Distinguished Ottawa Citizen Passes Away

(Canadian Press)

OTTAWA, Ont., Dec. 22.—A distinguished resident of Ottawa, who had served as the Capital's representative in the House of Commons, and was three-times Mayor of the city, as well as Lieutenant-Governor of the Northwest Territories, Hon. Charles Herbert MacIntosh died today. He was in his 89th year.

The funeral will be held tomorrow afternoon from the Chapel Street residence, where in 1874 he met Sir John A. MacDonald, coming to the Capital at the request of the Conservative chieftain to take over the Citizen, then the party organ.

Rev. Canon A. H. Whalley, of St. Alban's Anglican Church will officiate. Interment will be at Beechwood Cemetery here.

OLDEST WOMAN IN ENGLAND DEAD

LONDON, Dec. 22—The oldest woman in England has just died at the age of 108, in Alnwick, Northumberland. Her husband died fifty-four years ago. Mrs. Peary ascribed her long life to plenty of hard work; good food and barley cake. Her mother lived to be ninety three, and two twin sisters died at the ages of eighty-three and ninety three.

NATIONALISTS

Continued from page 1

restricting his movements and forbidding him to make speeches on the no-rent issue.

The Government of the United Provinces has forbidden the provincial conference, announced by Congress authorities to meet Saturday at Etawah. Its action was taken because the secretary of the Congress committee declined to give assurances that the no-rent question would not be discussed.

Provincial leaders of the Congress have decided, however, to hold an emergency meeting at Allahabad tomorrow under the Presidency of Nehru, and Mohanlal Sethna, Secretary of the Congress committee, has announced that members would defy the government ban and hold the Etawah meeting in any event.

ONLY FIVE

Continued from page 1

Weir, Minister of Agriculture, and Hon R. J. Manion, Minister of Railways.

"Business as usual" will be the slogan of Hon. H. H. Stevens, Minister of Trade and Commerce, who is now on the Pacific ocean en route to Honolulu where, on Christmas Day, he will meet a representative of the New Zealand Government for the purpose of negotiating a trade treaty with the Antipodean Dominion.

In search of health, Hon. C. H. Cahan, Secretary of State, has had a prolonged sojourn in the West Indies; but is now on his way back to Canada.

With regard to those executives who will spend Christmas Day in the Dominion elsewhere than in Ottawa the Prime Minister, Rt. Hon. R. B. Bennett, will visit his brother, Captain Ronald Bennett, at Sackville, N. B. Another New Brunswicker, Hon. Murray MacLaren, Minister of Pensions and National Health, leaves Ottawa this afternoon for Saint John, there to pass the holiday season.

The French-Canadian Ministers will go to their homes, Hon. Arthur Sauve, Postmaster General, to St. Eustache, Hon. Alfred Duranleau, Minister of Marine, to Montreal and Hon. Maurice Dupre, Solicitor General to Quebec City.

All the Ontario Ministers, outside those normally resident in the Capital, are going to their homes. The Minister of Justice, Hon. Hugh Guthrie, will spend the day at Guelph, Hon. D. M. Sutherland, Minister of National Defence, will visit his sister, Mrs. M. C. MacWhirter, at Norwich; Hon. E. B. Ryckman, Minister of National Revenue, proceeds this evening to Toronto; Hon. H. A. Stewart, Minister of Public Works, will go to his home at Brockville; and Hon. W. A. Gordon, Minister of Immigration, expects to pass the day at Haileybury.

Hon. Gideon Robertson Minister of Labor, is still in indifferent health in Ottawa.

GLASGOW, Scotland, Dec. 22. (Canadian Prese Cable)—The captain of the liner Tuscania which arrived here today from New York, reported an elderly woman was fatally injured and that 35 other passengers suffered minor injuries as a result of heavy seas which tossed the ship in mid-Atlantic.

Will Take Case To Privy Council

(Canadian Press Cable)

LONDON, Dec. 22.—Holders of the junior stocks of the old Canadian Grank Trunk Railways hope to eventually press their case for redress from the Canadian Government to the judicial committee of the Privy Council.

