This column is reserved for news of local interest but advertising of a new nature may be inserted at a special word strictly payable in advance.

FLY HERE FROM QUEBEC—A Waco airplane, piloted by B. J. Terrier, arrived here Saturday from Rocks Inn, St. Jovite, Quebec. Mr. Terrier, accompanied by Charles Forbell, also of Gray Rocks Inn, expected to remain here for a few days.

POLICE WARN OF SNEAK THIEVES—Chief Birtwistle of the Charlottetown Police Department warned motorists not to leave parcels in unlocked cars. Sneak thieving was prevalent, he said, and people who left their possessions lying around unprotected were inviting trouble. Only yesterday afternoon a pair of boots and skates belonging to a young man from Montague were stolen from the cab of a parked truck.

GYROS HEAR ADDRESS—Lt. Col. Keith S. Rogers gave a very interesting and interesting address on "Radio Network Programmes" at the regular weekly meeting of the Gyro Club held last evening in the Canadian National Hotel. The thanks of the Club were conveyed to the speaker by the chairman, Mr. H.W. Pletch. It was announced that almost complete returns have been made by the Gyros of the result of the personal solicitation of business firms in the Christmas Seal Sale campaign, and it is expected to announce the final figure next week.

Mrs. Agnes Moore, Argyle Shore, is a patient in the City Hospital.

INQUIRES FOR PARTICULARS

Detroit Man Seeks Information As To Father's Whereabouts.

Daniel Leslie McLean of Detroit, Michigan, U. S. A., has written to Chief of Police Birtwistle requesting a copy of the original letter written the Chief by Mr. William Eugene McLean of Williamsville, Missouri, seeking trace of his relatives believed to be in this Province. The Detroit man told in his letter that he had seen the request of the Missouri man in a clipping from the Charlottetown Guardian.

Daniel Leslie McLean stated his father's name was Daniel Oscar McLean and that he had gone out west forty or fifty years ago. He had corresponded with his wife for some years and then his letters ceased and his wife believed that he was dead.

William Eugene McLean said in a letter to Chief Birtwistle last September that his father's name was Daniel Oscar McLean and was a native of Prince Edward Island, he believed. Extracts from his letter were published in the Guardian at that time.

Daniel Leslie McLean gave his address as 9542 Littlefield, Detroit, Michigan.

Answer Charges Of Conditions In West

(C. P. by Guardian's Special Wire) LONDON, Dec. 6.—Aroused by "scare" articles and letters in the British press about economic and social conditions in Western Canada, the office of the Canadian High Commissioner in London has taken active steps to counteract the spread of false information.

Articles appearing in several daily newspapers purporting to deal with the actual state of affairs on the Prairies. In these contributions the writers conjured up a picture of utter desolation and in some instances left an impression that the entire west had been reduced to an arid plain and its people numbered into indifference.

The charges were answered by the High Commissioner's Office in an article setting forth the true state of affairs, based on information supplied by the Department of Agriculture in Ottawa.

Report Missing Man Located Is Unfounded

A report yesterday that Edward McGuigan, 73-year-old Charlottetown resident, missing from his home since November 29, had been seen in the vicinity of St. Andrew's, was believed unfounded last night following investigation by Royal Canadian Mounted Police. Further investigation, however, will be carried out today.

A report that the missing man had been living in the vicinity of St. Andrew's on Wednesday, Thursday and Friday of last week was brought to the City by a man from the eastern section of the Province yesterday afternoon. His description did not correspond with that of the missing man, however, police said.

Meanwhile members of the Laborers' Protective Union who have been conducting grapping operations along the Charlottetown waterfront ceased activities, but will resume them today, it was learned.

McGuigan was married and had been employed with the Charlottetown sanitary department during the last summer. He left his home near the Canadian National Railway station November 29 with the intention of returning within a few hours.

Epidemic Was Worst In History

(C. P. by Guardian's Special Wire) TORONTO, Dec. 6.—Ontario's 1937 infantile paralysis epidemic was four times as great as that of any previous year, there being 2,531 cases, of which 106 were fatal up to Nov. 20, R. W. Hopper, executive secretary of the Ontario Society for crippled children, said today.

