AN ATTIC SALT-SHAKER

By **W. ORTON TEWSON,**

All Rights Reserved, Reproduction Prohibited

It takes a sailor to spin a really salty yarn. And no yarn has more flavor to it than a salty 'un spun by an old sea dog. That certainly goes for "Yarns of A Kentucky Admiral," by Hugh Rodman. Rear Admiral U. S. N.—as jolly and rollicking, yet purposeful, a chronicle about the sea and sailors as ever the heart of a landlubber yearned for.

Admiral Rodman commanded the American Battle Squadron with the Grand Fleet during the last year of the World War. What he has to say of those hectic days will warm the cockles of the hearts of Americans and Britishers alike.

But it is as a yarn-spinner that the Admiral is in his element. He has had a glorious time in all parts of the world and he tells stories by the dozens of his amazing experiences, with a gusto and humor magnificently infectious. He is that kind of a sailor.

I am still laughing over his story of a "friendly" drink between a British Chief Petty Officer and a German Petty Officer in a Hong-kong saloon. It was at the time, many years ago, when there was some ill-feeling between the combined forces stationed at Hong-kong. The Americans and British enlisted men couldn't get along with their German comrades, so the British Governor of Hongkong issued an order directing a more friendly attitude on the part of the Britishers towards the Germans.

In compliance with this order, one of the British Chief Petty Officers invited a German Petty Officer to have a drink. When the glasses were filled, the Britisher, proposing the toast, said:

"Here's to his Imperial Majesty, the German Emperor."

"Prosit," said the German and down went the drinks.

The German in turn treated, and when ready to drain his glass, said:

"Here's to his Imperial Majesty, the German Emperor."

The Britisher put down his glass and said:

"We drank to the emperor the first time. What's the matter with drinking to the queen?"

"Here's to his Imperial Majesty, the German Emperor," again said the German and drained his glass.

The Britisher, thoroughly disgusted and angry, left his glass untouched and said:

"Well, if you won't drink to the queen, then up comes your bloomin' emperor," and he stuck his fingers down his throat and "the emperor" came up.

The origin of that over-worked expression, "You know me, Al!"—of which Admiral Rodman was this: "Some years ago," pipes the Admiral, "when we kept a station ship in Constantinople, our men taught the Turks to play baseball. In the final match between the Turks and the bluejackets when the first Turk came to bat, he said:

"O Allah! give me an eye to see the ball!"

"He struck three times and was out."

"The second Turk said:

"O Allah! give me the skill to hit the ball!"

"He likewise struck out."

"The third Turk came to bat and said:

"O Allah! grant that I may make a base hit!"

"And he also struck out."

"The sides changed and an American bluejacket came to bat. He fanned the home-plate with his bat and exclaimed to the world at large:

"You know me, Al!" and knocked a home run."

"Speaking of the voracity of fish," says Admiral Rodman, "while I was surveying at the entrance of Chesapeake Bay one May, when the bluefish were on their northern migration, it was not uncommon to have them grab a two-pound lead at the end of a sounding-line, and try to make off with it. The fish that attempted it probably did not weight over ten pounds, judging by these that were taken. At the end of a day's work the lead was materially roughened by the imprint of their teeth and had to be hammered

TIRED, WEAK, NERVOUS WOMAN BENEFITED

Praises Lydia E. Pinkham's Vegetable Compound

Abastos Mines, Quebec.—"After the birth of my second child, I was always feeling tired, nervous and weak and had headaches, backaches and terrible pains every month. I suffered two years before I tried Lydia E. Pinkham's Vegetable Compound. I got four bottles at first and it did me a world of good. I would not be without it in the house now, and have another six bottles in. I recommend it to every woman I know."—Mrs. T. BARRETT, Box 114, Abastos Mines, Quebec.