The annual meeting of "Grand Trunk Junior Stocks Limited" was held here today. Hon. W. G. Ormsby-Gore, Chairman, said the directors had received from their legal advisers the assurance they would shortly be able to institute further proceedings in Canada, and they should eventually be carried to the Privy Council.

A proposal for adoption of the report was defeated on a show of hands, whereupon the chairman ordered a poll. Some disorder resulted, with cries of "give the shareholders fair play—don't treat us like children."

The polling resulted in a large majority in favor of adopting the report and accounts.

JAPANESE

Continued from page 1

mittently occupied by Chinese regulars and guerillas.

At army headquarters, the belief was expressed that the occupation was accomplished without serious fighting, although no details were available because of the broken communications system.

The next important Japanese objective was expected to be Changwu, which would give control of the Tungliao-Tahushan railway to the Japanese and would isolate a considerable force of Chinese cavalry in the Tungliao district and open the way for an advance on Tahushan and Chinchow.

A headquarters communique said that a Japanese battalion occupied the important market town of Tungkiangtze, seven miles west of Kaiyuan and north of Fakumen, after routing 150 Chinese irregulars, 20 of whom were killed. There were no Japanese casualties, the communique said.

Headquarters announced the inhabitants of Tungkiangtze had suffered heavily from Chinese bandits and warmly welcomed the Japanese troops at the city gates.

The communique said another battalion clashed with Chinese irregulars about 100 strong near Hokuchiatze, west of Kaiyuan, and fighting still was in progress late this afternoon. Two Japanese had been killed when the latest dispatches were sent back from that front.

CANADIAN FARM PRODUCTS SUPPLY WORLD CRUISE

When the Canadian Pacific's palatial liner, Empress of Britain sailed from New York on Dec. 3 with a full complement of 600 passengers and a crew of over 700 ratings, she carried on board as food supply for the long voyage circling the globe an interesting range of articles. Where possible these were purchased in Canada and in every case in which they applied the supplies were bought by "Government Grade and especially was this the case with eggs, "Fresh Extras," dressed poultry, "Milkfed A" and "Selected A" beef, "Red Brand Choice Butter" "No. 1 Pasteurized" cheese, bacon, potatoes, apples, a wide range of fresh vegetables and particularly canned fruits and vegetables, "Fancy" and "Choice". Here are some of the items: Beef, "Red Brand Choice", 55 whole carcases, some 30,000 pounds; pork, 7,500 lbs grouse, 1,000 brace; turkeys, "Grade A" 15,000 pounds; chicken, "Milkfed and Selected A" 20,000 lbs.; about 3,250 individual birds; ducklings 6,000 lbs; coffee 8,000 lbs; and bought in Canada; eggs 130,000 "Fresh Extras" flour 100,000 lbs.; butter 15 tons—30,000 lbs; mutton, and lamb, 30,000 lbs;—about 600 head; potatoes, "Canada No. 1" 100 tons; apples 500 boxes, "Extra Fancy" and No. 1; bacon 23,000 lbs; "Wiltshire Side"; fresh milk 1500 gallons—60,000 quarts; tea 5,000 lbs sugar 40,000 lbs and a wide range of condiments and other products necessary to the maintenance of the high quality for which this service is famous the world around. The Canadian Pacific Ocean Services insists on the very best in quality in its catering service, supplies so far as possible being bought in Canada and government grads are written into all specifications on which tenders are made as "standards of quality."

DEATHS

PETERS—At the City Hospital, December 22nd, John Hube[illegible] son of Mr. and Mrs. Cornelius Peters, aged 2 years and 9 months.

Kindergarten Christmas Closing

The Kindergarten closed yesterday for the Christmas Holidays with a nicely arranged programme, arranged by Miss Berna Heustis, the numbers throughout showing with what care Miss Heustis trained the little tots under her charge.

A nicely trimmed Christmas tree contained presents made by the children for their parents and here too was seen the efforts of a trained teacher.

Throughout the entire programme the Christmas spirit prevailed and the complimentary remarks by Rev. Dr. E. H. Ramsay and Rev. C. N. Brown were well deserved.