Half those affected showed signs of paralysis or muscular weakness. Nearly 900 people are still suffering from effects of the disease. There were 59 patients treated in "iron lungs" of whom 32 died. Eight cases recovered after such treatment and 17 are still receiving it.

DELIGHTFUL

(Continued from page 1)

Royal Courts of Europe, and in the lovely Chorale Preludes, he portrayed to them the noble sincerity and love of religious truth which is the very spirit of Bach.

In the second group the Tocatta of Schumann—one of his greatest works—was most competently played, as were the Chopin numbers which, though familiar and not perhaps the most important works of that composer, were much liked by the audience. Following these came the melodious and technically difficult Staccato Etude of Rubinstein, to which, it need scarcely be said, Mr. Stewart did full justice.

The third group, as will be seen, consisted mainly of shorter pieces in lighter vein. Of these, the most interesting, to this listener at least, was the Jeux d'Eau of Ravel, a contemporary French composer. The tonality used in the composition is that of Debussy, to whose style it may be said, that of Ravel, as is natural, bears a strong resemblance.

As encore numbers, Mr. Stewart played the very well known Ballade in A flat of Chopin, and at the end of the recital, in response to enthusiastic applause, two compositions by Liszt. The first of these, which was given by request was Liebestraum No. 3, and the second Rhapsodie Hongroise No. 15, which is based on the Rakoczy March.

Both of these latter pieces were played in a manner which brought out all that their composer had put into them—and more. Very few pianists could make them sound so well. If one had any doubts as to the technical equipment of Mr. Stewart these must have been set at rest by his playing of the Rhapsodie, which abounds in those bravura passages, scales, octaves, and other pyrotechnics so characteristic of Liszt. Mr. Stewart took them all easily in his stride, and brought the Rhapsodie to a thunderous and triumphant conclusion.

Truly a most delightful concert.

DIES IN FLORIDA

(A.P. by Guardian's Special Wire) WEST PALM BEACH, Fla., Dec. 6.—John W. Borden, brother of the late Sir Robert Borden, former Prime Minister of Canada, died at his home here today after a long illness. His age was 81.

Dr. MacMillan Speaks On Health And Delinquency

Rotarians yesterday had the pleasure of hearing Past President Dr. W. J. P. MacMillan who addressed on "Radio Network Programmes" at the regular weekly meeting of the Gyro Club held last evening in the Canadian National Hotel.

In his opening remarks Dr. MacMillan complimented the members of the Club on the way the annual Rotary Auction had been handled. The smooth working organization was a credit to those in charge and was the means of enabling the club to carry on the noble work of helping handicapped and crippled children. It is because of the work of the Rotary Club and other organizations that P. E. I. leads Canada in the work among crippled children. This phase of the health activities of the province is going ahead by leaps and bounds.

A graver problem facing not only the people of Prince Edward Island but humanity as a whole is Cancer. Millions of dollars have been placed by philanthropists and huge sums raised by subscriptions to carry on the fight but with little success. The distressing fact remains that the death rate by cancer is increasing the world over. If we could imagine the entire population of Prince Edward Island being wiped out in one year and a half times our population die as the result of cancer in United States alone we can get some idea of the extent of this dread disease in the world. Dr. MacMillan said that only three cures for cancer were recognized, surgery, deep X ray therapy, and radium. In present day practice usually a combination of two of these cures is used surgery and deep X ray therapy. Radium because of its expense and the uncertainty of its effect is not used as extensively as formerly. The education of the people in the symptoms and care of cancer is of vital importance and \$14,000 of the \$400,000 collected for the King George V Cancer Fund is being used for this purpose. Dr. MacMillan intimated that new methods of dealing with the cancer problem is being launched by a Lay Medical Association of the Provinces of Canada would soon be announced.