They Were Stumped

When the Creators of Evangeline Pale Dry finally hit upon that happy drink their excitement gave way to wonder. . . . How to classify it? A Ginger Ale? No! It is only gingered ever so delicately. An extra dry Ginger Ale. True enough it has a dry smash to it and ginger, yet the actual fact is that there is no other type of refreshment so dainty and fruity—so neatly poised for a punch, a mixer otherwise, or tasting "straight."

smooth for the following day's work."

Now it's your turn.

Izaak Walton, the "Father of Angling" and author of "The Compleat Angler," the Fisherman's bible, was a sweet-souled, contemplative man, who spent much of his time, when he was not fishing, "in the families" of the eminent clergymen of England." As Andrew Leng said: "He had a natural taste for a Bishop."

For fifty-one years old Isaac was a business in London occupying half a shop two doors west of Chancery Lane. There is some doubt whether he was a linen-draper or ironmonger—says C. Lewis Hind in "100 Best Books"—but there is no doubt that important men sought him, and would chat with this delightful shop-keeper-fisherman over the counter.

A Josephine in a Gilbert and Sullivan "Pinafore" company had the unforgivable habit of singing sharp, and the equally unforgivable one of being careless in her dress, relates John Philip Sousa in his reminiscences "Marching Along."

"One night," recalls Sousa, who was conducting the performance "she came on the stage with her petticoat showing fully two inches below her gown, and she began to sing a shade over the pitch. I hurriedly scribbled a note:

"Dear Madam: Please raise your petticoat two inches, and lower your voice one inch."

A diverting incident—for the audience—occurred when Sousa's Band was playing at Mitchell, South Dakota. The concert was given in a hall dedicated to vaudeville. One of the vaudevillians did an act in which at a certain cue about two hundred hats of all sizes and shapes were released from a net strung in the roof and came tumbling on to the stage.

"Just how it happened, I don't know," chuckles Sousa, "but in the middle of a number a shower of hats descended upon us. They were piled nearly three feet deep in the bells of the Sousaphones. The laughter that overwhelmed the audience was so tremendous that you couldn't hear the band play at all, although they valiantly continued to do so."

Tucketts Show Greatest Profits

Hamilton, May 21.—The Annual Meeting of The Tucketts Tobacco Company Limited, was held today at the Head Office in Hamilton and the Sixteenth Annual Report was presented with statements of the Company's affairs.

The Management was congratulated upon the results of the year's business which showed the largest profits in the history of the Company, also for the strong liquid position which had been maintained as shown in the Annual Report.

Mr. Howard S. Ambrose, the President, in addressing the Shareholders commented upon the growth of the business, especially with regard to the increase in sales of the Company's brands of cigarettes, and expressed the hope that the growth in volume of business which has been experienced during the past few years would continue.

The retiring Directors were all re-elected.

At a meeting of the Directors held subsequent to the Annual Meeting all officers of the Company were re-elected.

FISHMEAL vs. SKIM-MILK FOR PORK PRODUCTION.

(Experimental Farms Note)

The value of animal protein in a ration is well known to those engaged in the raising of bacon hogs. In many cases, however, the supply is limited and a suitable substitute is desired that will give good gains, develop the right type of hog, and be economical to purchase.

In 1923-24 an experiment was carried out at the Dominion Experimental Farm, Nappan, Nova Scotia, wherein 24 hogs were fed from weaning to finishing on a grain ration containing 8 per cent of fishmeal. Another group of 25 hogs was fed the same grain-milk mixture plus 300 pounds of skim-milk per 100 pounds of the grain mixture. The fishmeal fed group gained 95 pounds per day at a cost of 10.2 cents per pound, while the skim-milk lot gained 94 pounds daily at a cost of 8.4 cents per pound. The fishmeal and skim-milk were charged at \$100.00 and \$4.00 per ton respectively.

In 1926 two experiments were carried out. In each case a check pen which received no animal protein supply, was included in the test. The average daily gains recorded were as follows: Fishmeal fed lot, 1.25 pounds, skim-milk fed lot, 1.1 pounds, and the check group, .93 pounds. The average costs per pound gain were 8.78 cents for the fishmeal fed lots, 7.57 cents for the skim-milk lots and 8.36 for the check lots.

