**As the poet says...**

"When Health, affrighted, speeds her rosy wings, And flies with every changing gale of Spring." —BYRON

Yes, and how easy it is to "affright" Health! Before you realize it, the treasure you valued so highly is no longer in your possession. It's easier to retain Health, you know, than to regain it. So, consult a Doctor at the first suggestion of illness, and be guided by his experienced counsel. Then, bring his prescriptions here for compounding by experts.

**Commends Premier's Stand On Daylight Saving Issue**

Strong criticism of Daylight Saving was made in the Legislature on Monday by Mr. C. C. Baker, (Liberal) Fourth District of Prince, in speaking on the Draft Address.

Mr. Baker said that if ever the Premier and Government had had bouquets passed to them, it was for the decided stand they took on this question in the House last year.

Premier Jones: "The Opposition took the same stand."

Mr. Baker said that from the public health standpoint alone, Daylight Saving was to be condemned. Some of the most bitter complaints he had heard about it came from young mothers in urban centres. He was quite sure that Standard Time was more advantageous from an economic view as well.

Congratulating Premier Jones on his personal election on Dec. 11, Mr. Baker said he believed it was due to the Premier's "strong leadership" that so many Liberals were returned. He predicted that if the Opposition Leader retired from the leadership of his party, there would be danger of the party being "torn asunder by contending claimants, both among the small number of 'ins' and the large number of 'outs.'"

Mr. Baker maintained that the property vote served a good purpose, but agreed that it should be confined to the district in which the voter actually resided.

He spoke at some length in praise of his district as the chief dairy production centre of the Island. If the Government can lend any further aid to this basic industry it would be of prime importance, as this has proved to be the most essential industry in the Province.

**Two Essentials**

"Two commodities that we need badly on our farms," Mr. Baker said, "are electric current and running water." He referred to the extension of these facilities in his own district. One section not yet supplied with electricity is the Chelton, Fernwood and Lower Bedouque area. Negotiations might be entered into by the Utilities Board and the Maritime Electric Company and Compton Company to provide this service.

Referring to the Hogg report on rural electrification prepared for the Government and published some time ago in The Guardian, Mr. Baker said that while it was "very extensive it is also very expensive to put such a scheme in operation."

He regretted that so little progress has been made to lighten the work of the farm wife. There is need for an unlimited supply of water in every kitchen, and no woman should be required to pump water by hand. It would be worth considering the question of subsidizing the provision of water facilities on the farm. "Electricity and water are both important, but if I had to do without either I would do without electricity in preference to a water supply," Mr. Baker said.

He commended the Blue Shield hospital plan, and in conclusion complimented the Minister of Public Works and Highways on the capable manner in which he had conducted the affairs of his department.

**Big Railway Development At Moncton**

MONCTON, March 4—The development of a tremendous industrial centre by the Canadian National Railway was announced today by J. P. Johnson, vice-president and general manager, Atlantic Region, of the company. The centre, which will cover an area of 145 acres, is expected to become one of the largest industrial developments in the Maritimes in many years and to involve millions of dollars.

To be named the "Victory Industrial Centre," said Mr. Johnson, it is the site of the former No. 21 Personnel Depot set up under the Commonwealth Air Training Plan early in World War Two. The depot was established in Moncton by the Department of National Defence through the co-operation of the C.N.R.'s department of research and development and officers of the Atlantic Region. It was constructed on property loaned by the C.N.R. to the Government.

One of the largest R.A.F. stations in the British Empire, Mr. Johnson stated, the Moncton station was a town in itself and in addition to its many service buildings had a stadium, motion picture theatre, roller skating rink, fire station and all the other advantages of a modern community. Hundreds of thousands of airmen from all sections of the Empire, South America, the United States and other countries of the world passed through the depot which served as a clearing house to training schools in various sections of Canada and the United States.

Later it became No. 1 "Y" Depot and finally No. 10 Release Centre for returning R.C.A.F.' personnel from overseas, he added. When the repatriation work was completed, the property was turned back to the Canadian National Railway and War Assets Corporation sold the buildings. Then the C.N.R. industrial department under E.A. Day, industrial representative here, made plans to develop it into an industrial centre, and arranged for the lease of the land to large industrial firms requiring rail transportation facilities.

