Are Your Glasses Right

Vision changes as all things do with the years and the glasses that were just right a few years ago may be all wrong today. If they have outlived their usefulness, you are doing your eyes an injury by wearing them and bring on headaches and nervous disorders. Better let us test your eyes and see whether your present glasses are suited to them.

Attention to Horses' Teeth

There are many horses of all ages that are not thriving well, although consuming a reasonable amount of food, and their owners are at a loss to account for it, and often spend money in condition powders, stock foods, etc, without result. The animals do not show symptons of illness, but simply do not thrive, and have not the spirits or energy they should have. The cause in the majority of cases, will be found in the mouth, either then is faulty dentition or there are irregularities of the teeth. The subjects do not require medical treatment all that is needed is intelligent attention to the teeth. We say "intelligent attention" as in many cases unskilled or ignorant interference does much more harm than good. It requires a man who thoroughly understands the anatomy of the mouth, and has the necessary instruments and skill to correct whatever is wrong.

An Optical Pointer

There enters into the sale of every pair of glasses, an element which places the transaction outside the field of ordinary competition.

There are numbers of standard articles which can be bought in half a dozen different stores in Ch'town; if any store sells cheaper than the others, that is undoubtedly the most advantageous place to buy.

In the optical business however, it is very different, with every pair of glasses the optician sells, is included his skill in scientically fitting those glasses, and to the public, the latter should be by far the most important factor in the transaction. Therefore get the best service—as cheaply as you can, but—GET THE BEST.