In 1927 two more experiments were conducted. The gains were slightly lower with the fishmeal groups than with those fed skim-milk, but both lots showed greater gains than the check pens.

In all the experiments outlined, the hogs in the fishmeal fed lots were equally as good or better in type and finished than those fed skim-milk and both lots showed marked superiority over the check lots. The 1927 fed hogs were graded by a representative of the Live Stock Branch and the results were as follows: Fishmeal group, 90 per cent selects, 10 per cent shop hogs; skim-milk groups, 80 per cent selects, 20 per cent thick smooth; check groups, 50 per cent select, 30 per cent thick smooth and 20 per cent shop hogs.

Averaging the results of all

experiments it was found that the hogs fed fishmeal gained 1.01 pounds per day, those on skim-milk .95 pounds and the check lots .97 pounds, at a cost per pound gain of 9.5, 8.15 and 9.01 cents respectively.

The digestible protein in the fishmeal cost 8 cents per pound. If the skim-milk is charged at the same rate, it would be worth \$5.76 per ton instead of \$4.00 and the cost, per pound gain would be 8 cents, instead of 8.15. Fishmeal analyzing 70 per cent total protein or 43 per cent digestible protein and selling at \$80.00 to 100.00 per ton, is one of the cheapest protein feeds on the market at the present time and if fed at the rate of 6 to 8 per cent of the total ration, will give good gains and develop a good type and well finished bacon hog, providing a balanced ration is fed.

From the experiments above outlined, fishmeal is recommended to the man who is growing market hogs and has only a limited supply of skim-milk on hand.

NEWS FROM LAKEVILLE.

Their many friends regret the departure of Mr. and Mrs. William Pope and family. Mr. Pope has been in New York for the past six months and came home lately to dispose of his property and effects. He had a sale Friday, 11th inst., but is limited and a suitable substitute is desired that will give good gains, develop the right type of hog, and be economical to purchase.

Mr. and Mrs. Pope, with their family, the Masters Henry and Lloyd, and Miss Hazel, left Tuesday morning for New York, where a good position awaits him. They will be much missed here as they were highly respected. Their host of friends wish them all happiness and success in their new home.

Mr. Neil McPhee, of Fairfield, has purchased the house and lot formerly occupied by Mr. Pope, and intends moving in soon. They will receive a hearty welcome, for Mr. and Mrs. McPhee are jolly good fellows.

Our veteran builder, Mr. William Stevens, has several large contracts for the summer. Although only with us for a few years, Mr. Stevens has created four large barns and several smaller buildings, which stand as memorials to his skill and workmanship.

Mr. S. J. Rose, whose dam was destroyed by the storm last Fall, intends putting in a heavy gas engine and continuing the business as usual.

We are pleased to learn that Mrs. William Fraser is improving rapidly after a serious operation in the P. E. Island Hospital and hope to see her home in the near future.

There are in this school district three men who are well over the four score mark, and still hale and hearty.

There are a number of Western horses purchased around here and all giving good satisfaction.

Great preparations are being made for certified seed potatoes.

The school is progressing wonderfully under the expert management of Miss Margaret Chandler.

Lobster fishing has been good on the North Side, but the weather is unfavorable just now.

Health Services of Canadian Medical Association

BLOOD PRESSURE

Blood pressure is the force that the heart exerts in order to pump the blood through the circulatory system. The heart is a hollow, muscular organ which acts as a pump to keep the blood in circulation. The blood leaves the heart in two streams. One stream carries the blood to the lungs where it is purified; the other stream goes to all parts of the body, carrying food to the tissues.

The arteries are hollow tubes which carry the blood. Normal arteries are soft and elastic. The impulse of the heart beat is carried along through the arteries and can be felt at the wrist, where it is called the pulse.

In the normal, healthy body, the blood pressure is normal. Certain abnormal conditions, particularly those affecting the heart, arteries and kidneys, cause an alteration in the blood pressure and it becomes normal.