The Victory Industrial Centre is bordered by John Street, Edmonton Avenue continuing as Collishaw Avenue, Killam Drive and south to the C.N.R. shops. There are twenty buildings formerly used by the R.A.F. on the property which are now occupied by industries. One building is under construction and two others are planned for construction in 1948.

**Granted To City**

All paved main streets, water lines and sewers which were turned over to the C.N.R. by the Department of National Defence have been granted to the City of Moncton by the company and will be operated as public facilities for the general benefit of the people. The fire station at the corner of Elzabeth and Halifax Streets has been purchased by the city, the land having been deeded to the people of Moncton by the C.N.R.

The eastern section buildings are being occupied by the Canadian Army and by the Canadian National Railways which has more than 40,000 square feet of office accommodation. The remainder of the site is being industrialized. Two main lines have already been laid to serve the entire area and provisions made for the construction of a third. Many of the industries already established are served by private sidings and others will be installed as plans are developed.

Among the industries whose plants are already in operation are Canada Brokers and Distributors Limited and Eastern Builders Limited, which have a combined office and warehouse; Terminal Construction Company Limited, plant and gravel screening yard; McCormack's Limited, Maritime Drug Company Limited; Daiglish Quebec Limited, plant for the manufacture of household chemicals; Hub Equipment Limited, warehouse and garage to service construction equipment; Dickie's Radio and Electric Company Limited, two warehouse buildings; Moncton Foundry and Machine Company Limited, modern foundry and machine shop; Maritime Drug Company Limited; Maritime Co-operative Services Limited, a number of buildings, one of which is being used for the storage and mixing of feeds and fertilizers; Co-operative Farm Services Limited, buildings for general use and a creamery plant; Michael Balg, furniture warehouse; and J. S. Brown Manufacturing Company, plant for the manufacture of wooden wares.

Is a large warehouse for Lawrence F. Wallace for his own cartage and warehousing business. Space will also be provided by Mr. Wallace for the Firestone Rubber Company Limited, as its New Brunswick and Prince Edward Island distribution centre, and for the Colgate-Palmolive-Peet Company Limited, for their Maritimes traffic.

There are numerous other large industrial firms planning to locate in the centre. While no release of the names can yet be made, plans are fairly well completed and construction work on the new buildings will commence this year. In addition, there are a number of transactions in the development stage.

"It is a great development for the Maritime Provinces," Mr. Johnson concluded. "This is only the beginning. We expect the new Victory Industrial Centre to grow and grow. Its possibilities are unlimited. Our industrial department is, with the co-operation of all other offices of the company, working incessantly to bring new industries to the Maritimes."

**Comments Premier's Stand On Daylight Saving Issue**

Strong criticism of Daylight Saving was made in the Legislature on Monday by Mr. C. C. Baker, (Liberal) Fourth District of Prince, in speaking on the Draft Address.

Mr. Baker said that if ever the Premier and Government had had bouquets passed to them, it was for the decided stand they took on this question in the House last year.

Premier Jones: "The Opposition took the same stand."

Mr. Baker said that from the public health standpoint alone, Daylight Saving was to be condemned. Some of the most bitter complaints he had heard about it came from young mothers in urban centres. He was quite sure that Standard Time was more advantageous from an economic view as well.

Congratulating Premier Jones on his personal election on Dec. 11, Mr. Baker said he believed it was due to the Premier's "strong leadership" that so many Liberals were returned. He predicted that if the Opposition Leader retired from the leadership of his party, there would be danger of the party being "torn asunder by contending claimants, both among the small number of 'ins' and the large number of 'outs.'"

Mr. Baker maintained that the property vote served a good purpose, but agreed that it should be confined to the district in which the voter actually resided.

He spoke at some length in praise of his district as the chief dairy production centre of the Island. If the Government can lend any further aid to this basic industry it would be of prime importance, as this has proved to be the most essential industry in the Province.

**Two Essentials**

"Two commodities that we need badly on our farms," Mr. Baker said, "are electric current and running water." He referred to the extension of these facilities in his own district. One section not yet supplied with electricity is the Chelton, Fernwood and Lower Bedouque area.
