## SHIP LABORERS FROM MONTREAL

To the Number of Three Hundred, Taken to St. John by C. P. R. to Load the Company's Ships—Both Parties Firm and men Orderly.

ST. JOHN, Nov. 27.—(Special.)—The Canadian Pacific Railway has completed contracts with three hundred Montreal laborers to work on the Company's ships in St. John during winter season replacing the striking longshoremen. One hundred will arrive tomorrow. There has been no disorder since the beginning of the strike, but both sides remain stubborn and conditions are unchanged.

There is much discussion as to the injury being done to the port and its trade, and several inward steamships with freight for St. John are being unloaded at Halifax where the laborers are willing to work for twenty-five cents an hour as against thirty-five demanded here.

NIAGARA FALLS, Ont., 24.—An ineffectual attempt was made at three o'clock this morning to burglarize the Traders Bank at Bridgeburg. Three men were engaged. Lights began to move in near by houses and the burglars, seeing the neighborhood was being aroused by the firing fled.

## WITNESS TOLD STORY, THEN DIED

MONTREAL, Nov. 24.—The final evidence in the Gallery election trial has been taken in the examination of the three sick witnesses, Charles Miron, John Gallery and Martin Fitzgerald, who were examined at their bedsides by Mr. F. J. Bisillon. K. G. A. sad feature of the case was that Chas. Miron died very shortly after his examination. Mr. Fitzgerald said he had been chairman of Mr. Gallery's Ottawa Street Committee, the most important committee in the election, and had employed from seventy-five to one hundred men, locating voters and distributing cards. He said he got \$1,500 from Mr. Gallery, and used all this except \$40 in paying the workers, or men for work on election day, and knew absolutely nothing about paying any carters.

## SAD DROWING AT ST. PETER'S ISLAND

William McRae, Son of the Late John McRae, Loses his Life by Upsetting of Boat.

News reached the city yesterday of a sad drowning accident at the east bar of St. Peter's Island on Saturday evening last, the victim being William McRae, sixteen year old son of John McRae, Canoe Cove. The young lad with his brother had been piling seaweed during the week and on Saturday afternoon went out shooting to secure birds for taxidermistic purposes. Shortly before dusk he shot a bird in the water and launching a small row boat he rowed out about 300 yards from the shore and it is supposed that in leaning over to pick up the bird, he capsized the boat. Daniel Taylor and J. Lund who were working in a field nearby heard his cry, and hastened to the rescue. They launched a boat, but before they reached the spot the unfortunate boy was not to be seen, only the upturned dory and his hat remaining. The body has not yet been found although considerable dragging has been done. There is a strong current at the place.

All the Russian Jews could not seek refuge in Canada but those who come here will receive a hearty welcome.

The contract was made on April 26, 1904, by Alfred S. Hayes, president of the company, and Flanders' employment was to begin on May 1, 1904. ## THRILLING ESCAPE OF I.C.R. EMPLOYEE

MONCTON, Nov. 28. Hazen Barnes, a shunter in west end of Moncton yard, lost four fingers of his left hand and had a most thrilling escape from being cut in two while at work last night. Barnes was engaged shunting box cars, and the car just ahead of the engine was passing him as he attempted to board it by catching the side rail as it passed. There was no rail on the car and the brakeman, losing his balance, fell between the cars. One hand fell across the rail and was instantly crushed by the car trucks. He was struck on the shoulder by the passing engine and his face scratched. A fellow brakeman, seeing his great peril, caught him by the feet and hauled him away from the train in time to save his life. Barnes' escape from death under the circumstances was miraculous and he was fortunate in getting off with the loss of his hand.

## ALLIED FLEETS READY FOR ACTION

LONDON, Nov. 25.—The commanders of the allied fleet at Pireus, held a further conference yesterday on board the Austrian cruiser St. George, as the result of which it is expected the fleet will sail today to seize the customs houses of the island of Mytilene.

Doubts are expressed as to whether in the event of the Sultan proving obstinate the combined fleets could establish an effective blockade of the Dardanelles. According to The Standard should the naval demonstration be disregarded the Powers will give Austria a mandate to take the necessary military steps for the carrying out of the proposed reforms.

## CONVICTS BATTLE WITH THE GUARDS

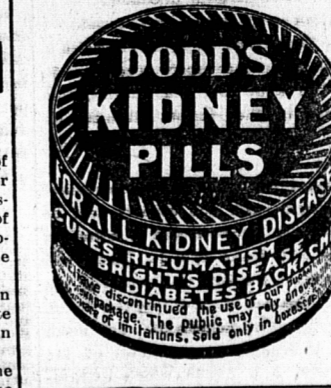

JEFFERSON CITY, Mo., Nov. 24.—Eight of the ten convicts at the State Penitentiary, suddenly mutinied tonight, and shot guards Barney Ellis and Chas. Clay, killing them instantly. The suddenness of the outbreak temporarily paralyzed the prison discipline, and before any attempt to subdue the convicts could be made, they had exploded dynamite under the prison gate leading out into the public street. Deputy Warden See fell mortally wounded by a bullet. The prison officials succeeded in preventing the escape of all but four of the convicts. These gained the street, sprang into a passing wagon, knocked the driver from the seat and then miraculously escaping a fusillade of bullets, lashed the horses into full speed through the residence portion of Jefferson City. Officers from the penitentiary armed with Winchester's pursued, and at the edge of town overtook them. A battle ensued, and three of the convicts were shot to death, the fourth escaping into the woods.

## THE TURBIN MAY HAVE EXPLODED

CLARK'S HARBOR, November 24.—Nothing further has been discovered concerning the fate of the steamer Turbin, which sank off Mud Island last Friday. No wreckage except that reported has been found. The weather this week has been mild as mid-summer. Small boats went out from the island two days and searched the spot where the disaster occurred but saw nothing by which to locate the wreck. The water in the vicinity is not more than twelve fathoms deep and the tops of the masts should be seen above the surface. In the opinion of some eye-witnesses on the island the steamer did not strike the shoal but foundered either in the heavy sea or as the result of an explosion. She seemed to be getting along all right when the hull was suddenly enveloped in a great cloud of steam, which looked at first like spray from a breaker. After that the ship was plainly unmanageable, and went down in less than five minutes.