An abnormal blood pressure is not a disease but is a symptom of some abnormal condition. It is a warning sign and the physical seeks for and treats the cause.

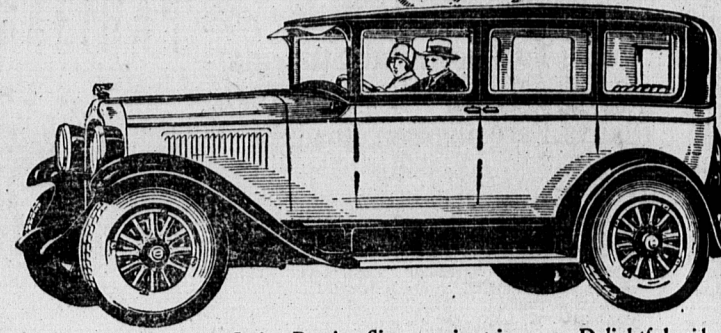

disregard of the needs of the body for exercise, rest, proper food and such things, throws a needless strain upon the whole system, and one symptom of this is frequently an increased blood pressure.

The family physician should be consulted regularly for advice as to how to live. The periodic health examination is not only for the purpose of discovering abnormal conditions, but also for receiving advice as to how to keep normal.

Questions concerning Health, addressed to the Canadian Medical Association, 184 College Street, Toronto, will be answered by letter. Questions as to diagnosis and treatment will not be answered.

IN MEMORIAM

DR. BARNARDO'S HOMES.

In the absence of the President, H.R.H. the Duke of York, Mr. Wm. McCall, Chairman of the Council, presided over the Annual General Business Meeting of Dr. Barnardo's Homes: National Incorporated Association today.

The Report showed that up to the 31st December last, 104,156 children had entered the Homes, 17,915 children and young people were dealt with during the year.

The new admissions in 1927 totalled 2,025, 1,648 being permanent admissions and 377 temporary. Nearly 80% of the children came from the Provinces and a little over 20% from the Metropolis. On an average 5 children come in daily. The children were admitted from almost every county in the Kingdom through the various Ever-Open Doors which are open for the reception of destitute children at any hour of the day or night. The average number of children in residence throughout the year was 7,716. Included in this large family were 1,203 babies and toddlers under 5; 422 crippled, invalid, blind, deaf and dumb, physically afflicted or sick children; 1,077 boys and girls were under industrial and technical instruction in workshops and work-rooms. 2,189 young people were placed out during the year. 29,661 had been migrated to Canada and Australia and the Overseas Dominions up to the end of 1927.

The Homes consist of 176 separate colleges, households and branches all over the Kingdom in addition to hundreds of boarding-out centres in rural districts.

The Charter of the Homes is "No Destitute Child Ever Refused Admission." There is no red tape; no waiting list; and no voting system. The need of the child is the only consideration. The Homes rescue the Nation's children, nurture, care for and train them, and give them back to the country as useful citizens, healthy patriotic and strong. In other words they are turning C. 3 children into A. 1 citizens.

The Home Secretary, presiding over a mass meeting of the House last year, speaking as one officially responsible for the inmates of the Industrial Schools and Reformatories of the land, said, "I am here today to say, and to say to the people of England at large, that there is no better way of decreasing my family and of keeping boys and girls out of the Reformatory and Industrial School than by supporting institutions like Dr. Barnardo's Homes. As Home Secretary, I thank God for Dr. Barnardo's Homes."

The income for the year from all sources, ordinary and special, amounted to £521,514 and the expenditure to £521,499.

Clydesdale Fillies and Stallions for Sale

A car load of choice imported Prize-Winning Clydesdale Fillies and three choice Clydesdale Stallions will arrive in Charlottetown about June 1st.

These Fillies and Stallions have been prominent Prize Winners in Scotland and at the Royal Show, Toronto.

Are you in the market for a good Filly or Stallion. Write me direct to Brampton, Ontario.