A large number of parents, particularly the mothers were present and before leaving they too complimented Miss Heustis on the success of her work.

The following is the programme:

Good Morning Song—Prayer and Christmas Hymn.

Recitation—Shirley MacDonald.

Pony Game—Katherine McEachern, Vonda McDonald, Evelyn Kays, Mary Walker, Fleur Hillion, Hughie Simpson, Buddy Sterns and Jim Palmer.

Solo—Away in a Manger—Joyce Coffin.

Chorus—Snow, Snow Everywhere.

Christmas Pantomime—A Train—Rollie McEachern as soloist.

Recitation — Merry Christmas Bells—Neila McLaine.

Walkins Dolls—Fleur Hillion, Margaret Cox, Jessie McNaughton.

Recitation—Buddy Sterns.

Solo—The Christmas Doll—Joyce Cantwell.

Chorus—Jingle Bells.

Children demonstrating Christmas Toys around the tree with children singing "Christmas Ships." Rocking horse—Donald Martin. Skates—Rollie McEachern, Music Box—Joyce Cantwell. Tricycle—Freda Cox.

Recitation—Hughie Simpson.

Game Boy Blue—Donald Martin; Hay Stack—Fern Mills, Vonda MacDonald, Betty Lynds, Jessie McNaughton. Sheep—Fleur Hillion, Mary Walker, Harold McPherson, Gordon Wood, Edward Chaisson. Cows—Margaret Cox, Shirley Bell.

Dance—Freda Cox, Donald Martin Corinne Walker, Gordon Wellner.

Recitation—Jim Palmer.

Chorus—Santa Claus puts on his Hat. Solo—Louise Brown—Old Santa.

Dance and Solo—Sylvia Chandler.

Solo—Shirley Bell.

Distribution of Gifts made by children for their parents from Christmas Tree.

Good-bye Song.

RIGHT WING

Continued from page 1

was feared rare books and codicils were lost. A professor who was consulting the books at the time, was missing. Workmen engaged in restoring the building escaped through a breach in the walls.

The Vatican library contains some of the most priceless books and manuscripts in the world. There are about 350,000 printed books, as well as manuscript and other bibliographical treasures. Some of the Greek and Latin manuscripts date from the fourth century.

The building, a splendid piece of architecture, was erected by Pope Pius V in 1588. It is used by scholars from all parts of the world. A new catalogue of the books was made from 1927 to 1929, with the aid of the Carnegie endowment. The code of the American Library Association was used and the work was done by four Vatican and four American librarians.

VATICAN CITY, Dec. 22. (A.P.) —Marco Vatasso, young Italian lawyer, was extricated from the ruins in the Vatican library late tonight, but died on the way to a hospital.

LORD ICORNSHAW'S SISTER PROUD WOMAN

LONDON, Dec. 22—A writer in the "Oversease Mail" describes an interview with Philip Snowden (Lord Icornshaw',—"In the stone-flagged kitchen of a two-roomed cottage in Cowling I talked to a very proud old woman—Mrs. Shaw, a weaver and the wife of a weaver, and the sister of Mr. Snowden.

In the broad dialect of the moors and with a great pride shining in her eyes she told me as we sat beside the kitchen range of the Philip Snowdn who lived in that very room more than half a century ago.

"I'm so proud that I cannot find words to express what I would like to say about Philip's honour," she said simply.

"I wish father and mother had lived to see this day," she said with a wistful glance at a photograph of her mother, who died a few years ago at the age of 90. "Being a Peer won't make any difference to Philip," Mrs. Shaw said. "If he walked in at that door now as he often has done I would be sorry that I hodn't got the house tidy and my clogs polished, but I would just take him by the arm and say, 'come along Philip and sit down. When he comes here he sits in father's chair by the fire for hours smoking his cigarettes."

