THE CHILD CAN'T HELP IT.

When a child does wrong willfully, there is some reason in correcting it. But when a little one's kidneys are weak—can't control their water at night—it's wrong to scold and punish. Thousands of children have been whipped for wetting the bed, who simply couldn't help it. Parents are coming to understand that this is a disease that needs curing—not a "bad habit" that requires correcting, and are giving their children

DOANS KIDNEY PILLS,

which strengthen and restore the Kidneys to healthy action, and prevent further trouble. Mrs. Young, 15 Garish Street, Halifax, N.S., cured her little boy by giving him Doan's Kidney Pills. This is what she says: "My little boy, 13 years old, has for several years been afflicted with weakness in the retention of his water, and did not seem to have any control of his urine. "Hearing of Doan's Kidney Pills, I procured a box, and must say that they helped him wonderfully. He has now finished his second box, and I feel they have cured him. He is pleased to think he can retain his water, as it was so distressing to have the trouble of this inconvenience."

S' SIDE AND PRINCE GO

THE ladies of the Methodist Church at Centreville, intend holding a pie social in their hall on Friday evening next. A literary and musical program will be rendered and a good time may be looked for.

A PROCESSION that looked like a general invasion was seen approaching Summerside by way of Bedeque Bay Monday afternoon. During its approach a good deal of speculation was indulged in as to what it really was. One old patriarch remarked that it reminded him of Jacob's return from Mesopotamia over the plains of Moab, with his oxen and asses and men servants and women servants. The man who knows everything was there however, and explained that it was only R. C. McLeod's cattle being moved from his Bedeque farm to Parkside, and that there were only 120 of them altogether, besides one man servant, whose name was Simon.

The accoutrements for the recruit of the Boys' Brigade have arrived and the new boys are being supplied by the officers during this week. From the smart appearance these young gentlemen present as they emerge from time to time in their brand new uniform, it may safely be said that Friday evening's drill will be an attractive sight. Esprit du corps is on the increase in the company and great things are predicted in the way of future development. The public look forward to a street parade when the weather permits. It is understood that a march out and parade service in some public place where the boys can be addressed by the several clergy and others interested in the movement, is in contemplation by the officers before the drill season closes.

Low Temperature in Milk Preservation.

While low temperatures check bacterial multiplication, cold kills but few bacteria; they may be said to be paralyzed, but they recover again if the temperature be raised. The effects of low temperature in stopping bacterial action is important in its bearings on milk preservation, for milk if free from micro-organisms, would keep sweet indefinitely. Then, if we prevent bacterial growth and multiplication by keeping the temperature low, we check any fermentative change, and can preserve the milk for lengthened periods.

PRINCIPLES OF COLD STORAGE. This too—this low temperature, inhibiting growth—is the basis upon which rests "cold storage" systems. Meats will not be attacked by the bacteria of putrefaction so long as the temperature is too low for their multiplication.

HEART DISEASE. SOME FACTS REGARDING THE RAPID INCREASE OF HEART TROUBLES.

Do Not Be Afraid, But Look For The Cause.

Heart Troubles, at least among the Americans, are certainly increasing and while this may be largely due to the excitement and worry of American business life, it is more often the result of weak stomachs, of poor digestion. Real organic disease is incurable; but not one case in a hundred of heart trouble is organic. The close relation between heart trouble and poor digestion is because both organs are controlled by the same great nerves, the Sympathetic and Paemogastric.

In another way, also the heart is effected by the form of poor digestion, which causes gas and fermentation from half digested food; There is a feeling of oppression and heaviness in the chest caused by pressure of the distended stomach on the heart and lungs, interfering with their action; hence arises palpitation and short breath.

Poor digestion also poisons the blood, making it thin and watery, which irritates and weakens the heart. The most sensible treatment for heart trouble is to improve the digestion and to insure the prompt assimilation of food. This can be done by the regular use after meals of some safe, pleasant and effective digestive preparation, like Stuart's Dyspepsia Tablets, which may be found at most drug stores and which contain valuable, harmless digestive elements in a pleasant, convenient form.

It is safe to say that the regular persistent use of Stuart's Dyspepsia Tablets at meal time will cure any form of stomach trouble except cancer of the stomach.

Full sized package of these tablets sold by druggist at 50 cents. Little book on stomach trouble mailed free. address F. A. Stuart, Co., Marshall, Mich.

MR. FRANK DODGE,

Says his Life was Saved by Dodd's Kidney Pills.

Toronto, Feb. 27.—Mr. Frank Dodge, of North Maupberg, Ont., has been visiting here recently. He is a splendid specimen of Canadian manhood standing more than six feet high "in his stockings" erect and muscular. "I was a different man two years ago," said he to a friend to-day. The truth is I would have died of Kidney Complaint, if it hadn't been for Dodd's Kidney Pills. "I had been treated by physicians who had taken various remedies without getting any better. I read of Dodd's Kidney Pills, and decided to try them. I did so, and was thoroughly cured in a couple of weeks."
