

A Timely Tip to Coal Users

Fill the Scuttle With INVERNESS Coal and Save Money

When you buy INVERNESS SCREENED COAL you get more than mere combustible mineral—more than common coal. You get coal that produces more heat to the pound than any you've tried before; coal that is carefully screened, thus ABSOLUTELY clean; coal that produces little ash with consequently a minimum waste; No matter what you need—what kind of fire you want or stove you use—INVERNESS is the coal to buy.

Inverness coal means safety, economy and satisfaction.

—BASEBALL.—The Kensington Athletes paid a visit to Malpeque on the evening of June 3rd to compete with the Malpeque baseball team. The game ended in a victory for the Malpeque team, the score ending 12-11. It is only fair to the Athletes to state that there had been a mistake made in marking of the pitcher's position of several feet, which caused several overthrows. After this mistake was rectified Kensington scored the larger number of runs. The teams were as follows:—Kensington.—Catcher, J. Thompson; Pitcher, E. Pidgeon; 1st base, I. Darragh; 2nd base, F. Pidgeon; 3rd base, V. Lynds; Short stop, H. Warren; C. Field, E. Bowness; R. Field, A. Cole; L. Field, P. McMahon; Malpeque.—J. Currie, C. Rattee, E. Bearisto, G. Mountain, H. Bearisto, R. Bearisto, V. Abbot, J. Rattee, H. Abbot. The Kensington boys were well treated by the Malpeque people, cake and ice cream being quite in evidence. Rev. Mr. Rattee, acted as umpire and his decisions were fair to all.—K.

A DEAD FLY

May Be As Dangerous As A Live One

It is certainly more repulsive, and, if left, will do far more disease than ever it did when alive. It is not sufficient to kill the fly. You must destroy the germs as well. These if allowed to multiply, will spread disease and death. Give up using the fly swatter and the unsanitary sticky fly paper.

Buy WEISS'S FLY PAIS—the only really effective method of exterminating the teeth-chaining nuisance. They will get the flies in the house in a few hours. No dead flies left lying about.

Be careful to follow directions found in each packet.

—MRS. OLIVER W. MUTTART.—The death occurred yesterday, at the residence of her son-in-law, Mr. Alex. Campbell, Summerside, of Mrs. Oliver W. Muttart after a brief illness. Last Sunday week, May 31st, in her usual health she attended church service morning and evening. On Monday, June 1st, she was stricken with paralysis and never completely regained consciousness, sinking gradually until she passed away. She was 70 years of age and had removed from Augustine Cove some fifteen years ago, residing with her daughter Mrs. Campbell until her death. She was a most lovable and exemplary Christian lady and her death will be sincerely mourned by a large circle of friends. She is survived by her husband, one son John Hooper, of Spokane, Washington, and two daughters, Mrs. Alex. Campbell, Summerside, and Mrs. B. N. Barnes, Halifax. The funeral will take place this Friday afternoon at 2 o'clock to the Presbyterian Church, thence to the People's Cemetery. To the bereaved relatives, The Guardian extends sincere sympathy.

The Original and "Herbicide"

Standard Article

The Weed Exterminator

"HERBICIDE" is a liquid preparation for the killing of grass and weeds of every kind on roadways, paths, gutters, tennis courts—any place that grass or weeds are not wanted.

It is applied by means of apparatus of any kind, from the small garden sprinkling can to the sprinkling car or cart.

Each gallon is sufficiently strong to make forty (40) gallons of effective treating liquid when mixed with water.

Each gallon when diluted with forty gallons of water will thoroughly treat one thousand (1,000) square feet of ground.

It is harmless to metal, stone or wood work, is perfectly odorless, does not stain the ground, and is harmless to life unless taken internally. It also helps to bind and lay dust. There is no danger to surrounding vegetation as it tends to go down in the ground rather than spread. It can be used effectively on any ground where weeds grow.

One thorough application kills both tops and roots of the weeds, and makes the treated ground sterile.

DIRECTIONS FOR USING

For the destruction of weeds, grass, etc., on roadways, drives, gutters, brick walks, tennis courts, etc.

Mix thoroughly one (1) part of "Herbicide" with 40 parts of water.

Then drench the ground with the diluted "Herbicide" so that it can get at the roots.

When the weeds are very high and thick, it is desirable to cut them down before applying the liquid, so as to make sure that it gets at the very roots.

If the weather has been very dry and the ground is baked very hard, it is best to wet the ground well before applying the "Herbicide." In about twenty-four (24) hours time after the application of the "Herbicide" go over the ground again with water, using sufficient to wet it well.

In the case of Canada Thistles, Poison Ivy and weeds of such a strong and tough nature it is more economical to cut off tops before applying the "Herbicide."

If these directions are followed you cannot fail to get the best of results from "Herbicide."