CENTRAL GUARDIAN

ZION CHOIR—Choir practice will be held this week on Wednesday evening from 7 to 8 o'clock. 11126

BABY BEEF—A carcass of choice baby beef, age 11 months, weighing 408 pounds dressed is on display at the Cash and Carry Meat Market, Great George Street. 11128

THE SACRED SERVICE Pageant "Christmas Bells" which was presented Sunday at the Central Christian Church, will be repeated tonight at 7 p. m. 11127-11

PERSONALS

His Honor Lieutenant Governor Dalton returned last evening after an enjoyable visit to relatives in Boston and Chicago.

Oyster Farming

From the December Issue of "Agricultural and Industrial Progress in Canada":

Oyster "farming" is now being promoted in Prince Edward Island with a view to increasing the crop of shellfish in that province. Malpeque Bay in this Island was once the most noted oyster producing region in the Maritimes, but recently that area has been virtually barren. For two or three years experiments have been in progress in the province under the Dominion Department of Fisheries, and these experiments have shown plainly that oyster farms can be most successful there. One bit of evidence as to the possibilities is that a small area in Bideford River, which was planted with oyster spat in 1928, now has on it some 200,000 oysters which will be ready for market next year.

The Department's work has demonstrated not only that oyster farming can be successfully undertaken in Prince Edward Island, but that the methods necessary for success are neither difficult nor unduly costly. In view of this fact it is believed that in the course of a few years commercial oyster farming can be made a very important industry in the province. Of course, oysters are already marketed from natural beds in all three of the Maritime Provinces, and there is also production in British Columbia, but the trade is capable of much expansion, so that a satisfactory demand may be expected for the output of any "farms" which may be established.

Under the plan now adopted for encouraging people to take up oyster farming in Prince Edward Island, where, for administration purposes, complete jurisdiction over the oyster beds is vested in the Department, under an agreement made with the provincial authorities several years ago, leases for areas which are believed to be suitable will be granted at small annual rentals. Each lease will be for a term of 20 years and will be renewable for a similar period. The information obtained by the Department's investigators will be at the disposal of lessees. In adition to the annual rental which will be charged, a reasonable royalty on production will also be collected after the lease has been in effect for five years, as at the end of that time, it is expected, operations should be on a substantial paying basis.

At present New Brunswick is the leading producer of oysters among the provinces. Last year production from this province was 13,862 barrels, with Prince Edward Island second at 4.888 barrels. From Nova Scotia, the remaining maritime province of the Dominion, came 1.995 barrels, while on the Pacific coast British Columbia produced 3.197 barrels.

Total production for the Dominion in 1930 was 23,942 barrels. This was slightly under the output in 1929, which was 24,959 barrels. The record production of recent years was reached in 1924 at 28,982 barrels. Last year there was a decline in each of the provinces engaged in this fishery except Nova Scotia, which showed a moderate advance. The marketed value of the Canadian oyster fishery last year was $205,019.

U. S. Population

WASHINGTON, D. C., Dec. 22.—The population of the United States is becoming more adult. This fact is noted by the United States office of education which finds that although there were 17,000,000 more people in the United States in 1930 than in 1920, there was a decrease of 128,840 children under five years of age. In 1920 the number of children who did not have to go to school were 10.9 per cent. of the population whereas in 1930 there were only 9.3 per cent.

Statisticians figure that by 1960 the population of the United States will be stationary at about 144,000,000. It is pointed out that this situation will de-limit the home market which has been the consumer of 90 per cent of American production.

Big Haul

NEW YORK, N. Y., Dec. 22.—Three score prohibition agents raided five supper and night clubs tonight in a sweeping pre-holiday drive in which they said the aggregate value of seized furnishings and equipment would run into several hundred thousand and possibly a million dollars.

HAPPINESS AND GOOD HEALTH

MONTREAL, Que., Dec. 22—(By The Canadian Press)—Think less of ills and more of happy things was a bit good advice given by Dr. J. J. McGovern speaking at a local women's club recently. "No medicine will ever cure the indigestion of a woman who is worrying because her husband has lost his job, or because her son is drinking too much, or because her daughter stays out late at night." the doctor said. "It is caused by worry and not by any functional disorders.

