Moving Forward

(C. E. MacKenzie)

Now that the province of Prince Edward Island has been declared a disease-free area it is up to the farmer, the dairy man and the beef stock raiser to move forward.

There seems to be an aversion to buying aged proven bulls that I think should be over come. I recall one instance where a bull of one of our dairy breeds was offered at beef prices but was allowed to be shipped away for beef.

The low producer and the high producer require approximately the same feed for maintenance. For the extra feed, the one cow gives big returns, while the other one is a boarder.

Loose Tile.

Loose Tile.

If a tile or two falls out of the bathroom wall, just coat the back with the best quality liquid glue. Press it in place, hold it until the glue hardens, and it will then be there for keeps.

Victor: "Ah dear friend, thinking of your sad past?" Convoit: "No, I was wondering what paper I'd write my experiences from when I get home."

Radio Programs

SATURDAY, MARCH 13

International Radio Programs

ETHER'S WHITE-CAPS

- 8.30 WTIC (476) Hartford—Rotary Club Boys' Band Concert.

Where the Roads Divide ALL ROADS ARE OPEN TO THE FEET OF YOUTH.

There are the roads of Self-Indulgence -- of spendthrift Prodigality -- of wasteful Extravagance. There is the road of Thrift and Wise Expenditure.

If you would know where these roads lead, look at the men who have travelled them, and consider that every old man was a young man once--filled with the same hopes and aspirations as you are today.

The farther and faster you travel on the wrong road, the farther you will be from your goal.

Life Insurance will keep you on the right road--because Life Insurance encourages thrift and conservation.

Let the Life Insurance representative show you how easy is the pathway to ultimate success.

Life Insurance Service

"The Love that Never Dies"

In Memoriam

CALVIN HOLM

There passed away at the home of his nephew, Ernest C. Holm, De-sable on Feb. 18th, 1926, Calvin Holm aged 68 years the deceased was the youngest son of the late Colin T. Holm. Some forty-five years ago he went to the United States where he resided for about eighteen years visiting his old home at different periods he then joined in the great rush to the Klondike goldfields in eighteen and with his friends around him he peacefully passed to his eternal rest the deceased was of a genial and friendly disposition and made friends wherever he went and enjoyed meeting the old friends around home. The funeral service on Feb 20th was conducted by the Rev. Geo. F. Sears, minister of the Church of Canada who also visited him during his illness. His remains were then laid to rest in the Argyll cemetery beside his wife Annie Ferguson who predeceased him thirty-seven years ago. There are left to mourn one daughter Mrs. Annie McDonald residing in Cornwall P. E. I. and one brother, Kenneth C. Holm, residing in Victoria. E. H. L. The pallbearers were three brothers-in-law namely: John Allan and Neil Ferguson, one nephew Ernest C. Holm and Thomas Cameron and Douglas McKinnon. (Patriot please copy)

Scientific Miscellany

An inventor has patented a light metal stand to hold a garbage pail off the ground. Australia's beam wireless stations will be completed in time for direct communication with reciprocating stations in June. Tests by experts seem to have shown that bees are color blind and they find their way about by experience rather than by instinct. When built a railway planned for Palestine will be the final link in an all rail route from Calais to Cairo by way of Constantinople. Operated by hand power, a new floor scraping and sanding machine is claimed to enable one man to do the work of six using ordinary tools. A special paint, applied with a sprayer about the size of a fountain pen, has been developed in France for covering scratches on automobiles. A portable saw mill has been given a shape that enables it to be hauled about as a trailer of the automobile that furnishes the power to operate it. A former English officer has invented pads of woven material that can be inserted in horses' hoofs without tools to prevent them slipping even on ice. Operated by a motor of one horsepower, a rack has been designed on which automobiles can be run and raised at an angle to facilitate working under them. The Argentine government has reserved the entire province of Santa Fe as a fiscal petroleum zone pending decision on the exploitation of its deposits. An Ohio man has invented a machine that makes slabs of opaque glass for building houses at less cost than with lumber by screwing them to wooden frames. One of the larger German airplanes companies carried more than 30,000 passengers last year with only one death, one severe injury and five lighter injuries. Engineers have worked out plans for steel braced concrete road-beds and roller turning equipment to enable trains to be operated at the speed of airplanes. Steel spurs are made for game cocks in many countries by an Ohio man from metal imported by a secret process that he discovered many years ago while a blacksmith. Air forced by an electric blower through 58 openings produces sound in a new French musical instrument that simulates tones of the violin, viola and cello. Steam and motor tonnage of the world's shipping has increased 16, 271, 000 tons since 1924 and it is estimated that 2,000,000 tons of new vessels are under construction. In New Zealand engineers are planning to obtain gold from the bed of a river by stopping the flow of the stream at its source by a dam and gates several months in each year. Government figures show that dust explosions and the fires they caused killed 45 persons and injured 28 in the United States in 1925 and caused property losses of \$3,000,000. Although the manufacture of artificial silk is increasing rapidly in Italy no wood has been found to yield the cellulose required and most of it is imported from Sweden. To prevent rain or snow reaching automobile windshields and keep sun glare from drivers' eyes an inventor has designed a set of bars to be mounted horizontally below windshield visors. Automatically operated by electricity, a highway crossing gate invented by a Wisconsin man drops into place from overhead supports when a train approaches and rises after the train passes. An automatic safety coupler has been invented for mine cars. More than one fifth of the area of Norway is covered by forests. Making tough steaks tender is the purpose of a new hollow mallet. About 90 per cent of Australia's coal is mined in New South Wales. For cleaning brushes of many kinds a small metal rake has been invented.
