Retinoscopic Eye Examination

The cut accurately shows this method in operation. It is probably, the most reliable test known today.

By its use the expert optician accurately measures the amount and kind of error in the patient's eyes, completely removing the uncertainty of the old system, and reducing to a minimum, the possibility of prescribing the wrong lenses.

We use this System

and rely on its readings, almost entirely; The results in past years have been remarkably satisfactory, and if you are in need of Glasses you cannot do better than allow us to examine your eyes.