Great work was being accomplished in the battle with Tuberculosis due to newer methods of combating the disease. It is now realized that the only feasible way of dealing with the problem is by providing enough accommodation in sanatoriums to take care of all patients affected with the disease. Our present accommodation is for only sixty cases a year. All other Tubercular patients must be cared for in the home, and it is known that each of these persons communicates the disease to from 5 to 9 persons each year. The logical thing to do is to increase the size of the sanatorium to take care of all cases in the province. The expense thus incurred will in the end result in a saving due to the wiping out of this plague. Dr. MacMillan said he had talked the matter over with the Premier and a possible solution had been worked out whereby a cottage for the housing of doctors and nurses would leave room in the present building for twenty-five more beds. This would materially reduce the danger of infection from outside patients.

Dr. MacMillan next referred to a letter in the evening paper criticizing his remarks at the Children's Aid society. The writer expressed a gloomy view of the situation, and that the Judge of the Juvenile Court and Mr. Brynders had a better insight into conditions than he. The speaker said it was true that he had taken a gloomy view and said his society had only been a matter of twenty-five years during 16 of which he had been president. His statement that conditions today were worse than they had been 20 years ago was correct and he had the documentary evidence to prove it. He did not relish the idea of anyone inaccurately or hinting that he was playing politics. It was the opinion of the speaker that he was not so much interested in the Children's Aid as in getting a crack at the Medical profession and his connection with the different welfare organizations gave him first hand knowledge of conditions. More and more people are admitted to hospitals who are unable to pay for their care. It was his opinion that neither the government nor the City Council were responsible for unemployment conditions and he doubted if the question of unemployment will be solved by any government.

Dr. MacMillan congratulated Mayor Turner on the way the problem had been met under his regime and said His Worship had done more to alleviate the situation than any Mayor for many years.

Quoting from a press clipping Dr. MacMillan went on to show the tremendous increase in insanity in the Maritime Provinces and the methods suggested for its control. He had discussed the formation of a mental hospital for the Maritimes with delegates from the other two provinces and had received the

More and more people are admitted to hospitals who are unable to pay for their care. It was his opinion that neither the government nor the City Council were responsible for unemployment conditions and he doubted if the question of unemployment will be solved by any government.

Dr. MacMillan congratulated Mayor Turner on the way the problem had been met under his regime and said His Worship had done more to alleviate the situation than any Mayor for many years.

Quoting from a press clipping Dr. MacMillan went on to show the tremendous increase in insanity in the Maritime Provinces and the methods suggested for its control. He had discussed the formation of a mental hospital for the Maritimes with delegates from the other two provinces and had received the

Report Missing Man Located Is Unfounded

A report yesterday that Edward McGuigan, 73-year-old Charlottetown resident, missing from his home since November 29, had been seen in the vicinity of St. Andrew's, was believed unfounded last night following investigation by Royal Canadian Mounted Police. Further investigation, however, will be carried out today.

A report that the missing man had been living in the vicinity of St. Andrew's on Wednesday, Thursday and Friday of last week was brought to the City by a man from the eastern section of the Province yesterday afternoon. His description did not correspond with that of the missing man, however, police said.

Meanwhile members of the Laborers' Protective Union who have been conducting grapping operations along the Charlottetown waterfront ceased activities, but will resume them today, it was learned.

McGuigan was married and had been employed with the Charlottetown sanitary department during the last summer. He left his home near the Canadian National Railway station November 29 with the intention of returning within a few hours.

DELIGHTFUL

Royal Courts of Europe, and in the lovely Chorale Preludes, he portrayed to them the noble sincerity and love of religious truth which is the very spirit of Bach.

In the second group the Tocatta of Schumann—one of his greatest works—was most competently played, as were the Chopin numbers which, though familiar and not perhaps the most important works of that composer, were much liked by the audience. Following these came the melodious and technically difficult Staccato Etude of Rubinstein, to which, it need scarcely be said, Mr. Stewart did full justice.

The third group, as will be seen, consisted mainly of shorter pieces in lighter vein. Of these, the most interesting, to this listener at least, was the Jeux d'Eau of Ravel, a contemporary French composer. The tonality used in the composition is that of Debussy, to whose style it may be said, that of Ravel, as is natural, bears a strong resemblance.

