THE COMING EXHIBITION.

The real function of an Exhibition is to educate those who attend. The tastes of the young are easily cultivated in almost any direction, Therefore it behooves those who have the management of Exhibitions to see to it that impressions may be made, the after-thoughts of which will in themselves be useful and elevating. All encouragement should be given to th young people of the rural districts as they in a few years will be the farmers of the country. They are those who should be encouraged in order that they may remain on the farm. The older ones have become set in their ways, and it is far harder to get them out of the rut than to teach the young who are susceptible to impressions.

This function is being thoroughly carried out by the management of the Exhibition to be held here in September. Lectures are to be given on the most important branches of Agriculture. Questions may be asked by any of the audience and will be answered with pleasure by the lecturer. Expert judges will be employed who will thoroughly explain the reason of their awards. Prizes are offered for the young to compete for in various lines.

Besides providing for the young there will be many features at the coming Exhibition, suitable and instructive for adults of both sexes and all interested in Agriculture. We feel confident that the chief desire of our farming population is to receive instruction in their lines of business. It is not possible for many of our people to attend the large fairs of other Provinces and therefore it is a wise step to bring to them every advantage possible, and to enable them to receive that instruction near home. In no way can this be done so well as at an exhibition, such as that which we hope to see here in September.

No thoughtful and unbiased person will dispute the beneficial influence of these institutions in stimulating to improvement in methods of farming, in promoting the character and quality of Agricultural and Dairy products and better types of live stock. The question, Have these Exhibitions been worth what they cost? is, to our mind, fully answered in the affirmative by the great improvement made in the various breeds of live stock, through the healthy rivalry incited by competition for the prizes and honors held out for the production of the best in al classes.

In what other way is it possible to determine that improvement is being made or has been effected? Advancement can only be made by bringing together for comparison the best specimens of the different breeds, the choicest of agricultural and dairy products, and the latest and best devices for effective and economical cultivation of the soil and harvesting crops.

THEY CANNOT ATTEND.

TORONTO, August 3,—A letter was received at the offices of the Canadian Manufacturers' Association to-day from Premier Laurier, saying that on account of the postponement of the coronation neither Premiers Laurier nor Seddon could attend the association banquet in Halifax on August 14th.

A COSTLY CHIME.

H. H. Rogers of the Standard Oil Company the Donor.

When H. H. Rogers, the Standard Oil and Amalgamated Copper magnate, commissioned Architect Charles Brigham to erect and equip the church at Fairhaven, Mass., for the Uniterian society, the one restriction imposed was that everything throughout must be of the very best; for the structure was to be a memorial of Mr. Rogers' mother, and no expense should be spared in making it a fitting one. Several years have since passed, and the residents of Fairhaven and the many visitors to that pretty town view with admiration the handsome architecture, with its abundance and intricate detail of stone carving.

Although the building may not be finished before next summer, the question of procuring a chime of bells that would be in keeping with its surroundings and a pleasure to its hearers has been under consideration for nearly two years, during which time bells of American and foreign make were investigated. Associated with the architect in this particular was J. Wallace Goodrich, the well-known organist of Trinity Church. The result has been the placing of an order with the Meneely Bell company of Troy for a chime of 11 bells, which will weigh, completed, over ten tons, at a cost exceeding that of any in the world made in modern times. It is confidently expected by those having the finest set of bells in fullness and sofiness of tone in existence.

VALUABLE MINERAL FIND IN CAPE BRETON.

SYDNEY, August 2.—Local prospectors at Glace Bay have discoverer extensive desposits of valuable mineral called libettenite in one of the outlying districts. This mineral which is the basic phosphate of copper of an olive green color, is used largely in certain important manufactures The only place where it is found to any extent is at Libetten in Hungary.

THE TRYING TIME

In a young girl's life is reached when Nature leads her uncertain steps across the line which divides girlhood from womanhood. Ignorance and neglect at this critical period are largely responsible for much of the after misery of womanhood. Not only does Nature often need help in the regular establishment of the womanly function, but there is almost always need of some safe, strengthening tonic, to overcome the languor, nervousness and weakness, commonly experienced at this time.

Dr. Pierce's Favorite Prescription establishes regularity. It is a strengthening tonic, soothing the nerves, encouraging the appetite and inducing restful sleep. It contains no alcohol neither opium, cocaine or other narcotic.

"I wish to tell you the benefit we have received from using your remedies," writes Mrs. Dan Hall, of Bredhead, Green Co., Wis. "Two years ago my daughter's health began to fail. Everything that could be thought of was done to help her but it was of no use. When she began to complain she was quite stout; weighed 170, the picture of good health, until about the age of fourteen. Then in six months she was so run down her weight was but 120. She kept failing and I gave up, thinking there was no use, she must die. Friends all said, 'You will lose your daughter.' I said I fear I shall. I must say, doctor, that only for your 'Favorite Prescription' my daughter would have been in her grave to-day. When she had taken one-half bottle the natural function was established and we bought another one, making only two bottles in all, and she completely recovered. Since then she is as well as can be."

Dr. Pierce's Common Sense Medical Adviser, in paper covers, is sent *free* on receipt of 31 one-cent stamps to pay expense of customs and mailing *only*. Address Dr. R. V. Pierce, Buffalo, N. Y.

COMPARE THE TIME!

As kept by the watches and clocks we sell with a first class "regulator" and convince yourself of the accuracy of our timepieces. You know our watches carry a guarantee, and we keep them in repair a whole year free of charge. Subsequent cleaning and repairing at moderate rates. COKE DANDRUFF CURE

Is a blessing to mankind, if you USE it; but if you merely read these advertisements and think about it, you will get no benefit whatever. Now what stage have you reached?

THERE IS FIRST DANDRUFF—
NEXT FALLING HAIR—
THEN BALDNESS—

Coke Dandruff Cure is created to cure dandruff, stop the falling of the hair and prevent baldness. All that we ask is—"try it." If it fails, your money will be refunded. Sold by druggists—50c. and $1.00.