"It is a curious fact," he said, "that there is not a thing wrong with the nerves of people who believe they have all gone to pieces. They are perfectly healthy but they have been responding to the suggestions of the mind that they have completely broken down, and have lost their adjjustment to the best running of the body." He quoted a nerve specialist as saying that the nervous patient thinks "I cannot," his friends think "he will not," but the doctor knows "he cannot will." A brisk walk in the fresh air was suggested as a remedy for that "tired feeling that prompts you to lie down in the middle of the afternoon."

Wintering The Rose

(By L. C. Young, Dominion Experimental Station, Fredericton, N. B.)

Of the many flowers grown in Eastern Canada, perhaps one of the most popular is the rose, even although it must be handled very carefully to ensure success. The question is of prime importance in rose growing, as practically all kinds and varieties have to be given some form of winter protection.

In order to determine the most satisfactory method of wintering, an experiment is being conducted at the Experimental Station, Fredericton, N. B., comparing different types and methods of wintering. For the greater part of the experiment in 1930, two methods of wintering were used, namely, "mounding" and "trenching.' In mounding, the bush is left in its permanent location, but soil is mounded up around it to a height of approximately 8 to 12 inches. In trenching, the bush is removed in the fall after the wood has ripened, and buried in a trench about 2 feet deep in a sandy, well drained soil. In the spring it is removed from the trench when the frost has come out of the ground, and placed back in its permanent location.

In all, 172 plants were used in the experiment, 86 being trenched and 86 mounded. Notes were taken on the growth of plants throughout the entire summer, and the results indicated that "mounding" was the most satisfactory method of wintering. Bushes thus wintered were larger, and bloomed much earlier. Mortality, however, was slightly higher, 9 of the "mounded" plants dying as compared to 3 of the "trenched" plants.

It will thus be seen that roses can be successfully wintered in Eastern Canada by mounding the bushes with earth to a height of approximately 8 to 12 inches, then preferably filling the intervening space with fresh, strawy horse manure after the ground has frozen.

It should also be remembered that no matter what method of wintering is employed, it is essential that the wood be hardened and thoroughly ripened. Hence, the watering and fertilizing system should be such as not to unduly prolong growth in the fall.

Duty Set

OTTAWA, Ont., Dec. 22. (By the Canadian Press)—A value for duty purposes on electric lighting fixtures, portable electric lamps and shades has been set by the Minister of National Revenue, announcement of the respective values being made today. Such articles invoiced at $3.25 per unit or less will have their value advanced by 331-3 per cent. When the invoiced value is greater than $3.25 per unit the added value will be $1.10 per unit. The unit is regarded as the separate fixture, lamp or shade, and each must be invoiced separately.

The values do not apply to importations purchased in good faith before December 22 and imported, or entered at customs, on or before January 22.

Farmers Can Profit Feeding Beef Cattle

Reasonable buying-in prices and combined with a cheap and plentiful supply of feed at the present time to form a strong argument in favor of the feeding of beef cattle by farmers, according to G. W. Muir, B. S. A., Acting Dominion Animal Husbandman at Ottawa. Both in the domestic and export market the past year has demonstrated conclusively that there is a big demand for well finished cattle of suitable beef type and the proper weight. Mr. Muir summarizes the present situation by point ing out:

1—Althongh cattle prices are comparatively low, fed calves, and yearlings, and two year old steers properly finished, have demonstrated that they can turn our present plentiful and otherwise coarse and unused grains into a reasonable profit.

2—Well finished young cattle command a premium on the home and export market and never lack a sale.

3—Well finished young cattle too have sold on the British market at prices equal to those paid for the best home grown stock.

4—Western conditions are highly favorable to the production of fed calves and yearlings.

5—Eastern conditions favor the finishing of steers at eighteen or more months up to two years.

6—The age limit for profitable feeding is two years.

7—Outdoor feeding is generally practicable; and that barley, oats and bran put on fast gains, and as much as two pounds per day can be easily possible.

8—And that the market is constantly bare of deep, well finished cattle, in strongest demand today, and there is a profit in catering to the market preference for these.

