend what you haven't got." And that is an excellent selling point at a time when Roosevelt foes are ranting about New Deal expenditures and the federal budget is billions out of balance.

Landon has been a careful financial plotter practically all his life. He kept a personal budget while attending the University of Kansas and fellow-students dubbed him "Foxy." He became an oil field operator and now, at 46, is reputed to be a millionaire.

Since he entered the gubernatorial mansion in 1932, Kansas State and local taxes have been cut approximately \$73,000,000. He curtailed governmental activity and explained it recently in these simple words: "What we have done is what a sensible family does in the face of reduced income. We have cut out the frills."

Landon is a vote getter and that is something his party needs in the federal field. He was powerful enough to win the governorship in '32 despite the fact Roosevelt took the state by 70,700 votes in riding into the White House. When the Democrats swept the country the wild-fire in '34 Landon again withstood the blast of Roosevelt's piping-hot popularity. He was the one Republican governor up that year to do so.

Two New Deal hands are at his liking. Kansas is a wheat growing state and the crop-control branch of the Agricultural Adjustment Act has his approval. State enabling legislation soon will make the Roosevelt Social Security program operative in Landon's domain.

This ruddy-faced westerner, hailed by some as a monetary marvel and called "the Coolidge of Kansas" is young in political experience. He is young winning the governorship he had served as secretary to Governor Clyde Reed.

He was born in Middlesex, Pa., but that was because his mother wanted to be at her parental home when her child arrived. At that time the Landon homestead was in Ohio, and "Alf" Landon is really of the West—plain, unassuming, not given to forensics of the tongue and a lover of the outdoors.

He is happiest in his old clothes and likes to get his tie off when working, even at the gubernatorial chair.

Many Tons Shipping Being Broken Up

There has been a great mortality among ships since 1934 due to the demand for more up to date vessels to meet the requirements of world trade today, states the Industrial Department of the Canadian National Railways. During that time according to Lloyd's register, 652 vessels, representing over 1,843,000 tons have been, are under process of or about to be broken up. In addition 321,000 tons have been lost due to casualty or stress of weather. At the end of June, 1935, there were 167 new vessels under Lloyd's classification under construction, representing 929,038 gross tons, or 72 per cent of the world total, of which 57 per cent was credited to Great Britain. During the year 1934-35 280 vessels were put into commission under Lloyd's, an increase of 115 per cent in tonnage over the previous year and representing 67 per cent of the world tonnage, with Great Britain accounting for 398,703 tons and elsewhere 358,911. In 1933-34 there were 2,020,185 tons of new shipping registered by Lloyd's and in 1933-34 350,430 tons. There has been a steady reduction in laid-up tonnage indicative of the revival in world trade, it having fallen from 12,000,000 tons two years ago to 8,000,000 tons last year and there is a further drop to 5,500,000 tons or a total drop of 7,500,000 tons in three years.

Rich Gold Lode Found By Anchor

Gold in the mind on a schooner's anchor, sealed orders, a mining party faced with death on the high seas and a last minute rescue—these are the ingredients of a romantic gold quest story told by Bartle Ryan, mining engineer, reaching Melbourne from the Australian mandated territory of New Guinea.

It began when a schooner was driven into the lee of Tatu Island, off New Guinea, for shelter. On raising his anchor, the captain noticed specks of gold in the mud sticking to it. He told a few friends, among them a planter who prospected the gold and won 200 ounces. He thought it alluvial gold. They then formed a small syndicate, keeping the location a close secret. Bartle Ryan was appointed engineer and sailed from Melbourne under sealed orders which he opened at Kavieng. Finding where he had to go he found a small party of whites and natives and began to prospect the place. He found that the gold was not alluvial, but a rich lode. On the way back to Kavieng to report, through the teeth of a gale which had sprung up, the rudder was smashed from the launch, and the party drifted helplessly for hours, expecting death from drowning. Just as the water in the launch was gaining on them, an island motor ship appeared on the horizon on a course taken only occasionally. They were rescued with great difficulty and landed on a plantation 100 miles from Kavieng whence they made their way to civilization. Preparations are now being made to work the lucky lode.—Australian Press Bureau

CARTER & CO. Ltd

Bad Prospect For Insurance Policy

HALIFAX, Dec. 10.—(C.P.)—Insurance men cross to the other side of the street when they spot Frank Quigley. They're just not interested in selling him a policy. For his job is one of the riskiest—so hazardous that no company will write him a policy. He's a steep-jack, and he goes about his business swinging at the end of a rope anywhere from 100 to 500 feet above ground. It doesn't matter much to him how high it is. "If you fall from 100," says the 25-year-old steep-jack, "you're through anyway, so you might as well go higher." He has been climbing since he was eight years old. The job fascinated him first as a small boy in Montreal, where he used to watch the "jacks" climb spires. "As soon as he was big enough, he got into the game himself. Since then, he has never had an accident, though he has gone up 300 feet at Sudbury, Ont., 265 at Trenton, N.S. But that's no inducement to the insurance men. You only have one accident in Quigley's business. HALIFAX.—(C.P.)—Contrasting Oriental and western racial characteristics before a large Halifax audience, Dr. T. Z. Koo, noted Chinese scholar, said that a person who was "down in the dumps" in America, was said to be having "an evening atmosphere" in China.
