For this reason, even the most simple stomach ailments should be given prompt and careful attention. So, don't neglect acid stomach, sourness, gas or bloating! And don't waste time with unknown or unreliable treatments. At the very first signs of distress, go to any good drug store and obtain a few cents' worth of pure Bismarck Compound. This special Magnesia Compound is safe and pleasant to take—quickly, almost instantly effective and does not act as a laxative. Be sure and ask for BISURATED Magnesia for stomach troubles only.

The Bread of Health

Why is HOVIS the "Bread of Health"?

What is the Secret of the HOVIS Flavor?

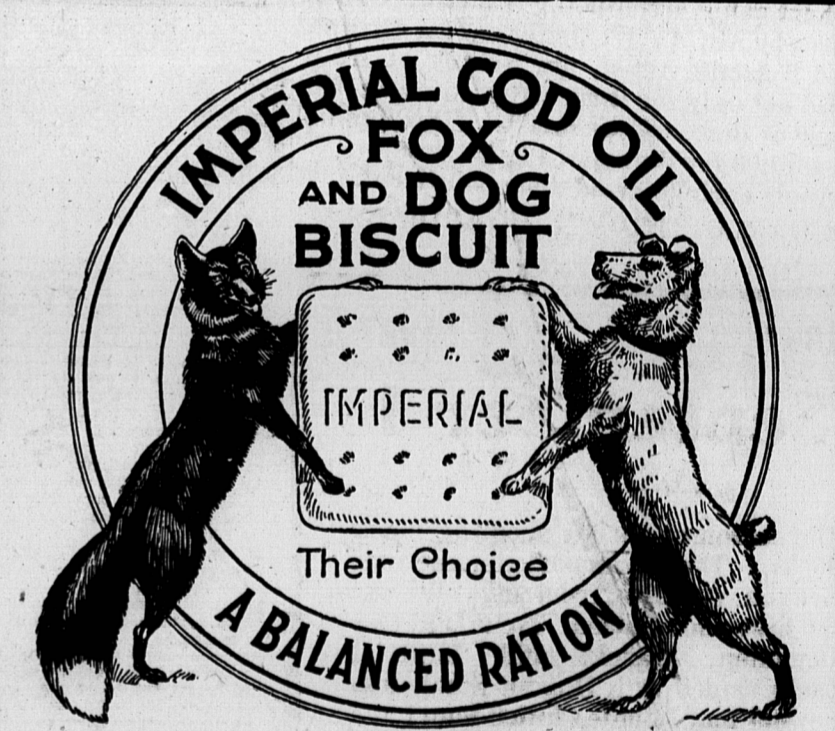

IT'S the Flour that makes the difference. No other bread flour is milled in quite the same way as HOVIS. For it contains a large proportion of wheat germ, which is the most nutritious part of the wheat grain. The result is that HOVIS Bread, baked by leading Canadian bakers, contains those precious, health-giving vitamins and more of the true nutriment of the wheat. That's why HOVIS Bread—"the bread of health"—is so different and so much better for you.

BETTER ingredients always make better bread. But there is one particular ingredient present in such abundance in HOVIS Bread as to give it a value no other bread possesses. That ingredient is the wheat germ, scientifically combined in HOVIS Flour. You have only to taste HOVIS Bread once, to realize the difference this makes! And you are certain to enjoy it—just as thousands of others do. Costs a little more—worth much more.

Why the name HOVIS? It is coined from the two Latin words "Hominis Vis" and means "The Strength of Man"

HOVIS Flour is made by the millers of PURITY FLOUR—trade-mark protected. A product of WESTERN CANADA FLOUR MILLS CO. LIMITED, Toronto, Montreal, Ottawa, Saint John, Winnipeg, Calgary, Victoria. Ask Your Baker or Grocer for Hovis Today

FLOWER SACHETS The latest sachets are flower leaves crushed and dried, then lightly spiced, to which a dash of sachet powder is added. This mixture is then inclosed in net bags which have been lined with a thin scrim and tied about the top with satin ribbons. These make the most attractive and the sweetest sachets to tuck into and come off at the slightest touch. The porcupine does not shoot its quills at an enemy. It makes them stand out like the fur on a cat's tail. A Copper as hard as steel was made by the Aztecs of Mexico thousands of years ago.