The complete story of these opportunities is told in Pamphlet 143 (NS), which has just been received by the Publications Branch of the Department of Agriculture at Ottawa for free distribution.

Grocer: "Yes, everything she carries out of here is charged."

"George," asked his newly affianced: "do you shave yourself?"

"Yes," replied Georgie.

"I thought so, for your face is the roughest I ever———"

But it was too late and the deal was off.

There seems to be no ocean left for some flyer to cross the first time.

THE FEEDING AND CARE OF DAIRY CALVES

(Experimental Farms Note)

The best and safest way of improving the milking qualities of a herd of cows is to raise the heifer calves from the best cows in the herd. However, though good breeding has been found a very important factor in the development of good dairy cattle, the usefulness of the cow when mature is also dependent on her proper development and starting the day she is born.

The following method used at the Dominion Experimental Station has been found very satisfactory and capable of developing strong healthy heifers. The calves are removed from the cow at birth unless they are weak and unable to drink or unless the cow's udder is severely caked. The mother's milk for the first four days at the rate of eight or ten pounds divided in three feeds is the first feed they receive. For the first three weeks whole milk is given twice daily and the quantity is increased gradually but overfeeding should be avoided. A safe rule is always to keep the calf just a little hungry. At three weeks of age, the calves are gradually changed from whole to skim milk, taking one to two weeks to make the change. A fat substitute is then added to take the place of the butter fat which has been removed from the milk. Flaxseed jelly has been found to be one of the best substitutes to use, which is made by boiling a pound of flaxseed in a gallon of water until a thick jelly is formed. While the change from whole milk to skim milk is made, a tablespoonful of jelly is added to the milk, increasing gradually until at one month old a half cupful is fed at each feed.

At three to four weeks of age a grain mixture composed of two parts of finely ground oats, one part of bran, and one of oil cake meal is kept before them commencing with a handful per day and increased gradually to 1 1-2 pounds daily at twenty two weeks of age when the skim milk may be gradually cut off and this grain ration increased proportionately. From the age of three to four weeks and on, fine clover hay and clean water are kept before them.

If the calves are spring born they are not exposed to heat and flies, but kept in a dark, cool box until four months of age, after which they may have a night paddock. If fall dropped calves, they are kept in a clean, bright, comfortable warm box stall. A limited amount of roots and ensilage have also been found very satisfactory.

Grain Exports

(Canadian Press)

WASHINGTON, D. C., Dec. 22—Grain exports last week from the United States amounted to 1,719,000 bushels against 2,501,000 bushels the previous week and 53[illegible]0 bushels during the corresponding week of last year.

Canadian grains exported last week from United States ports amounted to 368,000 bushels against 162,000 bushels the week before while exports of North American wheat flour were 175,000 barrels against 163,000 barrels.

Bermuda To Canada Telephone

MONTREAL, Que., Dec. 22. (By the Canadian Press)—Telephonic communication between private parties in the Island of Bermuda and Canada was inaugurated yesterday.

At present the provinces of Ontario and Quebec are linked by the wireless telephone to Bermuda. It is understood other provinces will be added later.

FRENCH WOMEN AND THE FRANCHISE

MONTREAL, Que., Dec. 22—The Gazette in an editorial on Women's Suffrage in France and Canada, says "It may possibly console Mrs. John Scott who, in a public address in Montreal, complained that the status of women in Quebec is the lowest in the Dominion, to know that, from the point of view of franchise rights. Quebec women have a status somewhat higher than French women. But that need not and will not curb the demand presently being made at Quebec for the provincial franchise for women.

"After long and vain effort, they in France are today hopeful that the recent example of the neighboring new republic of Spain will be followed by the French Parliament early enough to allow women to vote when the general elections are held in France next year. If this occurs, it will be the triumph of hope over experience. On two occasions already the Chamber of Deputies has approved a woman's suffrage bill, and each time the Senate prevented the measure from booming law. "Lectures pour Tous," a widely-read Paris monthly number. The main negative in France, as in Quebec, appears to be that the woman's place is in the home, not in the political arena or in the ballot booth. But against this attitude the Parisian periodical just named points out that in French industry at least forty per cent of the workers are women; in agriculture, the farmer's wife and daughter work as hard as the farmer and his son, and on tasks which are not purely domestic. In offices and stores, we are told, French women are taking a more active and important part in business affairs. Altogether, the number of French women engaged in business and other activities, outside the home is now 4,500,000. This compares with 8,500,000 men workers.