As encore numbers, Mr. Stewart played the very well known Ballade in A flat of Chopin, and at the end of the recital, in response to enthusiastic applause, two compositions by Liszt. The first of these, which was given by request was Liebestraum No. 3, and the second Rhapsodie Hongroise No. 15, which is based on the Rakoczy March.

Both of these latter pieces were played in a manner which brought out all that their composer had put into them—and more. Very few pianists could make them sound so well. If one had any doubts as to the technical equipment of Mr. Stewart these must have been set at rest by his playing of the Rhapsodie, which abounds in those bravura passages, scales, octaves, and other pyrotechnics so characteristic of Liszt. Mr. Stewart took them all easily in his stride, and brought the Rhapsodie to a thunderous and triumphant conclusion.

Truly a most delightful concert.

DIES IN FLORIDA

(A.P. by Guardian's Special Wire) WEST PALM BEACH, Fla., Dec. 6.—John W. Borden, brother of the late Sir Robert Borden, former Prime Minister of Canada, died at his home here today after a long illness. His age was 81.

License Plate Collector Asks Police Aid

Unusual Request Received By Chief Birtwistle Of The City Police.

Chief of Police Archibald Birtwistle has received numerous letters from motorists all over the world requesting all kinds of information, but yesterday when he opened his mail he found an unusual one—from an automobile license number plate collector.

Said Anthony Shuplens of Fortescue Road, Newport, N. J., in his letter to the chief: "Would you be kind enough to aid me in a small matter? I am making a collection of old automobile license number plates from all over the world, and I am very anxious to add a few Prince Edward Island I have made several attempts to secure some, but no one will help me, and as a last resort, I am appealing to you for aid. I would like to get five or six P. E. I. license plates, each of a different year, any years, the older the better. Just so they are not rusty. If you can help me out, please drop me a card and tell me what years you have, and how much to send for the postage, and I will send you a post-money order at once. Please help me out sir, if you cannot get five or six, then two or three would be greatly appreciated."

"I have over 300 plates from 85 different places all over the world in my collection. Some are 1906 Chief Birtwistle located six old P. E. I. plates and believed he could round-up some more for the collection in a few days.

Dr. MacMillan Speaks On Health And Delinquency

Rotarians yesterday had the pleasure of hearing Past President Dr. W. J. P. MacMillan who addressed on "Radio Network Programmes" at the regular weekly meeting of the Gyro Club held last evening in the Canadian National Hotel.

In his opening remarks Dr. MacMillan complimented the members of the Club on the way the annual Rotary Auction had been handled. The smooth working organization was a credit to those in charge and was the means of enabling the club to carry on the noble work of helping handicapped and crippled children. It is because of the work of the Rotary Club and other organizations that P. E. I. leads Canada in the work among crippled children. This phase of the health activities of the province is going ahead by leaps and bounds.

A graver problem facing not only the people of Prince Edward Island but humanity as a whole is Cancer. Millions of dollars have been placed by philanthropists and huge sums raised by subscriptions to carry on the fight but with little success. The distressing fact remains that the death rate by cancer is increasing the world over. If we could imagine the entire population of Prince Edward Island being wiped out in one year and a half times our population die as the result of cancer in United States alone we can get some idea of the extent of this dread disease in the world. Dr. MacMillan said that only three cures for cancer were recognized, surgery, deep X ray therapy, and radium. In present day practice usually a combination of two of these cures is used surgery and deep X ray therapy. Radium because of its expense and the uncertainty of its effect is not used as extensively as formerly. The education of the people in the symptoms and care of cancer is of vital importance and \$14,000 of the \$400,000 collected for the King George V Cancer Fund is being used for this purpose. Dr. MacMillan intimated that new methods of dealing with the cancer problem is being launched by a Lay Medical Association of the Provinces of Canada would soon be announced.

Great work was being accomplished in the battle with Tuberculosis due to newer methods of combating the disease. It is now realized that the only feasible way of dealing with the problem is by providing enough accommodation in sanatoriums to take care of all patients affected with the disease. Our present accommodation is for only sixty cases a year. All other Tubercular patients must be cared for in the home, and it is known that each of these persons communicates the disease to from 5 to 9 persons each year. The logical thing to