A "HOG" FOR HAIR-DRESSING

COPENHAGEN, Dec. 22— Not every little pig in Denmark is going to market—at least one went to the hairdressers.

Following a revival of trade by barter as a result of an agricultural stringency, a farm girl near the German border was given suckling pigs in place of money as wages.

She took one of the pigs to the hairdresser and traded him for a bob and a permanent.

Dawes To Head U. S. Delegation

(Special to the Guardian)

WASHINGTON, Dec. 22.—President Hoover today announced the appointment of Ambassador Charles G. Dawes in London as head of the American delegation to the League disarmament conference in Geneva beginning February 2. President Hoover also announced a woman may be included in the delegation.

Real Hockey At Milton

The opening hockey match at the popular Milton Rink was pulled off last night, when the snappy Ramblers from Stanley Shaw and Peardon's went down to defeat before the classy Hornets of North Milton. At the end of the first period, the score stood 2-1 in favor of the home team. This period looked to the fans as only a work-out and by the way this is what it really was.

The second period opened fast and furious with the Ramblers determined to even the score. Ken Webster, star defence for the Ramblers, stick-handled up through the Hornet defence and placed the puck nicely in the net, evening the score in two minutes. During the balance of this period, the Hornets got down to real team work, which demonstrates the good work of the Hornet coach, Mr. Layton Phillips. After a short period of play, two scores were placed to the credit of Hornets by Earl and Russell Coles. The score at the end of this period was 4-[illegible] in favor of the Hornets.

The third and final period was a repetition of the last half of the second period, when the home team scored three pretty goals by Robert Andrews and Matheson, thus ending possibly the cleanest and snappiest hockey game ever played in Milton. The lineup was as follows:

Ramblers—Goal, S. Webster; Defence, K. Burhoe, K. Webster, A. Peardon; Forwards, G. Bevan, F. Whalen; N. Good, Sherren, Jenkins.

Hornets:—Goal, F. MacKenzie; Defence, F. Crabbe, Earl Coles and Verner Coles; Forwards, D. Roberts, L. Phillips, Leonard Phillips, Russell Coles, Robert MacKenzie, R. Andrew, C. Matheson.

Referee—James Coles.

Goal Judges—E. F. Coles and Leslie Crabbe; Timer, A. B. Coles.

Both teams are loud in their praise of Mr. James Coles for the splendid clean and decisive decisions during the play.

The visiting team were then entertained by the management of Milton rink. It is hoped that the Hornets may soon wing their way to Charlottetown to again match their prowess with the Ramblers at the Forum.

A NOVEL GOLF TEE

LONDON, Dec. 22—A girl's forehead provided the tee in a freak golf challenge match at the Thames Ditton and Esher Club, Surrey, between George Ashdown a young professional, and C. Mansell.

One of the conditions was that Mr. Ashdown should tee up at every hole on a girl's forehead, and so Miss Ena Shaw, a young North London nurse, agreed to be used as a "teeing ground."

At every hole Miss Shaw, who had a tee-peg fastened to her forehead by an elastic band, reclined on the ground and did not appear to be in the least nervous, when Mr. Ashdown played the stroke. The professional, who conceded one stroke at each hole to Mr. Monsell, hit some splendid shots from his unusual tee and won the match in comfortable style by seven up and five to play.

Customer: "Mrs. Jackson has a most magnetic personality, hasn't she?"

WESTERN GUARDIAN

—THE BEDEQUE rink will open on Christmas Day with a special skate. Afternoon 3 to 5. Evening 8 till 10 .Admission 25c, Good music and perfect ice. Season tickets now on sale. Ladies $2.00, Gents $3.00. Tuesday and Saturday will be skating nights of the season.
